NATIONAL ASSOCIATION OF HISPANIC PUBLICATIONS

House, an 85-year-old community settlement house on the predominantly Hispanic near-northwest side. "My wife is Mexican. Her father hated Puerto Ricans."

His wife and her three sisters married Puerto Ricans, Mr. Del Valle says, "because we grew up in the same neighborhood. To me it didn't matter that she was Mexican," he says, noting his eldest son calls himself a Latino.

The attitude of Mr. Del Valle's son reveals one of the screwballs thrown at marketers by U.S. Hispanics. Not only must the market be considered horizontally—by nationality—but also vertically—by generation. The number of generations in the U.S. is as important in shaping the psychographic portrait as national origins.

"In 1970 there were 160,000 Hispanics here under 20," Mr. Triana says. "Most of those kids now have their own families, and most of them went through school here, meaning that for the most part they are English-dominant. They speak Spanish, but are likely to feel more comfortable in English for long conversations." This English-dominant group will increase in number and purchasing power faster than all the Spanish-dominant groups will increase through immigration, he says.

"In eight to ten years you're going to have equal numbers of Spanish-dominant and English-dominant Hispanics," Mr. Triana says. "The English-dominants will sit at a substantially higher socioeconomic level than the Spanish-dominants. They will be better educated, and they will tend to work in white-collar jobs and have incomes around the U.S. median."

Despite the trend toward crossculturalization, "you shouldn't confuse the melting pot with the mosaic," says Gorki Tellez, publisher, *El Manana Daily*. "If you were to mix everything together you'd have nothing left in the pot except something that tastes awful. This is a unique group—the subcultures are keeping their identities."

Although unity and respect among the groups is at its highest point, he says, the stores in the predominantly Mexican Little Village neighborhood carry Mexican goods, while in Humboldt Park the shops carry Puerto Rican products.

The roots of those preferences are deep. "We came to this country brainwashed," he says. Rosanna Stoll, president of Metrica Marketing Group, a locally based research company, says, "Hispanics come to this country with brand preferences developed at their country of origin."

As the number of second and third generation Hispanic-Hispanics increases, however, advertising in the U.S. will take on greater importance. "The first time I saw a McDonald's commercial in Spanish on Chicago tv, I got really excited," Mr. Del Valle says. "It was reaching out to us, telling me, 'I know you're out there. You're an important enough part of the society for me to be advertising to you.' "

Similarly, the recent commercial success of the singing group Menudo serves notice that the young Hispanic market is barely containing its urge to explode in every direction. The trick, of course, is how to explode with it.

According to Mr. Triana, the Yankelovich, Skelly & White survey "Spanish USA, 1984" was contradictory. "On one side, Yankelovich showed that Hispanics are more likely than the general population to be brand loyal. On the other hand, it also showed that Hispanics indicated a greater likelihood of trying new products, new stores, new things."

He says this indicates "Hispanics are initially more volatile, then later more loyal to particular products. That is, until brand loyalty is established, they are more likely to try new things." The conclusion, Mr. Triana says, is that it makes sense to develop that loyalty early.

One thing that makes the Hispanic market different from the mainstream market is that advertising alone is not enough to establish wide and deep brand loyalty. To be effective, "advertising must be supplemented by

COVER
YOUR
BEHIND

Because you know the times we are in. Tough. Sudden. Demanding.

The kind which force you to roll up your sleeves. Work. Sweat. Bleed. Scrutinize. And all of the above.

That is why these are the times to really know your business. Your weaknesses. Your strengths. Your competition's pluses and minuses. Your competitive edge.

Which brings us to an edge you may have not thought about taking advantage of. Hispanics. They are the force of the eighties. And now is the time to go after them.

But not just any old way, mind you. You must go after them with know-how. Experience. Creativity. Marketing discipline. Expertise. And our task-force approach.

You see, we are not just one more advertising agency. There are plenty of those around. We are simply one of a kind.

So unique, in fact, that we have become the fastest growing agency in the largest —most sophisticated— US Hispanic Market: Puerto Rico.

And now we are ready to reach other Hispanics up North; In the Continental United States. Just keep an eye and an ear open for the advertising of The Great American Shoe Store in the Hispanic communities of California, Texas and Florida. It will bear our mark.

And there you have us. On the move. If you are interested in learning more about us, and about how we can help you, give us a call. It is time you learn what our clients have known all along. We give what others just offer. The best. Always.

These times demand nothing less.

Chicago

(Continued from Page 37)

a vigorous program of promotional special events that put the product or service into the community through human representatives," Mr. Loza says. "This is an important point because it speaks directly to the fundamental Hispanic need to develop trust toward particular products and services." He often recommends companies participate directly in community events.

Illinois Bell has considerable expertise in penetrating the Chicago Hispanic market. "We were early among Chicago business to recognize the potential in this market place and just the plain size of the demographic equation," assistant vp Fredric J. Felton says.

The reasoning was simple, he says. "It was a marketing effort that says, 'When you've lost a customer, replace him.'" Older ethnic groups were moving out of the city, and Hispanics were moving in. Illinois Bell wanted their business.

"In 1970 we entered into a constructive dialog with two dozen or more community leaders," Mr. Felton says. "Our interest was in sales. Theirs was in jobs and the two translated perfectly because we needed people who understood the marketplace. It was important for us to add Hispanics to our payroll.

There is really no trick to winning the Hispanic marketing wars. "Once you win a Hispanic's heart, you've got him," Mr. Del Valle says. "And it really doesn't take all that much to win their hearts—just simply showing concern for Hispanic advancement."

Those two words sum up the fundamental concern of Chicago's distinct nationality groups and its growing population of Hispanic-Americans. Hispanic advancement is a uniting theme, and it is very likely to become a rallying cry for the growing number of second and third generation Hispanic-Hispanics—even as they make the transition to more mainstream consumer spending patterns.

All of which seems to indicate Chicago is destined to play a major part in the future of the national American Hispanic market; sort of an "as Chicago goes, so goes the nation."

According to Mr. Loza, the good news for those who want to audition for the role of Hispanic Chicago's suitor is that "You don't have to create elaborate, expensive spots to be successful. You don't even need to wear a *sombrero* or poncho to be welcome. Just come in genuinely."

Bay Area

(Continued from Page 15)

per capita incomes among such markets and one predicted to include greater economic growth.

Covering 11 counties and ranked sixth in the nation in Hispanic population with 717,200, according to Strategy Research Corp., Miami, the San Francisco area of dominant influence does not have a centralized Hispanic community.

The greatest influence on the Hispanic market personality of the San Francisco Bay Area is the influx in the past five years of Central and South American political and economic refugees, attracted by the mild climate and economic and cultural opportunities.

The Mission District is nestled in the narrow warm belt of San Francisco. Ten years ago, it existed like an island, a little chunk of Mexico located only a 12-hour drive from Baja, Cal. But the ethnic composition of this neighborhood has been reworked.

Many small "Mexitessens" are located along Mission St., the main drag of the district. Most are small, family-owned shops supplying the ingredients for many Mexican specialties: Fresh corn husks for tamales, handmade tortillas and Mexican-style sausages. But now the aisles include banana leaves for Nicaraguan-style tamales and beans for a popular El Salvadoran dish.

In barely five years, much of the Mexican population has left San Franciso and been replaced by Central and South American refugees, the professional people who made up the middle class of Nicaragua, El Salvador, Chile, and other politically hot nations.

"Certainly there are also 'economic' refugees," says Emilio Nicolas Jr., vp-general manager, KDTV, San Francisco, a SIN International Network affiliate. "But to a large extent, the refugees that settled in the Mission felt politically threatened by their economic status, education or political affiliation."

Because Spanish was the day-to-day language of the Mission, it was natural for the immigrants to settle in this neighborhood of pleasant weather, Spanish-language newsstands and theaters.

"San Francisco really has been the brain drain of Central America," Mr. Nicolas says. "It was the educated and politically involved people that had to flee." Many others came as well, he says, although this key group will have the greatest effect on income and buying. Mr. Nicolas also predicts per capita income will increase steadily during the next five years as this group becomes proficient enough in English to pursue their professions.

"It does appear that the Central and South Americans coming into this area are making it their home," he says. "They don't see much chance of returning to their native countries in the near future." Their children—born and raised in the U.S.—will add to this Hispanic market. They will be very American, but they will have strong cultural ties to their parents' homeland.

Carlos has been in the U.S. for almost 20 years, a Chilean political refugee who brought his young wife here to start a new life. His sons, Manuel, 13, and Juan, 17, were born in the U.S. and have never been to their parents' homeland.

Every year, the Chilean community gathers for a soccer game, dance and barbecue. The gathering was a family treat when the boys were younger. But during the past few years, it has become a family relations land mine. Embarrassed about the gathering's "hick" appearance, Juan began to balk at having to attend the ethnic affair.

He attended the celebration grudgingly when he was 15, but refused to go the next year. His father says he resented the "put down" of the family roots. Juan says he just wanted to be the same as his friends at school.

When he was 17, Juan went to the celebration. He met some girls and chummed around with some boys his age. He says he is looking forward to the party next year.

Carlos is still resentful that his son's life does not have a more Chilean focus, but Juan has become one of the emerging class of Hispanics. Juan is very Americanized in his buying tastes and habits. But he has a sense of pride in his heritage. For him, Spanish provides the connection to his parents and his Hispanic peers.

"The Bay Area is a perfect example of what the Hispanic market is," says Eduardo Gregg Patoni, president, Inter-American Advertising. "The nationalities included in 'Hispanic' are many: Mexican, Nicaraguan, Salvadoran, Argentine. There are some cultural differences, but they're really pretty minor compared to the common language that ties them together as a single market."

Bay Area Hispanic advertising and media executives say using Spanish makes any advertising work in the Hispanic market. It is the great common denominator, even in this diverse market.

Mirella-Olivia is 2 weeks old. Her mother, Janet, is an Anglo and her father, Lionel, is a Mexican who arrived in San Francisco about 10 years ago. They've been married for five years and Mirella-Olivia is their first child.

Lionel spoke virtually no English when he arrived in the U.S., but he has worked hard to learn it and has a responsible position at a flower nursery in the East Bay community of San Pablo. Janet, a native of the Bay Area, has a well-paying job as a postal worker.

Their friends are both Hispanic and Anglo, but Spanish is spoken at home. Janet and Lionel discussed speaking in English so Lionel would develop a better command of the language, but decided his English is adequate and using Spanish was more relaxing.

When Janet returns to work in three months, they have decided to send Mirella-Olivia to a day-care center that has Spanish as the primary language. They say their Hispanic friends' children who learn English first tend to be withdrawn and shy about using Spanish. But the children who learn Spanish first seem to pick up English quickly from tv, friends and family. Mirella-Olivia will grow and develop as an Hispanic; not Mexican, but not Anglo.

The largest concentration of Bay Area Hispanics—260,300 people, according to Strategy Research—is in Santa Clara County, the heart of Silicon Valley. Mexicans coming across the border 10 years ago would have headed to the region for harvesting jobs. As the computer industry boomed, agricultural jobs became factory jobs manufacturing silicon chips and computer casings.

The ethic to acquire land is part of the Mexican-American culture because the people of the land—farmers, field workers and those from small villages—were the ones who had come to seek their fortune in the U.S., according to Mr. Patoni. "The people who had money in Mexico have stayed," he says. "The Mexicans who came to the United States were looking for a better life and willing to work hard to get it."

Buying a house, acquiring major appliances, nice furniture and other accoutrements of U.S. middle-class living are some of the primary goals of these new Americans, he says.

"Latins are very status conscious in expressing the 'big' and the 'marvelous,'" he says. "They have a saying, '*Solo Dio y los Gringos*,' which means only God and the Gringos have it. They're looking for some of the good stuff in life. That's why you'll find they almost always buy name brands and consider discount products inferior."

Jose—an example of Mr. Patoni's analysis—crossed the border five years ago as a 17-year-old undocumented alien from a poor family in a small town in the state of Michoacan, Mexico. He and a friend crossed the border at night, a grand adventure. They had dreams of working the harvests and getting enough money to buy a car, taking it back to show the other boys in their hometown.

Jose had relatives in the San Francisco area, so when he crossed into the U.S., he called them and they sent money to make his way to the Bay Area. In the five years since that phone call, he's changed from a naive country boy, who had to

be taught to use silverware instead of scooping up food with a tortilla, to a married man with a steady job and two children.

Jose and his wife purchased a small home with some financial help from relatives, and Jose sends money back to his family in Mexico. He has become a legal citizen since marrying his Chicano wife and plans on staying in the U.S. His children will grow up in a very Mexican-oriented home, but they will go to American schools and will grow up as young Americans.

Although San Francisco is ranked sixth in total Hispanic population, it is ranked fifth in the number of households. According to the San Francisco Business Council, annual family income in the San Francisco Hispanic market is $23,400—$5,600 more than the U.S. Hispanic average and $2,100 less than the U.S. average.

"Because often both the husband and wife work and children also may be contributing to household income there tends to be more financial stability in the household economy," Mr. Patoni says.

Like most of the other major Hispanic markets, the San Francisco population is young—68.5% are younger than 35, 36.5% are younger than 18 and 25% are 11 years or younger. "Money is really spent on kids for clothes and toys," KDTV's Mr. Nicolas says. "They want the best for their kids because life often revolves around home and family."

However, according to Tony Salazar, senior account exec for KOFY-AM in Santa Clara, changes are occurring. "We're seeing an increase in the number of women heads of households," he says. "Although the Catholic church still is a very strong influence on the entire Latin culture, it does not have as strong a hold on the community. The divorce rate may not have increased drastically, but it seems to be an increasing trend."

As cultural changes occur, cultural clashes are inevitable. Within the past decade, Mexican-Americans have taken greater pride in their roots and developed an identity as Chicanos. But this is an identity newer immigrants don't always understand or appreciate.

Miguel, a young Chicano lawyer who grew up in the San Francisco Bay Area and is practicing in Bakersfield, is caught between the cultures. His mother was politically active, and Miguel's dream always had been to be a lawyer.

He now works with low-income Hispanics as clients, but his Spanish is almost nonexistent. It has made it difficult to help them and gain their trust.

"You had to feel sorry for the Mexican-Americans," Mr. Patoni says. "They weren't really accepted by Anglos or Mexicans. For a long time they just wanted to fit in. But one of the important things that has happened is that now it's okay to be Chicano.

"Latins are a very proud people," he says. "That is deep in the culture . . . ."

The San Francisco Hispanic market is a puzzle—an apparently lucrative puzzle. Its diversity and geography tend to make marketers wary. But it also is establishing itself as potentially one of the most profitable Hispanic markets.

The next five years, according to local experts, should see substantial growth. As political problems in Central and South America continue, refugees will flow across the borders to friends and relatives. With them will come greater acquisitions, making the San Francisco Hispanic market a puzzle worth solving. ■

Houston

(Continued from Page 15)

lented investigator. The figures run from a low of 300,000 Hispanics to a high of nearly 1 million.

Strategy Research Corp., Miami, places the population of the Houston area of dominant influence at 3.5 million, of which 611,300 are Hispanic. The company says 464,800 Hispanics live in Harris County alone. Arturo Sanchez, director-pr and promotions for KLAT-AM, the No. 1 rated local Hispanic radio station, says all figures are soft because of the number of undocumented Hispanics.

Regardless of the total figures, Houston Hispanics have gone far beyond the barrios, says Richard Jaffe, president of Telesurveys of Texas, Houston. "The barrio image is a false image here in Houston."

Telesurveys of Texas surveyed Houston's Mexican and Mexican-American population, which Mr. Jaffe says makes up 90% of the local Hispanic market. "Eighty per cent of the census tracts here are at least 5% Hispanic. Hispanics are in black areas and white areas. An insulated or isolated society, it is not," he says.

The result of this mingling, according to Rosie Zamora-Cope, vp of Telesurveys of Texas, has been greater integration in school systems and more intermarriage—30% of Houston Hispanics have married non-Hispanics. "So there is more acculturation," she says. "But you also have new arrivals all the time," so Houston has both old and new world Hispanics.

"Formerly all-white areas now have Hispanic shops in them," she says. "Apartment complexes that had been all-white, high-income buildings now have a lot of brown faces."

Mr. Jaffe says that "emotionally Anglos find it easier to absorb Hispanics into their society than blacks. There's no history of violence the way there is with blacks from the '60s. Also the culture is so inculcated—Anglos have always gone to Mexican restaurants." The only real concern whites have is that the number of Hispanics in the school system will cause a serious tax drain, he says.

Tacho Mindiola, a University of Houston professor, says the

Houston

(Continued from Page 39)

influx of Mexican immigrants gives residents a sense of vitality.

Mr. Jaffe says that without the undocumented, Houston would be poorer. "The undocumented have stimulated new jobs and industries. Despite an influx of immigrants, our unemployment figure is down one percentage point from last year to 7.4%. The undocumented and documented are able to enter the labor force rather effectively. They are also creating a middle class among Mexican-Americans and blacks," he says. The undocumented come in at the bottom of the employment ladder, pushing others up.

Although a portion of Houston's undocumented community has left because of the city's oil-related downturn, the city's proximity to the Mexican border makes it an attractive destination for Mexicans and an increasingly large number of Central and South Americans.

El Salvadoran residents now number between 30,000 and 50,000, Mr. Sanchez says. A small community of Cubans, estimated at 10,000 to 20,000 people, and another community of 12,000 Central and South Americans, fill out the local Hispanic population, he says.

The Cuban immigrants and some South Americans tend to work in white-collar jobs. "The Mexicans coming up are blue collar," Mr. Jaffe says, "and the Salvadorans are a mixed bag depending on who they're fleeing—the left or the right."

Because the Salvadorans, Guatemalans and Colombians are "more divorced from their lands," these people are adopting the Mexican-American culture, he says.

Mr. Jaffe says economic and social problems guarantee growth even if stricter immigration restrictions were approved. Already one out of every three students in the Houston public schools is Hispanic. Within 10 years the majority of the students will be Hispanic, and Mr. Jaffe says half of Harris County will be Hispanic in 30 to 35 years.

"The fertility rate among Mexican-Americans is much higher than among whites or blacks," Mr. Jaffe says. "Children are a survival mechanism: If you have kids, they'll support you. Until they become middle class, Hispanics are going to keep having children."

The Houston Hispanic community is an attractive market because of the age of the population, Mr. Mindiola says. More than 40% of the Houston Hispanic community is younger than 18 while 73.5% is younger than 35.

Local Hispanics' income and educational levels are higher than local blacks', but they are lower than that of Anglos. More than 40% of Houston area Hispanic heads of households are high school graduates, while 20% are college graduates. Strategy Research placed the 1980 average annual family income at $13,500. A smaller study done by Mr. Mindiola in 1982 found the average to be only slightly higher.

Although Strategy Research found that two-thirds of Houston Hispanic households have at least one credit card, Mr. Jaffe says only 35% of the Hispanic-Americans have checking accounts—a sharp contrast with the 90% of the total community. Only 6% of the undocumented have checking accounts, he says.

"With half the population being undocumented or registered-documented, they are always worried about what is going to happen," Mr. Jaffe says. The undocumented live "at the whim of the government," he says, making them unlikely to open checking or savings accounts and providing a healthy money order business.

But even the documented and Hispanic-Americans have not been reached by the financial services institutions. They are still strong believers in the cash transaction, he says. Houston Hispanic leaders say the lack of a relationship with the financial community is a detriment to increasing economic clout both as consumers and in business.

But lack of financial savvy has not kept 75% of the area's Hispanic families from owning their homes. One reason for the emphasis on home buying is the Hispanic's first priority—his family. The family orientation accounts for a lower divorce rate, fewer mental health problems and fewer problems with the law, Mr. Jaffe says.

Spanish is the bond between generations and Hispanic-Americans and new immigrants. ["Advertisers] have to understand that 44% of Houston Hispanics speak Spanish all of the time as a family language," Mr. Jaffe says. "Over 85% speak Spanish most or some of the time." This requires a new sophistication and adaptation to bilingualism, he says. "Businesses here are becoming more bilingual. The stores recognize there has to be a Hispanic flavor."

Fiesta Mart, a grocery store that opened several years ago in the heart of the city's north side barrio, found success hinged on promoting the Hispanic flavor. The store not only stocked nearly every item that Hispanics could ever want, it overstocked them. Store officials capitalized on the Hispanic trait of seeing abundant stock as an invitation to buy without fear of depleting the items for anyone else.

Politically, the Harris County Hispanic tends to be a Democrat but with a mixed stand on issues. On abortion, they are conservative, but on civil rights they are liberal, Mr. Mindiola says. He says the Republicans are making inroads into the upper and middle-class.

Hispanics believe they have no influence and that the political system is not responsive to their needs, says Mr. Mindiola, who conducted a political survey of a large Houston barrio. As a result, Hispanics are registered in smaller numbers than the community at large. Mr. Jaffe says that to vote in an American election would be to break their bond to Mexico.

Should they become registered, they would have increasing clout both as voters and buyers. But even if they remain undocumented, Hispanics will continue to shape the city in their image, adding Hispanic tiles to the city's cultural and economic mosaic. ■

Brownsville

(Continued from Page 16)

spite this, the people who inhabit what has been described as America's Third World survive on several cultural, economic and educational levels.

• **The Day Laborer:** A tv cameraman spotted an extreme case; two families seeking shelter from a winter freeze in a three-room shack with no heat, no water, one bare bulb suspended from the ceiling, swaying in the draft. The parents and eight children ranging in age from 2 to 10 years—with another on the way—stood without shoes or coats.

These new arrivals to the Hispanic Ellis Island probably will become low-paid day laborers, joining the 22% of the valley's population living at the poverty line or the 28% living below it, according to the Industrial Areas Foundation. These Spanish-speaking immigrants were victims of bureaucratic red tape. They don't qualify for food stamps because their papers aren't in order; a lawyer will straighten them out for $200.

The children don't speak English either, but they are of school age. The Supreme Court ruled they have to be admitted to school, but should they be taught in Spanish or the official language of their new country, a language they don't understand?

Immigrants continue to stream across the river primarily because conditions are worse in Mexico. Families such as these are the reason the valley's median age is 18, the average yearly income is $7,000 and educational levels are sixth grade, according to the South Texas Institute.

If this seems bleak, consider that the situation largely has improved: In 1970, the average annual income was $3,000 and the educational level was third grade. However, institute director Antonio Noe Zavaleta says the median age could dip to 16 years by 1990.

The day laborer's household and financial affairs usually are administered to by his wife. She will fill out the countless welfare forms, make the major purchases, raise the family and respond to efforts to organize the community.

Because of the day laborer's living conditions, the Catholic Diocese of Brownsville invited the IAF to try to organize this segment of the valley. "The only reason we're helping them is because no one else will—not the chamber of commerce, not the lawyers, not the developers," Bishop John Fitzpatrick says.

The day laborer spends nearly all his income on rent, food and clothing, usually at the neighborhood *tendajo* where credit is available. His favorite media is radio—music cheers him up and reminds him of home.

• **The Border Rat:** Julio grew up in the valley and will remain here until he dies. He is a border rat. He admits it. No, he proclaims it. Joe is one too, although he isn't quite as vocal about it.

Both completed Catholic high school and attended college. Every spring Joe tapes a 1040 tax form to his father's downtown office window and waits for the W-2s to walk in. It takes him about 15 minutes to complete a tax form while the customer waits. Presto, $10.

He won't keep it long, though; his children always need something. Joe blew his stack the other day when he found out his wife took their sons to the mall for haircuts at $12 each. His barber across the border in Matamoros charges 300 pesos, but he gives him $2 and let's him keep the change.

Joe considered moving to Houston with his brothers, but never got around to it. Although he is bilingual, his children don't speak Spanish and he hasn't bothered to teach them. "If they want to speak it," he says, "they'll learn it themselves."

Julio knows what it's like to be unemployed in the valley. The last time he got fired he went into his room and "didn't come out for a year," he says. His family supported him—they had to. They wanted him to be a po-

liceman, but after he got out of the Marines he didn't want to wear another uniform.

His father went bankrupt when Mexican banks confiscated U.S. dollars in savings accounts. The sign above his father's junkyard was knocked down during the last hurricane and hasn't been replaced. His uncle owns a sister yard in Mexico, and his relatives are close to local politicians. "You need connections like those to do business," he says.

Julio's philosophy—"there's a racket in everything"—makes him a shrewd and wary buyer, serving him well in the poverty-stricken valley, where a large underground economy exists. He wears Topsiders and tasteful, expensive jewelry.

The border rats account for 10% of the population, according to South Texas Institute estimates, and represent the new middle-class valley Hispanic. Earning between $20,000 and $40,000 a year, they are as bright and capable as their Anglo counterparts, having been given access to about the same education. They feel stifled by one thing: Lack of advancement. "You're never going to get anywhere down here," Joe says.

Politically, they differ just slightly. Joe disdains national and statewide politicians, who trek here every four years promising change in return for votes. His interest in politics is purely parochial. Julio is more radical on national issues as they involve "Chicanos," saying the deck is stacked against them.

- **The Infrastructure:** Representing about 15% of the population, the members of the infrastructure have risen through the ranks to become the valley bureaucracy. Their families have lived in the area for generations. In this group are social program administrators, district judges, school superintendents, college professors and just plain hometown folks who made good.

Because they have become the establishment, they lead their lives and carry their views conservatively. This group is wealthier—annual incomes exceed $40,000, according to local estimates—older—about mid-40s—more mobile and more secure than other valley Hispanics. They like their community and love their position in it.

Their homes are furnished with "brand name" merchandise. They have outgrown scrimping, but still know how to drive a hard bargain.

- **The Executive Winter Texan:** Primarily Anglos, these people, 15% of the valley population, often consider themselves stranded in an outpost far from civilization.

Many are long-term tourists or retirees. Others are industry executives—bank presidents, real estate agents, promoters and developers—who find themselves stuck in the 19th century. They are working hard to raise the standards of living into the 20th century and have been the class that valley Hispanics hope to emulate.

At their worst, they keep relations with the natives cordial and to a mimimum, learning only enough Spanish to communicate with the maid. They often remind others English is the official language of the U.S.

Long dominant in local politics, their strength is waning because of increasing Hispanic voting strength. Brownsville was the first to fall and McAllen now is tottering.

- **The Wealthy Mexicans:** This low-profile group is part of the reason magic once visited the valley, and it still keeps the malls afloat. When the peso fell, the Wealthy Mexicans' presence fell with it, dropping from 30% of the local population to 5%. They found themselves unable to afford quality U.S. merchandise, beachfront condos and lavish shopping sprees, causing local merchants to shift their target to local residents.

They still can be found vacationing on South Padre Island or shopping downtown. Their main contribution to the economy is keeping financial houses teeming with deposits, protected by the Federal Savings & Loan Insurance Corp. Mexico confiscated their dollars once, and they are making sure it won't happen again.

- **The Founders:** Also primarily Anglos, this 5% of the area's population didn't discover the area, but figured out how to make more money out of it. After forming irrigation companies, they turned a silty desert wasteland into a year-round citrus and vegetable producer.

They oppose change for one obvious reason: They have the most to lose. Still the real powers of the area, their strength may be waning. The biggest threat to their position is worker's compensation and union organization. Also, many of the citrus groves were sold in 10-acre lots to northerners for investments. It's unclear who the real owners are now.

Their offspring are part of the new right, more compassionate than their parents but still conservative. Most keep low profiles and live in secluded upper valley areas. They once planted palm trees and tried to re-create a plantation life style—now the palm trees are all dead.

With the exception of radio, advertisers primarily reach this diverse market in English. To advertise in Spanish is to consciously target the 215,000 residents on the other side of the Rio Grande, they say.

KGBT-AM is the largest radio station in the valley and broadcasts in Spanish to an audience well into Mexico and Central America. KIWW, also Spanish language, is the fm leader.

The tv market is divided evenly between KRGV, the ABC affiliate, and KGBT, the CBS affiliate. Their Spanish programing—less than 5% of airtime—consists of Sunday morning musical guest shows. Because of its cost, cable tv—represented by K12TV—primarily serves the Valley's rather limited middle to upper income groups.

Freedom Newspapers hold a

Brownsville

(Continued from Page 41)

virtual monopoly in the print media, owning the *Brownsville Herald*, the Harlingen-based *Valley Morning Star* and the *Monitor* in McAllen. The *Herald* publishes a Spanish-language edition that has a dedicated following numbering 5,000, according to Douglas Hardie, publisher. But it is merely four Spanish pages wrapped around the rest of the English-language newspaper.

Advertisers are missing the boat if they think converting English commercials into Spanish will appeal to the border market, says Mr. Zavaleta of the South Texas Institute. "That's a researcher's copout, to lump all Hispanics as Spanish speakers," he says. "The Hispanic is much more diverse than that. The valley is truly a bilingual community, and research has shown succeeding generations rely on Spanish less and less.

"We're entering the middle class, exerting our political and economic muscle, and we have to be reached in ways that are consistent with our experiences and values," he says.

The themes that appeal to valley residents are those that acknowledge they are moving into society as full-fledged participants in social and economic activities. Judge Reynaldo G. Garza, the first Mexican-American appointed to the federal judiciary, says he will never forget what President John F. Kennedy said to him on the day of his appointment: "He said, 'America was no longer going to accept second-class citizens.' "

Judge Garza symbolizes just how much the immigrant can achieve if given the opportunity. If Hispanics continue to infiltrate the middle class, by their sheer numbers alone, mindful of their humble past but driven by a desire to succeed, maybe magic once again will visit the Rio Grande Valley. ■

Albuquerque

(Continued from Page 16)

are a part of Texas.' "

Mr. Ramsey says Spanish phrases that are relevant to the Cuban, Puerto Rican or Mexican populations in other cities may be meaningless in New Mexico. "It's a different language."

New Mexico politics reflect the long-established clout of the Hispanic population. The state has the largest proportion of Hispanic residents in the nation —36.8% Hispanic compared with Texas' 23.4% and California's 22.5%. In part because of this, it is the only state with a Hispanic governor, and it has sent two of the nine Hispanic representatives to the U.S. Congress. The State Legislature is 40% Hispanic. "The Anglo has no trouble voting for a Hispanic here," says Lee Benjamin, executive director of the Albuquerque Hispano Chamber.

Mr. Collado points out another ramification of the long-standing Hispanic culture: New Mexico Hispanics are more heterogeneous. "Here you have all types of people," he says. "Rich, middle class and poor."

Albuquerque's Hispanic market is even more youthful than the national norm, with 69% younger than 35 years old. The obvious conclusion is that their greatest earning and spending years are still ahead of them. Males 18 to 34 account for 58.4% of the population—compared with 16.6% nationwide—and Hispanic females 18 to 34 account for 60.5%—contrasted with 16% nationwide.

The regional Hispanic median income is $19,500, close to the non-Hispanic national norm. But a Hispano Chamber of Commerce survey found Hispanic household income in Albuquerque hovered near $14,700 a year—$5,000 less than the average non-Hispanic household.

According to the survey, a greater proportion of New Mexico Hispanics work in heavy industry and as operators and service providers. Non-Hispanics tend to work in finance and insurance and are found in managerial, professional and technical jobs.

The brand loyalty found nationally among Hispanics is also evident among New Mexican Hispanics. A survey by Hispanic Advertising Consultants found that 61.3% of auto buyers surveyed listed "make" as the reason for a purchase, and only 16% listed "price." Marketers should "stress quality and service," Mr. Ramsey says.

The local touch also works, Mr. Benjamin says, adding that "word-of-mouth, 'Tell-your-neighbors-about-us' advertising is very effective. There is a tremendous amount of trust in the Hispanic community. Even very large companies now are starting to work with local management. The national can decide the 'what' but the 'how' has to be local. To succeed here advertising needs a local angle."

The strong family ties that show up among Hispanics nationally are also obvious in New Mexico, with entertainment centered on the home and family. "Hospitality is a valued quality," Mr. Benjamin says, and leisure purchases reflect that.

New Mexicans cling to their unusualness, preferring New Mexican native foods, which are influenced by Indian cooking, over anything that might be described nationally as "Mexican" food. "In food at least, it's more difficult to make a change than in the community at large," Mr. Benjamin says. "It's brand loyalty, partly, and a resistance to changing food patterns."

But by appealing directly to the community, companies can influence and stimulate change. When a local distributor for a national concern hired a Hispanic community coordinator, someone who was well-known in the community, the company's sales boomed. A "Mexican" restaurant chain failed, and a local took it over, turning it into a success by serving local fare.

The composition of today's market will change soon, some experts predict. "There is a lot of intermarriage," Mr. Delgado says. "That will have an effect. Maybe not now, but in 10 years."

The immigration to areas of Albuquerque, unlike many primary Hispanic markets, is mainly Anglo, not Hispanic. Nevertheless, the Hispanic population of the city—which including outlying areas of Bernalillo County now accounts for 183,000 of New Mexico's 532,000 Hispanics—is expected to triple by 1990, according to "The Hispanic Almanac."

"It's an exciting market," Mr. Ramsey says. "National advertisers look at Albuquerque and say it's not a big enough market to do something special, but it is. The rate of growth will be 35% in the next 10 years. That means 104,000 more people, 60% of that growth in the Hispanic population."

Those growth figures and the fact that New Mexico is the only officially bilingual state in the union have boosted the acceptance of Spanish-language media, according to local media people. "The Hispanic market is almost integrated with the English. People who listen to our station are bilingual," says Richard Garcia, general manager of Spanish-language KDCE-AM. "Some families have been here for 390 years, and they are used to hearing both languages."

Although the area has a number of Spanish-language outlets, Mr. Delgado says it is not necessary to use Spanish to reach potential buyers.

A lot of Spanish is spoken, "but that doesn't mean it's all they speak," he says. "You do have to get in and be part of that culture, but that doesn't mean working in Spanish necessarily, just being part of things. Locally originated tv programs are only tokens."

But tokens may help position a company in the community. Local media people say Spanish-language ads run during English-language programing, or vice versa, have not resulted in cultural backlashes. "The nice thing about using Spanish-language radio," Mr. Ramsey says, "is there is a cultural tie. There's a crossover because Anglos are listening, too."

A telephone survey by Hispanic Advertising Consultants found that 21.3% of the Albuquerque residents who identified themselves as Hispanics spoke Spanish at home "all the time," and only 11.7% responded "never." The survey also determined that 26.3% of those people identifying themselves as Hispanics listen "often" to Spanish-language radio, and 26.3% "never" turn their dial to those stations.

Albuquerque marketers report that residents are placing more value on speaking Spanish as a second language. Although the current generation of 30-year-old Hispanics may not have learned Spanish because speaking English and assimilating was highly valued in their parents' generation, they are encouraging their children to learn Spanish.

Those active in the New Mexican Hispanic market say marketers should be attentive to the area's characteristics. "In a nutshell," Mr. Delgado says, "marketing understands the numbers, but from a cultural and psychological viewpoint they know very little.

"A lot of trying to reach the Hispanic market is being done through the eyes of an Anglo," he says. "The days of the Frito Bandito and the Mexican under a Saguaro cactus were over a long time ago."

Mr. Delgado says the best way for a company to reach the market is to become part of it at the grass-roots level.

Problems will exist until marketers recognize the different subcultural groups under the Hispanic umbrella, Mr. Delgado says. "There is a unique identity here . . . a huge hidden market that someone with the right assessment is going to explore. We're dealing with a distinct cultural group that yet is in the mainstream of society. I don't know that anyone really understands the Hispanic market. They bandy the Hispanic name around, but it's an umbrella name."

For those willing to probe its subtleties, the Albuquerque market is promising. "There is a feeling of growth in Albuquerque," Mr. Benjamin says, "a feeling of being part of the Sunbelt. I think the '80s is the decade of the Hispanic." ■

El Paso

(Continued from Page 16)

Juarez and the constant contact with two cultures is Spanish-language KAMA-AM and its affiliate, KAMZ-FM. Jack R. McVeigh Jr., national sales manager, says older Mexican-Americans in El Paso not only speak excellent Spanish, but also generally feel more comfortable with it. Spanglish is prevalent among younger Mexican-Americans, who feel more comfortable with English, he says.

Unlike KAMA, KAMZ is programed in English to reach the young Hispanic, Mr. McVeigh says. The average age of Hispanics in El Paso is 23.5 years. Strategy Research says 43.9% of all Hispanics in El Paso are younger than 18 and children younger than 12 make up nearly 30% of the Hispanic population.

The radio business in El Paso-Juarez is highly competitive, Mr. McVeigh says, with 17 stations in El Paso and 20 in Juarez.

"El Paso will always be a Spanish-English community. The comparative low circulation rates of the two English-language newspapers [*El Paso Times*, 60,500 daily; *El Paso Herald-Post*, 33,000 daily] attests to the language uniqueness of this community," Mr. McVeigh says.

Mr. Bencomo says El Paso-Juarez is different in ways besides language, differences that

affect consumers' behavior and buying habits. "There is a great deal of pride among Hispanics in El Paso, of church and family. There is an ethic among Hispanics of being a good worker—that working hard is part of being a good provider," Mr. Bencomo says.

The good provider attitude means Hispanics are loyal to name brands, no matter how expensive, he says.

"Most of our customers are hard-working people," Mr. Bencomo says. "About 40% are receiving some kind of federal assistance, such as food stamps. But we also have very affluent Hispanics who grew up in the *barrio*, moved on to better things, but return to shop at the old store."

The future will see an upswing in the number of affluent El Paso Hispanics, he says. "Today we have many doctors, lawyers, judges, accountants. The Hispanic of today defies all stereotypes, even though we are still a blue-collar people and we have a long way to go."

Hispanics are able to take what they want from both cultures, Mr. Bencomo says. "More and more we're gaining the respect of the Anglo for our family ties, our music and food and our loyalty to the church," he says. "We're a beautiful people."

Politically, Mr. Bencomo says, the Hispanic is a mixture of Republican and Democrat, depending on economic status.

Those who live on a fixed income tend to remain loyal to the Democratic party, which is viewed as the party with compassion for the poor, Mr. Bencomo says. Underemployed and unemployed Hispanics feel left out of the American dream and are angry and frustrated, he says. "I would say 30% of our people are not making it. For them, being a Mexican and looking like a Mexican and speaking English with a Spanish accent is a terrible disadvantage."

When Hispanics are better educated and have better jobs, those characteristics become advantages. The Hispanic lawyer who relates to his clients because he is *raza* tends to do better than his non-Hispanic counterparts. Bilingual teachers are in greater demand than monolingual teachers.

"So political systems for the Hispanics means which party can get the Hispanics from the outside, where being Hispanic is a disadvantage, to the point in professional life where being Hispanic is a plus," Mr. Bencomo says.

Oscar Martinez, director of the Center for Inter-American and Border Studies at the University of Texas at El Paso, has a dim view of Hispanic progress. As a community, he says, El Paso Hispanics "have traveled only a short distance in their quest to achieve parity with the Anglo population. Economically and socially, a gulf still separates the two groups." But strides have been made, he says, and Hispanics have enhanced their role and their say in El Paso by fighting for their interests.

Residents of Juarez have none of the two-culture prejudicial problems of their friends north of the Rio Grande. Theirs is a problem of survival and of making it in a devaluating economy.

Many border businesses folded when Mexicans no longer could afford American products. The two cities again learned how much they rely on each other.

The peso today is still highly devalued, but because of high inflation in Mexico, Mexicans are finding bargains again in American border cities. Shoppers from El Paso and Juarez have crossed the border to spend some $125 million a year in each other's cities.

Not all the interaction has a positive effect, however. Labor experts say El Paso is a "minimum-wage town" because it is on the border.

Being on the border also promotes a feeling of isolation. El Paso is out of the normal orbit of Texas, relating in many ways to New Mexico, Arizona and California. "California has always been the mecca for Mexican-Americans," Mr. Bencomo says. "Very seldom would you hear of a Mexican-American moving to Dallas or Houston or Fort Worth. All that is changing now, and opportunities to the east are opening up. But the grass is still greener for us anywhere west."

Part of the Texas isolation comes from the fact that El Paso is only 325 miles from Santa Fe, the capital of New Mexico, while it is 583 miles to Austin, the capital of Texas.

Juarez is in the same boat. Mayor Francisco Barrio calls his city a desert island, and he says his constituents also are ignored, maligned and misunderstood by the rest of the country, including state and federal governments.

Because of the border, El Paso's economy is based on trade, government and low-skilled manufacturing, which has kept it from growing like other Sunbelt cities, says Thomas F. Lee, an El Paso economist. However, he predicts "a moderately healthy" economic future for the area.

Even if the economy doesn't boom, the population—fueled by high birth rates in both Juarez and El Paso and a steady influx of immigrants—probably will. City planners predict an increase from 470,000 to between 600,000 and 660,000 by 2000. In Juarez, planners estimate a population between 1.5 million and 2.4 million by 2000.

Economists, planners, businessmen and political leaders all agree on one aspect of the El Paso-Juarez economy of the future: The two cities and the citizens will continue to be Siamese twins, joined at the cash register.

Buy-buy, bye-bye in media world

New names, new faces result from desire to acquire

By CRAIG REISS

It was a week of historic magnitude and dramatic transition for some of the nation's biggest media companies.

Ownership changed hands in two major deals, and control of several other major media entities was either being challenged, or about to be, through stock purchases by outsiders.

The $3.5 billion takeover of ABC Inc. by Capital Cities Communications, both New York, remained the largest and most remarkable event in a remarkable week.

That was an amicable merger, as was Rupert Murdoch's $250 million cash outlay ($88 million was a loan) for a 50% stake in 20th Century Fox Film Corp., Los Angeles *(see related story on Page 2)*.

Friendliness, however, stopped there. For everyone else affected by the accelerating rush to acquire stock in media operations, the mood last week was particularly nasty. Consider:

James Brady's views of Tom Murphy and the Cap Cities crowd—Page 3.

- Ivan Boesky, one of the country's fiercest arbitragers, whose Wall Street exploits have earned him the nickname "Piggy," last week acquired a 7%-to-8% interest in CBS Inc., New York, for $240 million, according to the *New York Times*.

At press time, CBS said it was unaware of Mr. Boesky's action, but the company was listed every day last week on the New York Stock Exchange's list of most active stocks.

- Mr. Boesky's reported move on CBS followed by two days the announcement of the Cap Cities/ABC merger (AA, March 21) and by one day a report in Liz Smith's *New York Daily News* gossip column that former CBS Inc. chairman William Paley was considering a return to the fold by leading a leveraged buyout of CBS, the company he founded.

CBS denied the Paley report and also said it knew of no move by Mr. Boesky to acquire such a large block of CBS stock. But it is a clear commentary on the state of affairs in the control of media companies that Mr. Boesky was not discouraged by that denial. Media stocks now are being driven far more by perception than by fact.

- Ted Turner, who earlier this month was reported to have begun his own CBS Inc. takeover bid (AA, March 4), gave a deposition to CBS lawyers last week in which he apparently admitted that he had met several times with conservative Republican Sen. Jesse Helms (R., N.C.) about working together to buy out CBS. Sen. Helms' group, Fairness in Media, has been seeking to acquire CBS stock to force ideological change on the CBS board and CBS

(Continued on Page 116)

Perfectly clear who's touting Nixon's book

By JANET SIMONS

DENVER—If Geraldine Ferraro can, why not Richard Nixon?

The former U.S. President makes his bow this week as a commercial presenter in ads that tout the newspaper serialization of his new book, "No More Vietnams," in the *Rocky Mountain News*.

In 30-second radio and tv spots, Mr. Nixon reads a brief excerpt from his book. The tv commercial, featuring his narration, uses b&w Vietnam-era photographs of Mr. Nixon, selected by him from the Nixon archives.

Colle & McVoy, Denver, created the *News* campaign; the production company is Zine Design Films, Denver. Mr. Nixon made the tapes at his office in New York.

The idea of using the only President in U.S. history to be forced out of office as advertising talent began when an agency executive learned that Zine Design partner David Soma had a long relationship with Mr. Nixon and was willing to act as liaison. Mr. Soma had worked on a commercial for Mr. Nixon's presidential campaign and for other Republican party commercials.

The book's publisher, Arbor House; its syndicator, News America Syndicate Inc., and a group of Nixon sympathizers pushed to get the commercial made, according to Mr. Soma. "I think this will be very good for him," Mr. Soma added.

Mr. Soma claims Mr. Nixon decided to make the commercials not for the money, but to use them as a vehicle to show him in a favorable light. The former President undoubtedly feels the ads will present him as an elder statesman.

According to Mr. Soma, Mr. Nixon didn't take a talent fee, and insisted the commercial tapes be available free of charge to other newspapers carrying "No More Vietnams." The spots will run in at least 15 major markets, including New York, Boston, Chicago, Dallas and Orange County, Cal., starting March 31, the book's publication date.

Mr. Nixon had a degree of control over the content of the ads. He selected an initial group of photo-

The bite that's right
KING COBRA
KING COBRA
KING COBRA
KING COBRA
From Anheuser-Busch

Cobra coiled

Anheuser-Busch reenters the malt liquor category this week with King Cobra (AA, March 21). The brand, expanded to 150 markets in 20 states after a one-year test in 12 markets, gives St. Louis-based A-B an entry in a market segment it left several years ago after the failure of Budweiser Malt Liquor. Print, radio and outdoor advertising, themed "The bite that's right," support the rollout. J.P. Martin Associates, New York, is the agency.

Last Minute News

Marschalk, Jordan win in Sterling juggle

NEW YORK—Sterling Drug has shifted more than $20 million in Lehn & Fink business. The move adds Marschalk Co. and Jordan, Case & McGrath to its roster, drops Avrett, Free & Ginsburg and moves two products out of SSC&B. Marschalk gains Lysol Pine Action cleaner from Avrett, and Lysol laundry sanitizer, a new all-purpose bleach. The two Lysol brands bill an estimated $10 million-plus each. Jordan gains Wet Ones and Chubs towelettes, billing $1.5 million, from SSC&B.

GrandMet to sell off Pinkerton Tobacco

MONTVALE, N.J.—GrandMet USA intends to sell its Pinkerton Tobacco Co. unit, the Owenboro, Ky., marketer of Red Man chewing tobacco and pipe tobaccos. Benton & Bowles, New York, handles Pinkerton's roughly $3 million ad account.

First ads poured into Cherry Coke

HARTFORD, CONN.—Coca-Cola USA, Atlanta, breaks its first advertising today for Cherry Coke in a $1 million tv campaign in this test area. SSC&B, New York, created the advertising.

ABC lines up sponsor stars for Oscars

Stones may rock for Pepsi

By NANCY GIGES

Pepsi-Cola USA hopes to close a deal soon with the Rolling Stones, adding that group to what could be a growing list of rock groups sponsored by the Purchase, N.Y.-based soft-drink company.

A Pepsi spokesman had no comment on the report, but reliable sources said Pepsi is prepared to pay more than the $10 million it invested in the Michael Jackson deal last year.

If the deal is consummated, with a single act Pepsi would appeal to a broader age span than Michael Jackson or Lionel Richie alone. Mr. Richie, who replaced the Jacksons in Pepsi-Cola commercials this year, has a multiyear, multifaceted deal. Although Mr. Jackson and his brothers no longer are associated with Pepsi, the company has expressed hope it would link with musical groups or individuals desiring a longer-term arrangement.

The Rolling Stones, one of the few groups that has remained popular for many years, removed the stigma from corporate sponsorship of rock groups when it signed with Jovan in 1981. That 45-city tour brought in some $40 million from

'Scapegoat' Luisi grazes JWT on libel

By STEWART ALTER

Did JWT Group make Marie Luisi the scapegoat for its syndication problems?

That's the point her lawyers seem most likely to emphasize in court, now that a New York state supreme court judge has ruled (AA, March 21) that Ms. Luisi does have a cause of action for a libel trial against JWT.

The trial, which probably won't take place for at least another year, is also likely to focus on several issues that go beyond the world of advertising. Two subjects likely to get attention, both of which have relatively little legal precedent, are the extent of liability of an individual executive for a corporation's problems and the topic of press releases as documents subject to libel suits.

JWT, which now has the burden of proof, maintains that it can establish its case against Ms. Luisi.

"We are confident that when the facts are presented in a court of law that they will prove that we did not libel her and they will totally vindicate the company," said Don Deaton, senior vp-director of corporate communications at JWT Group.

It was Mr. Deaton's department that prepared the March 30, 1982, press release that forms the basis for the libel suit.

"We've been confident from the beginning in the validity of the way we handled the matter and have felt the lawsuit was without merit and ludicrous," he continued. Mr. Deaton also confirmed that the Securities & Exchange Commission "is still investigating what happened and that that investigation has not terminated."

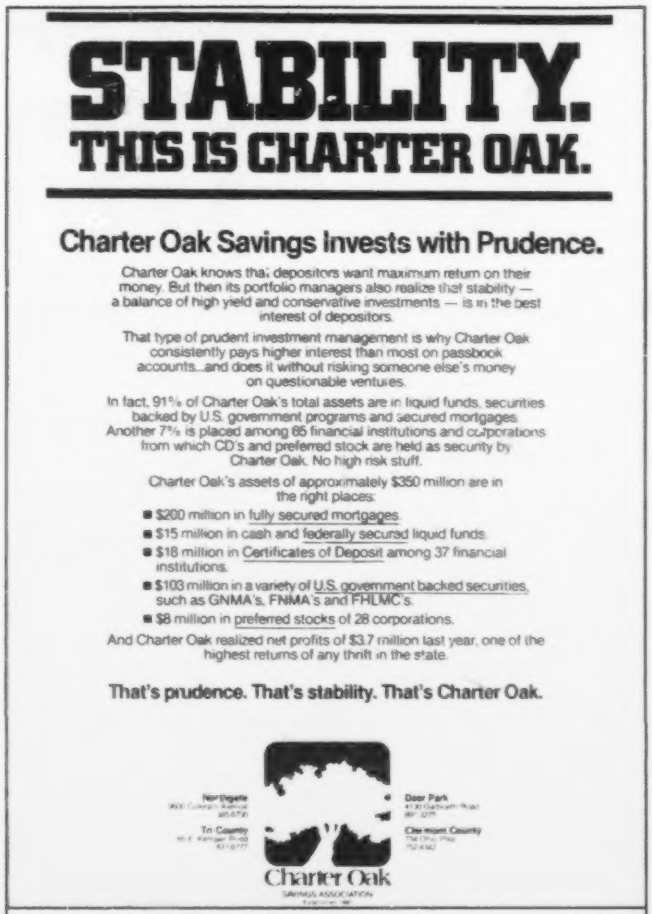
Ms. Luisi had headed J. Walter Thompson USA's spot-buying and tv program syndication units before it was learned that syndication revenue had been overstated significantly through computer system entries (AA, Feb. 8, '82, *et seq.*). Because of the discovery of these irregularities, JWT had to restate its earnings for that year to reflect a loss of more than $30 million.

The agency dismissed Ms. Luisi, labeling her responsible for the scandal.

The libel suit seeks damages in excess of $20 million and punitive damages of $30 million.

New York state supreme court Justice David Saxe ruled last week that "this press release may reasonably

(Continued on Page 114)



STABILITY. THIS IS CHARTER OAK.

Charter Oak Savings Invests with Prudence.

Charter Oak knows that depositors want maximum return on their money. But then its portfolio managers also realize that stability — a balance of high yield and conservative investments — is in the best interest of depositors.

That type of prudent investment management is why Charter Oak consistently pays higher interest than most on passbook accounts...and does it without risking someone else's money on questionable ventures.

In fact, 91% of Charter Oak's total assets are in liquid funds, securities backed by U.S. government programs and secured mortgages. Another 7% is placed among 65 financial institutions and corporations from which CD's and preferred stock are held as security by Charter Oak. No high risk stuff.

Charter Oak's assets of approximately $350 million are in the right places:

- $200 million in fully secured mortgages.
- $15 million in cash and federally secured liquid funds.
- $18 million in Certificates of Deposit among 37 financial institutions.
- $103 million in a variety of U.S. government backed securities, such as GNMA's, FNMA's and FHLMC's.
- $8 million in preferred stocks of 28 corporations.

And Charter Oak realized net profits of $3.7 million last year, one of the highest returns of any thrift in the state.

That's prudence. That's stability. That's Charter Oak.

Sign of stability

Charter Oak Savings Assn., Cincinnati, used this ad to reassure customers of its "stability" after Ohio authorities cleared state s&l's to reopen last week *(see story on Page 113).*

Highlights

Beer and wine advertisers can defuse opposition to their tv ads and marketing practices by implementing three relatively "minor" policy changes, according to the White House's alcohol policy coordinator. *See Page 10.*

The Christian Science Publishing Society in recent months has embarked on a new marketing program that promises to change the way the nonprofit organization works and may even turn it from a consistent money-loser into a break-even operation. *See Page 12.*

Mickey Mouse, Donald Duck and Pluto will star in a $2.5 million consumer advertising campaign starting in May, when Walt Disney Home Video begins promoting a new limited series of videocassettes. *See Page 32.*

In June, the International Assn. of Ice Cream Manufacturers, Washington, will ply legislators and Washington heavyweights with 3,000 gallons of ice cream, 300 pounds of candy and nuts, 8,500 ice cream novelties and 7,000 root-beer floats at its second annual ice cream social. After all, if elected officials support ice cream, how can the rest of the population ignore it, IAICM figures. *See Page 34.*

Stouffer Foods, the subsidiary of Nestle Enterprises that produces Lean Cuisine, is expanding its franchise in the health and well-being business by introducing a diet, nutrition and fitness video program for home use. *See Page 40.*

CORPORATE CLOSEUP

Just as his two-year struggle to stunt Storer Communications' multi-million-dollar losses and ballooning debt appeared to be paying off, Peter Storer, the company's 54-year-old chairman, is faced with a new threat that may force his corporation to liquidate. *See Page 4.*

Murdoch move out-Foxes L.A.

By BOB MARICH

Rupert Murdoch's buy into 20th Century Fox Film Corp. at a bargain price will give him a programing base to expand his worldwide tv ambitions.

The Los Angeles-based studio will supply programing to his tv ventures, analysts predict. With the purchase, the print media baron also gets his hands on Fox's extensive film library, which some analysts estimate is worth at least $300 million.

Mr. Murdoch operates Sky Channel, a satellite-direct-to-home tv service in Europe. A year ago, he abandoned a similar satellite tv venture in the U.S. in part because of difficulty in buying programing.

Mr. Murdoch's debut as a Hollywood mogul led to speculation primarily about the impact he might have on the shape and style of tv and theatrical programing.

But the move sent out another signal to newspaper publishers. With the Fox deal coming only months after Mr. Murdoch spent $360 million to buy 12 business titles from Ziff-Davis Publishing Co., New York, the newspaper in-

Like, Carling catches on, eh?

Great Lite North

By SCOTT HUME

Beer marketers wondering what could happen if the U.S. government cracks down on the use of celebrities in advertising need look only as far as Canada.

Carling O'Keefe, Toronto, under license from Milwaukee-based Miller Brewing, is launching Lite beer in Canada, the first American light-beer brand to be introduced there. Lite also is the first new brand to be introduced simultaneously in all Canadian provinces.

Carling expects to have the same success with Lite that it had two years ago when it began producing and marketing Miller High Life under a similar license. But there's just one snag: The Canadian government is having trouble making up its mind about use of celebrities in beer advertising.

The Canadian Radio & Television Commission, which must review and approve advertising before it appears, forbids use of rec-

ADWATCH

P&G ad awareness scores fit to be Tide

By SCOTT HUME

The Tide rolled in last month for Procter & Gamble.

The nation's largest consumer-products company took a gamble this year by introducing a liquid version of its top-selling Tide laundry detergent. So enthused was P&G about the importance of and prospects for Liquid Tide that it called its first new-product press conference in 3½ years.

P&G also is so determined to ensure Liquid Tide's success that it has committed a reported $50 million to advertising and marketing for the brand.

The first wave of the Liquid Tide launch appears to have received a solid response.

Of the 1,255 consumers asked last month in ADVERTISING AGE's adWatch survey to name the first laundry-product advertising that came to mind, 465, or 37.1%, named Tide. In January, Tide's share of first mentions was 27.3%.

Significantly, 26 respondents (2.1% of the total) specifically recalled advertising for Liquid Tide. That's surprisingly strong top-of-mind awareness for a new product, especially so soon after introductory advertising has broken.

Tv advertising for Liquid Tide began Jan. 14. On Feb. 3 and 17, P&G supported the launch with heavy insert couponing (AA, Nov. 26). But new products and new advertising campaigns frequently hit the marketplace with little effect on adWatch awareness scores. That Liquid Tide already has captured consumers' attention means P&G has passed its first hurdle.

The second hurdle, of course, will be the continuing sales competition with Lever Bros.' Wisk, the leading liquid detergent. Wisk's was the second most often recalled advertising in the laundry category last month, although it mustered only 3.4% of first mentions. Lever's powdered detergent, All, held the No. 3 spot with a 2.8% share.

Another advertiser facing high hurdles is Pepsi.

In the January adWatch survey (AA, Feb. 25) awareness of Coke's and Pepsi's advertising was virtually even. Last month, the tie was broken. Coke's advertising came to mind first for 32.7% of the sample, a 5.6 point increase. Pepsi's share dropped 3.4 points to 23.6%.

Those changes left Pepsi trailing Coke just as major new advertising executions for both companies were about to be launched. Last month's adWatch polling was conducted between Feb. 1 and 20. Thus the awareness scores do not include reactions to Pepsi's Lionel Richie commercials (which debuted on the Feb. 26 Grammy Awards telecast) or Coke's new "Coke is it" executions (which broke Feb. 19).

The February adWatch also was conducted too early to be influenced by Geraldine Ferraro's controversial debut as a spokeswoman for Diet Pepsi. That brand's advertising could use an awareness boost, since it garnered only 3.5% of first mentions last month (placing it fifth). Diet Coke was fourth with 4.4% of first mentions.

All this means next month's scores in the soft-drink category should be especially interesting.

Still trailing the colas last month was 7UP, which received 5.3% of first mentions. That was a strong enough awareness share to keep it in its accustomed No. 3 spot. But 7UP also has launched new advertising that revives its "Uncola" positioning. Can a 15-year-old advertising theme boost 7UP's awareness? Watch this space next month.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of consumers to name the advertising in a variety of product categories that first comes to mind from all seen, heard or read in the previous 30 days.

In February, 1,255 adults were questioned by telephone. Under adWatch methodology, an increase or decrease of 2.8 percentage points between monthly polls is considered to be statistically significant and attributable to more than variations in the sample.

Among other significant changes from the February survey:

- Is it Nissan or Datsun? Consumers continue to recall the auto maker's advertising under both names, which probably doesn't bother Nissan as long as they do recall its ads.

Nissan made its best showing ever last month, when its advertis-

Frohock to promote AA

NEW YORK—Christina M. Frohock has joined ADVERTISING AGE as promotion director, with responsibility for the publication's marketing and promotion activities. She was affiliate promotion manager for Home Box Office, the pay cable service of Time Inc.

C. Frohock

According to AA publisher Louis F. De Marco, Ms. Frohock provides "a new dimension to the publication's sales support systems since her varied experience is ideal for our needs."

A 14-year veteran in the media-promotion arena, Ms. Frohock's experience also includes newspaper and magazine promotion. She previously was associated with *Metropolitan Home*, *Newsweek International* and the Newspaper Advertising Bureau.

Ms. Frohock will be based in AA's New York office.#

CORRECTIONS & CLARIFICATIONS

- The major account losses attributed to J. Walter Thompson (AA, March 18, P. 8) should have been attributed to JWT/West's San Francisco office.
- A logo, "Ad Age Review," should have appeared with Fred Danzig's review of the new Miller High Life ad campaign headlined "Miller waves flag, but spots fall flat" (AA, March 11, P. 4).
- Lesley Gillman's assignment before joining Jack Brahms Advertising, Baltimore, was incorrectly stated, based on information supplied by the agency (AA, March 4, P. 46). Her previous position was account exec, WRLH-TV, Richmond, Va.
- Verbatim Corp. is not undertaking an agency review as reported earlier (AA, March 14, P. 35). The account was awarded to D'Arcy MacManus Masius, San Francisco (AA, Oct. 29).
- Beatrice Cos. gained $253 million from the combined sale of its cookie, foodservice equipment, agri-product and leather operations, not just from the sale of its cookie business (AA, Feb. 18, P. 77).#

Ohio s&ls bank on ads

By GARY LEVIN

State-insured savings and loan associations in Ohio switched from a "crisis mode" to one of recovery last week as most prepared to trumpet their reopenings with special ad campaigns.

Larger thrifts, at press time, planned extensive, short-term media campaigns to alert customers they would be back in business as early as March 22.

The crisis was precipitated by the failure March 9 of a single state-insured thrift, Home State Savings Assn. in Cincinnati. That failure caused a run on 71 other s&ls also without federal insurance, and Gov. Richard Celeste forced them to close their doors March 15 until the crisis could be resolved.

As for those new ad campaigns, City Loan & Savings Co., Lima, again will use celebrity spokesman Harry Morgan in tv spots to reassure depositors that it's "business as usual" for Ohio's largest state-insured s&l. Newspaper ads in most major dailies throughout the state will support the message for the 111-branch thrift, which has offices in each of Ohio's 88 counties.

W.B. Doner & Co., Baltimore, is the agency for City Loan and its Baltimore-based parent, Commercial Credit Co. Separately, the thrift hired the Burson-Marsteller public relations company to arrange media interviews and to send "personal letters" to each customer, a spokesman said.

The ads are "a message of confidence, reminding Ohioans of the long relationship between them and City Loan & Savings," said Don Riesett, management supervisor at W.B. Doner. "It's very straightforward and sincere, which Harry Morgan is very adept at." The veteran tv actor most recently appeared in CBS-TV's "M*A*S*H" series and "AfterMASH," its short-lived sequel.

Charter Oak Savings Assn., Cincinnati, planned immediate use of radio spots via Penny/Ohlmann/-Neiman, Dayton, announcing its ability to grant limited withdrawals. Newspaper and direct-mail efforts are expected to complete the $12,000-to-$15,000 campaign, said Bob Penny, the agency's chairman.

All emphasize the "stability" and "prudence" of Charter Oak's investments. The thrift has four branches each in Cincinnati and Columbus.

Other s&ls were plotting more unique ploys to regain customer confidence. One thrift reportedly agreed to donate a percentage of new deposits to an African hunger relief fund.

Another s&l, Molitor Loan & Building Co. in Cincinnati, passed out t-shirts emblazoned with the message "I support Molitor with my deposits." It also planned a radio and newspaper campaign via Financial Advertising Agency, Fort Mitchell, Ky., said Robert Nave, savings department manager. Mr. Nave added, "We're on the tv [news] so much, we don't need to buy tv time."

Smaller institutions found media coverage alone more then adequate for their publicity needs. "I don't think there are any [of our] customers out there who don't know we're open," said Stephen Wood, president and managing officer of Columbia Savings & Loan Co., Cincinnati. That s&l was allowed to reopen March 18. Fortuitously, its previous application for federal insurance was approved just after state officials shuttered it and 70 other thrifts.

And while Mr. Wood said the $6 million-asset s&l won't refuse new depositors, "we're not looking to go out and be a scavenger on this thing."

Officials at Independence Savings Bank near Cleveland said they'll also rely on word-of-mouth and local media coverage. But Mentor Savings Bank, also in the Cleveland area, plans a short-term direct-mail, newspaper and radio effort.

The Home State failure March 9 drained the state's private Ohio Deposit Guarantee Fund, which in turn caused a run on deposits at other state-insured thrifts.

Those applying for federal insurance and able to demonstrate "financial soundness" were conditionally permitted to reopen, at first only to grant $750 withdrawals to customers strapped for cash by the unexpected closing. Those who do reopen must obtain federal insurance within 120 days.#

Playboy countersues Jerry

New York—Playboy Enterprises, former owner of *Oui*, and freelance writer Jon Denny have countersued adman Jerry Della Femina, who took them to court last year for allegedly publishing "false and defamatory" statements about him in an interview in the January, 1981, issue of *Oui*.

The suit charges disparagement by Mr. Della Femina against the publication and Mr. Denny.

Mr. Della Femina sued Playboy and Mr. Denny around the same time filed a $184 million defamation suit against against A/S/M Communications, publisher of *Adweek*, and five individuals associated with that publication (AA, Aug. 30, *et seq.*). In part, his *Adweek* suit was spurred by an article in that publication he claims left the impression that a copy of the *Oui* article had found its way to the White House and doomed Della Femina, Travisano & Partners' chance to handle Ronald Reagan's reelection campaign.

The *Oui* interview, written by Mr. Denny, according to the Playboy complaint, had Mr. Della Femina discussing "the agency's annual 'sex contest'; his views on drug use; the manner in which his agency is run; clients he has handled, including Feminique, a feminine hygiene spray that he claimed was named for him, and his refusal, as a matter of principal, to handle the advertising for political candidates and campaigns."

As it turned out, James Travis, vice-chairman and chief executive officer of the Della Femina shop, and the agency's top creatives, Ron Travisano and James Weller, became key members of the Tuesday Team, the ad hoc agency that helped reelect the Reagan ticket. Mr. Travisano was bought out earlier this month by Mr. Della Femina (AA, March 11).

The Playboy countersuit in federal district court here contends that following his "rejection" by the White House, Mr. Della Femina began making statements designed to minimize the "damage and embarrassment" the interview had caused Mr. Della Femina "and to cast doubts on the honesty and professional integrity of Denny, who conducted and prepared the interview." Asked to comment on the countersuit, Mr. Della Femina replied, "I sued them. They sued me. That sounds fine to me."

In the case against A/S/M in state supreme court here, no ruling has been handed down concerning the defendant's motion to dismiss Mr. Della Femina's suit.#

AdWatch

(Continued from Page 6)

ing came to mind first for 11.3% in the **cars and trucks** category. That score represents a 4.8 percentage-point increase since January. For the record, 50 respondents said they recalled Nissan advertising; 19 remembered the advertiser as Datsun. Five commercials during January's Super Bowl helped Nissan's awareness, no doubt, as did broad print presence.

Ford's advertising continues to have the best recall, capturing 22.3% of first mentions last month. Chevrolet was second with 13.2%.

- "I love to talk about Carlo Rossi wine, but I'd much rather drink it," chortles the pixie-faced Carlo Rossi in the winery's advertising. The president of Carlo Rossi Vineyards is back on tv, and consumers noticed. In fact, the brand came to mind first for 4.4% of respondents in the **wine** category. That compares with a less than 1% share in January.

Riunite replaced Gallo as the category leader, capturing 8.6% of first mentions. Gallo came to mind first for 8% of the sample.

- Tylenol widened its lead in the **medicine and drugs** category with a 4.2 point gain to 24.1% of first mentions. Anacin took the No. 2 spot with 5.6%; Bayer was third with 4.2%.
- Where's Clara "Where's the beef?" Peller when Wendy's needs her? Doing Prego Plus spaghetti sauce commercials for Campbell Soup, that's where. The No. 3 burger chain's advertising has been losing awareness recently, and in February it received only 12.5% of first mentions. That represented a hefty 4.5% drop from January and gave Wendy's its lowest awareness score in the **fast-food** category in six months.

In January, Wendy's poked fun at its competitors with a commercial in which a clown (like Ronald You-Know-Who) and counter girl (like the stars of Burger King's spots) complained that they don't have stuffed baked potatoes to sell like Wendy's does. While the spot didn't help Wendy's awareness much within the category, Wendy's remained one of the 10 best-recalled advertisers over-all.

Consumers had no trouble remembering the name McDonald's. It easily retained the No. 1 spot with a 39.8% share of first mentions. Burger King took the No. 2 spot (for the first time in five months) with a 14.9% share.

- The **top 10** advertisers in unaided recall were Coke, McDonald's, Miller/Lite, Budweiser/Bud Light, Pepsi, Wendy's, Ford, Tide, IBM and Chevrolet.#

For additional information or data, contact: Gary Gabelhouse, SRI Research Center, 301 S. 68th St., Lincoln, Neb. 68506. Phone: (402) 489-0351.

For the Record

BBDO INTERNATIONAL, New York, maintains a high per-client profitability level by keeping "revenue generation per account equal to at least three times the salaries required to work on the account," says an investment study of the agency by Provident National Bank, Philadelphia. BBDO is the most profitable, on a percentage basis, of all U.S. publicly held ad agencies.

MILITARY ADVERTISING may be in for review by federal budget-cutters, says White House chief of staff Donald Regan. Mr. Regan said the role and effectiveness of advertising for the all-volunteer army "would be the basis for a discussion of whether that advertising should be held, cut or maybe increased." The Army's annual ad budget is about $65 million and the Navy's about $20 million. N W Ayer, New York, handles the Army and Ted Bates Advertising/New York handles the Navy.

LOTUS DEVELOPMENT CORP., Cambridge, Mass., has delayed for two months the introduction of Jazz, an integrated software package that is being counted on to make Apple Computer's Macintosh personal computer more attractive to business. Shipment of the software, which had been expected March 31 *(see earlier story on Page 82)*, has been rescheduled for May 27, reportedly because Jazz is plagued by operating "bugs."

HUGH HEFNER says he'll change his life following a mild stroke he suffered two weeks ago, even though the 58-year-old chairman of Playboy Enterprises has fully recovered. A spokeswoman for Chicago-based Playboy said Mr. Hefner probably will take "a more philosophic and creative role" and may become less involved in day-to-day affairs.

WOMEN FEEL misrepresented in car ads, says a new study that J.D. Powers & Associates, Los Angeles, conducted for *Family Circle*. Ads insinuate women are interested in a car's appearance only, said the women surveyed, and don't contain enough technical data. Respondents said dealers treat women shoppers less seriously than they treat men.

HOLIDAY INNS, Memphis, has proposed a corporate name change to Holiday Corp. to reflect the diversity of its growing chain. The company started with its Holiday Inns chain but now also owns Embassy Suites hotels, Hampton Inns, Harrah's hotels and casinos, Perkin's restaurants and the Residence Inn hotels.

SEVEN-UP CO., St. Louis, on March 31 will distribute 43 million two-page freestanding inserts in Sunday newspapers. The fsi includes a 25¢-off coupon for a carton of 7UP and a purchase offer for its upside-down Uncola glass. N W Ayer, New York, handles.

COCA-COLA USA, Atlanta, will air on ABC's Academy Awards telecast tonight a new commercial for diet Sprite featuring Paulina Porizkova. The 20-year-old Czech model, who appeared on the cover of *Sports Illustrated's* 1984 and '85 swimsuit issues, also appeared in last year's diet Sprite advertising. Marschalk Co., New York, handles.

BILLBOARD, New York, says it will contribute to USA for Africa $75,000 generated by its April 6 special section saluting that all-star group's "We Are the World" project. About 40 advertisers bought space in the section. The latest element in that fund-raising venture for the hungry and homeless in Africa and the U.S. is an album, which Columbia Records is releasing April 7.

AVON PRODUCTS, New York, is searching for an acquisition in either consumer goods or healthcare. It also has instructed all its divisions to make recommendations for divestitures from within each division.

ACCOUNT ACTIVITY: **Greater New York Aamco Dealers Assn.**, New York, to **Muller Jordan Weiss** for its $2 million broadcast account, from Albert Jay Rosenthal & Co. . . .**Suntory International**, New York, to **Isidore & Paulson** for Suntory imported beer and other projects, with billings of at least $1 million, from Chiat/Day. . .**Beverly Sassoon Cosmetics**, Dallas, to **GSD&M** to handle the initial $2 million account for a new cosmetics line that will be marketed to women 25 years old and older. . .**Marriott Corp.'s** Marriott Hotels & Resorts, Washington, to **Lewis, Gilman & Kynett**, Philadelphia, for domestic advertising from Ogilvy & Mather, New York. The assignment follows a three-month agency review and a reorganization of Marriott's marketing team . . .**American Natural Beverage Corp.**, New York, to **Ogilvy & Mather Partners**, its first agency for Soho Natural soda.

WORTH NOTING: **Jordan, Case & McGrath**, New York, has formed working affiliations with Humphreys Bull & Barker, London, and Goodis-Wolf, Toronto. . .**Patricia Martin**, formerly director-marketing support, Warner-Lambert Co., and **Joan Lipton**, formerly senior vp-associate creative director, McCann-Erickson, have formed New York-based **Martin/Lipton**, an agency specializing in health and personal care products. . .Drossman Lehmann Marino Reveley, New York, has been renamed **Drossman Lehman Marino** following the departure of exec vp Maria Reveley a few months ago. . .**E. Christian Schoenleb** to president, Horn & Hardart's Bojangles' of America subsidiary, Charlotte, N.C., from president-ceo, Swensen's Ice Cream Co., Phoenix. He succeeds **Jack Fulk Sr.**, founder of the chicken-and-biscuit restaurant chain. Mr. Fulk's employment contract with Horn & Hardart, which acquired Bojangles' in 1982, expired last January. . .**Robert Edgell** to vice-chairman, a new post at Harcourt Brace Jovanovich, Orlando, Fla., while retaining his post of chairman, HBJ Publications, Cleveland. Separately, **HBJ Publications** has acquired *CPI100*, which covers the chemical process industry, from Contour Publishing International, Cherry Hill, N.J. . . .**Seven-Up Bottling Co. of Los Angeles** is bottling Chicago-based A.J. Canfield's Diet Chocolate Fudge Soda (AA, Feb. 14). The lately trendy aspartame-sweetened soft drink will be distributed for the first time in Las Vegas and throughout Southern California. . .**Beatrice Cos.**, Chicago, and the **China International Trust & Investment Corp.**, Beijing, have formed Beatrice-CITIC Development Co. to develop modern consumer products in China. The venture also will develop opportunities for exporting goods from China to international markets. . .**Penton/IPC**, Cleveland, has acquired *Millimeter* from Millimeter Inc., New York. Peter Jablon will continue as president at the magazine. . .**Gannett Media Sales** has added 30 daily newspapers to its Four Color Newspaper Network, bringing the total number of papers that can print high-quality process color advertising to 94. GMS formed the network of Gannett and non-Gannett papers in January (AA, Feb. 4).

U.S. agency income surges 17%

Copyright ©1985 by Crain Communications Inc. Quotations or reproduction in whole or part without written permission is expressly prohibited.

By R. CRAIG ENDICOTT

Continued growth in the U.S. economy in 1984 enabled the U.S. advertising agency industry to increase worldwide gross income by 17% over 1983, to $7.23 billion, on worldwide billings of $49.36 billion, up 17.3% from 1983.

U.S. gross income increased 18.3%, to $5.34 billion, and U.S. billings jumped 18%, to $36.56 billion, as U.S. gross income and billings increased a percentage point to 74% of world gross income and billings, according to ADVERTISING AGE's 41st compilation of U.S. agency data.

The survey is based on year-to-year data supplied by 619 agencies, the preponderance of total gross income and billings coming from the 162 agencies that fall within AD AGE's top two of four categories used to group agencies in this issue.

Those categories, Nos. I and II, made up of agencies reporting $5 million or more in gross income, contributed 91% of worldwide gross income and billings for both 1983 and 1984 among the universe of 619 U.S. agencies monitored.

The Young & Rubicam agencies continued to head all others in world income with aggregate gross income of $480.1 million, and Ted Bates Worldwide held on to the No. 2 position with $424.4 million as the remaining agencies in the top 10 elite played musical chairs. Doyle Dane Bernbach International was the only agency to leave the group, being replaced by Grey Advertising.

Similar shuffling occurred among the top 10 agencies in world billings following the $3.2 billion from No. 1 Young & Rubicam, the perennial leader.

Ogilvy & Mather squeezed past Ted Bates and J. Walter Thompson Co. into No. 2, while a shuffling of positions characterized the remaining slots. The only agency to exit the world billings chart was SSC&B:Lintas International, giving way to Doyle Dane Bernbach International.

The story among this grouping was Ogilvy & Mather's quick surge behind Y&R, propelled by its strong U.S. base. This was evidenced by a similar rise by O&M from No. 4 to No. 2 in U.S. gross income behind Y&R. The spurt, which supplanted Ted Bates, was fueled by an increase of 32.5% in U.S. income.

O&M credits this strong stateside performance to $300 million in new assignments picked up from existing clients, primarily American Express, AT&T, Mattel, Sears, Roebuck & Co. and Kimberly-Clark.

There were no new entries to the U.S. income top 10 chart.

The prospect of repatriating U.S. dollars to foreign countries, which often has lured foreign agencies to shop stateside for clients and agencies—perhaps more so now than before with the dollar still peaking—was behind the move by Paris-based Eurocom to re-enter the U.S. market by buying 51% of Y&R-owned Marsteller Inc. Marsteller, merged with Eurocom's Havas Conseil, is now No. 22 and renamed HCM.

Geers Gross, the public U.K. agency whose major advertising activity is through its New York unit, also sold a minority interest to Eurocom. Eurocom's last dally in the U.S. market was in 1979 when it bowed out of Kelly, Nason, a shop it had taken over two years earlier.

McCann-Erickson Worldwide, the largest agency among the Interpublic Group of Cos., again outdistanced the rest of the field in the non-U.S. billings category with total foreign billings of $1.38 billion. J. Walter Thompson Co. stayed close in the second position with $1.25 billion. Saatchi & Saatchi Compton Worldwide, aided by a 28.7% increase in non-U.S. billings from 1983, pushed Ted Bates out of third place with $1.21 billion from clients abroad. This was the only position change among the top 10.

Further evidence of the importance of foreign billings among these three leading agencies is their high percentage of non-U.S. billings to total capitalized billings. At McCann-Erickson, it was 63.6%, JWT 46.2% and Saatchi & Saatchi Compton 52.5%.

Saatchi & Saatchi Compton was perhaps the most aggressive player among the top 10 agencies. The agency, whose British owners entered the U.S. ad scene through the

Ad Age honors BBDO as Agency of the Year

By STEWART ALTER

Philip Dusenberry shrugs off a question about his philosophy of advertising, saying it's hard to summarize.

But then, the vice-chairman and executive creative director at Batten, Barton, Durstine & Osborn recalls the advice he gives to the people who work for him: "Don't get happy too soon with the first idea that comes into your head" and "if it feels or sounds familiar, don't do it."

Those guidelines may explain why BBDO last year proved that advertising rules were made to be broken, especially in an age of increasing commercial clutter. This fresh approach won BBDO the 1984 Agency of the Year award from ADVERTISING AGE.

BBDO Inc.—which encompasses the New York, Detroit and Minneapolis shops—did not just slip out of the creative straitjacket in a couple of highly publicized instances. In one product category after another, BBDO found ways to avoid the familiar.

BBDO abandoned the seemingly mandatory theme-song and life-style approach for soft drink advertising—approaches the agency introduced to the category for longtime client Pepsi-Cola Co. Similarly, BBDO replaced the usual suffering faces in cold remedy advertising with lively feet and an upbeat theme for Menley & James Laboratories' Contac.

When BBDO came up with alternatives, it did not turn to arresting production techniques for their own sake. The new approaches were married to sound strategies. Cars drove up buildings and into dreamland to combat Dodge's staid image; fragmented closeups and intimate dialog were used to help Diet Pepsi target the sophisticated low-cal sipper, and an intense zoom-in shot was used to capture the muscle of Black & Decker's power tool heritage.

The agency demonstrated mastery over a range of techniques, from presenting facts to projecting images. BBDO applied wit to Black & Decker's Car Vac, Gillette's Dry Idea and Campbell Soup Co.'s Chunky Soups. It used warmth for General Electric and Home Box Office.

And at a time when the argot of advertising increasingly is being translated from the world of cinema and pop music, this 94-year-old agency proved itself among the more fluent in the language of a "whole new generation."

Its standout campaign of the year had to be the Pepsi-Cola USA work. While its advertising for Pepsi always has been among its best, BBDO broke tradition last year with its "Choice of a New Generation" campaign. The long Coke vs. Pepsi battle over which one could sing a better jingle or portray people having more fun at picnics finally came to an end, or at least entered a lull.

With what it called its "leading edge" strategy, BBDO tried to reach out to the new, younger generation in their own language and not through any single campaign format.

Michael Jackson filled the bill by singing for Pepsi an adaptation of his "Billie Jean."

None of the other new commercials for Pepsi had music. Instead, the spots were takeoffs of popular science-fiction movies such as "E.T." and "Close Encounters of the Third Kind," or the spots created their own format, such as the Cannes Gold Lion award-winning commercial in which a young man opens, pours and drinks Pepsi over a sound truck's microphone to stimulate sales to hot, thirsty beachgoers.

These commercials were the result of a process that would have been impossible even in the recent past at BBDO, a strategy-oriented, research powerhouse. The Pepsi campaign "was a creative intuition that became a strategy and the creative theories turned out to be strategically correct," says Allen Rosenshine, chairman-chief executive officer of the agency, who on April 1 will succeed Bruce Crawford as president-ceo of the agency's parent, BBDO International.

Mr. Crawford, who then will become chairman, a post that has been vacant, until the end of the year when he will become general manager at the Metropolitan Opera in New York, took over as president of BBDO International in 1975, became ceo in 1977 and built the largely U.S.-oriented network into a multinational agency. Non-U.S. billings since that time have risen from $147 million to $694 million.

Over-all, the multinational parent had gross income of $340 million on billings of $2.28 billion in 1984.

The BBDO shop with New York, Detroit and Minneapolis offices being honored in this issue contributed $92.6 million of the total gross income and $617.5 million of total billings.

"The creative intuition was that there was too much similarity in the execution in the category, that Pepsi and Coke were too similar over the years, that other life-style executions were encroaching on them and muddying the soft drink imagery," says Mr. Rosenshine, who sees his task now as maximizing the potential of the international network Mr. Crawford built.

"Pepsi," he says, "in an ongoing fight with a larger company with more money to spend, could not in the foreseeable future continue to see who could come up with a better song and prettier pictures."

Though the process didn't start with facts and figures and a strategic definition, it led to one, Mr. Rosenshine says.

"Pepsi could be seen as younger and more *avant-garde* and that Coke could not abandon its middle ground of Middle America and follow us there."

If BBDO proved that a top agency can be a creative leader, it also exemplified what the big agencies had to leave behind in the mid-1970s, when creativity was considered subordinate to strategy.

"I really agreed very much with Bill Bernbach that, of course, strategy was extremely important, but advertising agencies do not have an exclusivity on this expertise. It also exists among clients," Mr. Crawford says.

"I think if you want to stand out among people who practice this trade, you should be excellent at what is scarcest. One needs both marketing strategy and exceptional creative talent, but one is harder to come by," he says.

"In the mid-'70s, our creative work had slipped quite badly," says Mr. Crawford, whose credits include building the agency's international network and keeping its profit margins among the highest in the publicly owned sector of the industry.

"We lost a number of accounts then, and while we never knew exactly why, my feeling was we were not delivering the product as consistently," he says.

But building a creative reputation is not the same as simply desiring one. In tribute to its management, BBDO grasped relatively early why change was necessary, what was shifting in the world of advertising that undermined the strategy-creativity equation then in operation.

"We had a philosophy in the mid-'70s, and most people thought this, that strategy and execution were separate elements," Mr. Rosenshine says. The procedure then was that the strategy was developed and then "slipped into the cages of the creative animals, who masticated it and spewed it out, at which point it was determined whether the strategy was still on target or not," Mr. Rosenshine says.

Mr. Rosenshine was BBDO's creative director from 1975 to 1980. He spearheaded the movement to again mesh strategy and creativity. He became president in 1980, ceo in 1981 and chairman in 1983 when Mr. Crawford withdrew.

"What happened was parity products. When parity products develop creative strategies, they all

BBDO wins

(Continued from Page 3)

come out the same," Mr. Rosenshine says, explaining why major ad agencies in general have reawakened to the virtue and necessity of creativity.

The use of line extensions and market segmentation by parity product marketers to differentiate themselves has added to the problem. "The problem of parity products was not overcome, but rather exacerbated by market segmentation," Mr. Rosenshine says.

The market pie was getting cut into thinner slices, and the result was a surplus of hard-hitting, rational creative executions that all sounded the same.

They all aimed to be authoritative, assertive, competitive and convincing about why the product they were selling was the best choice for the consumer, he says.

For BBDO, it became clear that the way to go was to leave the rational sell behind. "We are far more devoted now to the concept that advertising is a consumer experience with the brand. We are much more sensitive to and careful that the experience is enjoyable, pleasant, human, warm and emotional, while no less relevant from a sales-strategy viewpoint," Mr. Rosenshine says.

To accomplish this, he notes, the relationship between the creative and research departments had to change. "We went from being Jim Jordan's creative agency to being Phil Dusenberry's," he says. Mr. Jordan left the agency as president in 1978, soon after Mr. Crawford became ceo of BBDO International; Mr. Jordan subsequently has become a principal at Jordan, Case & McGrath, New York.

The first major sign that BBDO was becoming more of a creative force came in 1979. BBDO competed head-to-head against Young & Rubicam for the whole General Electric account—which both shared—and won with its "We bring good things to life" theme.

But, in 1980, the agency's efforts might have been derailed when it suffered what everyone at the agency acknowledges as a "shock" and a "blow"—it lost the Chrysler Corp. account, more than 20% of its business.

"The effect of that is that it taught us we could survive it," Mr. Rosenshine says. "It also taught us to make strategic choices about the business we would be going after. We began to have criteria for new business prospects. Crawford made the choice that we would only replace Chrysler with something with as much potential."

Chrysler returned its Dodge division to BBDO in 1982 and that car account since has become one of the agency's creative showpieces.

Ben Bidwell, exec vp, Chrysler Corp., has to get much of the credit for BBDO's new wave Dodge advertising. He brought in a reel that showed some automotive commercials, for the most part European, and very much new wave—the direction Mr. Bidwell wanted to go. "We said, 'Ben, if you're serious, we'll bring it to you, but you understand it will be controversial,' " says Tom Clark, BBDO's president-chief operating officer.

Sensuous women dress tastefully with Pierre Cardin.

It may have been controversial within the ranks of Chrysler, but it was not particularly risky. "It might have been risky for a nameplate that had a larger share of market and that had a prospect base which was healthy. In Dodge's case, that was not true," Mr. Clark says.

The commercials, the most prominent of which showed a car driving up a wall and carrying a young woman to a heaven where handsome bare-chested men ride around on white horses, have spurred positive results. Sales have risen and recent research showed the new imagery is attracting a younger, more upscale, more active car buyer—the campaign's goal.

It is this success that best points to what may be BBDO's major accomplishment: Breaking the rules to push through the clutter with executions that enhance, rather than undermine, the sales message.

The Black & Decker corporate campaign is another prime example of BBDO's ability to break the rules without undermining the message. In each Black & Decker commercial, the spot ends with the phrase, "Built like a Black & Decker."

"It breaks the rule that you always have to show what you're saying and say what you're doing," Mr. Dusenberry says, referring to the opening zoom shot that kicks off each spot. "It's a compelling visual that's so simple it allows you to listen to what's being said, even though the visual doesn't fit in with the words," he says.

Similarly, last year's Diet Pepsi commercials with their visually fragmented approach was a clutter-breaking idea. The film focused on faces of men and women engaged in private conversation, with "Pepsi" interspersed into their dialog.

"We're not used to hearing intimate dialog in commercials," Mr. Dusenberry says. "If they do, it's usually dialog about a product attribute."

But the technique was also meant to draw in the slightly more sophisticated target customer for the product.

BBDO has continued into 1985 with demonstrations of how creative style can enhance an ad message. A recent commercial for General Electric audio products shows a futuristic scene in which space travelers set a frozen civilization free with the power of music.

This becomes BBDO's third major campaign in the past year to go the futuristic or science-fiction route, the others being Pepsi and Dodge.

"Science fiction is an easy route to modernity and contemporary positioning," Mr. Rosenshine says.

"It allows companies like General Electric, Pepsi and Dodge, which have a traditionalism about them, to tap into a contemporary style of communication without having to create their own milieu, which could be in violation of the consumer's perception of them."

Dodge, in particular, is a case where today's products are way ahead of the company's old-fashioned image, Mr. Rosenshine says.

"Dodge's reputation, like BBDO's, has lagged and been mired too much in the past," Mr. Rosenshine says.

And BBDO, in transforming the image of clients, has shown a particular creative gift of self-rejuvenation.#

Dusenberry plays creative hardball

Phil Dusenberry helped create the advertising that helped re-elect the President and found himself at the center of a minor controversy in the process.

The vice-chairman and executive creative director of Batten, Barton, Durstine & Osborn was a member of the Tuesday Team, the *ad hoc* group of advertising heavyweights who did the advertising for President Reagan's re-election campaign. It was Mr. Dusenberry who wrote and produced the 18-minute film that introduced the President on the closing day of the Republican National Convention.

Two of the networks refused to air the $425,000 film, which even its critics conceded was a moving and beautifully photographed tribute. The networks said the film lacked balance and that showing it would have amounted to free advertising for the President. Some observers objected to what they said was the film's implication that President Reagan personified the values of all America.

The characteristically low-keyed Mr. Dusenberry was unfazed by the fuss. "The film totally reflected the President and the optimism of America. It spoke to the people of America," he says.

Mr. Dusenberry believes the Tuesday Team's work in general brought a new dimension to campaigning. "I think it broke new ground for political advertising in that most political advertising, at least in times gone by, was amateurishly done," he says.

His Tuesday Team work wasn't the only notable extracurricular work for Mr. Dusenberry last year. Years ago, the rabid baseball fan (and one-time aspiring big-league catcher) wrote a screenplay for one of his favorite books, Bernard Malamud's "The Natural."

It met nothing but rejections and roadblocks before finally catching the eye of Robert Redford and making it to the screen last year. The film, which Mr. Redford directed and starred in, was a box-office hit and continues to be a popular videocassette offering.

There was a bit of controversy involved in "The Natural" also. As it neared production and encountered the inevitable rewriting, Mr. Dusenberry's name was dropped as author of the screenplay. He quietly but persistently protested and ultimately wound up in the credits as co-author.

The movie also was criticized for changing Malamud's bleak ending to an upbeat one. The happy ending, which Mr. Dusenberry cheerily concedes was all his doing, surprised no one who knows him or his advertising.

Criteria applied to selecting Agency of Year

ADVERTISING AGE's annual selection of Agency of the Year is based on evaluation, by a committee of the publication's editors, of the creative product of the nominated agencies.

The creative product, rather than business success or number of accounts gained, is given primary attention in order that agencies of all sizes and types can be considered for the annual award.

The creative product can include copy, creative strategies, merchandising, media planning, research and related factors.

An agency's business success and growth throughout the year is considered only to the extent that it is reflective of creative excellence.

Nominations for Agency of the Year are submitted to the editors by editorial staff members in all ADVERTISING AGE bureaus and offices.

While primary emphasis is put on nominations from members of the AD AGE staff, careful consideration also is given to the candidacies advanced by the agencies themselves.

Staff nominations result from the monitoring of the advertising agency business throughout the previous year in the course of covering the news.

This year, the final selection of the Agency of the Year came down to four agencies. BBDO faced stiff competition from Avrett, Free & Ginsburg, Chiat/Day and Young & Rubicam, but BBDO's innovative yet effective approach applied in its creative output separated it from the contenders.

Included in this issue are brief summaries and portfolios of these runner-ups considered in the final round of judging. Check the contents strip on Page 1 for the location of the writeups on these candidates.

1975—Leo Burnett Co.
1974—Scali, McCabe, Sloves

Advertisers draw bead on agency reputations

By JOSEPH M. WINSKI

J. Walter Thompson USA and Ogilvy & Mather are the nation's two best ad agencies, and Chiat/Day is the hottest, the nation's advertising directors say.

Those are some of the key findings of an exclusive ADVERTISING AGE poll of company ad directors across the country. Other results:

Which are the hottest agencies?

Rank	Agency
1.	**Chiat Day**
2.	**Fallon McElligott Rice**
3.	**Needham Harper**

- Awards do seem to matter.
- Less than half of the clients surveyed believe they will have the same primary agency five years from now.
- Nearly two-thirds of all clients surveyed have been approached by agencies seeking business within the past three months.
- Client satisfaction with agencies is lowest in the West.
- Female ad directors are more likely to dump their agencies than male ad directors.

This Survey of Agency Reputations, which will be repeated periodically to track changes, was conducted for AD AGE by SRI Research Center of Lincoln, Neb., in the last quarter of 1984. SRI questioned a random sample of 300 ad directors of companies with revenues of more than $25 million a year. Questioning was limited to the top 20 U.S. markets.

Asked to name the agency that "provides the best over-all services and products," more ad directors named JWT than any other agency, but the margin over No. 2 Ogilvy & Mather was slim: 8.3% to 7.7% of responses.

Rounding out the best over-all agencies were Young & Rubicam, No. 3 (with 6.3% of the responses); Leo Burnett Co., No. 4 (4%); BBDO International and McCann-Erickson Worldwide, tied for No. 5 (3.7% each); Doyle Dane Bernbach International, D'Arcy MacManus Masius, Bozell & Jacobs and Foote, Cone & Belding, all tied for No. 7 (3% each).

JWT's reputation among ad directors is distinguished by its across-the-board strength.

Of the six criteria by which respondents were asked to appraise agencies, JWT was judged best in five: Media planning and buying, account execs, marketing assistance, top management and research.

The numerical results were supported by followup questioning. Asked why they considered JWT to be the best agency, respondents invariably cited the agency's breadth. The ad director of a New York marketer said he was impressed by JWT's "total service concept." His counterpart at a Minneapolis-based food company cited the agency's "under-one-roof service."

Only JWT's relatively "poor" performance in creativity kept it from laying undisputed claim to the best agency title. JWT finished No. 4 in creativity. Few of the ad directors who picked JWT to be the best agency stressed creativity when explaining their choice.

Ogilvy & Mather's strength, on the other hand, derives largely from its creative output. That's the most critical criterion, according to the ad directors: 36% of them cited creativity as "the most important strength an agency must have."

Which agency is the best?

Rank	Agency	%*
1.	**J. Walter Thompson**	8.3
2.	**Ogilvy & Mather**	7.7
3.	**Young & Rubicam**	6.3
4.	**Leo Burnett Co.**	4.0
5.	**BBDO International**	3.7
	McCann-Erickson	3.7

* % responses

They rated Ogilvy & Mather tops in creativity. Its hallmark is its "really good creative people," the ad director of a New York financial institution said

Chiat/Day, the smallest agency to finish in the top three in any of the measured criteria, was ranked No. 2 by ad directors in creativity. The agency executives are "creative in a straightforward sense; they infuse humor and wit in their ads," said the ad director of a Dallas marketer. Doyle Dane Bernbach was No. 3 in creativity.

JWT, which has been one of the most aggressive agencies in self-promotion, was the clear winner in top-of-mind awareness. Twenty-five per cent of the ad directors named JWT when asked to name the first ad agency that came to mind. Ogilvy & Mather finished second in awareness with 15% of the responses.

They were followed by Young & Rubicam (12%), BBDO International (11%) and Doyle Dane Bernbach (9%). The survey found a positive correlation between awareness of an agency and ad director perceptions of its strength.

Los Angeles-based Chiat/Day, probably best known for its work for Apple Computer, was judged by ad directors to be the "hottest up-and-coming agency" in the country.

Fallon McElligott Rice was No. 2 among the hottest agencies. "They've got the best copywriters in the business," one ad director said. Needham Harper Worldwide was No. 3 in the category.

The value of awards to an agency is much debated within advertising, but the ad directors indicated they are an important barometer. "Reputation and past awards" were cited most often—by 16% of the respondents—as the reason for picking an agency as the best.

The greatest weakness among agencies generally, the ad directors said, is their lack of knowledge of the client's business. That deficiency was mentioned by 20% of the directors, nearly three times the number who said poorly trained account execs were the biggest problem.

The survey turned up significant geographical differences in agency assessment. Ad directors in the West expressed the most dissatisfaction with their agencies. The biggest surprise was that ad directors in the West gave their agencies lower scores for creativity, which much current opinion holds to be a forte of the West Coast agencies.

Which agency first comes to mind?

Rank	Agency	%*
1.	**J. Walter Thompson**	25
2.	**Ogilvy & Mather**	15
3.	**Young & Rubicam**	12
4.	**BBDO International**	11
5.	**Doyle Dane Bernbach**	9

* % responses

Despite Chiat/Day's West Coast base and the acclaimed work turned out by other California agencies such as the San Francisco offices of Ogilvy & Mather and Foote, Cone & Belding, only 30% of the ad directors in the West rated their agencies excellent in creativity, versus the 41% of the national sample who did so.

One theory: Ad directors compare their agencies' work with that of the best in the West—which is very good—and find their agencies wanting.

The West also was rated significantly lower in quality of account execs and top management. The West and South were both rated low in marketing skills. Ad directors in the South also rated their agencies relatively low in media planning and buying.

What are the most important agency attributes?	Which agencies are best at that?
1. Creativity	**1.** Ogilvy & Mather **2.** Chiat/Day **3.** Doyle Dane Bernbach

Ad directors in the North Central and East areas gave their agencies significantly better marks in creativity. The East scored high in account execs and top management.

Nonetheless, a significantly higher proportion of ad directors in the East indicated they were likely to change agencies; 37% of the East respondents disagreed or strongly disagreed with the statement, "My current agency will still be my primary agency five years from now."

That compared with 31% in the West, 27% in the North Central area and 28% in the South.

Nationally, 31% disagreed. But with more than 15% saying they didn't know and 4% saying they were neutral, that left less than half of the advertisers nationally agreeing that they would have the same agency in five years.

Female ad directors appear to be more restive than their male counterparts. Some 38% of the women surveyed disagreed—including 17% who strongly disagreed—with the statement that they will have the same agency in five years. Only 28% of the men disagreed, including just 7% who strongly disagreed.

Agencies are feeding the restiveness: 65% of the clients surveyed said they had been approached by agencies seeking business within the previous three months.#

For additional information on this survey, contact Gary Gabelhouse, SRI Research Center, 301 S. 68th St., Lincoln, Neb., 68510. Phone: (402) 489-0351.

Backer & Spielvogel, New York, reported gross income of $59,330,000 in 1984 on billings of $395,730,000. For 1983, the agency restated its gross income at $51,608,000 on billings of $344,055,000, compared with estimates submitted that year of $45,000,000 in gross income and $300,000,000 in billings.

The agency's 1984 volume consisted of $391,602,000 in media and $4,128,000 in capitalized fees. Backer and Spielvogel's 1983 volume consisted of $334,828,000 in media and $9,227,000 in capitalized fees.

In 1984 the agency gained: James Catto & Co.'s Steidl's wine cooler, Miller Brewing's Milwaukee's Best, Philip Morris USA's Parliament cigarets, Quaker Oat's Celeste frozen pizza. It lost: Sony Corp. of America's Betamax video-

Profiles with a checked box (☑) indicate an independent cpa or accounting firm has signed a statement of verification supplied by ADVERTISING AGE. *Those with a checked box and dagger (☑ †) were also signed by independent cpas and accounting firms who supplied their own verification language that was accepted by the editors. See story below left.*

Cpas verify '84 agency returns

This 1984 survey marks the first year ADVERTISING AGE has sought verification of an agency's domestic U.S. gross income by an outside accountant.

The step was taken to move toward greater assurance that the published figures are the most reliable that are available to those who need dependable information on agency performance.

Participating agencies with $5 million in gross income or above in the 1983 issue were notified of this move toward verification in the fall of 1984 and were asked how they would respond.

Many of those responding said they would attach an accountant's signature. The agencies were informed at that time that such a signature would be purely voluntary, and that ADVERTISING AGE would make note of those who volunteered a signature.

Those agencies who provided a signature are noted in this issue by a check mark within a box (☑) in the profile of the agency. More than a third of the agencies in this 41st annual issue signed the following AD AGE statement:

> *The undersigned, acting as outside accountant for the agency, confirms that the U.S. income figure indicated above for the year 1984 reflects totals as entered on the books of the company for the period reported.*

A number of cpa firms opted for greater clarification of the language and submitted their own finely tooled statements, which were accepted. Most of those adopted a statement drafted by the advertising committee of the New York State Society of CPAs. (See New York CPA statement in accompanying box.) That statement notes that a cpa's confirmation of the U.S. gross income does not constitute an examination (audit) in accordance with generally accepted auditing standards; therefore, a signature would not mean that the cpa was expressing an opinion (which comes with an audit).

"An accountant would probably do the same thing with your statement as with ours," says Gene F. Gaughan, chairman of the New York State Society of CPAs, "only ours is in keeping with standards adopted for legal reasons by the profession."

Neither the AD AGE nor the New York CPA statement requires an audit, which can be expensive and is unnecessary in general for small agencies.

Those agencies whose cpa firms used this New York Society of CPAs' statement or a form of it in complying with the AD AGE verification request are noted in the issue with a dagger adjacent to the marked box (☑†). Alternate statements from accountants generally were accepted in this attempt to seek greater verification.

Despite the strong response from the accounting profession, a number of smaller agencies failed to respond to the AA questionnaire, probably because of the verification procedures. Some blame for this fallout also may be attributed to AA's newly computerized mailing sent to "agency principal." One such betitled exec wrote: "Sorry we're late, but our mail room doesn't know anybody by the name of agency principal."

NY cpa statement accepted

To agency board of directors:

We *(the accounting firm)* have applied certain agreed-upon procedures, as discussed below, to the accounting records of *(give name of agency)* for the year ended Dec. 31, 1984, solely to assist you prepare your report to appear in the "1984 Agency Income Report" to be published by ADVERTISING AGE on March 28.

It is understood that our report on your accounting records is solely for your information and is not to be referred to or distributed for any purpose to anyone who is not a member of management of your agency without our consent. You may attach a copy of this letter to your agency's report to ADVERTISING AGE.

Our procedure was to confirm total 1984 "U.S. Income" of *(the amount is given)* shown on line 1 of the agency income questionnaire agreed with the balances in general ledgers or other financial records maintained by your agency and its U.S. affiliates.

Because the above procedure does not constitute an examination made in accordance with generally accepted auditing standards, we do not express an opinion on any of the accounts or items referred to above.

In connection with the procedure referred to above, no matters came to our attention that caused us to believe that "U.S. Income" should be adjusted. Had we performed additional procedures or had we completed or made an examination of the financial statements in accordance with generally accepted auditing standards, matters might have come to our attention that would have been reported to you.

This report relates only to the accounts and items specified above and does not extend to any financial statements of your agency taken as a whole."

There's no place like home.

Buy MSG Network and feel right at home.

That's where the New York Rangers' explosive brand of hockey teams up with the hoop magic of Bernard King and the New York Knicks to give you a competitive edge: our home team advantage.

MSG Network brings you New York's home teams *live* as part of a complete package of exclusive first-run sports and entertainment programming that also features the best in professional and Golden Gloves boxing, pro wrestling, pro tennis, top collegiate sports, special events like the Millrose Games and the National Horse Show, and more.

As a home team season sponsor, you'll enjoy broad exposure over MSG Cable, WOR-TV, and MSG Radio that will hit our fans right where they live: in New York, northern New Jersey, and Connecticut. A diverse group of upscale sports fans with a home team loyalty you won't find anywhere else.

And to make you feel even more at home, we offer some exciting extras. Like multiple exposures in team programs, game schedules, and Madison Square Garden arena signage. Plus, we'll work with you to develop tailor-made merchandising programs and promotions.

We make spot buyers feel right at home, too, with fan loyalty that's yours no matter which of our programming you choose.

So call us today at (212) 563-8962 and get the specifics on how the home team advantage can work for you. We'll show you why there's no place like MSG Network.

Dancer Fitzgerald Sample, New York, reported gross income of $110,409,000, of which $1,170,000 was non-U.S. contributions, in 1984 on billings of $758,003,000. In 1983, it reported gross income of $105,000,000, of which $10,950,000 was non-U.S. contributions, on billings of $726,095,000.

The agency's 1984 U.S. volume of $750,200,000 and 1983 volume of $627,000,000 were all in media.

Overseas, its 1983 dollar volume of $7,803,000 and its 1983 volume of $99,095,000 were all in media. DFS' reduced overseas dollar volume is traced to the March, 1984, sale of its ownership in 13 European agencies to Dorland Advertising, London, a subsidiary of Saatchi & Saatchi Compton Worldwide. The European group, considered a second network for Saatchi & Saatchi, had total billings in 1984 of $308,600,000.

After the sale to Dorland, DFS reaffiliated with Dorland to form Dorland-DFS International network, although retaining no equity interest. DFS and Dorland had been partners in Europe through the DDF (Dorland, Dancer, Fortune) network that broke up six years ago.

DFS holds little equity in the shops making up its DFS International network, which covers essentially the Far East and Latin America. All of that equity is held in three shops: DFS/Australia and NDC/DFS and Yomiko in Japan. That equity is the basis of the foreign income and billings attributed to DFS in this report.

Included in the agency's figures are the billings and gross income of the following U.S. subsidiaries:

- DFS Direct
- DFS/Wegener Agricultural Group
- Program Syndication Services
- DFS Program Exchange
- DFS Corporate Advertising Group

In 1984 the agency gained: DFS/New York—Western Union Easylink, Popsicle Industries, Martlet Importing's Molsen Golden beer, General Electric Rechargeables, Republic Airlines, Entre Computer Centers, Nabisco Oreo Cookies 'n Cream, CPC International Best Food div.'s Mazola corn oil, Karo corn syrup, Argo and Kingsford corn starch, Golden Griddle syrup. DFS Direct—All American Sports, Citibank, MacMillan Book Club, Western Union. DFS/Torrance, Cal.—Ashton Tate, Edelbrook Corp. auto aftermarket products, Bausch & Lomb's Bushnell div., KOVR-TV, Greatwest Hospitals. DFS/San Francisco—Megaphone Co. phone information system, Tri-Valley Growers' Libby and Sacramento brand juice products, Compris Hotel Corp., Itel Corp. In addition, the office gained about $20 million in billings from the purchase of San Francisco agency Wilton, Coombs & Colnett.

It lost: DFS/New York—Hellmann's mayonnaise. DFS/Torrance, Cal.—Bridgestone Tire Co. DFS/San Francisco—Grid Systems, IBC Prune Board.

Overseas, it gained: Duetz-Fahr Argentina, Crush soft drinks, Banco de Galicia, Veme women's swimwear, Stani candies (Argentina/Lautrec); Malaysian Tourist Board (Australia/DFS Australia); Toyota do Brazil (Brazil/Esquire); Canadian Egg Marketing Board, Xanaro Technologies, Brownies Franchises cooked chicken, Crush Canada (Canada/Ronalds-Reynolds); Salco Drugstores, Feltrex Carpets, Winter Sausage (Chili/Israel & DeBianchi); Reckitt & Colman's Sanpic, Cherry, Brala and Mansion, Cremhelado's Heladino, Frutti and Ski, Quaker's Frescavena, (Colombia/Contacto Publicidad); Danpo frozen chicken, DFDS sea transport/holiday tours (Denmark/Bergenholz & Arnesen); Bergenheim Yhtiot, Insko, Ekonon, Finnpap, Neste OY, Outocumpu OY (Finland/OY AC MAINOS); Jaguar, Italimprese, Federconsorzi (Italy/Dorland/DFS Italia); CPC's Skippy peanut butter (Japan/NDC); Philip Morris Asia Retail Assistance Program (Japan/Yomiko); Sat Nam yogurts, Larousse dictionaries (Mexico/Iconic); Mair Foods' meat, seafood & horticultural exporters, New Zealand Health Dept., New Zealand Kiwifruit Authority, Auckland Region Visitors & Convention Bureau, Time-Life New Zealand (New Zealand/Carlton-Carruthers); Puerto Rico Dept. of Agriculture, Puerto Rico Power & Light Co. (Puerto Rico/J.R. Marquina); Bacardi Rum (Spain/Tapsa); B&W Hypermarket, General Bisquit, Nordstjernan (Sweden/DFS Pihlstrom); British Telecom's tv buying and flotation, B&Q, Camerons, *Daily & Sunday Telegraph*, Dow Chemical, Duracell, Heinz tv buying, Hoseasons, LRC, Orbis Publishing, Pimms, Sekonda Watches, Templeton's Stores, United Biscuits-TFC Sorge (U.K./ Dorland); Ceramics Piemme, Compania de Telefonos (Venezuela).

It lost: L'Eggs (Australia/DFS Australia); Duracell (Brazil/Esquire); New York Life Insurance, St. Hubert Barbeque (Canada/Ronalds-Reynolds); Ferios Chilena del Libro bookstore, (Chile/Israel & DeBianchi); Baboo, Holguines (Colombia/Contacto Publicidad); Volvo, Valtameri OY, Bausch & Lomb (Finland/OY OC MAINOS); General Mills Toys (Italy/Dorland/DFS Italia); Christian Dior, Nuevo Vallarta (Mexico/Iconic); McLean Engineering (New Zealand/Carlton-Carruthers); BMW Iberica (Spain/Tapsa); Robinsons Cosifits (U.K./Dorland).

Billings breakdown: Newspapers 2.8%, magazines 10.8%, supplements 0.7%, radio 5.4%, network tv 37.4%, spot tv 35.7%, cable tv 2.3%, outdoor 1.8%, business papers 1.2%, farm publications 1.3%, transit advertising 0.3%, other 0.3%. Employes: 3,352 in 49 offices. Top execs: Stuart B. Upson, chairman-ceo; Peter F. McSpadden, president-chief operating officer; William McC. Vickery, Robert E. Kennedy, vice-chairmen; Gary M. Susnjara, president-DFS/New York; Nelson (Skip) Riddle, president-DFS/Torrance; Ronald Colnett, president-DFS/San Francisco.

☑

HCM, New York, the new signature created by the September, 1984, merger of major French agency, Havas Conseil, and New York-based Marsteller Inc., reported gross income of $75,282,000 of which $44,700,000 was non-U.S. contributions, in 1984 on billings of $501,984,000. In 1983, comparable figures would be gross income of $59,857,000 of which $31,800,000 was non-U.S. contributions, on billings of $399,140,000.

The agency's 1984 U.S. volume of $203,984,000 consisted of $109,807,000 in media, $34,663,000 in materials and services and $59,514,000 in capitalized fees. Its comparable 1983 U.S. volume of $187,140,000 consisted of $103,073,000 in media, $40,553,000 in materials and services and $43,514,000 in capitalized fees.

Non-U.S. volume in 1984 was $298,000,000 compared with $212,000,000 in 1983. Havas Conseil's results were the lion's share of international billings for both years.

Under the merger, Young & Rubicam, owner of Marsteller, got 49% of the new agency, and Eurocom, parent of Havas Conseil, got 51%. Burson-Marsteller, the public relations unit of Marsteller, remained 100% owned by Y&R. Its gross income and billings do not appear in the 1984 or 1983 results shown. Traditionally consolidated with those of Marsteller, the pr unit's results were subtracted from the 1983 figures. Those of Havas Conseil were added to Marsteller in 1983 to arrive at a comparable year-to-year growth figure for the two HCM partners. In 1983, consolidated figures for the advertising and pr units at Marsteller Inc. were fee income of $84,258,000 on capitalized billings of $562,000,000.

The Eurocom connection gives Marsteller greater European presence. The European group will include about $300 million in billings distributed in 14 French offices and 13 in other European countries. Marsteller brings a London office into the group for the first time. Eurocom finally gets a foothold in the U.S. following an uncessful attempt to establish Kelly Nason, New York, as its U.S. base in 1977. That lasted two years before Kelly Nason employes bought back the agency.

In 1984 the agency gained: Perkins Restaurants, Charles P. Young, GAB Business Services, Mita Copiers, Spiegel Retail, Connecticut Bank & Trust. It lost: Alinet, Vernor's.

Overseas, it gained: Toshiba Copiers & Computers, Penney, Swiss Credit Bank, Mahou beer, Chanel, Camel Plus pay tv, Materne preserves, A. Blatt wool. Lost: None.

Billings breakdown: Newspapers 8.1%, magazines 21.8%, supplements 0.2%, radio 6.5%, network tv 20.8%, spot tv 14.3%, outdoor 1.0%, business papers 27.3%. Employes: 1,329 in 25 offices. Top execs: R. Y&R: An impressive runnerup

One of the many apocryphal tales in advertising deals with a client who went about choosing his new agency by reviewing major account changes of the year and figuring out which agency was the most consistent runnerup. That was the agency he selected.

He explained, the legend goes, that because different clients have different needs and different reasons for their first choice, it is the steady second-place finisher that is, by anyone's criteria, generally doing the best work.

For those who follow that logic, Young & Rubicam's credentials would appear to be in good order. Advertising Age editors were sufficiently impressed by Y&R's 1984 creative output to make the agency their runnerup choice behind BBDO. Y&R was also a finalist last year. And it was the co-winner in 1978, along with N W Ayer.

Among the Y&R creative work most often cited were ads for American Telephone & Telegraph, Lincoln-Mercury, Jell-O, Thomas' English muffins, Campbell Soup Co., U.S. Postal Service and 7-Eleven stores.

The agency is justifiably proud of its track record in the creative award derby:

It recently produced an 90-page catalog of ad awards garnered by its various agencies around the world. In the foreword, Y&R's Alex Kroll, recently named chief executive officer, wrote:

"While we do not measure our success by awards . . . they tell us whether our creative product is near, or at, the leading edge of inventiveness . . . . They show us where we stand in the 'art' of commercial communications, which is at least half the business."

"Little Rascals" rally around Jell-O Gelatin Pops stand.

JELL-O
GELATIN POPS

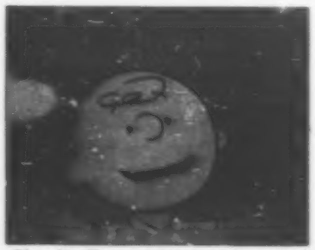
Dr Pepper can slake the mighty thirst of Godzilla.

The list includes 13 citations from the International Advertising Film Festival at Cannes.

Ad Age's editors noted that in 1984 Y&R was particularly adept at adding familiar touches to a number of clients' tv spots for added impact.

For example, A Mercury class reunion spot was reminiscent of "The Big Chill" movie of a similar theme, Dr Pepper used a takeoff on Godzilla and another on the bar scene in "Star Wars." A band of "Little Rascals" types appeared in Jell-O spots, an Ed Sullivan spoof was the theme of a Ruffles commercial, and old movie clips were used in a Dentyne spot.

And the agency recently broke a major campaign for Metropolitan Life using the popular "Peanuts" comic strip characters.#



Charlie Brown gives sales pitch for Metropolitan Life.

Lincoln-Mercury rolls into town for a reunion . . .

. . . and lost friends arrive "home" as in "The Big Chill."

Materials/services	N/A	32.4	N/A
Capitalized fees	N/A	177.2	N/A

Saatchi & Saatchi Compton Worldwide, New York, reported gross income of $337,534,576, of which $180,162,576 was non-U.S. contributions, in 1984 on billings of $2,301,683,353. In 1983, it reported gross income of $253,266,000, of which $142,410,000 was non-U.S. contributions, on billings of $1,710,569,000.

The agency's 1984 U.S. volume totaled $1,093,329,000 compared with $771,785,000 in 1983, which the agency broke down into $562,206,000 in media, $32,404,000 in materials and services and $177,175,000 in capitalized fees. No U.S. volume was provided.

Overseas, its 1984 dollar volume was $1,208,354,353 compared with $938,784,000 in 1983, neither figure of which was broken down.

Included in the agency's figures are the billings and gross income of U.S. subsidiaries:

- Saatchi & Saatchi Compton Inc.
- Irv Koons Associates
- Rumrill-Hoyt
- Fairfax Inc.
- Cochrane Chase, Livingston
- Klemtner Advertising
- Mayo Infurna Design
- Cadwell Davis Partners
- Hoffman York
- McCaffrey & McCall
- Kleid Co. (direct mktg)

(See separate profiles elsewhere in this issue on many of these U.S. subsidiaries. Also check Saatchi & Saatchi Co. Plc profile in the story on group agencies.). Domestic figures also include the advertising activity of Hay Group, the UK-based advertising and management consulting company. Virtually all that advertising activity is in the U.S.

Compton Advertising, which ranked 26th in gross income among U.S. agencies in 1983, is now called Saatchi & Saatchi Compton Inc., which had estimated gross income in 1984 of $59,000,000 on estimated billings of $414,300,000. These figures are consolidated into Saatchi & Saatchi Compton Worldwide.

The overseas business is dominated by two agencies under the Saatchi & Saatchi Worldwide umbrella—Saatchi & Saatchi Compton Inc. (formerly Compton in New York) and Saatchi & Saatchi Compton London, lead agency of the Saatchi & Saatchi Group UK subgroup which also includes Downton, Crawford Halls Harrison Cowley, Acme Media, RPG Gloucester, Sales Promotion Agency, Dorland Advertising and KMP. Group UK reported in 1984 gross income of $82,000,000 on billings of $550,960,000 compared with gross income in 1983 of $65,977,500 on billings of $440,079,000. Returns from Dorland Advertising's European network were not included because terms of its equity buyout of DFS International have yet to be ironed out. In this issue, figures for those network agencies do not appear in DFS International totals either.

Also, for the sake of year-to-year comparison, Saatchi & Saatchi Worldwide reported three new units not reported in 1983: Cochrane Chase, Livingston, Hay Group and Kleid Co. Together, these units provided gross income of an estimated $32,000,000 in 1984.

Accounts gained: Johnson & Johnson in Mexico, Puerto Rico, Spain, Colombia, Greece; Playtex in US, Australia, Puerto Rico, Belgium; Procter & Gamble in US, Puerto Rico, Barbados, Hong Kong, Malaysia, Singapore, UK, France, Germany, Holland, Italy, Spain; Citibank in Philippines, UK, Belgium, Holland; Jacobs-Suchard in Spain, Germany, France, Switzerland; Wander in Switzerland, Germany, Spain, France, Italy, Belgium, Austria; Nabisco Brands in Spain, Puerto Rico, Holland, Canada; Carnation in Germany, France, UK; Revlon Healthcare in Taiwan, Philippines; CPC in Thailand; Cunard in Canada; Gillette in UK, Germany, France, Belgium, Holland, Spain, Italy; Trust House Forte worldwide; Chesebrough Ponds in Finland, France; Mattel in Italy; Allied Lyons in Brazil, BSN in UK, Germany, Mexico; Gallaher in UK, Greece, Australia, Hong Kong; Hiram Walker's Courvoisier on pan-European basis. Lost: 28 accounts.

Billings breakdown for Saatchi & Saatchi Compton Worldwide: Newspapers 7%, magazines 18%, radio 2%, network tv 70%, point of sale 3%. Employes: 3,814 in 84 offices worldwide; 1,499 in 12 U.S. offices.

Top execs: O.M. Gossett, chairman-ceo; Robert Jordan, chairman, New York; E. Wax, ceo-president, New York; Robert Huntington, exec vp-coo; James Adler, director-Intl, Kurt Willinger, Charles Saatchi, Maurice Saatchi,

SSC&B:Lintas Worldwide, New York, reported gross income of $182,942,000 in 1984, of which $120,778,000 was in non-U.S. contributions through SSC&B:Lintas International, on billings of $1,230,283,000. In 1983, it reported gross income of $155,468,000, of which $104,695,000 was in non-U.S. contributions, on billings of $1,047,541,000.

Interpublic Group of Cos. links SSC&B:Lintas Worldwide and Dailey & Associates agencies only in financial reporting results, but there is no management connection other than indirectly through the Interpublic parent office. Ad Age has therefore elected to treat the two agencies separately, as in the past, with the exception of 1983 when their figures were combined. Figures for the two years represented in this issue, however, are on a comparable basis.

The agency's U.S. volume through SSC&B was $414,634,000 in 1984 and $338,656,000 in 1983. No further breakdown was reported. Also included in the agency's figures are those of Frank Vos Co., a division of SSC&B Inc. All Frank Vos business is in the U.S. Overseas activity of the agency is vested in SSC&B:Lintas International.

Overseas, SSC&B:Lintas International had billings of $815,649,000 in 1984 and $708,885,000 in 1983. No further volume breakout was reported.

In 1984 the SSC&B Inc. shop in the U.S. gained: JVC audio/video equipment, Unilever's Snuggle Fabric Softener, Johnson & Johnson new assignments, Coca-Cola's Tab, Columbia Pictures. It lost: Textron/Homelite, Renfield Importers.

Employes: 3,765 in 59 SSC&B: Lintas Worldwide offices, of which 760 are in two U.S. offices.

U.S. volume breakdown			
Media	N/A	N/A	N/A
Materials/services	N/A	N/A	N/A
Capitalized fees	N/A	N/A	N/A

Young & Rubicam, New York, reported gross income of $480,078,000, of which $156,973,000 was in non-U.S. contributions, in 1984 on billings of $3,202,120,000. In 1983, it reported gross income of $413,996,000, in which $139,618,000 was in non-U.S. contributions on billings of $2,761,353,000.

The agency's total U.S. volume was an estimated $2,155,110,000 in 1984 and $1,830,101,000 in 1983. Overseas total volume was an estimated $1,047,009,000 in 1984 and $931,252,000 in 1983.

No breakdown was provided for domestic or foreign volume, both figures of which are ADVERTISING AGE estimates.

The report includes figures for U.S. subsidiaries:

- Hutchins/Y&R
- Sive Associates
- Young & Rubicam/Zemp
- Creswell, Munsell, Fultz & Zirbel
- Rives, Smith, Baldwin & Calberg/Y&R
- Burson-Marsteller (including Cohn & Wolfe and Rogers Merchandising)
- Cato Johnson
- CYB
- Chapman Direct Marketing
- Stone & Adler
- Sudler & Hennessey
- Wunderman, Ricotta & Kline
- Y&R Entertainment Division
- DYR (joint venture)
- HCM (formerly Marsteller Inc.)

Only 50% of the financial results of the latter two units above are consolidated into the total Y&R figures because of its near 50% ownership in both units with Tokyo-based Dentsu Inc. (DYR) and Paris-based Eurocom through Eurocom's Havas Conseil agency (HCM). Burson-Marsteller, not included in the 51% purchase of Marsteller by Eurocom, remains fully owned by Y&R. In 1984 it had returns of $84,258,000 in net fee income which would capitalized into $562,000,000 in billings, figures consolidated in Y&R's totals.

In 1984 the agency gained: AT&T Intl Long Distance, Advil, Rozzoni, Canada Dry No-Cal, Ajax Dishwashing Liquid, Dart & Kraft's Breyers Ice Cream, NYNEX Business Information System Sales Force, Tupperware Home Parties, Intl Harvester corporate, Humana Corp.'s Medfirst div, Cole National Eyeworks, Helme Tobacco Redwood, Motorola National Cellular Advertising, Consolidated Foods' Gallo Salame div. It lost: Hallmark Cards, *USA Today*.

Overseas, it gained: Plein Pot, Banque Populaire (Paris); Kawasaki (Stockholm); Felix Australia (Vienna); KFC Dealer Advertising (Toronto); KFC, Colgate-Palmolive (various brands) (Sydney); Kaffe Hag (Amsterdam); Kodak, Suchard (Berne); Suchard (Brussels); Brinkmann AG, Triumph (Frankfurt); Aegtelefunke, Crunchies (Cadbury), Advil-ICC, British Midlands Airways, Johnny Walker IDV (London); Milan, Barilla, Smirnoff, Cinzano (Madrid); Nilisk (Oslo). It lost: Mercedes Dealerships (Stockholm); Manpower (Berne), Heinz Soups, TV Rentals (London); Winston Cigarets (Madrid); J&J (Mexico).

Billings breakdown: Newspapers 7.2%, magazines 17%, supplements 0.4%, radio 4.6%, network tv 41.1%, spot tv 22.1%, cable tv 1.2%, outdoor 1.0%, business papers 1.6%, farm publications 0.7%, transit advertising 0.4%, direct mail 1.7%, other 1.0%. Employes: 8,418 in 117 offices; 4,872 in 43 U.S. offices.

Top execs: Edward N. Ney, chairman-ceo; Alexander Kroll, president-coo; Peter Georgescu, president Y&R Intl; Harold Burson, exec vp-chairman, ceo, Burson-Marsteller; Richard E. Christian, chairman, Marsteller Inc.; John J. McNamara, president, Y&R USA; Joseph E. De Deo, exec vp-president, Y&R Europe; Roger Craton, exec vp-cfo; R. John Cooper, senior vp-general counsel and secretary; Arthur Klein, exec vp-president, Direct Marketing Group; James Dowling, president Burson-Marsteller; Robert Schmetterer, president-coo, HCM; Roby Harrington, exec vp, Y&R USA; Lester Wunderman, chairman, Wunderman, Ricotta & Kline; John McGarry, exec vp, Young & Rubicam USA.

Chiat/Day: Getting big, staying creative

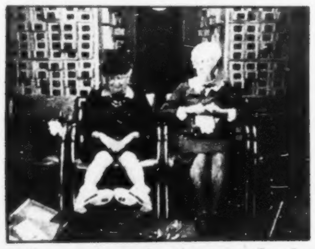
In 1981, ADVERTISING AGE picked a hot West Coast shop, Chiat/Day, as Agency of the Year. It was the first West Coast agency so honored. Since then, the agency's billings have grown from more than $100 million to $226.6 million in 1984, the latter representing a 63.7% increase over 1983.

Despite its rapid accumulation of top clients with big bucks, Chiat/Day has not lost its creative spark. It seems to have taken on bigness without falling prey to Jay Chiat's warning, or challenge, depending on one's point of view: "We're going to find out how big we can get without getting bad," said the agency chairman in 1981.

Chiat/Day produced one of the most talked-about spots of last year, the "1984" commercial for Apple Computer that ran only once nationally, on the Super Bowl telecast. The commercial, taking a sly dig at International Business Machines with a Big Brother theme, received wide acclaim. Although Apple's eagerly awaited Super Bowl spot this year (titled "Lemmings" and taking another dig at IBM-style conformity) did not receive the same acclaim, Chiat/Day's work for Apple has been consistently high quality and was partly responsible for the recent selection of the client's John Sculley as AA's 1984 Adman of the Year.

AA's editors also had high praise for the agency's highly creative work for Nike shoes.

Chiat/Day's "1984" Apple spot was a smash hit.



Nike got mainstreamed via humor spots and outdoor splash.

AF&G: Versatility recognized

Avrett, Free & Ginsberg, a New York agency with gross income of $10.1 million on billings of $87 million last year, was nominated for Agency of the Year because of its versatility in turning out ads that run from nuts-and-bolts to trendsetters.

The AF&G client list is equally diversified, ranging from Lord & Taylor to Purina Cat Chow and Sun-Maid Instant Hot Cereal from Ralston Purina Co. to Tri-State Cadillac.

Its spot for Frisson wine from Remy Martin Amerique used new video technology and an entertainment theme launched by a video segue from the Frisson logo into a Frisson party on a fast-moving train. Test market sales doubled the projected goal for this product, billed as a wine for young adults, the agency says.

The agency also moved Ponderosa Steakhouses president Jerry Office into that select group of identifiable company bosses by featuring him in spots for the Ponderosa chain.

AF&G says the Ponderosa spot for "family priced" meals garnered a 22% increase in dinner sales over control markets and a 38% increase in customer count.

Despite such success, the account since has moved to McCann-Erickson, though Mr. Office continues to appear in ads for his chain.

PONDERO
FAMILY
NIGHT
Jerry Office
President

Will Ponderosa prexy Jerry Office become a cult personality?

The Party's
Frisson

Just any ol' party turns into a movable express with Frisson.

Paterson Falls

FROM THE MALLS TO THE FALLS, WE COVER YOUR WORLD. ALL OF IT.

If your success depends on the ring of a cash register, these facts should really sound like money in the bank:
- The Record, in northern New Jersey, reaches readers with the second highest median income in America.
- The Record covers Bergen and Passaic counties, representing retail sales of almost $8.5 billion.
- Malls in New Jersey have the highest gross income per square foot of any malls in the country.

And The Record's circulation covers eight huge malls averaging almost 900,000 square feet each.

This rich retail market turns to The Record for news, information – and advertising – that they know is up to date, covering their world with award-winning, full-color quality.

Make their world part of your success. Add The Record to your schedule and strike a responsive chord with the most desirable retail market around. Call Jonathan Theophilakos, National Advertising Manager, at 201-646-4257.

Gray Strayton International, Wellesley, Mass., had estimated gross income of $4,400,000 in 1984 on billings of $29,010,000. In 1983, it

Atlantic Video's $20,000 flat as a pancake studio floor.

Most studio floors are smooth and level enough for 999 out of 1,000 situations.

But studios are used to create magic, and every now and then we might be asked to shoot the most delicately balanced creation to stem from an art director's brain this side of Rube Goldberg. Or use a micro-lens on a dolly shot that would make the tiniest bump look like you were at 15,000 feet and hit an air pocket.

So we put an extra $20,000 into pouring a self-leveling floor for our studio. We thought it a small enough investment to ensure that once the cameras are on, we get through the job as quickly, and as best, as it can be done. (What we do, and some of the equipment that helps us do it, is at right).

We use our floor to illustrate the thought that went into designing Atlantic Video, a place we've created to be as easy for you to work in as it is for us.

And that statement's on the level. Call Atlantic Video's Diana Del Toro today at 703-823-2800 and we'll prove it to you on your next job.

Studio Production: A 95' x 40' and 50' x 40' sound stage, both with Kliegl digital lighting. Hard cyc, a 10' x 10' prop door. Grass Valley 300-2B switcher, ADM VP-1603 audio board, Hitachi SK-96 and Thompson 701 cameras.

Remote Production: Three BVH-500 1", two BVU-110 ¾", Sony Betacam recorders, Grass Valley 100 portable switcher and five Thompson 701 cameras.

Post-Production: Four editing suites, two with Paltex Vanguard editors for interformat editing. Seven Ampex VPR-3's, three Sony 1000's a Sony 2000 1", three Sony BVU-820's, two Sony BVW-40's. Plus a Dubner CBG-II graphics generator and 2 channel ADO.

Duplication: From any tape format, to any tape format with four Quad and twelve 1" machines. A Dwight Cavendish duplication system makes up to 50 ½" and ¾" dubs at a time.

Video-conferencing: Fixed gear microwave to virtually all earth station facilities in metro Washington. Access to all domestic satellites though our up-link facility in Bren Mar, Virginia.

Eenie, meenie, minie, moe.

Have you ever felt like this when choosing a telemarketing service? They're all alike. Each parrots the other with seemingly interchangeable personnel, technology and services. What's more, in some cases they can barely provide you with the basics.

But you don't have to settle for parrots.

There's an innovative alternative. One that will make a big difference. One you'll notice every time you check your results...and your profits. A professional telemarketing service, backed by decades of American experience in perfecting one of the most flexible and sophisticated telecommunication systems in the world.

American Airlines Telemarketing Services.

The people, the technology, the management and the performance capabilities to customize a program that gets the results you need for your business.

With a separate resource totally dedicated to telemarketing, American offers you thoroughly trained experts who know how to sell, qualify, upgrade, research, handle customer service, raise funds and service accounts. Backed by some of the most advanced, computerized telemarketing technology available today.

So when you're ready to talk to telemarketing experts — instead of parrots — return the coupon below or call toll-free:

800-325-2580

YES! I NEED TO TALK TO EXPERTS, NOT PARROTS!

Please have a professionally trained representative (one with real sales experience) call to give me the full details.

Profiles with a checked box (☑) indicate an independent cpa or accounting firm has signed a statement of verification supplied by Advertising Age. *Those with a checked box and dagger (☑ †) were also signed by independent cpas and accounting firms who supplied their own verification language that was accepted by the editors. See story on Page 10.*

An eerie pattern has turned up in which the big winners (on an annual percentage basis) one year often turn up among those with smallest increases the next. Tatham-Laird & Kudner, Ally & Gargano and Bloom Cos. were among the top 10 of the 50 biggest agencies last year in year-to-year gains in U.S. billings. This year, all fell among the top 10 in "smallest increase," joining William Esty Co. and Kenyon & Eckhardt which have camped out on the chart two years running. Saatchi & Saatchi Compton and TBWA are "big gainers" two years in a row, and Leo Burnett Co. exited 1983's "smallest" for 1984's "biggest."

When only the best will do.

Freeman Huenink Zilbert Inc., Brookfield, Wis., had estimated gross income of $1,400,000 in 1984

"Biff! You've furnished your condo, got a new VCR, arranged a Bermuda vacation, and sent me flowers—all in a day!"

"Just tapped my fingers on the telephone and called the numbers I saw in my AT&T 800 SERVICE DIRECTORY!"

THEY CALL 'EM AS THEY SEE 'EM

...in the new AT&T 800 Service Directories

One million consumers, earning a median household income of $54,000 annually, received a free Consumer Edition of the new AT&T 800 Service Directories last year. These proven direct-response buyers averaged thirteen gift purchases per person and 96% purchased gifts in the past six months. Their purchases ranged from travel to photography, and consumer electronics to sports equipment.

And, 67% of those surveyed reported that the AT&T 800 Service Directories increased their 800 number usage. Why? Because the AT&T 800 Service Directories are today's most widely distributed sources for 800 numbers.

To help your clients reach their best target market, the 1985 AT&T 800 Service Directories are available in a Business Edition, as well as a Consumer Edition.

For more calls, more business, and more visibility...call us. And then, they'll call your clients.

Your first week of TV monitoring is on us!

You pick the market from the 75 that BAR monitors every month. We'll send you a full report of all spot TV schedules monitored there for one week.

It includes station call letters, day, date, time, length and program name, plus estimated cost of each schedule...arranged by brand, parent company, and product class.

Spot by spot, you analyze how the stations aired your campaigns. You learn how your competitors are using TV. With this information, you can plan ahead to make the most of your TV expenditures.

Offer is open to advertisers and advertising agencies. No obligation. Call George Seekamp at (212) 221-2630.

IT'S YOUR MOVE...
Call us for a no obligation lease valuation analysis. We'll show you how a move to Midtown South, coupled with the sublet or "sale" of your uptown space, might mean millions of dollars to your firm or you! (Even with a recapture clause!) The more years left on your Uptown lease, the greater the profit.
Just a sample of our offerings...
40,000 Square Feet
• On one floor • Fifth Avenue
• Quality building • Fine Tenancy
$12.00 per Square Foot
We can also provide other units of up to
280,000 Square Feet
of contiguous space. So contact us.
IT IS YOUR BEST MOVE!

Agency income surges by 17%

(Continued from Page 1)

purchase of Compton Advertising, had year-to-year increases in world income of 33.3%, world billings 34.6%, U.S. income 42% and non-U.S. billings 28.7%.

Growth among agencies in 1984 was most evident among the I agencies—the select group of agencies that top $15 million in gross income. Sixty agencies entered this grouping in 1984, compared with 54 in 1983. The I agencies accounted for 81% of the world gross income of all agencies monitored and 80% of world billings. In the U.S., they accounted for 74% of U.S. gross income and billings.

The new entries to this select group in 1984 were paced by Lord, Geller, Federico, Einstein, the JWT subsidiary that rose to No. 38 from No. 57 in 1983. Lord, Geller had increases of 106% in gross income and 111% in billings, a performance chairman-chief executive officer Richard J. Lord credits to new business from Book-of-the-Month Club and Charles of the Ritz Group and from growth in new assignments from existing clients, particularly Scheiffelin and IBM (PC jr).

Chiat/Day, one of the contenders for this year's Agency of the Year, was not far behind, jumping from No. 56 to No. 40 in rank by world gross income. Other newcomers: No. 56 AC&R, a Ted Bates Worldwide subsidiary; No. 57 Medicus Intercon International, a Benton & Bowles subsidiary; No. 58 Rosenfeld, Sirowitz & Lawson, and No. 59 Evans Communications.

The II agencies—those with gross income between $5 million and $15 million—included 102 agencies in 1984 compared with 86 in 1983. They accounted for 10% of both world gross income and billings for the 619 agencies reported.

Westport, Conn.-based Barry Blau & Partners recorded the largest jump among them, from No. 216 in 1983 to No. 145 in 1984. Substantial new business from Purolator Courier Corp. and new assignments from IBM and Citicorp Diner's Club were the major contributors to growth at Blau & Partners.

The III agencies—the 272 in this issue with gross income of $1 million to $5 million—accounted for 8% of total world gross income and 8.6% of world billings among the agencies. Group IV agencies—the 185 in this issue with gross income of less than $1 million—accounted for less than 2% of gross income and billings.

The I and II agencies, because of their sheer size, serve as a window to the entire advertising industry, which Ad Age has plumbed in this 41st agency report by monitoring their productivity, where they spend their clients' money, the relationship of fees to total billings volume, the employment picture and how it is changing, among others.

In general, the most efficient ad shops fall in the II agency sector—the $5 million to $15 million gross income category. Productivity—a measure of the number of employes per $1 million in billings—in this group averaged 1.9.

But employment stability among these shops is more hazardous, the average number of employes dropping 0.7% from 1983 to 1984, to 88, despite a billings boost of 17% for the entire category. The leading shop in productivity (0.56) was Ohlmeyer Advertising, a member of the II agency category.

The only I agencies to crack the top 10 in productivity were Laurence, Charles & Free (0.95) and Leber Katz Partners (1.02). While the I agencies are on average less productive (2.4 employes per $1 million in billings), they are at least hiring as a group—employment in this $15 million-plus in gross income category rose 8.4% from 1983 to 1984 in the U.S.

The much smaller III agencies ($1 million to $5 million gross income) averaged 2.2 persons per $1 million in billings, and the IV's 3.0 persons, indicating that somewhere among the 102 II agencies there is a point of diminishing returns.

Tv dominated the spending among the I and II agencies with network tv commanding 32.9% of their total billings and spot tv 21.4% of the total. Magazines came in third at 17.7%. Other expenditure breakdowns: Newspapers 9.6%, radio (spot and network) 6.3%, outdoor 2.5%, business press 2.3%, direct mail 2.2%, cable 0.8%, supplements 0.7%, farm and point of sale, both 0.5%, transit 0.2%, and other 2.4%. These statistics were based on the media segment figures supplied by 144 of the 162 agencies in the I and II categories.

The dominant media shops by billings volume reads like the "Who's Who" among agencies: Ogilvy & Mather outpaced the rest in network tv expenditures, spending 51% of its billings in that medium. O&M also led the pack in direct marketing, where it spent 9% of its billings—a tribute to O&M's big direct marketing subsidiary.

Young & Rubicam led the rest in spot tv billings volume, where it spent 22.1% of its billings, and in magazines, which pulled in 17% of the Y&R total. The newspaper king was Wells, Rich, Greene, which funneled 28% of its business into that medium.

BBDO International won in the radio billings race, spending 9% of its volume in that medium; Ted Bates Worldwide took outdoor billings with 8.8% of its expenditures, and Doyle Dane Bernbach was the volume leader in cable, which attracted 2.5% of DDB expenditures.

The growth of capitalized fees as a form of agency remuneration stalled at 10.9% as a composite of capitalized U.S. billings among the I and II agencies in 1984. The percentage actually dropped among the I shops from 8.9% of the total billings for those agencies in 1983 to 8.5% in 1984, which countered the II agency composite increase from 22.7% to 25% of II billings—the latter figures influenced by a large number of direct marketing and specialty type shops (medical advertising, for example) that comprise the II ranks.

Lavey/Wolff/Swift and Lorsch Group topped the top 10 I and II agencies in percentage of fees to total billings, handling all their business by fee.

This relationship of an agency's size to its propensity to take remuneration by fees rather than media commission continues into the III and IV agencies. The percentage of fees to total billings increased from 34.9% to 36% among the III agencies on the year-to-year basis, and moved from 39.7% to 41.1% among the IV agencies.#

1984 composite statistics in 41st agency report

($ figures in 000,000)

Agency group	World gross income range	Agencies reporting	Capitalized fees	U.S. billings	Cap. fees as % of U.S. billings	Total employes	Average employes

Saatchi paces agency groups

The meteoric rise of Saatchi & Saatchi Co. Plc in the 1980s was never more evident than in 1984 when it rocketed six places from No. 10 to No. 4 in world ranking by gross income of agency groups/-agencies.

The London-based holding company, whose business emanates primarily from New York and London, rose dramatically in 1984 from sizable new business stateside and from the inclusion of financial data from 1984 acquisitions—Hay Group and Yankelovich, Skelly & White.

The holding companies are not ranked in this issue because technically they are not agencies. The accompanying chart illustrates how they line up against agencies in this issue, many of which are their own subsidiaries.

Interpublic Group

Interpublic Group of Cos., New York, comprising agencies McCann-Erickson Worldwide, Marschalk Campbell-Ewald Worldwide, SSC&B:Lintas Worldwide, and Dailey & Associates, had consolidated gross income of $671,311,000 in 1984 on billings of $4,477,644,000 compared with gross income of $566,370,000 on billings of $3,777,688,000.

Individual members of the holding company and their gross income and billings in 1984: McCann-Erickson, $325,241,000 gross income on $2,169,356,000 in billings; Marschalk Campbell-Ewald, $140,272,000 gross income on $935,612,000 in billings; SSC&B:Lintas Worldwide, $182,942,000 gross income on $1,230,283,000 in billings, and Dailey & Associates, $22,175,000 gross income of $147,907,000 in billings.

Interpublic is headed by Philip H. Geier Jr., chairman-ceo. Other top officers include: J. Donald McNamara, president, and Eugene P. Beard, exec vp-finance/cfo.

JWT Group

JWT Group, New York, reported gross income of $528,300,000 in 1984 on billings of $3,523,600,000. In 1983, it reported gross income of $468,200,000 on billings of $3,122,600,000.

The group is comprised primarily of J. Walter Thompson Co., New York, which had gross income of $405,800,000 on billings of $2,706,700,000 in 1984 compared with gross income of $368,300,000 on billings of $2,456,200,000 in 1983. Under the J. Walter Thompson banner fall several agencies: J. Walter Thompson USA, Brouillard Communications, Thompson Recruitment Advertising, Market Behavior, and Marti, Flores Prieto.

JWT Group agencies not under the J. Walter Thompson Co. banner include Lord, Geller, Federico, Einstein, Hill & Knowlton, a leading pr agency, E-A International and Simmons Market Research Bureau. Don Johnston is chairman-ceo and chairman exec committee of JWT Group, and chairman-ceo of J. Walter Thompson Co. Hugh P. Connell is exec vp-secretary of JWT Group.

Saatchi & Saatchi Co. Plc

Saatchi & Saatchi Co. Plc, New York, reported gross income of $426,201,241 in 1984, of which $209,495,908 was in non-U.S. income, on billings of $2,390,350,018. In 1983, it reported gross income of $253,266,000, of which $142,410,000 was in non-U.S. income, on billings of $1,710,569,000.

The company's 1984 U.S. volume was $1,152,662,333. In 1983, volume of $771,785,000 consisted of $562,206,000 in media, $32,404,000 in materials and services and $177,175,000 in capitalized fees.

The report incorporates all of the operations in the company, including the non-advertising activities within Hay Group in London, an advertising and management consulting company, and Yankelovich, Skelly & White, the U.S. research company, both of which were purchased in 1984. Saatchi & Saatchi continues to seek acquisitions, recently purchasing Rowland Co., a New York pr business.

Mickelberry Corp.

Mickelberry Corp., New York, comprised of Cunningham & Walsh, Laurence, Charles & Free and Nadler & Larimer, reported consolidated gross income of $96,030,000 in 1984 on billings of $755,000,000 compared with gross income of $92,454,000 on billings of $631,000,000 in 1983 for a year-to-year increase of 3.9% in gross income and 19.7% in billings.

Individual results in 1984 include: Cunningham & Walsh, $53,280,000 gross income on $370,000,000 in billings; Laurence, Charles & Free, $32,250,000 gross income on $215,000,000 in billings; and Nadler & Larimer, $10,500,000 income on $70,000,000 in billings. C & W also took over Chicago's BBDM in March, 1985.

James Marlas, founder, recently moved up to chairman to allow Richard J. Diamond to become president. Former chairman, Franklin D. Roosevelt Jr., has become chairman of exec committee.

Agency groups lead top agencies

(Figures in $000,000)

World rank	U.S. rank†	**Group**/Agency	World gross income 1984	% change 1984-1983	U.S. gross income 1984	% change 1984-1983

ABC sporting with Ford, Chevy

'MNF,' Olympics deals in works

By VERNE GAY

New York—Ford Motor Co. is preparing to sign a multiyear deal with ABC Sports for sponsorship of "Monday Night Football," Advertising Age has learned. The deal, expected to be completed by mid-April, will break the domestic-auto-exclusivity hold that General Motors' Chevrolet division has held for years.

Chevrolet, however, is a prime target for ABC as it prepares to begin its sales effort April 15 for its coverage of the 1988 Winter Olympics. Asking price reportedly is $400,000 or more per 30 seconds, about double the 1984 Winter Games, when Chevrolet was a major sponsor.

On "Monday Night Football," Chevy and import Nissan will continue to maintain their berths, but the new arrangement will be structured so that Ford and Nissan can share a game. Ford reportedly would take the first half and Nissan the second. The following Monday Chevrolet would be the exclusive auto sponsor. Nissan and Ford would switch halves every other game.

In addition, ABC is increasing the number of commercial units per game needed to maintain automotive-category exclusivity from 10 30-second spots to 12. The reason for this, AA was told, is that ABC can firm up the commercial load on the game.

Having suffered a ratings loss last season, "MNF" experienced a decline in advertiser interest. As a result, unit costs sometimes dipped below $100,000. It is believed Ford would pay $175,000 per 30 seconds for its "MNF" positions.

Exclusivity advertisers in both the beer and automotive categories ended three-year deals on "MNF" last season.

The strategy with the automotive companies this year is the exact opposite of the way ABC handled beer-category exclusivity renewals. To shore up its chances

$40 million push starts

AT&T finally rolls its own

By BRIAN MORAN

AT&T is starting a new network tv push for its lagging IBM-compatible personal computer as it rolls out, at long last, a machine of its own design.

AT&T's latest moves indicate the company is determined to continue the fight in the casualty-ridden IBM "clone" battle, while it begins challenging IBM with a unique, potentially more competitive product.

The new advertising push, estimated at $40 million over six months, goes into high gear tonight with two tv spots aligning AT&T's IBM-compatible 6300 personal computer with the company's telecommunications experience. Ogilvy & Mather, New York, handles.

AT&T Information Systems, Morristown, N.J., last week introduced a wide range of enhancements for the 6300, which flopped since it was unveiled last summer as AT&T's first entry in the personal-computer market. Industry analysts estimate it sold 20,000 units in 1984, compared with IBM's 1.5 million in personal-computer sales.

AT&T hopes peripherals for the 6300—including a new modem and hard-disc drive for added storage—will trigger more 6300 sales.

Both tv spots carry Information Systems' new theme,

Nabisco cuts three shops; DDB added

By NANCY GIGES

Nabisco Brands, aiming for long-term, more-stable agency relationships, last week split $40 million in food product assignments between Doyle Dane Bernbach and Bozell & Jacobs, both New York.

In making the assignments, Nabisco, Parsippany, N.J., dropped Benton & Bowles, McCann-Erickson and J. Walter Thompson USA, all New York.

The agency reshuffling was signaled when Nabisco revealed its own restructuring several months ago (AA, Dec. 24). At the time, Nabisco consolidated several units into three operating divisions—biscuits, Planters/Life Savers and grocery.

DDB, new to the Nabisco roster, gains Fleischmann's and Blue Bonnet margarines, billing about $9 million; Cream of Wheat and Nabisco ready-to-eat cereals, billing about $8 million, and Fleischmann's yeast, a $2 million brand.

Bozell & Jacobs, already agency for candy bars, gains Planters nuts and snacks, a $20 million line.

The biggest loser is Benton & Bowles, which had Planters, Fleischmann's and Blue Bonnet. McCann-Erickson lost the cereals and JWT had the yeast.

According to R.J. Carbonell, Nabisco Brands USA president, the shift was made to "bring about the most efficient use of our advertising dollars as well as to avoid agency product conflicts. What we are aiming for is meaningful, ef-

Chiat picks a flower fight

By STEWART ALTER

Four months ago, executives at Chiat/Day and *800-Flowers* were still writing each other nice flowery letters. There were regrets that the five-month agency-client relationship had never made it out of some brief test-marketing.

But that friendliness has now withered into bitterness and lawsuits.

Chiat/Day, New York, filed papers in federal district court there two weeks ago, seeking a jury trial. Chief Judge Constance Baker Motley is to decide whether jurisdiction is in Texas (where 800 Flowers, a national flowers-by-phone service, is located) or New York before any trial action can proceed, said a spokeswoman in the judge's office.

Chiat's filing followed a suit it entered in New York state supreme court in early January, seeking a little more than $1 million it claimed 800-Flowers still owed in commissions, fees and production charges. The agency won from that court an order of attachment against 800-Flowers' property.

That led to a suit from 800-Flowers, filed in Texas state court in mid-January. It sought to vacate that order and claimed the decision threatened the company's ability to

More cable tv ads, but creativity lags

By SUSAN SPILLMAN

New York—Some big advertising dollars are finally rolling into cable tv, but those long-promised innovative commercials aren't.

That was the picture painted last week at the fourth annual Cabletelevision Advertising Bureau conference. And it was an image that some of the leading cable executives embraced.

Although cable channels no longer are being filled solely with per-inquiry ads for Ginsu knives and Veg-A-Matics, neither are they being used as originally envisioned—as a means to deliver new kinds of long-form and narrowcast messages.

Advertisers, however, are quick to credit MTV: Music Television with inspiring a new music video look for several spots. But most of these commercials also air on broadcast tv.

"Why should we go to advertisers and say, 'Treat us differently'? We're doing the same thing as the networks, we're bringing a signal into the home through a tv set," said William Grimes, president of ESPN, Bristol, Conn. "We don't want to act like some fledgling business asking for experimental dollars."

Kay Koplovitz, president of USA Network, Glen Rock, N.J., agreed she'd rather see more money spent on buying cable time than in creating expensive new-form advertisements.

The sentiments of advertisers were summed up by Hilary Hinchman, vp-director of advertising for Sterling Drug. She said cable provides "cheap tonnage and a way to combat network erosion. We didn't want to spend money for new cable commercials, nor did we see the need to in our categories."

Advertisers spent $542 million in cable tv last year, and CAB president Robert Alter predicted 1986 cable ad revenues will reach nearly $1 billion. In 1980, cable ad revenues were $58 million. Mr. Alter added that almost all of the top 50 tv advertisers now include cable in their schedules.

Not everyone is pleased about the new tendency to position cable as a cheap counterforce to declining network tv shares. Keith Reinhard, chairman of Needham Harper Worldwide, in his keynote address to the conference, said he had wanted to put together a reel

From the state that has other ideas about getting to work...
...surviving the winter...
...and business meetings comes...
ONE MORE REASON TO HATE CALIFORNIA.

California Cooler believes the rest of the country has a bad case of "California envy." Ads, breaking this week in network and spot radio and on tv, claim CC is just "one more reason to hate California."

Tongue-in-cheek, of course

Cooler cuts Cal.

By RUTH STROUD

California Cooler, expecting to be vastly outspent by major beer and wine competitors this year in the category it pioneered, is pinning its future on a startling new campaign breaking this week.

Tv and radio ads developed by Chiat/Day, San Francisco, elaborately spoof California, featuring eastern or midwestern types uttering every cliched image of the state that has ever been thought or uttered—from surfing and hot tubs to organic vegetables and "49-grain bread"—and ending with the theme line: "California Cooler: One more reason to hate California."

Industry sources already are comparing the potentially controversial campaign to Apple Computer's "1984" ad, another attention-getting Chiat/Day product. Some of the industry assessment is negative, with observers rating the campaign "weird" or "well done, but it makes no sense" in reference to the theme.

Tom Gibbs, director of marketing of the Stockton, Cal.-based company, pooh-poohed the negative reaction, boasting that at a recent sales meeting in Vail, Colo., the audience "stood up and

Thursday

Noted author Roy Blount Jr. tells why he likes those macho light beer commercials—and why he'll probably never appear in one. Mr. Blount's essay on advertising will appear in Advertising Age *Thursday* April 4.

It's Sunbeam vs. B&D in houseware war

By LAURIE FREEMAN

Sunbeam's spot for its Monitor iron emphasizes its automatic turnoff. Burton-Campbell, Atlanta, handles.

CHICAGO—Sunbeam Appliance Co. is gearing up for a fight with archrival Black & Decker Corp. for supremacy in the small electric appliance market.

The Oak Brook-based unit of Allegheny International plans to spend a record $42 million in its bid to fill the void created when General Electric Co. last spring sold its $300 million small appliance business to Black & Decker, Towson, Md. (AA, Dec. 19, '83, et seq.).

Sunbeam officials are betting consumers will be confused by the disappearance of GE products and will turn instead to Sunbeam branded appliances.

"The demise of General Electric's brand name in small appliances, and the resulting disarray in the industry, opens up a tremendous opportunity for Sunbeam," said Paul Saxton, Sunbeam vp-sales and marketing.

However, Sunbeam's marketing power may not have enough strength to compete with Black & Decker's $100 million corporate image and product ad budget.

Already the fight is under way. Both companies staked out their marketing turf here last week at the 82nd annual National Housewares Manufacturers Show.

Sunbeam threw down the gauntlet, introducing its new Freedom line of cordless, rechargeable appliances and heavily promoting its minisize, $85 Oskar food processor.

Black & Decker proudly displayed products bearing the GE or Black & Decker labels.

B&D has until 1987 to convert all GE products to the Black & Decker name. The mixing of the old and the new was subtly highlighted as GE Toast-R-Ovens stood beside Black & Decker's new cordless, rechargeable appliance line.

Although B&D is better known for its power tools, vp-marketing Kenneth Homa said the company's brand-image campaign should erase any lingering doubts about its commitment to the appliance business.

Network tv spots, breaking this month, play up the company's heritage as a power tool marketer and introduce B&D's new products. BBDO, New York, created the spots. The agency had handled advertising for the small appliances while they were at GE, and Black & Decker retained BBDO after it bought the GE business.

Sunbeam's $42 million 1985 budget, split between media advertising and promotion for its entire line, is five times the total spent by the company in the last five years.

Network tv spots for Sunbeam's Monitor electronic irons as well as the cordless series carry the company's "Sunbeam makes it easy" theme. Burton-Campbell, Atlanta, handles.#

Appliances become unwired

By LAURIE FREEMAN

CHICAGO—Having convinced consumers to shelve bulky toaster ovens and coffee makers under cabinets, housewares marketers now will try to convince them to hang cordless, rechargeable appliances on their kitchen walls.

Six months ago, West Bend Co. introduced the first cordless electric iron at the National Housewares Manufacturers Show. Not only has West Bend expanded its iron line to include a second FreeStyle steam/dry iron, but at last week's spring Housewares Show, it appeared every manufacturer has jumped on the cordless bandwagon. Marketers now offer everything from hand mixers to knives and can openers—and even a lightweight vacuum cleaner.

Sunbeam Appliance Co.'s Freedom line and Black & Decker's assortment of cordless, rechargeable appliances were the most-talked-about items among retailers and buyers at the show.

The Sunbeam Freedom line, including a cordless hand mixer, knife and can opener, comes with rechargeable batteries. The company estimates the batteries will last five to seven years before they need to be replaced. Burton-Campbell, Atlanta, is the agency.

Black & Decker added two new cordless appliances to its HandyMixer beater—a three-speed mixer and a knife. BBDO, New York, the agency that handled advertising for General Electric, is producing Black & Decker's new campaigns.

Not to be overshadowed, Hamilton Beach, Waterbury, Conn., has signed up Heisman Trophy winner Doug Flutie to promote its cordless carving knife. Mr. Flutie, now quarterbacking for the New Jersey Generals, will also promote the company's newly introduced $250 microwave oven.

Joe Namath returns to the Hamilton Beach spotlight to pitch the company's air-driven popcorn poppers. He's been touting the company's popcorn makers since the early 1970s. Actor Mickey Rooney is the spokesman for Hamilton Beach's DrinkMaster mixer.

Hamilton Beach is backing its products with $15 million, more money than it's ever spent before, said Charles Skoog, chairman of Hicks & Greist, the New York agency handling the account.

Separately, Richard Hochman, director of communications, National Housewares Manufacturers Assn., is retiring, effective July 1.

The NHMA also appointed Smith, Badofsky & Raffel here as its advertising and direct-mail agency, replacing Kreicker & Meloan, Northfield, Ill. Sheila King Public Relations has been named to handle pr.#

Zochert, Maurstad join AA; Hume promoted

CHICAGO—Donald Zochert has joined ADVERTISING AGE here as senior editor on the copy desk.

A graduate of Elmhurst (Ill.) College, Mr. Zochert worked as a reporter and editor at United Press International here from 1961 to 1966. He then spent 12 years at the *Chicago Daily News* as a reporter, rewriteman, feature writer and editor. In 1974, he began a writing career that led to three novels as well as several other books, articles and essays.

D. Zochert

T. Maurstad

Mr. Zochert also is an experienced business writer, most recently having served as a senior staff journalist in the corporate communications department of Urban Investment & Development Co., a major real-estate development company.

Also joining AD AGE is Thomas A. Maurstad, who will be a reporter in the Dallas bureau. A December, 1984, graduate of the University of Texas at Austin with a degree in journalism, Mr. Maurstad held several posts with the university's 39,000-circulation *Daily Texan* and other student publications.

In AA's Chicago bureau, Scott Hume has been promoted from reporter to senior reporter.

Mr. Hume, whose beats include fast-food and beverages, will serve as acting bureau chief this summer when bureau chief Sarah Moran takes maternity leave.#

CORRECTIONS & CLARIFICATIONS

- Contrary to an earlier article (AA, March 11, P. 1), R.J. Reynolds Industries uses its in-house media department only for planning and placing print advertising for its Del Monte and Heublein subsidiaries. Young & Rubicam handles network tv; Marschalk handles spot tv; Asch Advertising handles outdoor.
- Andrews/Mautner, Milwaukee, is the agency for Bell & Howell Co.'s Micro Design division. A B&H official earlier said another agency had the account (AA, March 11, P. 40).
- Coca-Cola Co. received 600,000 entries in its "Win a Magic Evening" with Julio Iglesias sweepstakes. The number was reported incorrectly (AA, March 11, P. 42).
- The correct linage figures for *Esquire* are March, 1985, 150.6 pages; March, 1984, 122.6; year-to-date, 1985, 252.2, and year-to-date, 1984, 220.6 (AA, March 18, P. 91).
- The magazine revenue increase for February of 14.3%, as reported by Publishers Information Bureau (AA, March 25, P. 8), is an increase over revenues of February, 1984, not over the previous month.
- Cine Design Films, Denver, was incorrectly spelled in an article on the newspaper serialization of President Nixon's new book (AA, March 25, P. 1).
- Thoro System Products is based in Miami. Its agency is HCM, Chicago. Wrong cities were listed earlier (AA, March 25, P. 36).
- Contrary to information in an earlier article, S.C. Johnson's new Raid Flea Killer Plus does kill insects with the initial application, as well as prevent eggs from hatching and young fleas from maturing into adults (AA, March 25, P. 92).
- The U.S. disposable diaper market is $2.7 billion, not $4.7 billion, which is the size of the international market (AA, March 25, P. 80). Also, Kimberly-Clark Corp. said it is using "chopped cellulose" for the insert panel in its new Huggies Extra Absorbent Medium 40s, rather than a cotton panel.#

Risque advertising and Brazil are often synonymous. In commercials for Playboy shampoo (two on left), agency DM 9 shows a young couple in bed before shampooing, while two girlfriends talk about how people think they are homosexuals. Inega jeans' agency DPZ shows a young girl caught with her pants down.

BRAZIL

Advertising market bounces back after years of recession

By JULIA MICHAELS

"Brazil is the country of the future," goes a popular saying, "and always will be." The cynic who thought this up may have to eat his words soon.

After four years of recession, Brazil, Latin America's largest consumer market with $2 billion in ad spending, is making a cautious comeback.

Unemployment is down, consumer spending is up and a new democratic civilian government, led by President-elect Tancredo Neves, took over in March from a military dictatorship.

"Clients are more optimistic. They're taking plans out of the drawer," said Alex Periscinoto, a partner in Alcantara Machado, Periscinoto Comunicacoes, Brazil's No. 2 agency.

Although inflation still hovers around 250% a year, ad spending in the last six months is finally keeping up with the inflation rate and is even showing signs of real growth, said Petronio Correa Filho, superintendent-director of top-ranked MPM Propaganda's Sao Paulo division.

Compared with 1984's 15% drop and 1983's 30% drop, some agencies might show some real growth in billings at the end of 1985, Mr. Filho predicted.

"Clients are feeling a positive reaction in sales," said Walter Guelfi, client service director at J. Walter Thompson Publicidade.

Mr. Guelfi said that JWT client Gessy Lever, a Unilever subsidiary, is reactivating its ad budget in the laundry detergent market after at least a year of belt-tightening.

The three major yogurt makers—Lacesa (under license from the French company Yoplait), LPC Industrias (48% owned by another French company, BSN Gervais-Danone) and Swiss-based Nestle—have all launched drinkable yogurts and are fighting for a piece of the newly targeted adult market.

Early this year, Coca-Cola Co. introduced Sprite, via McCann-Erickson Publicidade, while the giant Rock 'n Rio rock music festival held last January marked Pepsi-Cola Brasil's $10 million reentry of Pepsi, via JWT, into the Coke-drenched Rio de Janeiro market.

"After four years of decline, the soft-drink market is turning around," said Edward Moerk, president of Pepsi. A Coke executive said he expects soft-drink sales to grow by 4% this year after 3% growth in '84. He also sees increased '85 sales recouping most of last year's losses.

Cigaret marketers say the recession, which caused lower-price cigarets to flood the market as smokers traded down, has stabilized. Top-of-the-line brands are coming back into focus, slowly.

Late last year, R.J. Reynolds Tobacco Co. launched its high-price Camel brand with an ad blitz, via McCann.

Earlier last year British American Tobacco Co. came out with a soft-pack version of its upscale John Player cigarets. BAT marketing director Flavio de Andrade said he expects uptrading in cigarets to begin in earnest by the end of 1985.

Ad agencies are expanding, too. MPM Propaganda has begun opening offices in the rich agricultural regions, which it regards as Brazil's No. 2 consumer market after Sao Paulo.

"We're placing ourselves there for when the market explodes," said Petronio Correa, MPM general director, "in three to four years."#

DPZ

A bridesmaid, but never a bride

Roberto Duailibi is the most outspoken partner in Duailibi, Petit, Zaragoza Propaganda, Brazil's fourth-largest agency, and president of the National Assn. for Advertising Agencies in Brazil. Before that, he worked for J. Walter Thompson Co. and McCann-Erickson Worldwide. His agency has been been courted by many U.S. multinational agencies, but sources say the stumbling block is equity—DPZ doesn't want to give up any. Mr. Duailibi tells his story below.

By ROBERTO DUAILIBI

When the day comes to set up a club for international vps of U.S. advertising agencies, Sao Paulo could easily be chosen as the club's headquarters. There are even a few agency presidents who'd probably like to join.

We know them all. Some come in the summer, some in the winter, some zip through and others stay for a while. Some come just to sniff up prospects, some to make deals. Some make the right choice and others pick a lemon.

It's rare to meet one who's not a good professional. And all of them are excellent public relations men.

I have a fond memory of George Gribbin, who traveled around the world in search of opportunities for Young & Rubicam, even after he had retired. His presence itself was a great honor for the then-young admen he visited. His sincere empathy, his wish to help without expecting anything in return were precious and I now find unforgettable.

Young & Rubicam's Alex Brody, the extrovert (now with DYR); the warmth of Doyle Dane Bernbach's Clay Timon (now with Colgate-Palmolive Co.); the companionship of Grey Advertising's Norman Vail; the cheerfulness of J. Walter Thompson's Lee Preschel; and the care of Foote, Cone & Beldings' Julian Morrison—and the pride they all took in their agencies' work—made a good impression and still serve as a model.

Julian Morrison spent almost 10 months here in 1980-81, trying to

Anything goes

Sex sells, and blame it on Rio

By JULIA MICHAELS

Europeans and Americans worry about their countries' bans on cigaret and liquor advertising, about lawsuits because of shaky product claims and about complaints from insulted ethnic groups.

But in Brazil, there are ads pulsing across the airwaves that never would make it off a sketch pad in the U.S. Brazilians say sex sells, but the evidence suggests that so do nuns, priests, monks, children and ethnics.

Take a funny commercial for Johnson & Johnson's o.b. tampons, by Duailibi, Petit, Zaragoza Propaganda.

The tv spot features a little girl who says she wants the product for Christmas. She doesn't know what it is, she said, but it was good because you could swim, play sports, ride a horse. . .do anything if you had one. (The idea was filmed, but the client didn't approve it and the spot never aired.)

A commercial for Dorsay Industria Farmaceutica's Playboy shampoo and deodorant, via DM 9 Propaganda, shows a teen-age couple in bed. While the baby-faced girl complains that she can't talk to her mother about sleeping together, her boyfriend gets up and takes a shower, using the products. (The product is not licensed by Playboy Enterprises, Chicago.)

This ad was taken off the air after a month, but a spot from the same campaign, suggesting a homosexual relationship between two young women, ran for a longer period.

Another commercial for Inega jeans shows people getting caught with their pants down. Duailibi, Petit, Zaragoza created the spot for the manufacturer, Comercio E Industria Gofra S.A., but eventually quit, claiming the company was "intractable."

For a Catholic country, Brazil is unexpectedly irreverent. Actors portraying priests often are used to sell alcoholic beverages. Clerical characters also appear in spots for dishwashing liquids and instant noodles.

In other ads, children look and act like naughty grownups. An LPC Industrias commercial for Dannon yogurt, via Alcantara Machado Periscinoto, had a boy saunter into a bar and ask the pint-size barman for a yogurt (the bar clearly served only yogurt). He then made a pass at a little girl, dolled up in makeup and sexy clothes, seated on the next bar stool.

There are practically no taboos on racial stereotypes. Japanese Brazilians, who emigrated here before World War II, are used to selling high-technology products while showing off their karate skills. They usually speak a choppy, broken Portuguese.

Italians sell food products, but they also are shown as Mafia bosses. In a Gillette Co. ad, via Alcantara Machado, a Mafia-like underling turns his boss on to the Atra razor when the boss tries to slap him in the face and discovers how smooth it is.

Sometimes it's hard for Brazilians to make a clear distinction between advertising and programing or editorial content. A series of government ads that ran last January during TV Globo's prime time "Fantastico" variety show so closely resembled the show itself that viewers had to remind themselves that the spots weren't just other musical numbers.

Using a colorful dance troupe and testimonials from young people, the government sold viewers on its many accomplishments during the just-ended presidential term.

General Foods' Tang breakfast drink, Ford automobiles and Braun electric mixers are sold in the middle of Brazil's popular tv soap operas by having the products and comments about them inserted into the shows' scripts.

One sportswear marketer, Industria de Roupas Staroup, has an advertising campaign that mainly consists of soap opera characters wearing clothes with larger-than-normal Du Mond brand labels. The agency

(Continued on Page 59)

Still a bridesmaid

(Continued from Page 54)

convince us it was worth it to link up with a multinational company because it would improve our technology, that sort of thing. The first thing he did, when he got a chance, was to leave the company and open an agency in Chile. I still kid him about it.

It's curious the way the first contact is made between a U.S. agency and a foreign one. Naturally, we know more about their agencies than they do about ours. Our access to the professional culture is all in the English language. For us, when something happens in New York, it's as if it were in another neighborhood. (Except the budgets are enormously bigger.)

So at the first meeting, we know who their clients are, how good their work is and the agency's reputation. Nevertheless, I never met an international vp who hadn't done his homework and didn't come fully informed about the agency in question and the general characteristics of the Brazilian market.

You have to value the local professionals. One American, who courted us and then ended up coming down to open a separate agency, the first thing he did was put down Brazilian advertising. He was shocked by the high salaries paid to our creative people and called them "dilettantes earning big salaries." This didn't go down so well.

Then he brought an art director down from the U.S., saying he would teach people how to make advertising. This also didn't make a good impression. The first campaign they did was for a paper factory and the client was a difficult one. Of course, the campaign was terrible.

We are always pleased, for example, to find the vp who understands the small idiosyncrasies of each market. In fact, maybe this is the mark of a good international vp. He never considers a particular aspect weird or strange—unlike the executives of some other countries. Often, the latter looks at things that are different from home with a mixture of shock and criticism. Nothing is more irritating.

The French and the English never come to Brazil. The Japanese appear, but they end up making small deals with Japanese studios. A few Germans have shown up, coming to take a superficial look at the market.

A Dentsu vp once came. He was more American than the Americans. He used a lot of American slang, even though he had a strong Japanese accent. He was the opposite of the ultra-formal Japanese businessman. One had the feeling he was playing a part. Overacting.

It's easy to make friends with colleagues, and this, it always seems to me, is the basic requirement for making a deal. Among the American international vps I've met, not a one has failed to keep up his side of the friendship, even when the deal, for a variety of reasons, doesn't go through.

When I say friendship, I mean that each person is pleased to welcome the other into his own home when he visits the foreign country. That's why, when I talk about Clay Timon, I think about Barbara. When I talk about Norman Vail, I think of Irene. When I talk about Julian Morrison, I think of Makeka. And their children.

All the international vps have the same approach. Something of a canned talk. They all push the exchange of experience, of technology. In fact, the bottom line is how many dollars you're talking about.

The ambition of the Brazilian agencies that are interested in negotiating is to grow faster, to get an edge on the competition. Lots of agencies want to sell. They dream of linking up with a big agency, almost as a way of getting international recognition of their creative work.

The role played by some creatives, as two companies draw near to each other, cannot be underestimated. I remember, for example, the enormous role played by Bert Steunhauser and Don Blauweiss (both formerly with DDB) and Steve Frankfurter (formerly with Y&R), in speeches they gave around the world.

They didn't come to make deals, but they ended up creating the interest in making deals with the agencies they represented. Ed McCabe (of Scali, McCabe, Sloves) and Jay Chiat (of Chiat/Day), for example, continue to do this.

But we will stay independent for a while. We still have lots of room for growth. There's a feeling of freedom, to be your own agency and your own boss.#

** Forecast of "Meio & Mensagem"
Source: "Meio & Mensagem", January 15, 1985.

An opening democracy; a recovering economic development: Brazil has just changed its government as well as its economy figures. To us, all this is a good reason for festivity. But we are also celebrating something that did not change: once more MPM is the first ranking agency among those in Brazil having the highest billings.

Ten years in first place.

If you want to do good business in this enormously expanding market, follow the preferential trend of the Brazilian advertiser: choose MPM, the agency that has been the leader in Brazil for the last ten years.

MPM
Ten years in the vanguard.

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation.

REPORTING METHODOLOGY

Media Records continues to measure in activity but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA/NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page.....
   Width and Depth in Inches.
2. Determine Square Inches of Page.....
   Multiply Width by Depth Inches.
3. Determine the Number of SAU Inches of Page.....
   Divide the Square Inches by 2.0625 (SAU Inches).
4. Measure the Total Lines of the Page.....
   Multiply Column Depth Agate Lines by the Number of Columns on the Page.
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches.....
   Divide the Total Lines of Page by the Number of MRCS/SAU Inches of the Page.

Simon bids billion for Multimedia

By CRAIG REISS, VERNE GAY and WILLIAM F. GLOEDE

The investment company headed by former Treasury Secretary William E. Simon has made a $1 billion bid to take over Greenville, S.C.-based Multimedia Inc., the 36th-largest U.S. media company, ADVERTISING AGE has learned.

Multimedia is already considering a leveraged buyout by top management and members of the four families that hold large blocs of company stock. Multimedia, founded in 1888, is a major group television and radio broadcaster and owns 13 daily and 22 nondaily newspapers, mostly in the Sunbelt. It also has extensive holdings in cable tv franchises and operates an entertainment division that is best known for its syndication of "The Donahue Show" with Phil Donahue.

In February, management offered to take Multimedia private at $37 cash per share and $25 per share in a 20-year bond that is interest-free for the first five years. Mr. Simon's Wesray Inc., Morristown, N.J., has offered $60 per share cash, sources said. There are about 16.6 million common shares of Multimedia stock outstanding, bringing the Wesray takeover price to about $1 billion.

If Multimedia management agrees to present Mr. Simon's bid to its stockholders, and if it is approved, it

Two new coffee brands help fight for market share

GF stands its ground

By GAY JERVEY

General Foods' intensive effort to broaden its coffee business is continuing with the coast-to-coast rollout of Maxwell House decaffeinated instant coffee and the testing of Maxwell House Master Collection, a family of whole-bean and ground-premium brews.

Advertising for the new decaffeinated item—which joins Maxwell House ground decaf, new last year—is expected to break early next month. Master Collection—comprised of both special-reserve dark and traditional roasts, in addition to a decaffeinated variety—is available only in an Evansville, Ind., test market. Ogilvy & Mather, New York, is the agency for both products.

GF declined to elaborate on either introduction, other than to describe the instant launch as "imminent" and the Master Collection test as "very limited."

However, analysts applaud both GF moves as further indication the marketer is bent on protecting its coffee franchise—the company's biggest source of cash and one that has been under pressure from Procter & Gamble and Nestle.

It also is clear the name of the game in the coffee market these days is segmentation. "The only way to gain, or even to just maintain market share today, is to have every niche covered," said Ron Strauss, an analyst with William Blair Co., Chicago. "This strategy has enabled GF to do a good job of warding off P&G and Nestle."

"There's so much activity in the coffee business, and it's so highly, highly competitive, that segmenta-

Robert Jacoby, chairman of Ted Bates Worldwide, is seeking growth, but denies the company is holding m[illegible]r talks with Saatchi & Saatchi.

Bates' Jacoby will hang tough on growth plan

By STEWART ALTER

NEW YORK—Ted Bates Worldwide will make changes in its money-losing McDonald & Little operation, maybe even buy another agency in Atlanta. It is also close to a direct-marketing acquisition in the U.S., as well as agency purchases in Canada, Germany and Puerto Rico.

But while Bates chairman-ceo Robert Jacoby bluntly admitted to being "disappointed" in the performance of the William Esty Co. unit, he still likes its management and is not planning any changes in that area. Nor, as rumored, is he having merger talks with Saatchi & Saatchi; "they're a major Procter & Gamble agency and our second largest client is Colgate-Palmolive," he said.

Mr. Jacoby, who has found himself at center stage lately because of news reports about all kinds of changes he might be making—in his board of directors, his subsidiary agencies, and Bates' ownership—sat down last week for a rare interview to explain his thinking and goals. He touched on a range of subjects that included his thoughts on his successor, his subsidiaries, his financial goals and the Bates stock ownership system that gives him such enormous power.

Esty, despite three major account losses (several brands from Colgate-Palmolive, some Warner-Lambert brands, Winston cigarets) and "major motion" downward in its billings, still seems to be the jewel in the Bates crown of affiliate agencies. This in spite of the fact

Last Minute News

Galotti bows to 'Mademoiselle'

NEW YORK—Ronald Galotti is leaving Hearst Magazines, where he was publisher at *Country Living*, to join Conde Nast Publications as *Mademoiselle's* publisher. He succeeds Joseph Fuchs, publisher since 1977, who becomes vp, a new post being created at Conde Nast because "additional corporate management is required" as a result of recent expansion, said chairman S.I. Newhouse Jr.

Plant's workers gear up to picket at BBDO

NEW YORK—BBDO's headquarters here is slated to be picketed next month by workers from Black & Decker Corp.'s Allentown, Pa., plant. The action will be part of the workers' protest against plans to close down what is the only unionized plant among those that B&D acquired last year when it bought General Electric Co.'s housewares division. BBDO handles B&D's $100 million ad campaign highlighting the division's name change to B&D from GE.

Interpublic mulls former Time chief for board

NEW YORK—James Shepley, former president of Time Inc. and currently chairman of Pullman Co., has been nominated to serve on the Interpublic Group of Cos.' board. If elected, he would join former CBS president Frank Stanton as the second former media company president on the Interpublic board.

Philip Morris plays down Players 25s

NEW YORK—Philip Morris USA has "no firm direction" rega possible introduction of 25-unit packages of its upscale Pl line, a company spokesman says. Last year, Players fell market share thought essential to a brand's success.

The word at AT&T is Mummenschanz

By BRIAN MORAN

NEW YORK—AT&T this week begins new network tv ads for a broad range of business and consumer products as part of a $125 million first-half ad push designed to drive home the company's reputation for reliability.

The new creative marks a significant shift in direction for AT&T, which spent most of last year laboring to reestablish itself with consumers following the telephone monopoly's breakup in January, 1984.

The new commercials, produced by three AT&T agencies here, have a more aggressive tone. A few even show competitors' products and challenge viewers to make comparisons.

Consumer confusion from the divestiture was not helped by AT&T's dizzying array of theme lines in its corporate, product and service advertising last year. All of the new advertising carries a single theme line: "The right choice."

The new look will appear first in spots breaking tonight for AT&T Information Systems, Morristown, N.J., on the NBC-TV miniseries "Wallenberg: A Hero's Story." The commercials, via Ogilvy & Mather, support Information Systems' office automation products and services.

To get across a potentially dull message about the adaptability of AT&T's product line to integrate existing office systems, O&M created two futuristic spots featuring Mummenschanz, the famous Swiss mime troupe, in its first-ever commercial appearance.

In one spot, the mimes appear in costumes resembling giant Slinky toys that slowly "integrate" with each other. In another, the three-member troupe silently exchanges vividly colored building blocks until each has the "information" necessary for efficient office communication.

"To use people in the same old office setting to talk about office automation in the future would have been deathly boring," said Jay Jasper, O&M senior vp-creative director. "We needed a metaphor, and [Mummenschanz'] ability to imbue objects with humanity fit the bill."

AT&T's new ad tack will hit full stride April 14, when the company begins its one-eighth sponsorship of the CBS-TV miniseries "Space." AT&T's $4.8 million buy for the special will see the debut of new creative for the AT&T Communications, Consumer Products and corporate accounts.

AT&T Consumer Products, Parsippany, N.J., will break three spots on the special, via N W Ayer, that will play up consumer fears of buying non-AT&T telephone equipment and stress AT&T's status as the only home telephone

Can Yugo spark Beetle-mania?

By JESSE SNYDER

A new importer plans to recapture the low-price, but lovable, marketing image of the Volkswagen Beetle this summer when it starts marketing a Yugoslavian-built auto.

The Yugo, announced as a $3,995 basic small car, must be marketed as a fun vehicle with good value because too many low-end competitors will soon crop up for price advertising alone to work, said John Slaven, senior vp-marketing for Yugo America.

The stated price is $1,400-to-$2,000 below established low-end Japanese imports, but South Korean and other European auto makers already are planning or considering similar entries into the U.S. car market.

Yugo America, a New York-based subsidiary of Malcolm Bricklin's Bricklin Industries, will import a base and upscale model of the small four-seat sedan. The cars, based on a licensed Fiat 127 design, are built by Zavodi Crvena Zastava, a 30-year-old Yugoslavian auto maker.

The car bears a passing resemblance to a small VW Rabbit, one of several parallels to the West German auto maker.

Rosenfeld, Sirowitz & Lawson, as agency for the Yugo (AA, April 1), will be charged with finding a distinctive position for the car. Agency co-chairmen Ronald Ro-

Baker puts it on back burner

Celeb rule stalled

By STEVEN W. COLFORD

WASHINGTON—A Treasury Department proposal to restrict the use of celebrities in alcoholic beverage ads appears to have run into opposition from Treasury Secretary James Baker III.

The proposal from the Bureau of Alcohol, Tobacco & Firearms was forwarded to Mr. Baker and his deputy, Richard Darman, last month after John Walker, assistant secretary for enforcement and operations, signed off on it, according to department sources.

Under normal circumstances, Mr. Walker's approval would have sufficed, sources said. But because of the ongoing debate over alcohol advertising on tv, department officials felt it advisable for newly arrived Secretary Baker to pass on the proposal. The length of time it has languished on Mr. Baker's desk has sparked questions about the proposal's future.

A high-level Treasury official,

Hefner eases grasp on 'Playboy' helm

By BOB MARICH and GARY M. LEVIN

HOLMBY HILLS, CAL.—Hugh Hefner said he won't lord over Playboy Enterprises anymore, but instead will be a sort of elder statesman in the company he founded 32 years ago.

The change in status is prompted by the stroke he suffered March 6, he told reporters at an April 1 press conference at his mansion near Beverly Hills. Mr. Hefner blamed his stroke on stress resulting from a bitter feud with film director Peter Bogdanovich, whom he blasted during the press conference.

No immediate changes are expected in the $187 million Playboy media conglomerate because Mr. Hefner's daughter Christie, 33, president-ceo, and longtime publishing aide Arthur Kretchmer, 44, senior vp-editorial director, *Playboy*, take up the slack. Insiders say the reins of *Playboy* are in the hands of Mr. Kretchmer; Ms. Hefner concentrates on Playboy's cable tv venture and corporate affairs.

Nat Lehrman, president of Playboy Enterprises' publishing division and associate publisher of *Playboy*, said he will step down from those posts to take an "advisory" role in the company when a successor is found (AA, Feb. 18).

"This is a company nearing the end of its transition period," said David Leibowitz, an analyst with American Securities, New York. "I am very impressed with what I've seen. I think management has a realistic set of expectations on what they can do. . .Clearly there's a sense that this is a business and will be operated as such," Mr. Leibowitz continued, adding that the opposite perception was prevalent until perhaps a decade ago.

Mr. Hefner said his stroke was "acute," not minor as first suggested by the company. Though he appeared to be healthy, alert and fully recovered a month after being stricken, he said the experience convinced him it's time to slow down.

"The stroke was in the left lobe" of the brain, he continued. "What I lost was the ability to gather the appropriate words and phrases, both to read them and also to find them in the index files of the mind.

"I expect to be very actively involved in the future of the company, but it will be a different kind of activity [with] the focus more on the creative kinds of things, rather than the routine," he said.

Mr. Hefner said improving *Playboy's* image, which he says is under increased attack, is one of the roles he sees for himself.

Mr. Kretchmer, who has been with the magazine since 1966, said he expects Mr. Hefner will drop participation in regular meetings where he personally reviewed art and editorial of the magazine. "But Hef's stamp will still be on it," Mr. Kretchmer said.#

CORRECTIONS & CLARIFICATIONS

- Monahan Dayman Adams, an agency based in Sydney, Australia, bought 50% of Japanese-owned Standard Advertising, Sydney, not 50% of Tokyo-based Standard Advertising (AA, March 18, P. 3).
- The list of previous winners of the ADVERTISING AGE Agency of the Year award (AA, March 28, P. 4) unfortunately omitted Cunningham & Walsh, which in 1973 became the first agency to win this award.
- According to Simmons Market Research Bureau, 42.8% of all black males age 18 to 34 read *Jet*. The percentage was reported incorrectly (AA, March 14, P. 26).
- Geers Gross Advertising's gross income and billings should have been $37.3 million on billings of $253.6 million in 1984, compared with gross income of $37 million on billings of $250 million in 1983 for the New York agency. The change would elevate the agency to No. 32 in ranking by worldwide gross income from No. 46. Figures for Geers Gross, London, should not have been omitted from the totals (AA, March 28, P. 36).
- SSC&B:Lintas' percentage of foreign-to-world billings should have been 66.3% in the Top 10 chart, based on SSC&B's foreign contribution of $815.7 million to world billings of $1.23 billion. The agency's No. 2 rank on the chart does not change (AA, March 28, P. 50).
- Saffer Cravit & Freedman, Toronto/Chicago, did not lose as published, but gained the following overseas accounts: Simpson's, Coles Books, Budget Rent a Car, Firestone U.S., Scitron (AA, March 28, P. 90).
- A Young & Rubicam profile should have contained a ☑† indicating an independent accounting company had verified the agency's gross income figure using language acceptable but different from that supplied by AD AGE. Additionally, Roger Craton was listed as exec vp-chief financial officer. He is senior vp-chief financial officer (AA, March 28, P. 51).
- The chart "Top 10 I and II agencies by direct marketing billings" should have read "by direct mail billings" (AA, March 28, P. 80). Additionally, the direct-marketing designation in the pie chart on P. 108 should have been labeled "direct mail."#

FINALLY
A COUPON VEHICLE
WITH REDEEMING
QUALITIES.

FREE
CouponCounter

At last there's a coupon vehicle that offers you efficiency, security and reliability: The Coupon Counter®

The incredible in-store Coupon Counter
The Coupon Counter machine instantly delivers your coupon right inside the store. Which means shoppers don't have to hunt for it through a cluttered newspaper. Or clip it. Or remember to bring it. Your coupon is always right there where decisions are made.

Triples your redemption rates
Our 1984 results prove that shoppers who use the Coupon Counter are three times more likely to redeem your coupon. Which means you get three times the power to stimulate trial. In fact, shoppers are so likely to redeem Coupon Counter coupons, many of our clients tell us they can lower the face amounts and still get impressive results.

Tightens security
With misredemption on the rise, the Coupon Counter offers virtually fool-proof security. Your coupon can only be validated when the shopper enters a personal code.

Delivers demographics
Because every Coupon Counter cardholder is listed in our data bank, we know exactly who redeems your coupon. This vital tracking information is now available for the first time…just ask and find out exactly how our research capabilities can help you.

Join the revolution
If you're not getting these kinds of results from your current coupon vehicle, it's time to try the Coupon Counter. You'll join a long list of top companies who've had remarkable success with us.

Just call 1-617-329-5800.

It could be the most redeeming thing you've done for your couponing effort.

Some shops quarrel with DMA billings report

By PAUL L. EDWARDS

NEW YORK—The Direct Marketing Assn. has reversed its decision to separate from its annual survey of billings one agency that reported income from its letter shop.

At the same time, the DMA is continuing to receive protests from agencies that believe the unusual treatment of the annual billings survey was unfair.

The complaints are likely to lead to a review of the entire process before the 1985 survey is released next year.

In its "1985 Fact Book," DMA will reinstate the listing for Foote, Cone & Belding/Direct. In its first release of the survey (AA, March 18), the agency was included in a smaller, separate list of direct-marketing agencies that provide letter-shop, database and printing services in addition to the standard agency fare. DMA initially referred to these agencies as specialty agencies. It has now decided to call them integrated agencies.

DMA also considered making a similar change on behalf of the Direct Marketing Group, but at that agency's request decided to leave it on the smaller list, where it ranks No. 1.

The survey was split into two categories, DMA said initially, because many in the industry believed that including ancillary income made it difficult to compare all the agencies listed on the same basis.

While the decision generally was received favorably by agencies without such operations, it drew immediate protest from FCB/-Direct and the DM Group. Two weeks later, the Direct Marketing Agency, Westport, Conn., joined in the complaint.

The DM Group has included income from its letter-shop activities since DMA first conducted its survey. FCB/Direct, on the other hand, never had such income until its purchase last year of Smith-Hemmings-Gosden. At the Direct Marketing Agency, it is the company's database services, rather than a letter shop, that generate the ancillary income.

In a letter to the association, Norman Suslock, chairman, Direct Marketing Agency, wrote, "The only difference between the Direct Marketing Agency and any of the other agencies is that we believe that the computer, and more particularly, the construction of unique databases and the ability to perform back-end analysis, separates us in terms of a more complete service to clients. If there is a difference [between us and the other agencies], that difference is not that the general agencies are blind to the value of those techniques, but that they buy them outside." DMA said it received the Direct Marketing Agency's complaint too late to consider a change in its "Fact Book."

In the case of FCB/Direct, director Mark Weinstein said the letter shop at Smith-Hemmings-Gosden was a small part of that agency and represented but a minuscule portion of the total revenue generated by FCB/Direct. Together with the letter shop, FCB/Direct reported 1984 billings at $48.7 million. In the revised listing, with the letter-shop activity removed, the agency is reporting $47.5 million.

John DePasquale, chairman of the DM Group, went even further. He said not only was the income from the letter shop a small part of his agency business, but the comparisons between his agency and others that do not have letter shops were unfair.

"It makes very little, if any difference," he said, "whether the money that we spend on letter shops goes to our factory or to someone else's. We do use others sometimes and all the other agencies must go outside. The money that they spend on those letter shops is then considered a fee and capitalized for billing purposes. So they've been reporting their spending on letter shops all along, just as we have."

Nonetheless, in its revised listings, the DM Group was asked to remove from its billings the amount of income attributed to its letter shop. Mr. DePasquale declined to do so, and so will remain on the integrated list. Mr. DePasquale said he will continue to press for reinstatement of the agency on the general list while retaining the letter-shop revenues. "The other agencies say it's like comparing apples and oranges to include all our income. But I think that it's only apples and oranges when you leave it out," he said.

A spokeswoman for the DMA said only two changes will be made in the "1985 Fact Book." The smaller list will be retitled "Integrated Agencies" and FCB/Direct will be returned to the general agency list. She added, however, that the controversy is likely to lead to a review of the process by DMA's Agency Leaders, a newly formed group consisting of the senior management of direct-marketing agencies.#

Top 10 general DM agencies

This revised list represents only those agencies that responded to a DMA request made in 1985 for their full-year 1983 and 1984 U.S. billings. All figures were supplied by the individual agencies, which were asked to include space and broadcast billings, billings for materials and services provided by organizations outside the agency and capitalized agency fees. Source: DMA Research Department.

Rank/Agency	Billings ($ millions) 1984	1983	Per cent change
1. Wunderman, Ricotta & Kline	159.0	124.2	28.0
2. Ogilvy & Mather Direct Response	133.0	95.0	40.0

S.N. Okner to president, Signature Direct Response Marketing division, Signature Group, Montgomery Ward & Co., Chicago, from exec vp-life and health insurance. He succeeds **Richard Cremer**, who retired.

The **Frank Vos Co.**, the New York direct-marketing agency owned by SSC&B:Lintas Worldwide, has changed its name to **SSC&B:Vos Direct**.#

Risky business is DRM Group's target

NEW YORK—Steve Bowman has a mission: Restoring an entrepreneurial spirit to insurance companies.

"Insurance companies were more entrepreneurial many years ago, but that stopped when they got bogged down in bureaucracy," said the president of Omaha-based DRM Group, a direct-marketing agency that specializes in insurance.

"And up until recently, 'entrepreneur' was a dirty word in this business. But not any more," said Mr. Bowman, who has reason to know.

He spent 12 years in the marketing departments of insurance companies, developing direct-marketing programs in-house, before founding his own agency with three other insurance professionals in 1982.

Unlike most direct-marketing agencies, which skew their efforts toward developing marketing programs, DRM Group, with its insurance expertise, often presents entire business plans to potential clients.

"We'll develop a direct-marketing program for a specific product, like hospital indemnity, and then find an insurance company that would like to create that product and work with us," Mr. Bowman said.

"We'll share in the marketing costs and in the profits."

Mr. Bowman conceded that is a high-risk approach to direct marketing, but it is a risk he takes with obvious relish. "Direct marketing is accountability," he said. "And with our approach, we're putting our time and future profits on the line."

Just the same, Mr. Bowman's approach is new and different, and not all insurance marketers have embraced the idea. "A lot of what we do is still conventional direct marketing—lead generation, for example."

Some insurance companies view lead generation as an adjunct to the existing agent sales efforts, while others view his programs as a totally independent sales effort that they believe "competes" with the agents.

Mr. Bowman believes this conflict will be resolved over time, with insurance companies setting up centralized direct-marketing departments that will take over for agents on certain products. "There are many common insurance products, such as property and casualty insurance, that don't generate sufficient commissions to maintain an active sales-agent network," he said.

"They would be good candidates for direct-marketing programs exclusively. Other, high-ticket items that are also more complicated, like universal life, will probably still require the services of an agent to sell effectively."

Direct marketing in the insurance industry, he said, has changed considerably since the early 1970s, when he first started at Mutual of Omaha Insurance Co. "Back then, direct marketing was taking a list of 5 million names and mailing to every one of them. Postage was [low] and they could afford that. Today, the cost would be prohibitive."

Insurance marketing has become more sophisticated, he said, and that will continue. "One of the techniques that became popular was third-party endorsement, the use of an association or person to endorse a given plan. At first, those endorsements were a tremendous boost to sales. But today, only a few groups, like the American Assn. of Retired Persons, have much effect."

DRM Group is a privately held agency reporting $2.4 million in retained earnings.

Among its insurance industry clients are numbered Amoco Life Insurance Co., a division of Standard Oil of Indiana, Omaha; Equitable of Iowa, Des Moines; Liberty Mutual Insurance Co., Boston; the Hartford, Hartford, Conn., and Phoenix Mutual Insurance Co., also Hartford.

Mr. Bowman said the agency also has begun working with several banks.

"They have very similar problems and we feel that our approach will be attractive to them as well," he said.#

Senior editor Paul L. Edwards, New York, is the editorial director of the ADVERTISING AGE Direct Marketing section.

In the news

Delta plays oldie but goodie

When Delta Air Lines decided to put a long-running advertising slogan on ice, the company didn't mind borrowing to come up with a new one. Delta simply bought the rights to a song that once worked wonders for *Sports Illustrated*. *See Page 4.*

Jingle jangles advertiser

Cover photo by Arnie Adler

Are three notes enough of a jingle to warrant trademark protection? That's what Nabisco Brands would like to know, and it's up to a New York court to decide. *See Page 4.*

Short takes

"Saturday Night Live's" Martin Short has created a Grimley funny character and ridden it to late-night comedy success. *See Page 5.*

A publishing 'Romance'

The all-together woman is the target of *Romance Today*, a four-color, slick women's magazine set to debut in the May 5 Sunday editions of the *New York Daily News*. *See Page 9.*

Uncovering the jeans beat

Jag jeans caught readers' attention with a print ad in which all but three of the 13 models were nude. It was created by a new Franco-American agency called ADN. *See Page 31.*

Special Report

International—Canada

Canada is looking beyond its own borders. More Canadian companies are investing in the U.S., and many Canadians are finding jobs overseas. Agencies, media and admen from Quebec to British Columbia are included in the Special Report, *starting on Page 13.*

Presstime

Two of them look at 'Us'

New York—*Us* is likely to be sold soon by Macfadden Holdings' Peters Publishing Co. division to Straight Arrow Publishers (*Rolling Stone*) and Telepictures Publications (*Muppet Magazine*), publishing industry sources say. All three companies declined comment on reports of the impending sale of the every-other-weekly.

A-B hatches promo

St. Louis—Anheuser-Busch soon will launch an unusual promotion for its Natural Light brand. Complementing that brand's "The beer with the taste for food" theme line (AA, Nov. 26), the on and off-premise promotion will offer a $1 rebate with proofs-of-purchase for fresh chicken and two six-packs. Also included is a recipe for Chicken Monica, a dish featured in one of the Natural Light spots. D'Arcy MacManus Masius handles. Separately, an A-B spokesman flatly denied published reports the brewer plans to start a pay-per-view cable channel to carry St. Louis Cardinals baseball games. A-B owns the National League team. Sports Time Cable Network, in which A-B held a 51% interest, folded March 31. That network had telecast Cardinals games.

'S-T' pages local agencies

Chicago—*Chicago Sun-Times* has invited nine local agencies to vie for its account. The winner will succeed Grey, Lyon & King, New York. The agencies contacted for formal presentations are Bozell & Jacobs; Campbell-Mithun; Doremus & Co.; HCM; Smith, Badofsky & Raffel; Albert Jay Rosenthal & Co.; Don Tennant Co.; Zechman & Associates, and Zwiren & Wagner.

O&M gets bank account

Hartford—Connecticut National Bank has named Ogilvy & Mather Partners, New York, to handle its $3.6 million advertising and promotion account after a six-agency review. Geers Gross previously handled.

$300M to merger pals?

New York—Broadcast station brokers expect Capital Cities/ABC Inc. to get between $300 million and $500 million from the sale of tv and radio properties needed to meet Federal Communications Commission requirements as part of the merger of the two companies. The brokers also expect Cap Cities/ABC to receive as much as 12 times projected cash flow, compared with the rate of 10 times cash flow in other recent station sales.

ESPN forms Olympic team

Bristol, Conn.—ESPN has tapped 22 1984 Olympians to host its 16-day rebroadcast of the 1984 Summer Olympics beginning June 29. Among the athletes who will revisit Los Angeles for special coverage of their sports are Mark Breland, Michael Jordan, Edwin Moses and Mary Lou Retton. David Wolper, producer of the opening and closing events of the Olympics, will also appear.

Bozell is on Beam

Chicago—Bozell & Jacobs has added a new-product assignment from James B. Beam Distill-

'Go West' not part of vocabulary for East Coast talent

By Jennifer Pendleton

Hiring talent from the East for positions in California is risky business, according to Bozell & Jacobs Pacific division chairman Cy Schneider.

Getting the prospective employe to accept the job is easy. The real test comes later—seeing if the new hire can adjust to life on the West Coast.

"When they accept the job, they think, 'Yes, it would be nice to have a vacation. I think I'll take it,' " explains Mr. Schneider, noting that, for many, West Coast experience is limited to brief respites at posh lodgings, such as the Beverly Hills Hotel.

"With their first paycheck, they buy a pair of sunglasses. On the second, a sports car," explains Mr. Schneider.

But then, the problems start to emerge: "They go crazy. They find they don't have any support systems here," states Mr. Schneider. "They're astonished they can't find a corned beef sandwich after 10 p.m."

Dealing with the culture shock many transplants from the East experience after moving to California is only one problem agency heads face when filling management positions. In interviews with the general managers of several major agencies in Los Angeles and San Francisco, most complain about the difficulty of finding top talent for middle and upper-management positions.

Many admit the West Coast talent pool is smaller than that of New York and Chicago. One of the obvious reasons is that there are fewer major package-goods companies in the West, the kind that typically provide a solid foundation for careers in account management.

"There's a shortage because there aren't too many training companies based here," laments Alan Pando, president of Della Femina, Travisano & Partners' Los Angeles office. "And the average account exec gravitates to New York because that's where the action is." He believes the typical account exec who has spent his entire career on the West Coast is less prepared for a management position than his eastern counterparts.

Craig Campbell, director of client services at Foote, Cone & Belding, Los Angeles, agrees that good management personnel are hard to find, but thinks the problem goes beyond the lack of package-goods companies based in the West. The agency business simply is growing at a faster rate than new talent is entering the business, he believes. Jerry McGee, executive director of Ogilvy & Mather, Los Angeles, thinks so, too. "It's [the talent pool] not as big as it used to be," states the recent New York transplant.

In addition to facing fewer qualified prospects, Los Angeles and San Francisco agencies have another major problem that inhibits recruitment efforts: The prohibitive cost of California real estate. "It's the single biggest obstacle in a New York or Chicago move," states Los Angeles-based executive recruiter Joan Baeder.

While a senior executive may be able to own a substantial home for $300,000 in some suburbs of New York or Chicago, prospective employes are shocked to learn that a similar sum will yield only a modest post-World War II two-bedroom house in West Los Angeles.

One agency exec explained one of the problems this way: "Say

(Continued on Page 31)

Tv turning over new leaf

By Desmond Smith

TORONTO—In a country as regionally diverse as Switzerland and bigger than China, national politics—which way the wind is blowing in Ottawa—is a good clue to media trends.

With the election of a conservative Prime Minister, the outlook for Canada's electronic media is one of change.

Pay tv appears to be taking off after a brutal shakeout that saw the financial collapse of all seven original national and regional pay tv companies. Two years later just three pay tv companies have survived, and then only after financial restructuring.

In English-speaking Canada, the First Choice pay tv company has a monopoly east of Alberta, while Superchannel owns everything west of the province. Super Ecran has the French monopoly nationwide.

Until now, with less than a 2% share of the total tv hours tuned in, pay tv has been a losing proposition for programers and cable companies. But Fred Klinkhammer, president of First Choice, based in Toronto, says he expects his company to break into the black this year.

Colin Watson, president of Rogers Cablesystems of Toronto, Canada's largest cable service with 1.4 million subscribers, says the engine now driving pay tv was last year's federal decision to allow cable operators to offer U.S. specialty channels.

Far ahead of systems in the U.S., cable in Canada is the dominant distribution technology for tv. More than 60% of households are hooked into cable systems, compared with 43.7% in the U.S.

However, cable is facing a challenge from the satellite dish, which has become as familiar a northern sight as the Hudson's Bay store and the snowmobile.

In addition to programs that can be picked off Canadian satellites, there is an even greater choice of programing available off U.S. satellites.

The Canadian Cable Television Assn. estimates between 80,000 and 100,000 satellites are in use. Recognizing the market potential, Tandy Corp.'s Canadian Radio Shack stores are marketing a complete C-band satellite dish that can receive between 50 and 100 channels.

Of all the emerging technologies in tv, videocassette recorders have stirred up the most interest among advertisers, broadcasters and cable operators.

According to A.C. Nielsen Co. and the Broadcast Bureau of Measurement, vcr penetration in Canada in 1978 was about 1%. By the summer of 1984, the bureau estimated vcrs had reached 20%.

This fragmentation of Canada's tv distribution system concerns Ron Willoughby, chairman of the Assn. of Canadian Advertisers.

"The increasing number of viewer options is a significant trend, yet as advertisers I don't believe we have a handle on it," Mr. Willoughby says. He says that in the age of the vcr, it's time to reconsider the industry's cost-per-thousand yardstick.

"We have to think about viewership of commercials as opposed to viewership of programs now that viewers have such options as zapping, switching and editing."

Programing continues to be an explosive issue in Canada, as the trend toward more U.S. and foreign (mostly British) programing escalates. The trend has been helped by the new administration's relaxed attitude toward the Broadcasting Act of 1968, which says Canadian broadcasting should "safeguard, enrich and strengthen the cultural, political, social and economic fabric of the country."

In a newspaper article, Mark Starowicz, top current affairs producer with British Broadcasting Corp., said the Canadian broadcasting system has become substantially American, and noted that less than 30% of all English-language tv in Canada is Canadian.

But consumers don't seem to mind. The latest A.C. Nielsen Co. ratings book for 1984 listed "Dallas" on the CBC, "60 Minutes" on the Global Network and the movie "Popeye" on the CTV Network as the most watched tv shows.

Desmond Smith is a senior producer with the Canadian Broadcasting Corp.

Magazine market heats up

By Tony Thompson

TORONTO—*Newsweek's* move to begin printing in Canada has brought controversy to the Canadian magazine industry, but it's the battle for the lucrative and growing yuppie market that's generating the industry's greatest activity.

The battle has caused a flurry of new launchings. Earlier this year, Thomson Newspapers-owned *Globe and Mail*, Toronto, produced the first of its monthly *Report on Business*, distributed free with the paper to the *Globe's* 380,000 readers.

At about the same time, CB Media, publisher of *Canadian Business*, the country's leading financial magazine, announced introduction of *Your Money*. Publishers say the magazine met the 100,000 target circulation for the first issue in January.

However, one new issue already has ended in failure. *Quest*, owned by Comac Communications, offered advice on the art of fine living and personal investment. Unfortunately, a survey found that few of the some 700,000 copies delivered free were opened. The publication folded in December.

While much of the industry's new-publication money is being socked into the slick, money-oriented issues, much of the industry rhetoric is being aimed at *Newsweek*. The agreement between Canada Post and the Washington Post Co., *Newsweek's* parent company, for a mail rate subsidy allowing the company to pay about 5 cents to deliver each magazine instead of almost 40 cents that it normally costs for second-class mail, brought a storm of protest.

The powerful Canadian magazine lobby extracted a promise from the government that the magazine would be the last of the 28 U.S.-owned publications to enjoy this special postal rate. All major Canadian-owned magazines receive postal subsidies.

Newsweek's entry was a miniseries rerun of the late 1970s political intrigue that led to the disallowance of business tax deductions for Canadian companies advertising in non-Canadian-owned media.

Katharine Graham, board chairman of the Post Co., told the Empire Club of Canada in February that while "Canada's culture and national identity are well-served by support of Canadian media," diversity of information should not be "at the expense of . . . the foreign media."

However, Peter Newman, a former editor of *Maclean's*, at the same luncheon said newsmagazines purporting to report on Canada should be owned and edited by Canadians.

Critics say this view, common among Canadian publishers, is blinkered, failing to take into account the ownership of U.S. media by Canadians. Mr. Newman's former employer, Maclean Hunter, owns many U.S. trade magazines, recently acquired the *Houston Post*, and has several cable franchises in the U.S. And the Thomson family has more holdings in the U.S. than in any other country.

The controversy continues to provide free publicity for *Newsweek*. *Newsweek's* circulation before it began printing in Canada on Nov. 5 was about 55,000, vs. *Time's* 357,000 and *Maclean's* 643,000 copies. By January, *Newsweek* was selling 85,000 copies a week, with a mid-1985 target of 100,000 to satisfy media buyers' criteria.

Time has been printing in Canada since before 1976, when the business tax deductions for advertising were disallowed.

Canadian media buyers have welcomed *Newsweek's* entry. "I see it as a good thing; an enrichment," says George Murray, Ogilvy & Mather Canada's media director. "They have a good publication, and there's room for it here."

Coke gets its juices flowing

Orange, recast Fresca ready

By NANCY GIGES

Coca-Cola USA plans a double-barreled entry into the emerging with-juice segment of the soft-drink market. It will introduce into U.S. test two brands containing juice: Minute Maid orange soda and a reformulated Fresca.

Coca-Cola is racing to beat rival Pepsi-Cola USA into the marketplace with the orange flavor, as Pepsi is expected to begin tests of Mandarin orange-flavor Slice soon. Coca-Cola has watched Pepsi's Slice lemon-lime with 10% juice overtake Coke's own Sprite lemon-lime (sans juice) in test areas.

Coke plans a late May or early June introduction for its new with-juice items.

Careful to pay attention to the larger cola segment as well, Coca-Cola plans this week to air the first 30-second spots for Cherry Coke, themed "Out 'n outrageous," in its limited markets: Atlanta; Charlotte/Greensboro/Winston-Salem, N.C.; Denver, and Hartford, Conn./Springfield, Mass.

A Coca-Cola spokesman said the company thinks Minute Maid "has a real advantage over Pepsi's Slice. The U.S. consumer is going to be excited about the 10% real orange juice in Minute Maid as opposed to Slice, which has principally pear and white grape juice in addition to lemon-lime."

In Canada, which served as a working test lab, Minute Maid orange soda contains only 2.5% juice.

Coke out to quench buyers' thirst for clothing—Page 3.

A Coca-Cola spokesman said the juice content was increased for the U.S. market because testing here indicated a stronger interest in the higher percentage. In Canada, the drink is now available to 90% of the population, up from 40% a month ago.

Fresca, a low-calorie grapefruit-flavor soft drink that has been restaged several times since its introduction in 1966, will be tested as "The perfect soft drink." It will contain 100% NutraSweet low-calorie sweetener, 1% real grapefruit juice and revert to a cloudy appearance from a clear one. New packaging features a creamy-yellow can at the bottom that fades to a light cream color at the top.

Fresca's agency is McDonald & Little, Atlanta.

According to Coca-Cola, the brand will be aimed at an upscale audience 25 years old and older with incomes of $30,000 and above.

Brian G. Dyson, president, Coca-Cola USA, said the new Fresca will be positioned as a low-calorie alternative to other beverages, including sparkling waters, light wines and coolers. "Unlike certain competitors, this is a soft drink, not a bubbly, flavored water," he said.

As for Minute Maid orange soda and its diet counterpart, Mr. Dyson said it is directed at the citrus-flavor and real-juice segments, which are currently experiencing significant market growth.

Noting that the orange soda carries the prestigious name of the leading brand of orange juice in the U.S. from Coca-Cola's foods di-

Lowenbrau out shopping

By STEWART ALTER
and SCOTT HUME

Miller Brewing has begun a "preliminary review of new advertising creative" for the $20 million Lowenbrau superpremium brand assignment now handled by Backer & Spielvogel.

A spokesman for Milwaukee-based Miller said it will interview "a number of potentially interested agencies" over the next two weeks. By the end of this month that number will be narrowed to two or three finalists who will join Backer & Spielvogel, New York, in making competitive presentations.

If Miller sticks to that timetable, it would be a much speedier review than last year's 11-month-long deliberation over the $50 million assignment for High Life. B&S ultimately lost that account to J. Walter Thompson USA, New York, but retained media-buying responsibility.

The job of reviving Lowenbrau's sales may be no easier than turning around Miller High Life. The superpremium segment has been badly hurt by the rise in sales for imports, and Lowenbrau sales dipped perhaps 20% last year, according to analysts' estimates.

Media merger mania mounts

By VERNE GAY

New York—Everyone agrees, media takeover fever is rampant. Now the question is, who's next?

Wall Street observers, broadcast analysts, consultants and brokers say the flurry of takeover activity is far from over. Just in the last week, Cox Enterprises, the closely held company that owns the Cox newspaper interests, made a $75-a-share tender offer to take Cox Communications and its broadcast and cable properties private; CBS Inc. sued arbitrageur Ivan Boesky for alleged stock-trading improprieties involved in Mr. Boesky's purchase of an 8.7% interest in the media giant; Multimedia Inc. rebuffed two separate $1 billion offers from former Treasury Secretary William E. Simon and Lorimar Communications, and Storer Communications, which faces liquidation and a hostile proxy fight for control of the company, convinced the Federal Communications Commission to decide quickly whether the dissident stockholders had to file a "long form" request, a move that could seriously delay the takeover attempt.

At least half a dozen other top communications companies could also be targeted by takeover specialists in the near future, according to an Advertising Age survey of stock analysts and station brokers. Some of the companies most often cited as likely takeover targets,

Sohio bridges Gulf account with Doner

By JESSE SNYDER

Standard Oil Co. (Ohio), devising a marketing strategy for the 4,200 Gulf service stations it acquired this year, has assigned the multimillion-dollar account to W.B. Doner & Co., Southfield, Mich.

Doner, already on Sohio's agency roster, will open a Cleveland office, where Sohio is headquartered. The size of the account is under negotiation, but it could reach $8 million. A key factor will be how soon and how completely Sohio plans to consolidate retail gasoline brands.

Sohio is researching for an umbrella brand name under which to consolidate many of its retail gas outlets within a year or so. It is unclear how agency assignments would be divided under such an arrangement.

The Gulf stations in Sohio's hands, located in eight southeastern states, were acquired from Chevron Oil Co. in February.

Doner beat out another incumbent Sohio agency, Marschalk Co., Cleveland, and an unspecified number of other agencies, said Jon Groza, Sohio advertising analyst. Young & Rubicam, New York, which has Chevron's remaining Gulf stations outside the Southeast, was not involved because of the conflict.

Doner handles Sohio's year-old Procare auto service centers in Ohio and tire, battery and accessories advertising. Marschalk handles Sohio's other retail gasoline outlets: Sohio in Ohio, Gibbs and BP in the East, William Penn in Pennsylvania, Boron in Michigan, Kentucky, Pennsylvania and West Virginia and Gas-'n-Go in Detroit.

Marschalk also handles Sohio Chemical Co., a Cleveland-based subsidiary, and Truck Stops of America, which Sohio purchased from Ryder Co. in 1984.

Sohio's 4,200 Gulf stations had to be divested by Chevron in order to get government approval of its acquisition of Gulf Oil Co. Chevron still operates Gulf stations in other states, but will allow Sohio to retain the Gulf brand name for up to nine years.

Doner executives will travel to Sohio headquarters in Cleveland this week to discuss plans for the new office. Doner is likely to locate account execs in Cleveland, perhaps in the Sohio building, and keep creative in its Detroit office.

"We are very happy with Marschalk's work, but Doner's Procare work is just what we wanted," Mr. Groza said.

Marschalk is shooting a series of six new commercials for a new

The Hearns-Hagler fight prompted a waterbed marketer to place these outdoor ads, which join advertising and promotional efforts of all sorts, in Detroit, Tommy Hearns' hometown.

Hagler-Hearns: Promotions for pugilism pay off

By ROBERT RAISSMAN

The folks at Waterbed Gallery in Livonia, Mich., have a special interest in the outcome of tonight's World Middleweight Championship fight between Marvelous Marvin Hagler and challenger Thomas (Hitman) Hearns.

They have signed the Hitman to a yearlong endorsement deal. Thirty-five outdoor boards featuring the 26-year-old fighter with the slogan "Waterbed Gallery puts Thomas Hearns on his back every night!" have been hanging around Detroit, Mr. Hearns' hometown, for about a month. Whether he will move on to bigger and better deals inside and outside the ring will be determined following the rumble. The fight itself appears likely to set box-office records for both live and closed-circuit tv attendance.

"It's gone beyond my expectations," said Bob Halloran, vp-sports and special events, Caesars World Productions. The fight will be held in the parking lot of Caesars Palace in Las Vegas. "I thought the interest in other [championship fights at Caesars] was great, but it's beyond great in this one." For Caesars, the smashing success of the fight—ringside seats were being scalped for $2,000 each late last week—gives the Las Vegas casino an added shot of awareness. Mr. Halloran said Caesars' ad budget for the fight was about $200,000.

"But when you think of the publicity this fight has generated here and around the world, the cost-per-thousand we are getting is amazing," Mr. Halloran said.

Tv ads featuring Messrs. Hearns and Hagler have appeared regularly on ESPN for the past month, and ads for the fight have been in a variety of national magazines.

The one area in which the fight may have fallen short is tie-ins. Bob Arum, president, Top Rank, the promoter of the fight, had ap-

Reed on wild side for Honda scooters

By BOB MARICH

American Honda motor scooters are portrayed as hip, trendy and fashionable in a new ad campaign featuring singer Lou Reed.

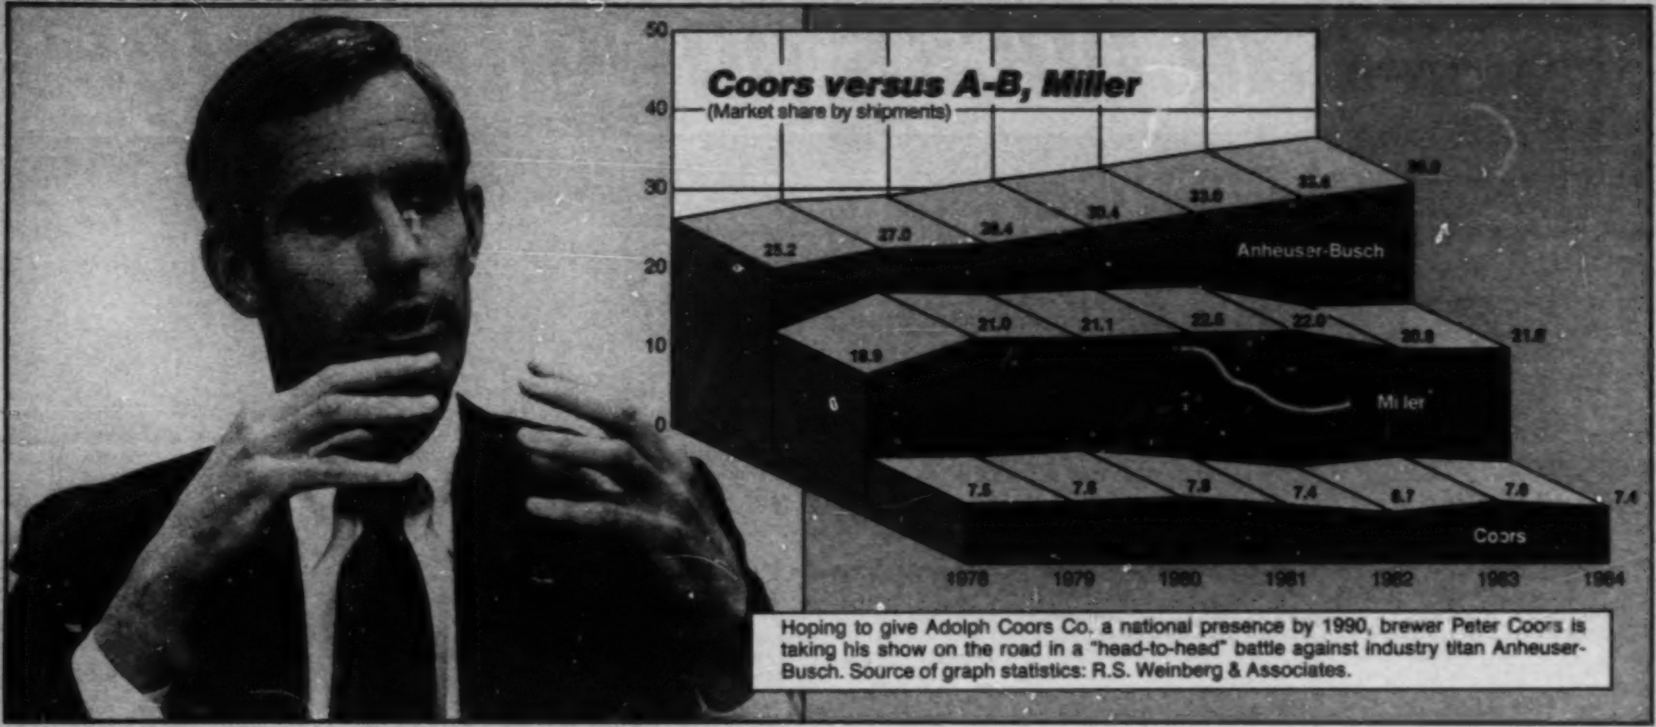
In one print ad, featuring a photo of Mr. Reed and a scooter in a cityscape, there is no copy.

In a tv spot with the same setting, the background music is from "Walk on the Wild Side," Mr. Reed's funky hit song from 1972 about a transvestite.

"The whole idea is to suggest being different and Lou Reed is about as avante-garde as they come," said Gary Langstaff, general manager of Wieden & Kennedy, Los Angeles. The campaign is the first since the agency took the account (AA, Jan 7). The estimated $8 million campaign begins May 6. Media Buying Services (West), Santa Monica, handles media buying.

Honda holds about 80% of the scooter market; Yamaha Motor Corp., Cypress, Cal., is the other marketer in the category.

Neil Leventhal, Honda motorscooter division manager, said the ads are designed to elicit "an emotional response." Dailey & Associates, the former motor scooter agency that still handles the $40 million Honda motorcycle account, last year used rock stars Adam Ant and Grace Jones as presenters in scooter ads.#



Hoping to give Adolph Coors Co. a national presence by 1990, brewer Peter Coors is taking his show on the road in a "head-to-head" battle against industry titan Anheuser-Busch. Source of graph statistics: R.S. Weinberg & Associates.

Coors pores over plans to expand

By SCOTT HUME

CHICAGO—Peter Coors leans forward in his chair when asked why his family's company, Adolph Coors Co., has in the past two years nearly doubled (to 44) the number of states in which it markets its products. He answers the question straight on:

"We have to be a national marketer. Changes in the brewing industry, especially consolidation, now make that mandatory."

With only a short pause, Mr. Coors then gets right to the marching orders.

"Anheuser-Busch is our competition, and primarily Budweiser," he says flatly. "Traditionally, A-B has used the profits it makes in the East against us in the West. What we've got to do is press on them in their traditional markets [in the East and Midwest] and force them to redirect marketing funds to ease their pressure."

Mr. Coors understands the perils of taking on Anheuser-Busch, a company that presently enjoys an awesome dominance in the industry.

In the past, Coors tried without success to position advertising for its Coors and Golden Lager brands against A-B's Budweiser. But the Golden, Colo.-based brewery is now avoiding that kind of confrontation and, instead, going "head-to-head" against A-B brands on retail shelves and in taverns across the country as part of its territorial expansion strategy.

Mr. Coors, the company's secretary and divisional president for sales, marketing and administration, was in Chicago recently for precisely that purpose—to help inaugurate Coors' off-premise sales in one of the nation's most competitive beer markets.

The move into Illinois is the latest in a series of such "grand entrances" for Coors, which is steadily taking its Coors and Coors Light beers across the country. Similar galas are coming soon in six New England states.

The great-grandson of the company's founder, Mr. Coors speaks with the openness and honesty that long has characterized his family and sometimes brought trouble. He doesn't say Coors has arrived in Chicago because the city is "a great beer town" or because "the market wanted us," as a slicker brewery exec might have. Instead, Coors now is selling its products here and in Milwaukee, and soon in Boston, because it *needs* to do so. It needs the sales, it needs the economies of national marketing.

Likewise, Mr. Coors believes, it needs to take on Anheuser-Busch.

For every major brewer except one, 1984 sales were lower than the previous year's and the scramble is on to find ways to reverse their slides. Anheuser-Busch, of course, was the exeception. Its net beer-business sales rose 10% to $5.39 billion. Total shipments by the St. Louis-based brewer were 64 million bbls., a 5.8% increase from the 60.5 million shipped in 1983. Coors' net beer-business sales last year, by contrast, were $938 million, down 1% from $947 million in 1983. Total shipments fell 3.9% to 13.2 million bbls. from 13.7 bbls. The difference between the two sets of figures leaves Coors with a lot of marching to do.

Brewing industry observers generally agree that becoming a national marketer—and a national advertiser—is important to Coors' long-term survival. The nation's fifth-largest brewery (or sixth, if you combine Paul Kalmanovitz' holdings, including recently acquired Pabst Brewing), Coors has

Japanese urge 'Buy foreign'

By JACK BURTON

TOKYO—The Japanese government later this month will launch a domestic public relations campaign including tv and print ads to encourage Japanese to buy more foreign—mainly U.S.—goods.

The campaign, to be coordinated by the prime minister's office and the Ministry of International Trade & Industry, is one of several dozen measures the Japanese cabinet approved April 9 to open the country further to imports.

"An intensive campaign through advertisements in newspapers, magazines and posters—and on the streets—and on tv will be carried out to strongly appeal to the Japanese and local marketers to encourage their efforts to expand imports of foreign manufactured goods," the cabinet announced.

The action was taken in the face of growing demands in the U.S. that Washington limit Japanese exports to America unless Japan improves the access of foreign products to its own market.

The tone of the campaign was set when Prime Minister Yasuhiro Nakasone told tv viewers April 9, "If each of you buys $100 worth of foreign goods, Japan's import volume will expand by $12 billion, and this is the way to overcome the present difficulties."

Although the government import measures are designed to be enacted over a three-year period, the pr campaign may have a considerably shorter life span and only a limited impact.

Tv spots, which will remind viewers that it is their responsibility to buy more foreign goods to maintain the free-trade system, probably will run for only a three-week period from April 20 through early May, according to Mitsuoki Kikuchi, a senior official in the public information section of the prime minister's office.

These spots, which will take the form of public service announcements, may have a hard time getting on prime time tv since ad time during this time slot usually is booked weeks in advance.

Newspaper ads will appear the last week in April, and cinema ads will be screened in early May. The government also will get its "Buy foreign" message across with electronic posters and foreign-product exhibits on street corners.

The next two weeks of a government-sponsored tv program, "Amakara Talks," will be devoted to the issue, but it is expected that it will reach a small audience because the show airs at 8 a.m.

Mr. Kikuchi said he could not estimate how much the campaign will cost, but admitted "it is not a big amount" because "we are using media space that we have already contracted for other information purposes."

Dentsu, which handles the bulk of government advertising, likely will play a leading role in the campaign, sources say.#

Wesson looks for Mazola corn oil to slip

By JULIE FRANZ
and RUTH STROUD

CHICAGO—Backed by a $16 million ad campaign, Beatrice/Hunt-Wesson Foods is preparing for a fight with CPC International's Mazola corn oil by introducing nationally its Wesson corn oil.

The product tested in New York, Philadelphia and Miami last year (AA, Dec. 10).

The strength of the Beatrice name and Hunt-Wesson's distribution system should give Wesson corn oil the momentum to pass Mazola as the corn-oil market leader, one retail source said.

Some believe Wesson simply will sacrifice profits for market share—pouring millions into promotion and paring its prices to steal volume from Mazola and private-label brands.

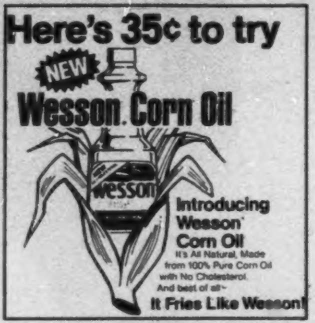
The Fullerton, Cal.-based company reportedly decided to go forward with the corn-oil introduction after simulations showed that consumers would buy the corn-oil product because of the Wesson name.

One regional competitor said he found it "hard to believe" that people would switch oils based only on name perception.

Instead, price and promotion will be the motivating factors, he theorized.

Wesson's regular vegetable-based oil is No. 2 in the cooking oil category.

The new corn oil is heavily targeted to Hispanic consumers, the largest buyers of corn oil.



Here's 35¢ to try
NEW
Wesson Corn Oil
Wesson
Introducing Wesson Corn Oil
It's All Natural, Made from 100% Pure Corn Oil with No Cholesterol.
And best of all—
It Fries Like Wesson!

Hunt-Wesson's new Wesson corn oil is taking a stab at the top spot in the corn oil market, currently held by CPC International's Mazola brand. Wesson corn oil ads are by Ketchum Advertising, San Francisco.

Englewood Cliffs, N.J.-based CPC, considered by retailers to be giving Mazola lukewarm support, has stepped up advertising efforts by offering co-op coupons, buyers report.

Mazola corn oil brand manager Mike Lyon said, "We feel we do provide Mazola corn oil with enough ad support for long-term growth." He had no comment on how the brand will defend itself against Wesson's new entry. D'Arcy MacManus Masius, New York, is the agency for Mazola corn oil.

Ketchum Advertising/San Francisco, Wesson's agency, plans spots on both network and Hispanic cable tv. Themed "And best of all, it fries like Wesson," the spots run from June through November.

Coupons for 25¢ off will run in June, July, August and November. Co-op coupons for 35¢ off are already appearing in selected markets.

Wesson corn oil comes in 32-oz., 48-oz., 64-oz. and 1-gal. sizes. It's priced comparably with Mazola, buyers report.

As of last fall, Procter & Gamble's Crisco led the cooking-oil category with about 21% of the 1.15 billion-lb. market. Wesson followed with 19.9%, Mazola with 15.8%, P&G's Puritan with 3.8% and Beatrice/Hunt-Wesson's Sunlite with 2.2%. Private labels and generics represent about a quarter of the market, industry sources estimate.

Market shares in the corn-oil segment are a little less defined. Mazola clearly is the leader in the segment, which comprises an estimated 25%-to-30% of the total cooking-oil category. Mazola represents about 50% of the corn-oil segment, followed by private labels with about 30%, sources believe. Regional brands comprise most of the rest.

Fleischmann's corn oil, introduced in upstate New York (AA, Feb. 13) by parent Nabisco Brands, Parsippany, N.J., hardly will be a factor after Wesson's distribution and heavy promotion goes into full swing, industry sources suggest.

Sources said Beatrice/Hunt-Wesson's attempt to reposition its ailing Sunlite sunflower-oil brand has proved ill-fated and the new corn oil is supplanting it on some store shelves. The company changed the product name to Sunlite Wesson 100% Sunflower Seed oil, seeking to raise its sinking market share by linking it with the Wesson name (AA, Dec. 10). Dailey & Associates, Los Angeles, is the agency.

Wesson corn oil is a way of filling the gap left by the Sunlite disappointment while further leveraging the Wesson name. In addition, the company has quietly reformulated its regular Wesson oil, a partially hydrogenated soy oil, to a "new, all-natural" nonhydrogenated oil.

Hydrogenation is the process that ensures oil doesn't break down when heated.

Hunt-Wesson apparently has discovered a way of stablizing the oil naturally, a mysterious technique that has aroused competitors' curiosity.

A Hunt-Wesson source said the company has been advertising its Wesson oil on a continual basis and probably will mention its "new all-natural" designation in future advertising. The source also denied that its renamed Sunlite oil has been a disappointment. "It's meeting all our expectations," he maintained. Tv and print ads continue for the product.#

CORRECTIONS & CLARIFICATIONS

- Lord, Geller, Federico, Einstein, New York, had gross world income of $14.4 million in 1983. The amount was listed incorrectly in two charts (AA, March 28, P. 30).
- The budget figure reported for Citibank's national MasterCard/Visa card marketing campaign, $17 million (AA, April 8, P. 84), is based on an AA estimate from outside sources. Citibank, which declined to release spending figures, said the $17 million estimate is inaccurate.
- Ogilvy & Mather's growth usually comes 70% from existing clients, 30% from new business, but came 50% from existing clients, 50% from new business in 1984, a very strong new-business year for the agency. A previous story on the agency (AA, March 25, P. 47) confused those percentages.
- In a story on Brazil, the names of agency executives Steve Frankfurt, Bert Steinhauser and Norman Vale were incorrectly spelled (AA, April 1, P. 54).#

Coors

(Continued from Page 4)

been losing share in some of its core markets like California and Texas (primarily to A-B) and additional sales territories can help offset those losses.

Thus the company has spent the past few years expanding its marketing territory, its product line and its advertising budget in pursuit of 50-state availability by 1990.

A-B a tough target

Establishing itself nationally would be difficult for Coors in the best of times—which, for the brewing business, these aren't. Setting its sights on A-B only compounds the difficulty.

"It's like you or me going one-on-one with [Boston Celtics star] Larry Bird," Manny Goldman, an analyst at Montgomery Securities in San Francisco, says of taking on A-B. "You might actually score a few points, but you're not going to win. How well Coors does long-term really depends on how it does against the industry as a whole."

Analyst George Thompson at Prudential-Bache in New York is similarly unenthusiastic.

"A-B will wear you down in a market even if they don't have the largest market share" as they do not in Chicago, where G. Heileman Brewing remains the leader, he says. "And if they do have a significant share, they'll eat you alive."

That has been Coors' fate in earlier expansion pushes into the Southeast and upper Midwest, analysts say.

"When Coors moved into Florida [in 1983], bingo, it grabbed a 15% share. But three months later it was down to 10% and heading toward 8%," Mr. Thompson says. And that's been their experience in every market they've expanded into lately."

Coors is a beer that midwesterners and easterners once "smuggled" home from the West. Yet "the 'novelty' of the new brand and the so-called 'Coors mystique' wears off, and they haven't got the muscle to keep share," Mr. Thompson adds.

According to industry newsletter "Beer Marketer's Insights," Coors' shipments in the Southeast dropped 21% in 1984. A-B's were up 12%, Miller's up 1.3%. Coors' 7% share in the Southeast is respectable, analysts add, but they question whether Coors can increase its share at the expense of A-B or Miller. It might be wiser to target Detroit-based Stroh Brewery or La Crosse, Wis.-based G. Heileman, they suggest.

Money is only one of the competitive edges A-B and Miller have over Coors, but it is a formidable one. Both A-B (with net income last year of $392 million) and Miller (with wealthy parent Philip Morris) have more available cash than does Coors (whose net income last year was $44.7 million). And staying afloat in the beer business takes a lot of money.

Expensive expansion

"Coors' expansion is going to be very, very expensive," says Mr. Goldman. "Remember that there is *no* market where A-B has a vulnerably low share. It can afford large marketing outlays everywhere. And I'd be surprised if A-B really is concentrating its spending on the West. Instead, it has been increasing spending in Chicago and the Midwest, where it hasn't been strongest. And that's right where Coors is going now. The move into Chicago may be Coors' most difficult to date."

Another roadblock in Coors' path is what analyst Mr. Thompson calls the "third-strongest guy" distribution problem. Distributors for the two strongest brands in a market—usually A-B and Miller or Stroh or, in Chicago's case, Heileman—won't take on Coors. That forces the Colorado brewery to hook up with no better than the third-strongest distributor in the market, and to live with the consequences of wielding only the third-strongest clout in getting on-premise placements. This, says Mr. Thompson, is why Coors' share drops off in new markets.

Reasons for optimism

Compounding the distribution problem are the large number of Pabst distributors who also handle Coors. Paul Kalmanovitz' immediate dismantling of Pabst's marketing department after his acquisition of the brewer (AA, March 25) puts some of those businesses on shaky ground.

Peter Coors is fully aware of these obstacles, yet remains confident. Among his reasons: The success of Coors Light and the potential of the current "distinctiveness" advertising campaign to boost sales of Coors premium.

Coors Light, which broke a 20-year company tradition of brewing only one beer when it was introduced in 1978, "has gone crazy," Mr. Coors points out. Analysts agree. Coors Light is now the No. 2 light beer behind Miller Lite and a significant advantage in the effort to increase market share.

Not all the brewer's efforts to expand its product line have met with such success, but even so, Mr. Coors declares, the experience has been instructive.

Herman Joseph's, Coors' entry in the top-of-the-line superpremium category, has languished in a variety of test markets since its introduction in 1980. For now, its future is "in a holding pattern," Mr. Coors says, since that category has been especially hard hit by the industry's downturn.

Killian's Irish Red, an import-style beer introduced in 1981, is "doing quite well" in the 24 states where it is marketed "but isn't right for every market," he says. Still, he predicted further market expansion for the brand this year.

In 1983, Coors tried out Golden Lager, a "heavier-tasting" premium beer meant to do battle with Budweiser. Golden Lager was pulled from test last fall, but Coors is ready to try again. This month it will begin testing a new full-bodied premium brand called Coors Extra Gold (AA, Feb. 11).

"We learned some lessons from the failure of Golden Lager," Mr. Coors says with characteristic forthrightness. "It was targeted directly at Bud, and that didn't work. Consumers didn't understand what the brand was all about and they didn't understand its connection with Coors.

"We pushed too hard toward Bud with Golden Lager rather than concentrate on its being from Coors. Coors Extra Gold has the benefit of the Coors name and we're going to tell people [in advertising created by Tatham-Laird & Kudner, Chicago] that this isn't a superpremium, this is simply a premium beer with a bit more heft."

Advertising is the other important element in Mr. Coors' plan, and he is counting on a campaign from national agency Foote, Cone & Belding, Chicago, to improve sales of Coors premium, which has slipped. These ads (AA, Jan. 31), themed "Coors is the one," feature actor Mark Harmon, star of NBC-tv's "St. Elsewhere," quietly discussing attributes (such as nonpasteurization) that set Coors apart.

"Just plain beer talk"

"There's no hoopla here," Mr. Coors says of the campaign, now airing in established markets. "There are no bar scenes, no macho postures. This is just plain old beer talk. We're not saying it's like Bud or anything else, we're just saying what it is: A fresh, clean-tasting beer."

That campaign will be used for Coors' first foray into network tv in the next few months. Mr. Coors allows that the brewer has "paid a penalty for not having national network tv" like its competitors have, but relishes the prospect.

"It's going to be fun getting into the bidding [for network and local sports sponsorships]," he says with a smile. "But with the Olympics and the Super Bowl and the stadium presences, A-B has pushed the prices up substantially, making it more difficult for us to do what the company wants to do. But we're the second-most-profitable brewery in the country."

Through last year's first three quarters, A-B spent $91 million in measured media on its Budweiser and Bud Light brands alone. Miller spent $85 million on High Life and Lite (and this was before the start of its expensive blitz for High Life's new "American made" campaign). For Coors and Coors Light, Coors spent $23 million.

Mr. Coors said advertising spending will be up significantly in 1985 (last year its total advertising/marketing spending was $139 million, or 11% of gross sales, compared with 9.9% the previous year). Several million dollars will be spent in Chicago alone.

Image problem lingers

If there's a cloud in Mr. Coors' blue sky, it's Adolph Coors Co.'s recurrent corporate image problem. Marketing dollars that could be channeled to media spending instead are directed to a massive array of community-relations programs that have a special urgency for Coors because of longstanding complaints in the past about the company's alleged discrimination against ethnic groups and organized labor, and the conservative politics of chairman William Coors and his brother, Joseph, who is president.

A 1982 "60 Minutes" report on Coors chronicled the extent of its affirmative-action programs and helped put that issue to rest. But a residue of bitterness clearly remains when Peter Coors talks about how hard the company has had to fight its negative image.

"We are not anti-union," he says flatly, "although it would be easy for us to be considering some of the things labor has said about us."

(To handle advertising targeted to the Hispanic market, Coors has hired GSD&M, Austin, Tex. Although it works with several small minority agencies for advertising targeted to blacks, Coors has yet to name an agency to coordinate that effort. Mr. Coors said he "expects that eventually a national agency will be named" for that.)

One area in which Coors hasn't yet become a competitor is low-alcohol beer. Coors is the only one of the nation's top five brewers yet to introduce such a brand. The company isn't opposed to the concept, but is still monitoring consumer acceptance.

Says Mr. Coors: "Anheuser-Busch can afford to spend $25 million advertising LA while selling only 500,000 bbls. We can't. Still, we have a product on the shelf and preliminary marketing plans that we could implement very quickly.

"But it would be a dilution of what we want to do now."#

Gray area

(Continued from Page 24)

ance. Many incentive houses are not offered that same 3% to offset their costs.

The only exception is a large-scale catalog with wide distribution. In many cases, manufacturers are willing to pay a certain percentage to get their product featured in that catalog. Involvement in the gray market by the incentive industry is risky, but the 20%-to-30% price spread makes these products difficult to ignore.

In the electronics area, companies such as Sony are hit the hardest. Other companies, such as Yamaha, with a limited line and limited distribution, also can fall victim. Yamaha last year found itself in the gray market with its popular compact-disc player. The parent company traced serial numbers to some of the gray goods that were sold in Japan selling to certain importers. It terminated its relationships and problems ceased.

It is difficult for the premium marketer to compete with both the retailer and the gray market. It is the premium and incentive marketers who continually promote products through large incentive programs and provide additional channels of distribution for these products. Clearly, the manufacturers must decide if the premium accounts are worth cultivating.

Many manufacturers contend that there is a distinction between the retail market and the premium market. Premium buyers are, in many cases, more concerned with service, specialization and support materials, delivery time and, of course, warranty. Price/value is as important to the premium buyer, if not more so, as to the retailer. With price differences between gray market and legitimate product ranging as widely as 20% to 30%, it is difficult to sell legitimate product to a client looking for a value.

The difference between premiums and retail should be black and white, not a shade of gray.#

'Times Herald' escalates Dallas news war

By TOM BAYER

Times Mirror Co. has opened its coffers wide in its latest effort to improve the circulation of the *Dallas Times Herald*.

The paper—which long has been embroiled in a bitter newspaper war with the rival *Dallas Morning News*—is beefing up its staff to make way for an array of new sections, backed by a media campaign.

On May 5, the *Times Herald* will replace its *Westward* Sunday magazine with *Dallas City*. The new 10¾-by-11½-in. magazine will be printed on supercalendared stock, stitched and trimmed for an updated appearance.

The newspaper also will begin a weekly "Outlook" section of in-depth and behind-the-scenes reports related to recent news stories. The "Arts and Leisure" section also will be expanded, as will the Sunday sports and business presentations and the newspaper's *TV Times*. That's only the first salvo. On Monday, May 6, the *Times Herald* will introduce "Dallas Inc.," a weekly tabloid business section targeted at business executives.

Harold Stanley, senior vp of the *Morning News*, the *Times Herald's* feisty competitor, described the coming changes as "catch up."

Both papers reported circulation gains from 1983 to 1984 for the six months ending Sept. 30, the most recent Audit Bureau of Circulation figures available. But the *News* remains the dominant Dallas paper. The *News* reported daily circulation of 360,347 compared with 270,661 for the *Times Herald*; on Sundays, it's 454,828 to 373,225, respectively. These figures were derived after an ABC audit showed both papers submitted circulation figures that included nonpaid subscriptions.

Times-Mirror Co. also owns the *Denver Post*, *Los Angeles Times* and *Newsday*, among other newspaper properties.

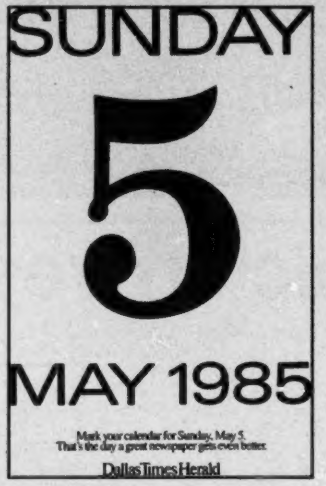
Tom Johnson, *Times Herald* chairman and chief executive officer, said the changes are designed to feed the increased appetite among readers and advertisers for business, sports and Dallas coverage, as identified in research.

On the circulation side, the *Times Herald* will begin offering guaranteed service to all subscribers as well as a 90-day, money-back guarantee to new subscribers. The change reflects Mr. Johnson's resolve to correct what he says were "serious service problems," for which a new circulation service center was created.

Mr. Johnson said changes will continue throughout 1985, culminating in the fall with a graphic streamlining of the newspaper that will occur when a new offset press is installed.

Laurie Walton, *Times Herald* marketing director, said 41 different projects are involved, not the least of which is a multimedia advertising campaign being created by the Richards Group, Dallas. Details of that are to remain under wraps for competitive reasons, she said, but she acknowledged that the new campaign will replace the newspaper's "What does the *Herald* say" celebrity campaign.

For the newspaper's parent, Los Angeles-based Times Mirror Co., the change represents a major increase in its commitment to the Dallas property, Mr. Johnson said. He said the company increased its capital expenditures for new *Times Herald* presses and other equipment to $45 million from $25 million initially.



SUNDAY

5

MAY 1985

Mark your calendar for Sunday, May 5.
That's the day a great newspaper gets even better.

Dallas Times Herald

Dallas, Inc.
Cashing in on the '80s
3
7
23

At left, an April 7 *Dallas Times Herald* ad trumpets the paper's new additions, which include a weekly tabloid business section (above), "Dallas Inc."

And, he said, Times Mirror is adding 10 editorial staffers at the *Times Herald* (mostly for business news and *Dallas City*).

Times Mirror said it will commit to a significant increase in ad spending, but would not specify the ad budget. According to Leading National Advertisers, the *Times Herald* spent about $1 million in spot tv through the first nine months of 1984.

The changes are designed to stop the *Times Herald's* loss of market share to the *Morning News*, which has undertaken many improvements of its own during the past three years. The *News* introduced a "Business Tuesday" section and increased business coverage five years ago, and has upgraded its Sunday magazine, sports section and made other improvements.

Some *News* insiders, who asked not to be identified, speculated the changes are intended to divert attention from the *Times Herald's* declining circulation, expected to be confirmed in March 31 Audit Bureau of Circulations figures to be released about the same time.

Mr. Johnson said the *Times Herald* improvements are not responses to changes at the *News*. "The *Dallas News* is an excellent newspaper, and I congratulate them on their many successes and achievements. But I do not believe in building yourself up by cutting the competition. Our emphasis is to do what we can do to make the *Times Herald* the best it can be."#

4A's programs guide

NEW YORK—A growing number of advertising agencies are developing and packaging software programs to improve record keeping, according to a new directory published by the American Assn. of Advertising Agencies.

The 65-page "Computer Software Systems Directory" lists 45 software and hardware vendors that serve agencies and provides details on software applications in accounting, traffic, media and production billing.

The directory—free to member agencies, $25 for nonmembers—is available from the Four A's, 666 Third Ave., 10017.#

QUARTERLY EARNINGS

Competition stifles Curtis

CHICAGO—"Unprecedented competition" among consumer products marketers sent Helene Curtis Industries' fiscal fourth-quarter and yearly earnings tumbling, despite higher revenues.

For the quarter, which ended Feb. 28, sales rose 5.8% to $96 million from $90.7 million a year earlier, while earnings dropped nearly 20% to $4.3 million, from $5.3 million.

For the year, sales increased 12% to $370.3 million from $330.4 million a year earlier. Earnings fell 74% to $2.7 million from $10.4 million the previous year.

"We had improved results for the first half, but our operating results were [hurt] in the second half when the competitive environment [in personal-care products] intensified," said Ronald J. Gidwitz, president.

"The need to advertise and promote consumer brands heavily to gain or maintain market share narrowed margins considerably," Mr. Gidwitz added.

Privately, Wall Street analysts are concerned Helene Curtis cannot maintain its heavy ad spending on products such as the Atune line for permed or color-treated hair.

However, one industry consultant says the company won't be able to bargain for precious retail shelf space unless Helene Curtis continues spending to improve its market shares.

CBS Inc., New York, reported significantly lower income and revenues for the first quarter, which it attributed to a decline in record sales and the acquisition of the Ziff-Davis Publishing Co.'s consumer magazine group. The decline had been expected.

The absence of the "extraordinary" sales of Michael Jackson's "Thriller" album caused the records group's net income to plummet to $25.1 million from $57.2 million in the year-ago quarter.

The publishing group incurred a loss of $15.2 million, vs. a year-ago loss of $11.7 million, due to amortization of acquisition costs and goodwill associated with the acquisition of the Ziff-Davis magazines, which was completed Feb. 4.

The broadcast group's performance, by comparison, was better, with net income up 9%, to $56.4 million from $51.8 million. This was attributed to the strong performance of the CBS Television Network, which continues to lead its rivals in the Nielsen ratings in all dayparts, except for late night and Saturday morning.

Bottom Line: Net income was $16.7 million, a 57% decrease from $38.9 million in the same period last year. Total revenues for the quarter declined 2%, to $1.12 billion from $1.15 billion.

General Mills' proposed spinoff of its toy group and the expected sale of its fashion operations have had a drastic effect on third-quarter and nine-month financial results.

The Minneapolis company announced earlier this year it would sell its ailing toy group, comprised of Kenner Products, Parker Bros. and Fundimensions, and its troubled fashion division, comprised of Foot Joy, Izod, Monet Jewelry and Ship 'n Shore (AA, Jan. 31). Last month, General Mills amended that plan and said it would spin off the toy group instead (AA, April 1). Bottom line: In the third quarter, ended Feb. 24, General Mills had a $105.3 million loss from discontinued operations and another $8.5 million loss from asset redeployment charges. Net earnings from continuing operations were $39.7 million, resulting in a total net loss of $74.1 million. That compares with net earnings of $38.7 million for the same period last year. Third-quarter sales rose 4% to $1.1 billion from $1.0 billion.

For the first nine months, the company lost $77 million from discontinued operations and $9.4 million from asset redeployment but earned $122 million from continuing operations, for total net earnings of $35.6 million.

For the year-ago period, General Mills had net earnings of $192.9 million. Sales for the first nine months rose 3.5% to $3.3 billion from $3.2 billion.

MGM/UA Entertainment Co., Culver City, Cal., reported a net loss for the second quarter, which the studio blamed on poor performance of its movies.

For the second quarter ended Feb. 28, MGM/UA sustained a net loss of $82.2 million, compared with a net profit of $16 million a year earlier.

Bottom line: Revenues were $162.1 million, versus $214.3 million a year earlier. For the six-month period, it posted a net loss of $80.5 million, compared with a net profit of $27 million a year earlier. Revenues were $332.9 million, versus $406.5 million before.#

Suburban newspapers take on some bigger issues than you might expect.
9402
CAUTION
RADIOACTIVE MATERIAL
DO NOT REMOVE

It's true that if you live in the suburbs, the only place you'll find your little girl's softball team standings is in suburban newspapers. But they're also your only source for learning about things like school board elections, zoning board meetings or the proposed transport of toxic materials through your town.

And you learn about these things while you still have time to do something about them, not after the fact. Suburban newspapers are the only place people who live in the suburbs can get the news, issues and information that affect their everyday lives.

USSPI makes it easy for you to reach this prime audience of nearly 13,000,000 households and 31,000,000 readers. USSPI is a national network of over 1000 quality suburban newspapers covering 45 major metro areas. Papers that have won over 500 local and national editorial awards. Papers that are all audited, and that subscribe to the new SAU Standard advertising units, so your ad can run unaltered from coast to coast.

We can provide demographics and CPMs by market. And you can buy as many markets as you like with just one insertion order. One rate. One invoice. One check. To reach the suburban market, buy what the suburban market reads. USSPI.

Eye lights

Tired of eyeliner that smudges and smears? Now you can have it applied permanently. Doctors across the country are "implanting pigment"—or, more familiarly, tattooing—around women's eyes to keep them highlighted through showers, tears and games of tennis. Called Accents, the technique was invented by a doctor who for years watched his nearsighted grandmother struggle with eyeliner. *See Page 6.*

A presidential presence

Former President Jimmy Carter is one of a number of Georgia notables treading the boards—badly, in the opinion of the advertiser—in a series of ads to support Atlanta's Alliance Theater. D'Arcy MacManus Masius produced four *pro bono* 30-second tv spots, each featuring three renowned Georgians hamming it up. The spots close with an appeal for the theater's new subscription and fund drive, warning that if the show can't afford to go on, "The alternative would be to depend on 'other' talent—and that would be a tragedy." *See Page 54.*

BBDO charges for Visa

New York—Visa USA has named BBDO here to handle its $20 million domestic account, formerly in-house (AA, Jan. 28, *et seq.*). BBDO/West, San Francisco, will be involved in management, account services, media and research aspects of the account. New advertising is expected to break this fall.

Henderson picks up two

New York—Hilton International this week assigned its $3.5 million account to Henderson Friedlich Graf & Doyle after a two-month search. Lord, Geller, Federico, Einstein resigned the account in February. Separately, Reader's Digest Assn., Pleasantville, N.Y., gave Henderson a corporate advertising assignment estimated to be worth $2 million. There was no previous agency for the corporate work.

'Space' rockets past rivals

New York—CBS-TV's "Space" miniseries began with an A.C. Nielsen Co. 19.4 rating/31 share on April 14. It ranked 14th for the week and beat NBC and ABC movies competing against it. NBC, however, stayed out front for the week.

Faberge, N&L part

New York—Faberge and Nadler & Larimer finally have called it quits after some 20 years together. N&L on Aug. 1 will officially resign the Organics brand, the only nationally advertised Faberge brand it retained after Kenyon & Eckhardt was awarded Aqua Net, Babe and Brut. K&E will now pick up Organics and project development that N&L had. Separately, Faberge reportedly has canceled its plans for introducing an upscale Erte fragrance. Instead it will roll out new mass-market fragrance brands in 1986.

Dior appeals Jackie ruling

New York—Christian Dior/New York, J. Walter Thompson USA, Richard Avedon and model Barbara Reynolds have filed an appeal in a New York state court in a bid to overturn a ruling that they trampled on the privacy rights of Jacqueline Onassis by using her look-alike in a Christian Dior ad (AA, Jan. 23, '84). The lower court issued a preliminary injunction against further distribution of the ad at that time. The appeal's outcome may be key in determining whether Ms. Onassis is entitled to damages.

FTC, MADD eye ads

Washington—Federal Trade Commission chairman James Miller warned alcohol advertisers this week to clean up their advertising and promotional acts, especially when it comes to on-campus promotions. Mr. Miller cautioned the industry after announcing that the FTC will not consider any rule to ban or restrict alcohol advertising on an industrywide basis. The FTC is watching specific beer ads and promotions, he noted, and that regulatory action could be taken on a case-by-case basis. Separately, Candy Lightner, founder of Mothers Against Drunk Driving, called for the alcohol industry to establish advertising guidelines by Jan. 1, 1986. She spoke at the National Assn. of Broadcasters meeting in Las Vegas. Congressional representatives at the NAB convention

After two years' work, AT&T designers have come up with a personal terminal telephone they believe will enchant white-collar workers.

AT&T finally ready with ultimate phone

By Lenore Skenazy

"You know more than you think you know."

That reassuring first line in Dr. Spock's baby-care manual for new parents also could apply to new "parents" of the AT&T personal terminal telephone. For two years, AT&T's designers and engineers labored to create a machine so attractive and simple to use that white-collar workers would fall in love with it immediately, and learn how to handle it almost intuitively.

But how can you make state-of-the art computer equipment unintimidating, nay, enchanting to the average executive? You get rid of all the things that fluster him: Nix on keyboards, user manuals, confusing codes and bulk. Then you go a step further. You make the display screen squishy soft, so that a simple poke fetches the user whatever he wants. No muss or fuss. Even infants require a certain technical dexterity from their parents, but not this baby. You price it at $1,800 and christen it the PT510.

The PT510 is a phone that works with a computer terminal and AT&T's phone systems to combine the functions of most things a manager would keep on his desk: Message pads, phone directories, business reports, a calculator, clock and calendar. It lets the user call his phone directory to the screen, tap the number he wants, have the machine dial it and leave a message if no one's there. That's two pokes of the finger. It also allows him to send messages to other PT510 terminals—even while he's talking on the phone—and to review and revise data from a mainframe computer. No keyboard is necessary for any of these functions, although one is sold separately. The entire unit will be ready to order by May 31, and has just been unveiled. This is the story of how AT&T designed it.

Design

* * *

AT&Ts first "computer phone" actually made its debut about four years ago, for testing purposes only. A hodge-podge of existing hardware, it was called "The Epic." Though it quickly evidenced some serious flaws, it was clear that with the Epic's phone and terminal marriage, "the egg had met the sperm," as designer Don Genaro put it.

Mr. Genaro is a senior partner at Henry Dreyfuss Associates, a Manhattan company that has been designing AT&T equipment since the 1930s. At the Dreyfuss loft, Mr. Genaro, his partner Gordon Sylvester and senior designer Steve Miggels created the way the PT510 looks. Poring over old pictures of the Epic there recently, the threesome shook their heads at how far the PT510 had come.

One of ancestor Epic's biggest problems was that its phone didn't have a dial. That's right. Users were expected to make phone calls using the numbers on the typewriter keyboard attached. Since most people are far more familiar with the phone dial than the typewriter, this method proved cumbersome, even ridiculous. But discovering mistakes is what prototypes are for.

Epic's other big problem was the fact that it required a keyboard at all. First of all, said Mr. Genaro, many executives balk at the idea of a keyboard in their office. "It's like a mop and a pail." Even more damning, many of those same executives simply don't know how to type. To them, mastering the Epic would be a daunting, not to mention embarrassing, task. The design was dropped even before AT&T tried test-marketing it.

While the Epic was getting kneaded at AT&T's human factors research centers, Bell Laboratories was experimenting with gentle prods of the finger. Bell wanted to create a "touch screen" for the terminal that would respond to people tapping on it. Although some screens already did use touch, they were made of hard glass. Using them was about as sensually pleasing as tickling a Coke bottle. Furthermore,

Supermarkets evolving to avoid extinction

By Mary McCabe English

Supermarkets are the innovation of the 1950s. Are they the dinosaurs of the 1980s?

Not yet, but they are under a lot of pressure from a rapidly changing grocery retailing environment, and the key to survival may be how well supermarkets can evolve.

Competition is the first and most obvious force prodding supermarkets to change. The competition for America's food dollar is increasing rapidly, industry experts says. Shoppers can spend their grocery budget in a different kind of food store almost every day of the week if they like—warehouse stores, carryout stores, bulk groceries, ethnic stores, gourmet shops, health food stores—without setting foot in one of the "traditional" supermarkets that trace their roots to the 1950s.

In immediate response to this competition, supermarkets are trying to become more things to more people.

Gone are the days when a supermarket automatically equaled an esthetically barren 20,000 sq. ft. filled with more than 10,000 items. Today's supermarkets range from smaller neighborhood markets to superstores and combo stores that average up to 55,000 sq. ft. and include amenities such as pharmacies (found in a combo store but not a superstore), flower shops, salad bars, takeout food sections, sit-down restaurants, juice and fruit bars, health food sections, dry cleaning services, photo processing and banking.

There's even a more flamboyant "hypermarket" format that combines supermarket and discount department store in spaces from 100,000 to 200,000 sq. ft.

Though these huge retailers, such as Bigg's, which was opened last year in Cincinnati by Hyper Shoppes, generally are not given much of a prognosis for widespread success in the U.S., the more conservative superstores and combo stores are seen as state of the art in food retailing, the competitive tool that will bolster supermarkets' position as the main grocery outlet for most shoppers despite the emergence of alternative specialty formats.

Progressive Grocer, a grocery trade publication based in Stanford, Conn., has tracked dramatic growth in the number of superstores, combo stores and warehouse stores during the past 10 years.

There were few superstores and combo stores 10 years ago, but today they account for one-third of the sales made by supermarkets that do at least $2 million a year in business, according to Walter Heller, *Progressive Grocer's* research director. Many of the country's top supermarket chains are investing in these formats for the future.

Tim Hammonds, senior vp at the Food Marketing Institute in Washington, says these supermarket formats probably will continue to evolve through the decade, heading off erosion of grocery sales.

"The specialty food store is not going to become the dominant format for food sales," Mr. Hammonds says.

To prevent that, supermarket chains will respond to the competition and changes in consumer preference with whatever format the marketplace requires. "The most important single force influencing food shopping today is the need for one-stop shopping for the bulk of shopping trips. Now, that doesn't mean that people won't

(Continued on Page 16)

New services meet changing life styles

By Wendy Kimbrell

As Americans change their shopping habits, some grocery retailers are supplementing their traditional price-item marketing tactics with new images and services.

Retailers are still emphasizing price, marketing executives say, but they want consumers to know that the products they want at prices they want are available in stores that can match a stylish, convenience-oriented life style.

"There is a definite change in supermarket retailing," says Michael Mulligan, communications director, Super Valu Stores, Eden Prairie, Minn., the nation's largest food wholesaler and supermarket chain. "Just as American families are less homogenous today, so are supermarkets."

Says another industry official, "A lot of the change has to do with the working woman and the working mother. Those people simply don't have time to sit and read the paper page by page to hunt for bargains anymore."

Hundreds of chains still highlight weekly specials and promotions in their advertising, but many have added more tv and radio spots to go with the coupon inserts in local newspapers and the glossy, direct mail circulars featuring specials.

But some are adopting more innovative approaches.

The entry of discount warehouse food chains into the marketplace has made the supermarket industry more competitive than ever. As the mammoth stores slowly spread across the country, they blast the airwaves with slick ad campaigns backed with fat ad budgets.

While some of these marketers pitch convenience and value, others highlight over-all low prices rather than special prices on particular items.

In the Midwest, for example, Bigg's, a 200,000-sq.-ft. hypermarket offering food and general merchandise at discount prices was introduced last October in Cincinnati by Hyper Shoppes, owned by Euromarche Co., a Parisian retailer with about 55 hypermarkets in France.

Bigg's draws about 50,000 customers a week, and industry sources estimate it generates $2 million in weekly sales.

Diana Carter, account supervisor at Southfield, Mich.-based W.B. Doner & Co., the agency handling the Bigg's account, claims 95% of Bigg's weekly customers are lured by the multimedia ad campaign.

The campaign, touting the theme "True Minimum Pricing. A new way to shop for food . . . and everything else," challenges competitors' price-item ad strategies and emphasizes an economical image.

One 30-second tv spot warns consumers to avoid "specials." The copy says: "Supermarkets lose money on most specials. But don't feel sorry for them. They make that money back and more by charging higher prices on everything else. The bottom line is, you pay more for food. Bigg's doesn't have specials. We have true minimum pricing on every item every single day."

Other Bigg's spots highlight

Wendy Kimbrell is a free lance writer.

W.B. Doner & Co., Southfield, Mich., handles Bigg's multimedia ad campaign touting "True Minimum Pricing."

Evolving

(Continued from Page 15)

go to specialty food stores when they want something special. But we're not headed back to 'butcher, baker, candlestick maker' shopping," he says.

Catering to this desire for something special, Mr. Hammonds says, new supermarkets will tend to be of the large variety with many specialty and service departments.

Customer convenience, selection and price will continue to motivate all shapes and sizes of grocery retailers. Warehouse store operators will heighten their consumer appeal by adding more perishables to their inventory, he says, and large, multi-department food stores will continue to reduce prices to make themselves more cost competitive with the warehouses.

"So what we're seeing in this case are two prominent store formats starting to evolve toward each other, and in 10 years there may not be much distinguishable difference between the two," Mr. Hammonds says.

Stores' evolutions will reflect consumers' needs and demands.

Bill Joseffer, marketing director-grocery products for *Better Homes & Gardens*, told the Grocery Manufacturers of America's Consumer Affairs Conference in Washington last month that today's shopper is on a quest for convenience and "wants to find a full spectrum of services [at the supermarket] . . . from banking and stocking up on wines and liquor for tonight's party, to buying freshly cut flowers and mailing packages in a post office branch."

There remains room for smaller supermarkets. Willard Bishop, a consultant from Willard Bishop Consulting Economics, Barrington, Ill., says the future won't be a case of big stores supplanting all smaller supermarkets. Smaller supermarkets also will change, adding selected specialty departments. Smaller supermarkets still are needed by consumers. It takes a certain population density to support very large stores, Mr. Bishop says, so they simply won't be cost-efficient in some areas.

Mr. Bishop also agrees with Mr. Hammonds that in the face of competition, many smaller supermarkets will find ways to close the price gaps between them and larger stores.

"Under these circumstances, everybody making a store choice has fewer reasons to go to the big store, so I don't really see out and out domination at the expense of the smaller stores," Mr. Bishop says.

John B. Lightfoot, exec vp of Supermarket Insights, a New York company that produces monthly and quarterly video reports on critical issues related to the grocery and convenience store industries, respectively, also sees a lot of blending of grocery store types and strategies as savvy retailers look to survive by carving out new, narrower marketing niches in a highly dimensional society that on one side squeezes them with pressure for value and price, and on the other with pressure for variety and premium goods.

The market, he says, has become so segmented that pat definitions for convenience, quality and value just don't work.

"The basic factor at work behind all the shifting and melding of store formats is the demassification of food distribution," Mr. Lightfoot says.

That makes it increasingly important for food retailers to know their customers and come up with marketing and advertising approaches designed to deal with the differences within that group, he says.

In this kind of environment, traditional price advertising in the local newspaper won't always be enough. At the same time, attention to image takes on new importance, FMI's Mr. Hammonds says.

"The big challenge in food marketing right now is knowing how to reach an extremely diverse customer base," Mr. Hammonds says.

"It follows that if the customer base is more diverse, advertising needs to be more diverse. In line with this, everyone is using more media.

"For example, if you're trying to reach the growing Hispanic audience, radio is usually more effective than newspaper advertising, which generally gets poor results with that market. Or, in close, well-defined neighborhoods, fliers to the door might work best," he says.

Newspaper is still the backbone of food advertising, "but people are also using a lot more tv, radio and alternative advertising, such as fliers, than they used to," he says.

"Another aspect of this is that with scanners, food retailers are better able to measure the effectiveness of their advertising. And these measurements are going to mean a much more objective evaluation of advertising."

Bruce F. Failing Jr., president of Actmedia Inc., says in-store marketing also has become more important than ever as a means of maximizing customers' buying potential.

Not coincidentally, Actmedia, which has offices in Darien, Conn., and Speonk, N.Y., has been conducting in-store programs for the past 12 years, including the placement of ads on supermarket shopping carts and aisle directories, in-store distribution of cents-off coupons, product samplings and demonstrations for many major package goods clients.

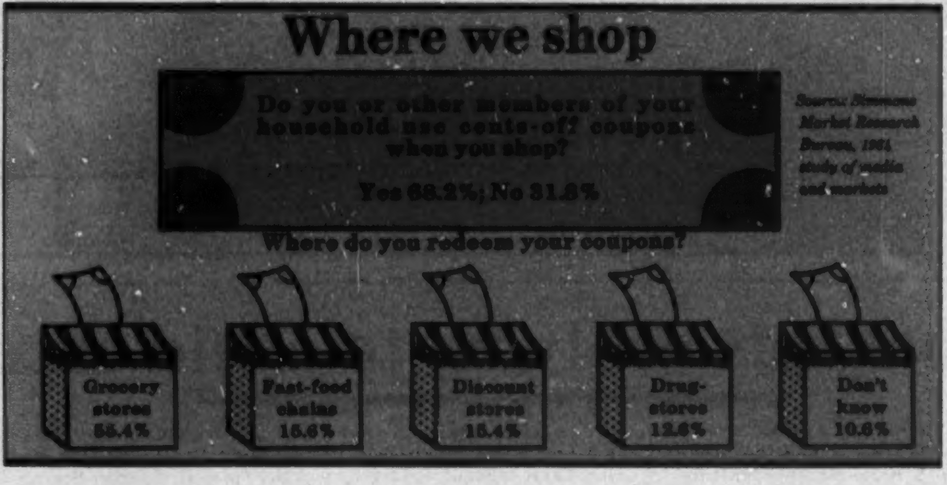
Mr. Failing builds his case for in-store advertising on the assertion that grocery shoppers can't be reached totally by either newspapers or tv. In addition, he says, only a third of all shoppers use lists and even though stores are generally bigger, with more items per store, than in the past, "average shopping time is still only 30 minutes."

"As convincing as Mr. Whipple is, you don't walk into a store picturing him squeezing the Charmin," Mr. Failing says in reference to Procter & Gamble's bathroom tissue spokesman. "You need something right there to bring him back to awareness.

"In the supermarket, profit depends on turnover, and in today's market, especially with the increasing attention being given to direct product profitability, the manufacturer needs all the help he can get to make his product profitable to the retailer."

Mr. Hammonds says technology also will play a major role in helping food retailers determine product profitability and control costs in a marketplace that contains so many variables.

Grocery competition "is like a two-edged sword," he says. "Business as usual is very dangerous at a time when the customer base is changing so much. And retailers have to be very



Source: Simmons Market Research Bureau, 1981 study of media and markets particular departments, such as produce or meat. Although company officials would not divulge budget figures, some industry analysts estimate the budget for the Bigg's campaign to be more than $2.5 million.

W.B. Doner also has devised image campaigns for two other large retailers, Cub Foods and Farmer Jack Supermarkets.

Cub, owned by Super Valu, is a Stillwater, Minn.-based discount warehouse chain with 26 units in the Midwest and South and plans to open 16 more stores this year. Throughout its history, Cub advertising has highlighted low prices.

The company shifted its account in February from Chuck Ruhr Advertising, Minneapolis, to W.B. Doner because Cub officials were impressed with the job Doner had done for Bigg's, according to Mr. Mulligan. The ads will continue to emphasize low prices, but won't link economy to only special items.

Another midwestern chain, Farmer Jack Supermarkets, an 85-unit chain owned by Borman's Inc., Detroit, is helping parents prepare plans should their children become lost.

Through a joint venture with Purchase, N.Y.-based PepsiCo and WDIV-TV, a Detroit tv station, Farmer Jack is running a campaign urging parents to obtain a "New Generation ID Card," which posts a child's picture and other identifying information, at any Farmer Jack store.

Ads emphasizing the theme "If you think it's frightening to be the parent of a lost child, imagine how the child feels," explain how the card may help some children who become "too scared for words." The ads will run through May.

Farmer Jack, which in 1983 ran a campaign introducing shopping carts designed for the handicapped, now promotes other services such as the "Want Card," a program enabling customers to order items not available at Farmer Jack's.

Farmer Jack's script says, "Another reason why one supermarket is better than the rest."

"Loyalties toward merchandisers are sometimes fickle," a Farmer Jack spokesman says. "But if you give customers more reasons than price to visit your stores, your chances of gaining consumer loyalty are much better."

In Southern California, where several major chains battle for market share, supermarkets are stretching beyond price advertising to promote "quality," and expanding use of image-building spot tv.

While most of the Southern California chains have taken their ad campaigns to the airwaves, Alpha Beta Co., La Habra, Cal., was one of the first to redirect the majority of its ad dollars from print to tv in the 1970s. The chain, which stresses its reputation for over-all low prices rather than specials with its "Where the Savings Don't Stop" theme, also is promoting its "Win a Million" sweepstakes with a multimedia campaign.

The sweepstakes, offering an array of prizes, including $25,000 jackpots and automobiles, will award one winner $1 million in May.

Bozell & Jacobs, Los Angeles, manages the Alpha Beta campaign.

Lucky Stores, Dublin, Cal., which operates 620 Lucky food stores in eight states, is also looking to enhance itself.

"We're trying to promote a high quality image," says Larry Davis, vp-ad manager, Lucky's southern food division. "A lot of customers shop a store for more than just price."

A low-price leader, Lucky shifted its advertising from price-item about a year ago when it began spreading its "more than low prices" theme through its markets via spokeswoman Stephanie Edwards, who promotes over-all quality and value. Advertising is handled in-house.

Although the number of supermarket retailers eschewing price-item advertising is growing, there are some marketers that prefer to stick to tradition.

Larry Nauman, vp-advertising, Dominick's Finer Foods, Northlake, Ill., a conventional supermarket chain with 82 Chicago area locations, says, "We are very comfortable with price-item advertising. It has been successful for us, and while some of our competitors are departing from it, we don't see any need to."

THINK BIGG CLEARANCE
bigg's
ENDS SUNDAY

Some Bigg's spots highlight price and others particular departments, such as produce or meat.

sensitive to trends and what's going on in other parts of the country. But, at the same time, this diversity has created a lot more opportunity."

Mr. Joseffer relates the changes and opportunities within the food retailing industry to a perception popularized by author John Naisbitt in "Megatrends."

"Keeping an eye on consumer interests and marketing to those interests will be the key to successful supermarketing in the future," Mr. Joseffer said at last month's GMA conference. "Recognizing the food renaissance and the consumer's interest in food as a means of status, self-esteem, creativity and self-fulfillment, and catering to that interest will mean greater sales and profits in the future.

"Food is no longer just fuel to stoke the furnace of work. It offers the reassurance of high-touch in a high-tech world."

That's hardly the talk of dinosaurs.

Chains cultivating superstores

Although industry observers say there's plenty of room on the retail food horizon for conventional supermarkets, the country's top chains are committed to developing superstores and combo stores in the 1980s.

Superwarehouse stores also promise to make a mark on the evolving grocery scene.

A&P, for example, has rebounded from the operating problems it had been burdened with and has undertaken an aggressive remodeling and building program that is moving all of the Montvale, N.J.-based chain's stores toward the superstore concept.

A&P's prototype Futurestore opened in Allendale, N.J., last November, and the company has two other superstores in Baton Rouge, La.—all three are remodeled existing structures. A&P's first newly constructed Futurestore, consisting of 40,000 sq. ft., is scheduled to open in Atlanta by late spring.

In addition, an A&P spokesman says, the company's Family Mart combo stores—24 stores of 55,000 sq. ft., with eight more scheduled for construction by the end of 1986—are one of the company's fastest growth areas.

A&P also is working on the prototype for a new superwarehouse concept, with plans calling for a possible opening this summer at an undisclosed location.

Robert E. Wunderle, an economist and vp-public affairs at Supermarkets General Corp. in Woodbridge, N.J., agrees that strength lies with the expanded store or warehouse.

"The basic concept at work here is the desire for one-stop shopping and shopping trip elimination, and the primary consideration in the way anyone sets up has to be convenience," Mr. Wunderle says.

All of Supermarkets General's 135 Pathmark supermarkets are either combo stores (90) or superstores (44). In the future, Mr. Wunderle says, the dominant store types will be the combo store, "an enlargement and refinement of the superstore," and the so-called hybrid warehouse, "which has evolved from the basic warehouse that carried only dry groceries . . . to include perishables and specialty departments."

Both types afford maximum convenience, he says.

Kroger Co., an industry leader in store product and hours expansion, has built nothing but superstores or combo stores since 1972. And, according to a spokeswoman for the chain, "The kinds of stores we've been opening for the last two or three years have been virtually all combination stores, which we see as expanded superstores. And we're invested heavily in this concept for the future, because our research continues to show that this is what people want."

Safeway Stores, the Oakland, Cal.-based supermarket giant, also is convinced superstores are the answer to many of today's food retailing needs.

Superstores of between 35,000 and 60,000 sq. ft. are "the mainstay of our building program," a corporate spokeswoman says, and "more than 80% of the stores we built between 1981 and 1984 were superstores.

"We do have a lot of traditional-size stores left, and we're also putting in smaller stores where desirable," she says. "Our emphasis is on superstores."

The same is true for Lucky Stores, based in Dublin, Cal.

"We've been putting a lot of emphasis on bigger stores and the addition of more service and specialty departments in existing stores," a spokeswoman says. "Our new prototype Food Center is over 40,000 sq. ft., with delis, bakeries, more produce, more meat and fish and expanded liquor and wine. And we'll be concentrating where possible on building stores in the 40,000 sq. ft. range."

Lucky also operates two hybrid Big Bear warehouse stores in Seattle.

Boston-based Stop & Shop Supermarket Co. also has embarked on an aggressive program that will make it a virtually all superstore company.

"We will not be building any new stores that won't be superstores," company spokeswoman Michele Vaughters says. "Fifteen of our 119 supermarkets are currently superstores, and based on what we've learned from our consumer board program, this concept is definitely the wave of the future, for us and for the industry generally."

Even Jacksonville, Fla.-based Winn Dixie Stores, which has trailed other top 10 supermarket chains in adopting the more nonfood and specialties format, has begun to get into the act.

"We have two stores in the 45,000 sq. ft. range and many more in the 35,000 sq. ft. range, and we'll have more in the 45,000 range within the years," says Mickey Clerc, Winn Dixie's ad director. "We are building larger stores every year." *M.M.E.*

Competition gains ground

Research compiled by *Progressive Grocer*, Stamford, Conn., charts the increased popularity of new supermarket formats such as superstores and combo stores during the past 10 years.

In 1975, the magazine reports, conventional supermarkets accounted for 97% of all food retailers that recorded more than $2 million annually in sales; superstores accounted for 2%, and economy stores (warehouses, limited assortment stores and super warehouses) 1%. This is based on a total of 19,370 stores.

Progressive Grocer's most recent figures show that in 1984, conventional stores made up 75% of food stores; superstores, 13%; combo stores, 2%, and economy stores, 10%, based on a total of 30,175 stores with annual sales more than $2 million.

Research shows conventional supermarkets brought in 96% of the business in 1975; superstores, 3%; combo stores and economy stores, less than 1% each, based on total sales of $82.1 billion by stores with sales of more than $2 million.

In 1984, conventional supermarkets did only 59% of the business done by food stores with more than $2 million in annual sales; superstores, 25%; combo stores, 5%; economy stores, 11%, based on total sales of nearly $189.2 billion.

Progressive Grocer research director Walter Heller says total 1984 grocery sales—including those by stores recording less than $2 million in sales a year—came to $263.8 billion. Stores with sales of more than $2 million accounted for about 72%; convenience stores, 6%; and others, 22%. *—M.M.E.*

Alternatives gain on price and print ads

By Russell Shaw

Once upon a time, grocery advertising was simple. When your competition advertised ground beef for $1.39 a pound, you advertised the product for $1.29 a pound.

Along with the other 40 or so items that the regional office dictated would be on sale that week, a drawing of the ground beef would be etched in a page display ad, ready for display in the food section of the metropolitan daily.

> **"In many cases, price has become a neutral factor .... There's a lot more emphasis on service and selection."**
>
> *—Susan Schmierer*
> *L.F. Rothschild*

Now, grocery advertising is changing in terms of media and creative content. The annual total grocery ad budget in the U.S., more than $2.1 billion in 1983, is being divided and conveyed in a greater number of ways.

Although specific buying and creative strategies vary by region and company, two key trends are emerging. Price is no longer the automatic primary consideration in grocery ads, and run-of-print is not automatically the medium with the message.

Statistics for 1984 will be released in early May by the Food Marketing Institute, but comparing 1983 and 1982 data shows a change in grocery media mix. In 1982, 57.2% of grocery ad dollars were spent in newspapers. By 1983, that bite had declined to 42.1%. Direct mail also diminished, shrinking from 13.7% of dollars spent to 12.4%.

The biggest shock, observers say, was that spot tv also dropped, going from 13.2% to 10.8%.

However, 1984 statistics released by the Television Bureau of Advertising show tv advertising (mostly in spot tv) increased nearly 10%, to about $253 million.

The big spenders in tv spot advertising, according to TvB, were: Kroger Co., Cincinnati, with $20.5 million; Safeway Stores, Oakland, Cal., with $20.1 million; Winn Dixie Stores, Jacksonville, Fla., with $14.3 million, and Lucky Stores, Dublin, Cal., with $8.6 million.

From 1982 to 1983, radio's share of grocery ad dollars increased from 7.7% to 12.8%. In-store coupons were the real winners, mushrooming from 2.6% to 14.9%, according to FMI.

Many of the media changes can be linked to consumer lifestyle changes and the use of image rather than price advertising, industry experts say.

Price customarily has been viewed as the only tangible component able to be communicated in standard print advertising, while the electronic media traditionally have been seen as the perfect venue for image ads.

A survey in the April issue of *Progressive Grocer*, an industry magazine, reported on consumer responses to grocery advertising.

"The older the shopper is and the less income they have, the more they 'almost always' read supermarket newspaper ads in preparing a trip to the grocery," says Walter Heller, director-research for the trade publication. Newpaper ads are read by 47% of consumers younger than 35, but this increases to 64% of consumers age 35 to 54 and 78% of consumers 55 and older, he says.

Income levels skew similarly, according to the same study. While only 48% of high-income consumers read the food ads, 62% of middle income and 77% of low-income consumers do.

"What this shows to me is since price is not a major concern of the upper-income levels, then other ways are needed of pulling in the consumer," Mr. Heller says.

"The marketplace is becoming more sophisticated, and the consumer knows what is going on now," says Susan Schmierer, grocery industry analyst with L.F. Rothschild, Unterberg, Towbin, New York. "In many cases, price has become a neutral factor. Supermarkets have begun to understand the competitive role better and have responded with the inception of several new formats. There's a lot more emphasis on service and selection."

But that doesn't necessarily mean price-item advertising is obsolete. Grocery retail advertising is still an inexact science.

"There's no question that consumers have put other priorities on their shopping list besides price," says Marvin Goldsmith, vp, Campbell-Mithun, Chicago, agency for the $175 million-plus ad account of Kroger Co. "There's no question that the industry has recognized consumers' interest in nutrition, life style changes and more exotic menu items. Broadcast, which gives you more opportunity for sight and sound, is the first place everybody looks for creativity."

But creativity—even on tv—is not achieved automatically. "Everything we're saying today has been said in the past. It's just how to say it a little differently that matters," says Bob Snyder, vp, Bowes/Hanlon/Yarborough, Atlanta, agency for the 75-store Food Giant chain.

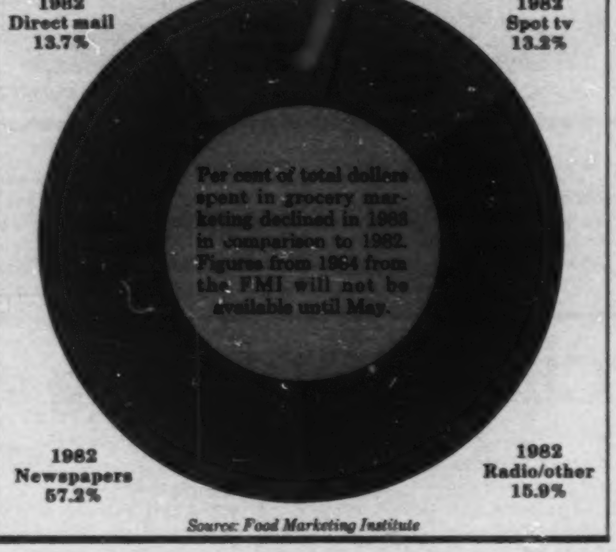
The chain currently features the president of the company as a spokesman in a tv spot using unusual angle photography.

The answer to whether to use price-item advertising depends on what the grocer's problem is in the market, says Sheldon Sosna, industry consultant and publisher of "Supermarket Advertising Newsletter."

"I don't think there's a set answer. If you are a conventional supermarket in Indianapolis facing Cub Stores, you might do well to say you have Hellmann's mayonnaise on sale for 89 cents, because Indianapolis is a price-conscious market dominated by price-conscious stores," Mr. Sosna says.

"Kansas City is another extremely price-conscious market. But in Southern California, for instance, everybody is priced together, so you might want to talk about how great your meat or produce is."

Grocery media mix



Per cent of total dollars spent in grocery marketing declined in 1983 in comparison to 1982. Figures from 1984 from the FMI will not be available until May.

Source: Food Marketing Institute

While advertisers debate price vs. image, consumers raise another issue.

"Supermarket advertisers need to do a better job zeroing in on consumers' major concerns," says Mona Doyle, president of the Consumer Network, a national organization based in Philadelphia. "They are sort of doing price, image and freshness, but people are overwhelmingly concerned about ingredients and hassle."

Ms. Doyle cites a national survey that indicates long checkout lines are a greater concern to shoppers than price. "We're talking about the poverty of time vs. the poverty of dollars," she says. "The complexity of today's shopping experience is very hard for that industry to get wrapped around. They have to learn to zero in on a smarter consumer who is willing to pay for less hassle and wants to know more about the food they eat."

While the advantage of shorter checkout lines and the explanation of inventory selection are not major parts of the grocery ad message, nutrition is finding exposure in a relatively new vehicle, in-store print advertising.

The publication of nutrition-oriented booklets, either in tandem with food marketers or in-house, is more of a promotion than an ad function, yet these pamphlets, published by many leading supermarketers, either contain coupons or are displayed near in-store circulars.

Stores active in the informational publishing field include Kroger; Jewel Food Stores of Melrose Park, Ill.; Farm Fresh Supermarkets, Norfolk, Va.; D'Agostino Supermarkets, New York, and Safeway.

For example, "Foods Unlimited," the Safeway publication, is a recipe-laden volume packed with nutrition information. As in many other booklets, the teachings of home economists receive significant play.

With consumers, nutrition pamphlets are becoming a more valued item. In a Food Marketing Institute study tabulated through January, 1984, 78% of respondents thought supermarkets "do an excellent or pretty good job of" providing nutrition and health information. The figure was up eight percentage points from the previous year.

Closely allied with in-store informational booklets are direct mail and fliers. Accounting for more than 12% of the national supermarket ad total, they are popular in the Midwest, where their use approaches $1 out of every $3 spent.

The tremendous growth of circular advertising in the supermarket industry is the most important thing happening in print, Mr. Sosna says. "We see this in the Marriage Mail concept, started by ADVO in Hartford, Conn. They have the ability to give you just those Zip codes you want. Stores used to do them four times a year or at most once a month. Now they do them weekly."

Newspapers, however, are fighting back. There is, according to Mr. Sosna, a danger of wasted circulation in markets such as Los Angeles, which has 117 daily and weekly newspapers.

"Daily newspapers are waging a strong battle against ADVO Marriage Mail," Mr. Sosna says. "They stress their more friendly relationship with readers, since a newspaper is purchased but the fliers come by junk mail. Also, dailies are convering nonsubscriber homes with a bob-tailed version of the regular paper—with ads."

Print also has another, rather unexpected ally—radio. Mr. Sosna says spot radio, which has increased its net dollar amount of supermarket-related advertising 64% since 1980, is stressing "media synergism," or a mixed-media marketing approach.

In "Media Synergism, The Mixed Media Approach to Retail Advertising," published by the Television Bureau of Advertisers, numerous merchants were quoted as to the reinforcement advantages of a mixed-media campaign.

Supermarkets' run-of-print newspaper ads also are beginning to respond to consumers' creative challenges.

Each year, the Food Marketing Institute, in tandem with *Woman's Day*, conducts a creative competition for supermarket ads. "Although the two-page traditional price information grocery ad continues to be one of the primary advertising styles, we see a lot more on the part of companies in the way of service-oriented ads," FMI communications director Karen Brown says. "We see a lot more in the way of service-oriented and company-image ads, more creative use of graphics, more use of white space."

In print, there also seems to be a corresponding trend toward less listing of products. "Creativity starts with the simplicity and singleness of the message," Mr. Goldsmith says. "Consumers are looking for simplicity, but I think that grocery retailers tend to try to get an awful lot into ads. That in itself overshadows what kind of creativity there may be. There's a giant shift in grocery advertising toward more merchandising of single products."

Industry experts see a more practical reason for continued growth of supermarket advertising creativity—increased sophistication on the part of supermarket staff personnel.

"They are more sophisticated and better trained," Mr. Sosna says.

According to FMI research, newspaper grocery ads are three times more likely to be composed by staff than an ad agency, 39% to 13%, with the remainder put together by printers and other resources.

Even with all these changes, grocery advertisers won't ignore advertising prices.

"You have to have price," Ms. Schmierer says. "Mid-America is not exactly full of yuppies, and most people have to know that you are pricing.

"But just like anything else," she says, "you have to be more creative with that, too." ■

Convenience outlets expanding customer base

By Faye Brookman

One of Circle K Corp.'s 12-ft. outdoor boards shows a construction worker munching a sandwich. By using this hard-hat-clad worker, Circle K, Phoenix, Ariz., the nation's second largest convenience store chain with about $1 billion in sales, appeals to a group long considered the mainstay of the convenience store business: The blue-collar male.

But wait a minute: This rough-and-tough bruiser is eating a croissant sandwich—a strange snack for a construction worker.

Hold on, the story gets even stranger. Down the road a few miles is another Circle K poster featuring a professional-looking woman—another odd ad pitch considering that women make up two-thirds of those who do not frequent convenience stores, according to Gallup Trends Reports.

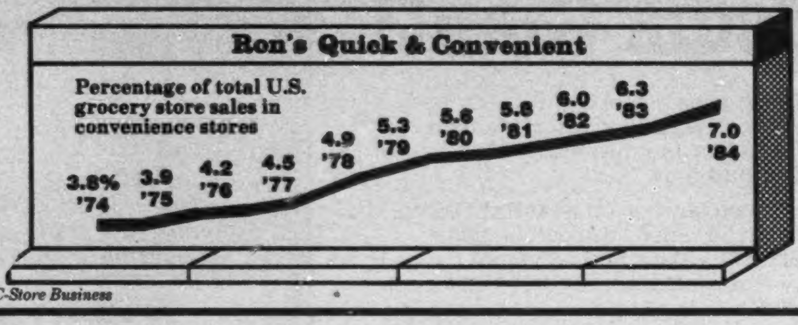
The paradox in both cases is intentional, says Joe Jacober, Circle K's account manager at WFC Advertising in Phoenix.

"We use real people but with a different twist, like the blue-collar worker eating a croissant. The idea is to give infrequent shoppers a reason to come to Circle K," he says.

Circle K is just one of the nation's convenience store chains taking bold steps to strip away the old stereotypes of being a supplier of last-minute party supplies and snacks in hopes of attracting new shoppers, particularly women. The primary convenience store shopper has been a male between the ages of 18 and 34.

According to Gallup, if more of the 11% of customers who are infrequent shoppers could be enticed to come in about twice a month, it could result in as much as 1,200 more visits, or $29,000 of additional revenue per store. That's on top of the $500,000 an average 4,000-sq.-ft. unit churns out each year.

Convenience stores' growing importance



Source: C-Store Business

"We are appealing to a group that has not traditionally been a substantial part of our customer base in the past, but can be in the future," says J.S. Brewster, vp-finance and chief financial officer for National Convenience Stores, Dallas, the nation's fourth largest chain, with annual sales of about $819 million.

To woo this customer, stores are adding more fast foods, including freshly prepared dishes, more health and beauty aids, and better services. Today a woman can purchase a dinner to prepare in the microwave and some nachos plus rent a videocassette all under one convenience store roof.

"Convenience stores used to say, 'Sure we cater to women; we sell panty hose," one industry observer says. "Now they know it takes more than a pair of L'eggs."

No longer just a late-night haunt for people on a beer run, the $43.3 billion (including gas) convenience store business is thriving. Sales rose 16% last year while earnings climbed 28%. Convenience stores are beginning to give supermarkets and other food retailers a better run for their money.

According to industry trade publication *C-Store Business*, convenience stores now account for 8% of total food dollars, up substantially from 10 years ago when these units grabbed a 3.8% share. Moreover, New York-based researcher Frost & Sullivan predicts sales increases will outpace other food retailers through 1987.

This sales optimism is generated by the stores' targeting new customers. Working women will prefer the convenient foods and the easy shopping, Frost & Sullivan says, and more than 50% of all convenience stores are open 24 hours to meet changing work and shopping schedules.

The bright outlook for convenience stores does not dismay traditional supermarket chains. "We appeal to a different consumer," says a spokeswoman for Lucky Food Stores in Dublin, Cal. "We have everyday low prices and a broad selection."

But supermarkets aren't sitting still for convenience stores. According to Ed Gagnon, an analyst and investor relations expert at Dallas-based stock brokerage Eppler, Guerin & Turner, food stores have reacted to convenience stores by adding express checkout lanes. One chain, Supermarkets General Corp.'s Pathmark Supermarkets, Woodbridge, N.J., promises a new lane will be opened if customers have to wait behind more than three people.

Even with express lanes, 60,000-sq.-ft. units can't be considered convenient. The trend to megastores, which has propelled the food industry, also has fueled growth in convenience stores.

Pathmark reported $4.3 billion in sales in 1984.

"The big opportunity for convenience stores," says Larry Schaeffer, editorial director for *Progressive Grocer*, another industry trade publication, "is to fill the void left by the closing of small, conventional food stores forced out by one-stop shopping."

Kerley LeBoeuf, president of the National Assn. of Convenience Stores, agrees.

"Convenience stores will never replace other foods stores as the primary shopping outlet, but as these superstores are forced to be spread far apart, convenience stores will become more of an outlet for fill-in needs."

To spur even more growth, convenience stores are revamping many strategies.

"They have cleaned up the stores, given more attention to training of personnel and reworked pricing to help eliminate the negative image they had in past years," says Denise Melinsky, editor of *Convenience Store News*.

With the new look of the stores, convenience retailers have found a need to spread the word. "We did not advertise very much before," Mr. Brewster says of National Convenience Stores, which operates units primarily under the Stop N Go name, "because we were just another 7-Eleven-style operator. Now we have a new prototype, new graphics and a reason to reach people."

Says Ms. Melinsky, "There is more use of advertising and it is not just hyping convenience but price as well. Convenience stores are going head-to-head on some prices with food stores."

Outdoor boards and radio are the two primary advertising vehicles, industry marketing executives say, and larger chains are increasing their use of spot tv.

Dive into our subs for just $1.49

Circle K Corp. is among many convenience store chains offering fast food options.

Circle K, for instance, will launch a new campaign weighted heavily toward radio and tv, according to Duane Baukus, senior vp-marketing. Print ads and possibly direct mail also will be used. Outdoor boards are used extensively by Circle K, primarily because the corporation owns Bauman Co., an outdoor board company in El Paso, Tex.

On radio, jingles are still the most powerful tool convenience stores have, Mr. Gagnon says, especially during peak driving

Small stores cling to city corners

By Eileen Norris

For 17 years, Carmelo and Esther Varela have worked 15-hour days in Varela's Spotlight Groceries, a cramped corner store that lies in the shadow of Chicago's Wrigley Field.

The neighborhood is in transition—assaulted by youth gang graffiti on garage doors and gussied up by rehabbed graystones that have been taken over by the newest of the nouveaux riches, young urban professionals.

For the Varelas, 1984 heralded not so much a fear of George Orwell's "Big Brother" as it did a fear of big corporations, specifically the convenience store that moved in across the street.

The 7-Eleven, marked by its distinctive orange shingles and owned by Southland Corp., Dallas, opened its doors just one year ago, not long after the neighborhood began an obvious economic rebound. At that time, the Varelas feared they might not be able to make it in a competitive price and hour war with the corporate giant that operates more than 7,000 stores around the clock in 42 states.

Although Varela's Spotlight Groceries is still open everyday from 8 a.m. until 11 p.m., Mr. and Mrs. Varela are not sure they have survived the battle.

"We can't say the 7-Eleven has downed us. Business has been profitable, but it hasn't been a good year for anyone," Mrs. Varela says as she rings up small orders from a steady stream of regulars.

"This is a neighborhood store in a walking neighborhood with too many stores to compete with," she says. "Customers are shop-hopping, going from us to the 7-Eleven to the Jewel or Dominick's [two nearby large supermarkets] to pick up one or two items at each that are on sale.

"All we can do is service our people," she says. "People come in and ask for something and we get it. If there's a problem, they confront the owners, not just some salesperson. There's no permanent set of rules here, and if we know someone, we'll take their personal check."

Varela's is a classic example of what some observers see as a dying breed: The urban neighborhood grocery. Under siege since the late 1950s by large supermarkets, the "corner" grocery store has survived by being convenient and available to shoppers walking in the neighborhood.

Now a new competitor, the convenience chain store, also is aiming at that marketing niche and offering longer hours and other advantages.

One of the only remaining advantages for the old urban corner store over a convenience chain store often is price.

"We never ripped off our customers and we never will," Mrs. Varela says. "We buy at the best rate and we will buy 10 cases of something so that we can pass the savings onto our people."

Convenience stores, she says, get the same good rates from wholesalers and distributors but fail to pass on that savings to the customer.

Donald Ciszewski, 7-Eleven zone manager for the Chicago area, says most pricing is dictated by the corporation, but the stores try to compete locally with special pricings sometimes.

But the price competition isn't cutthroat.

"The Varelas are still there; there's room for everybody on the street," he says.

"The convenience stores are higher priced by their choice," says Donald Bloom, vp of Bloom Komon Distributors in Countryside, Ill. "The only thing you won't find upcharged is a newspaper. They demand a 35% to 40% markup on the cost of goods so that even a 35¢ candy bar will be 40¢."

Mary Herlehy

Esther and Carmelo Varela have owned Varela's Spotlight Groceries in Chicago for 17 years.

In some cases the mom-and-pop operation may have lower prices, says Mr. Bloom, whose family has been in the full-line distribution business since 1897. Corner stores once accounted for about 50% of his business, but now he estimates that figure is about 20%.

The Varelas say they have no trouble competing with the convenience store on price. What the mom-and-pop store can't begin to compete with is the chain's round-the-clock hours and 7-Eleven's parking lot in a neighborhood that rivals New York for lack of parking space.

The similarity between New York and Chicago extends to more than just parking problems. Both cities are probably the only remaining havens of the small urban grocery, Mr. Bloom says. Most other cities already have turned to convenience stores for their impromptu and nearby needs.

"The new mom-and-pop store is the convenient store for many, but in certain markets, like Chicago and New York, there are corner stores that appear to be here to stay," he says.

Mr. Bloom estimates there are thousands of corner stores in the Chicago metropolitan area that still are doing a good business.

However, a lot of corner stores tend to be undercapitalized, and that can be a major problem, Mr. Bloom says. "Some aren't good credit risks and a lot are not in the financial position of carrying enough selection. Sometimes that forces their customers to go to the chains."

It is difficult for the corner store to afford and maintain enough stock, agrees Shelly Grossman, editor for the National Candy Wholesalers Assn. magazine, *Candy Wholesaler*, in Washington. Member wholesale distributors also sell tobacco, candy, health and beauty aids, and groceries to small and large stores.

"Many mom-and-pop operations can't afford to buy in bulk from grocery wholesalers, and some don't have the room for backup stock," she says.

Some turn to wholesale cash-and-carry operations that cater to small businesses that have a limited amount of capital or space to store merchandise, Ms. Grossman says.

Corner stores are "turning into the convenience store of the 1980s. Both have high markups, long hours and a limited amount of product, so where do you draw the line? It's just an evolution of terms," she says.

No one really knows how many small, urban groceries remain, says Bruce Smith, vp for *Progressive Grocer*, a Stanford, Conn.-based trade publication. "Our data center doesn't even track the number because the corner grocery store is not a fac-

Convenience

(Continued from Page 36)

hours. Circle K has its "We'll save you some time," and Southland Corp.'s 7-Eleven, the largest convenience store chain with $5.9 billion in annual sales, has countered with, "We'll save you more than time."

Convenience stores also are getting more involved in corporate sponsorships as a method to spread their name. Southland was a major contributor to the 1984 Olympics.

The company allocated $4 million for the building of the Olympic Velodrome.

A source at Baltimore-based High's Dairy Stores convenience stores says advertising will become more important as the various convenience stores try to get more exposure.

Once the advertising entices the customer, the mix and the store layout must trigger the sales.

Convenience store operators say they are increasing their fast food offerings to not only please customers, but also improve gross profit margins.

"Fast food is the fastest growing sector of our business," Mr. Baukus says.

Sales of fast foods at the Circle K chain amounted to $51.7 million, or 8% of total sales (excluding gas), in 1984.

The profit picture was even rosier. Convenience stores average a 30% gross profit margin, but fast food yields gross margins as high as 60%.

With that in mind, National Convenience Stores hopes to fatten its fast food sales from a 6% share of total volume in 1984 to a 9% share in 1987. One of the company's vehicles to reach this goal is its new hexagonal-shaped building. The company will open 80 of these 3,300-sq.-ft. stores this year and all will devote 25% of selling space to fast food, including an area for dining.

"They have a wonderful open-refrigerator section to sell sandwiches," Mr. Gagnon says. "It is as attractive as produce departments in food stores and it helps convince shoppers of the quality of the goods because they can actually touch the sandwiches."

Additionally, Mr. Gagnon says, the planned purchases are located in the rear of the new stores so customers must pass the high impulse foods and snacks.

Circle K, 7-Eleven and WaWa Stores in WaWa, Pa., (a smaller chain with about $259 million in 1984 sales) are other operators revamping the store layout to emphasize food offerings. "These items are placed in high traffic, high visibility spots to maximize exposure," Mr. Baukus says.

Shoppers also cannot miss the various services convenience stores now are offering. Automatic teller machines and airline ticketing head the list.

The planned purchases are located in the rear of the stores so customers must pass the high impulse food and snacks.

More than 3,000 7-Eleven outlets have automatic teller machines, a spokeswoman for Southland says, and eventually the chain will feature event ticketing.

In the Northeast, 43 7-Elevens now rent videocassettes in an 8-ft. section.

tor. The corner store as a term doesn't exist," he says.

In terms of national retail food sales, supermarkets that ring up more than $2 million in annual volume account for 72%. Convenience stores account for another 6% of the annual sales, leaving 22% of all retail food sales to be divided between neighborhood stores, delicatessens and superettes, small grocers that do less than $1 million in sales a year.

"Corner stores exist only if they provide a service to the neighborhood they're in," Mr. Smith says. "The only place you won't see the growth of the convenience store and the decline of the mom-and-pop operation are in Chicago and New York, especially Manhattan, where there are greengrocers and specialty butcher shops on just about every corner," Mr. Smith says.

The National American Wholesaler Grocers Assn. also says it has no idea how many corner stores are in existence, but estimates there must be 85,000 stores in all, with annual sales of less than $1 million. That doesn't include the about 50,000 convenience stores, says Richard A. Brown, vp-operational services for the association, which represents large and small wholesalers and distributors.

"The corner store doesn't seem to be having as much trouble existing as the medium-size store," Mr. Brown says. "The megastore chains are getting larger and the smaller stores have found a special neighborhood niche. They offer a convenience to the neighborhood. The feeling is that convenience stores tend to go into areas more outside of a downtown city, like in a shopping center or a new housing development."

Corner stores can continue to make money when they're needed and when they don't have a bigger store to compete with, he says. "It's still a good business as long as the community in the area responds and with many, a relationship with customers 90 hours a week breeds a certain kind of loyalty."

Member distributors and wholesalers of NAWGA have no problem catering to the smaller grocery store either, he says, unless the wholesaler has a minimum order size. "The economy of wholesaling is reducing the number of stops the truck has to make, but there are a lot of small wholesalers out there who want to service the small account. The corner store might be charged a little more for delivery and service, but his operating expenses and overhead are considerably less."

Since the 7-Eleven moved in across the street, Varela's Spotlight Groceries has had little difficulty keeping its service contacts. The couple has not had to resort to buying from a cash-and-carry wholesaler.

"We aren't penalized with a minimum order size because we buy in bulk and store our stock in our two full basements," Mrs. Varela says. "But we are having trouble getting service from a bakery that is hesitant to service us. He feels he can sell more stock to the 7-Eleven. That's the only problem we've had."

The Varelas plan to keep their store, which they bought sight unseen for $7,000 from a relative. That was 17 years ago, when the neighborhood was rough and the grocery store windows were broken by punks an average of three times a week, Mr. Varela says.

"We're making a living and trying to get our six kids through school. I'd like to think our customers will keep coming in and won't forget us. We have really lost very little in the last year, and I'd say the 7-Eleven hasn't hurt us that bad. But that's because of our loyal customers."

But, if the right offer came along, "we might sell," he says.

---

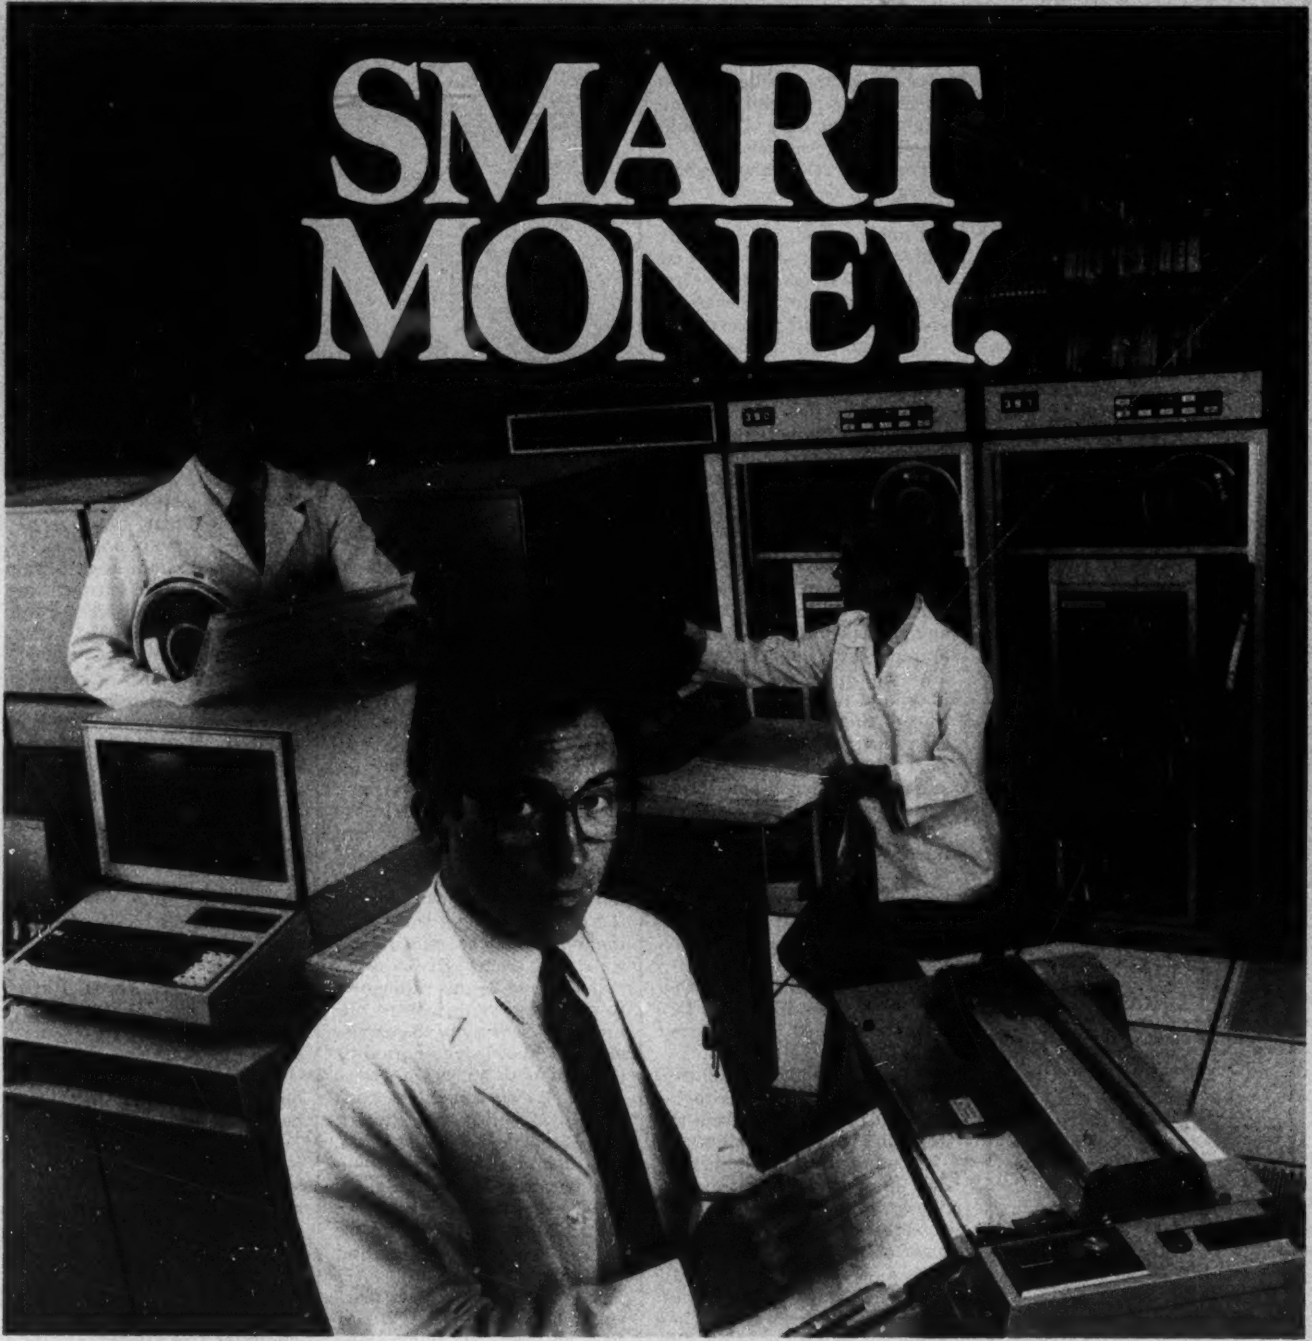
that customers must come in at least two times—once to rent and again to return. Research shows these customers are spending about $8 (excluding the rental) on the first visit and $3 on the second.

That's higher than the average convenience store transaction, which is about $2, according to the National Assn. of Convenience Stores.

Competition with food stores is not the only reason behind these moves. Oil companies including Hess, Texaco and Mobil are opening their own versions of convenience stores.

Drug chains also are enlarging convenient food selections. Walgreen Co. of Deerfield Ill., Longs Drug Stores in Walnut Creek, Cal., and Fay's Drug Co. in Liverpool, N.Y., for example, all now have 1,000-sq.-ft. food sections offering 800 of the most wanted items in selected stores. Southland supplies several of the sections.

"Today's convenience stores face many of the same challenges as the supermarket industry. Both must adjust to changing demographics. Convenience stores appear to have found their own successful method to do this," Mr. Schaeffer of *Progressive Grocer* says.



Get the mavens of Silicon Valley where they live.

The brains behind the high-tech industries. The people with the new money, the big money. They live in Silicon Valley, the Santa Clara Valley. And their daily newspaper is the San Jose Mercury News.

The Mercury News reaches the 1.4 million richest people in Northern California.[1] And the Mercury News reaches them better than any other Bay Area newspaper. Five times better. The Mercury News delivers 52% of Metro San Jose adults daily, with a 5-day adult reach of 65%.[2] On any given day, the best the San Francisco papers can do in this market is 9%.[3]

And this market (San Jose PMSA/Santa Clara County) is the high-end market. The big ticket market. The young people on the move with the money to get there in style. It's the kind of market every advertiser dreams of.

But don't dream. Buy it.

It's one of the smartest buys you'll ever make.

Specializing in gourmet tastes

By Joanne Y. Cleaver

It's 8 a.m. on a weekday, and the aroma of rich, fresh coffee fills the air at Cafe Express, an Evanston, Ill., gourmet coffee shop.

Commuters peruse their newspapers, lingering over another cup. Manager Annika Kostrubala and two employes are squeezing fresh orange juice, serving freshly baked breakfast breads and pouring several different types, flavors and strengths of coffee into customers' waiting cups.

In the afternoon, the store is full of students and "the gauze skirt crowd," according to Ms. Kostrubala; after dinner and until midnight, young professionals meet there to sip decaffeinated coffee and talk.

Though the store opened 2½ years ago as a gourmet coffee bean and accessory shop, the continental breakfast and fresh coffee menu accounts for much of its 1984 $90,000 annual gross sales.

But the demand for the store's coffees, which cost between $5.25 and $6.75 a pound, is as strong as espresso, and Ms. Kostrubala is trying to figure out how she can rearrange the tiny store to accommodate an expanded line of beans, coffee makers and exotic accessories dear to the hearts of coffee aficionados.

Such are the problems of specialty food stores. The adventuresome spirit of today's gourmets has spawned an enthusiastic demand for the unusual, the imported, the best, the latest, in food trends. Shops selling primarily cheese, coffee, fresh fish, chocolate, pasta or rich and unusual baked goods are springing up all over.

Consumers with gourmet palates brush aside the conveniences of the local grocery store to make multistop shopping trips, even timing their arrivals with that of the fresh scallops or red snapper.

Food business insiders say it's almost impossible to gauge how many specialty food stores exist. Many are very small and family owned. But there are some indicators of the specialty food category's recent explosive growth.

The National Assn. for the Specialty Food Trade's winter show in February had more than 400 exhibitors—a 30% increase from the 1984 winter show. More than 15,000 trade insiders attended, a 10% jump.

According to the retail division of the Census Bureau, the latest survey of independent food shops, completed in 1982, reveals that the number of specialty stores nearly doubled from 1972. At the time of the survey, that category included 6,317 stores with total annual gross sales of $1.6 billion—a figure that industry insiders say probably has doubled by now.

Specialty food stores also are commanding a dominant market share in the fragmented world of gourmet foods, according to the 1984 Gourmet Retail Market Report, commissioned by Miami-based *Gourmet Retailer*. Competing with cookware, coffee, cheese, gift gourmet shops and even department stores' gourmet food sections, specialty food stores came out on top in nearly every category surveyed, from chocolate confections to Dutch cheese.

The survey did not include grocery stores' gourmet sections.

The profile of the typical gourmet food customer is not surprising: Urban, two-wage earner household, sophisticated and self-confident, in short, the kind of person who figures he's worth the extra money it takes to have Swiss water-decaffeinated fresh almond-flavored bean coffee sitting in the cabinet rather than Maxwell House.

But association executives and store managers also agree that the customers are of all ages, very interested in food as a hobby and health-conscious.

According to Edward Loeb, publisher of *Gourmet Retailer*, the groundwork for the current

FINALLY
A COUPON VEHICLE
WITH REDEEMING
QUALITIES.

Coupon Counter
Coupon Counter

At last there's a coupon vehicle that offers you efficiency, security and reliability: The Coupon Counter®

The incredible in-store Coupon Counter

The Coupon Counter machine instantly delivers your coupon right inside the store. Which means shoppers don't have to hunt for it through a cluttered newspaper. Or clip it. Or remember to bring it. Your coupon is always right there where decisions are made.

Triples your redemption rates

Our 1984 results prove that shoppers who use the Coupon Counter are three times more likely to redeem your coupon. Which means you get three times the power to stimulate trial. In fact, shoppers are so likely to redeem Coupon Counter coupons, many of our clients tell us they can lower the face amounts and still get impressive results.

Tightens security

With misredemption on the rise, the Coupon Counter offers virtually fool-proof security. Your coupon can only be validated when the shopper enters a personal code.

Delivers demographics

Because every Coupon Counter cardholder is listed in our data bank, we know exactly who redeems your coupon. This vital tracking information is now available for the first time…just ask and find out exactly how our research capabilities can help you.

Join the revolution

If you're not getting these kinds of results from your current coupon vehicle, it's time to try the Coupon Counter. You'll join a long list of top companies who've had remarkable success with us.

Just call 1-617-329-5800.

It could be the most redeeming thing you've done for your couponing effort.

Restaurants cater to home eating

By Julie Liesse Erickson

Having a pizza at home is as American as mom, baseball, hot dogs and apple pie. But what happens when mom doesn't have time to cook?

Then pizza may be partially prepared by Edwardo's Natural Pizza restaurant, the apple pie baked by Bakers Square, and the meat selection, along with the sauce and side dishes, purchased raw or ready-to-cook from a favorite local eatery.

As home cooking shrinks as an American standard, restaurants and grocery stores are invading each other's turf with new fervor to compete for the growing carryout and prepared food market. For grocery stores, the weapons are soup and salad bars and on-premise bakeries.

And for a growing number of restaurants of all types—full service as well as fast food—takeout foods, retail grocery counters and home delivery have become a routine part of the daily menu.

So far at least, the invasion has not been dramatic. Latest estimates compiled by Technomic Industries, a Chicago-based leader in foodservice industry research, indicate that one out of every five meals is eaten away from home. That figure, Technomic president Ron Paul says, "is changing very, very slowly" in the favor of restaurants.

"Restaurants [someday] may account for one out of every four meals, but people ask when one out of every two meals will be eaten away from home," he says. "The answer is never."

Perhaps more worrisome for grocers is the company's estimate that between 40% and 45% of America's food dollars are spent away from home. Soon, Mr. Paul says, foodservice and groceries will share equally in consumer food spending.

Changing demographics—more working women, more two-income families—and improved foodservice industry efforts indicate that takeout foods and home delivery will become more important in that equation.

Takeout already represents a formidable percentage of restaurants' sales. Technomic estimates the industry's takeout sales at $20 billion yearly.

The fast food industry's rule of thumb says about 40% of sales are not eaten in the restaurant. Wendy's International, Dublin, O., meets that percentage with conveniences such as its drive-through window, which in many cases is open 24 hours.

For pizza restaurants, thus far foodservice's most accepted participants in takeout and home delivery, those sales are even more important. Ann Arbor, Mich.-based Domino's Pizza has grown to more than 1,200 units through pizza delivery only.

Wichita, Kan.-based Pizza Hut, conspicuous for years because of its lack of a delivery system, is testing home delivery.

Mama Mia! Pasta in Chicago offers complete dinners to go, including a bottle of wine.

And even for "gourmet" pizza restaurants, such as the eight Edwardo's shops in the Chicago area, takeout and delivery account for 43% of the average unit's about $1 million in sales.

In addition to the convenience of takeout foods, Mr. Paul says, "The home has become an entertainment center in itself. If consumers have [videocassette recorders], tvs, stereo systems, cable tv, you have to expect that they're going to be using them. They want to be in their home, but they don't want to cook."

That's what Dorothy De Carlo and David Houle, co-owners of Chicago's two-unit Mama Mia! Pasta chain, discovered in their first restaurant, an upscale fast-

Julie Liesse Erickson, an associate editor of ADVERTISING AGE, has covered the foodservice industry for more than three years.

Gourmet

(Continued from Page 43)

popularity of gourmet foods was laid about 10 years ago when gourmet cookware shops started springing up.

When cookware sales started to peak, he says, "The independent retailers started to put in consumable items. The easiest ones were coffee and tea of all types." Deluxe preserves, condiments, flavored cooking oils, vinegars and wines were next, he says, and now virtually all gourmet cookware stores also stock some types of food—and vice versa.

Much of the appeal of specialty food shops comes from the atmosphere and service created by knowledgeable salespeople. The family-owned stores go out of their way to be sure customers get what they want and know what to do with it when they get home.

"People come to a gourmet shop expecting service," says Steve Pasto, editor-in-chief of Barrington, R.I.-based *Food Distributor*. "And service means [telling them] where the cheese came from and what to do with it."

Even the most adventuresome can be stymied by indecision when trying to put together the right combination of goat cheeses, soft cheeses and whole-grain crackers for a party.

Encouraging customers to sample food is standard operating procedure for specialty shops, says Marc Nathanson, administrator of the retail division of the National Assn. for the Specialty Food Trade.

"If you're going to spend that kind of money on food, you shouldn't be buying it prepackaged off the shelf," he says. Sampling is also "one of the strongest marketing techniques in specialty stores." Impulse purchases are increased by sampling, and it also encourages customers to buy groups of related products—such as chocolates and coffee.

An equally strong appeal of the service emphasis is the enjoyment customers get out of seeing their food prepared before their eyes.

Even fish stores, which formerly had a reputation for having an atmosphere people avoided, are evolving into gleaming, tile-lined emporiums of fresh seafood.

"People walk into a fish store and they expect greater variety and preparation aids," says Bob Arnold, director-marketing for the National Fisheries Institute. "They want to see the whole fish cut down. They'll come in to see [that] even though they don't want to buy something. Watch people around a lobster tank. They'll sit there and make faces at them."

Recognizing that specialty foods appeal to many people who aren't sure how to prepare or serve them, many gourmet shops are branching into takeout and catering services. Evanston SeaFoods, for example, features homemade chowder and gumbo, as well as deep-fried shellfish. Takeouts account for 25% of sales, owner Marion Maguire says.

Other stores, such as Cafe Express, are installing small

Specialty stores gain on groceries

Specialty store outlets of various types continue to grow at a rapid rate, according to a 1982 survey by the Retail Division of the Census Bureau. Figures do not include stores too small to have a payroll, but do include leased specialty departments in department stores.

service shop specializing in freshly made pasta and sauces.

"When people call in a dinner order to pick up, they know there's someone else slaving in a hot kitchen making the pasta and sauce and plating it just for them—but they don't have to worry about the fuss or the mess," Ms. De Carlo says. "We can give them complete dinners to go—pasta, sauce, bread, dessert, even a bottle of wine. What amazes me is that people don't even want to toss a green salad.

"But I know what *I* like—and there's nothing like having it done for you."

Another attraction of Mama Mia!'s takeout, delivery and grocery options is the food's freshness. "We make our pasta fresh daily and once people have been to our restaurant a couple of times, they realize there's a distinct difference between it and store-bought pasta," Mr. Houle says. "We're educating people to believe it's better to buy it fresh—with no preservatives."

Takeout and delivery combined account for about 15% of Mama Mia!'s sales. The original restaurant and its six-month-old sister store have yearly sales of $2 million to $2.5 million and offer pasta by the pound and sauces by the quart as well as individual-portion dinners to go.

If customers want an unusual combination of bulk foods not normally produced by Mama Mia!, such as whole-wheat pasta shells, the store generally will accommodate. Such personal attention by restaurant staffs to individual consumer needs is even more widespread, however, at retail grocery counters attached to restaurants.

At Timbers Away!, the retail shop located under the roof of Timbers Charhouse, Highland Park, Ill., customers can purchase raw the fresh meats and exotic fish featured on the dining room menu.

"We'd get a lot of customers asking whether they could buy a couple of slabs of meat from us," says Jillian Okun, director-marketing for Timbers parent, Northbrook, Ill.-based Errant Enterprises. "They'd tell us that they couldn't find such good meats in their grocery stores—or that they couldn't find the fresh turbot or pompano or other exotic fish they'd sampled in our restaurant."

> **"They'd tell us they couldn't find such good meats in their grocery stores."**
>
> *—Jillian Okun*
> *Errant Enterprises*

Now, Ms. Okun says, customers can purchase these raw materials, as well as the full-service restaurant's freshly made salad dressings, salads, baked goods and desserts, from Timbers Away!

"They're getting the quality they already have witnessed in the restaurant," she says. "And sometimes, if they don't know exactly how to prepare one of our exotic fish, we'll try to team them up with our chef, who gives them pointers—and perhaps even filets a fish for them."

Although Timbers, not yet open six months, does not have sales figures available, its sister Claim Company restaurants in Northbrook and Oak Brook, Ill., together ring up $250,000 annually in takeout of prepared meals.

One reason the Claim Company added a takeout menu was to satisfy customers who didn't want to wait in line for a table at the two popular restaurants, which do not accept reservations.

That same problem—customers lined up outside the door—led to a takeout business for The Crab House restaurant in Miami. But in this case, the takeout business has developed into a separate chain of takeout-only facilities.

The Miami Crab House was purchased in 1976 by Edward Scharps and Leonard Rapaport, who boosted its annual sales volume to the current $3 million. By the early 1980s, the restaurant was generating $500,000 in

(Continued on Page 46)

---

seating areas where customers can munch in comfort.

Despite such amenities, the specialty food stores pose little threat to grocery stores' 92% share of the food market. But the grocery chains closely watch the gourmet shops to see what food trends are gaining strength, according to Ian Gittlitz, publisher of *Gourmet Today/TeleFood*, a New York-based publication that goes to 15,000 gourmet cookware and food stores.

Mr. Gittlitz and other industry insiders agree that supermarkets' expanded gourmet sections reflect the national appetite for specialty foods.

Many food distributors and manufacturers use specialty shops to build their market presence and then are thrilled to broaden their distribution through supermarket chains.

But the paradox is that a widely distributed specialty food is no longer unusual; therefore, it loses its appeal to the status-seeking gourmet.

However, the specter presented by the local grocery chains stocking whole bean coffee to be ground at the store doesn't faze Ms. Kostrubala of Cafe Express.

What does scare her, she says, is the thought that a restaurant corporation might pick up on the success that specialty food shops are having and launch a chain of gourmet coffee shops that sell coffee both by the bag and the cup.

Even so, she's convinced her customers would remain loyal. "The people here just want to start out their day right, with a good cup of coffee," she says.

With Y&R win, Dentsu leader may stay on

By DENNIS CHASE

Trivial pursuit: Name the biggest advertising agency in the world.

If you answered Dentsu, you would have been right for any of the past 10 years. But no longer.

Young & Rubicam supplanted Dentsu as the biggest agency in the world last year by gross income, according to ADVERTISING AGE's latest tabulations of international agency income and billings *(see story on Page 58)*. Dentsu had held the No. 1 ranking since 1973.

Y&R's gross income, measured in U.S. dollars, hit $480.1 million last year, compared with Dentsu's $468.4 million.

The announcement is having an impact in Tokyo, where Hideharu Tamaru, president of Dentsu since 1977, is believed to be considering retirement this year.

Following Dentsu's drop from the top spot, all bets are off on whether the 70-year-old Mr. Tamaru will retire this year.

"Nobody knows what he will do," said one agency source. "He doesn't have to retire if he doesn't want to. No one can force him."

One reason for the uncertainty is Japanese concern about losing face. Before publication of the agency rankings, Dentsu officials expressed concern about Y&R overtaking Dentsu, and whether this would upset retirement plans organized by Mr. Tamaru's colleagues.

"If Dentsu stayed No. 1, then it was pretty certain he would retire because he couldn't take the agency any higher," said the source. "Now it's not a given."

Rumors about Mr. Tamaru's retirement during the last three years were rekindled by reports in local business publications this year that he would step down, partly because he turned 71 on April 20.

Although there is no mandatory retirement age at Dentsu for senior executives, 70 is considered a benchmark.

Also, Mr. Tamaru's birthday falls around the time of Dentsu's general stockholders meeting in May, the most likely time for a retire-

New taste buds as Coke hits 100

By NANCY GIGES

Coca-Cola Co., Atlanta, this week will announce that it is changing the formula for flagship-brand Coke to produce a taste that purportedly is far superior to the original.

The U.S.' leading soft drink will enter its second century in May, 1986, with an even better taste than ever before and in packaging tied especially to its 100th birthday.

The reformulation move is considered so major that the head of one West Coast bottler was considering postponing his weekend wedding to attend meetings in Atlanta.

Coca-Cola has invited financial analysts and the media to presentations on April 23 at New York's Lincoln Center, where this announcement, as well as others relating to new advertising and the Coke brand's 100th birthday, will be made.

Invitations to analysts say major "soft-drink marketing developments" will be discussed.

Bottlers, who will all meet in Atlanta this evening, have also been told to cancel all advertising possible

Turner takeover plan: Skeptics abound

CBS oils weapons

By CRAIG REISS

NEW YORK—CBS Inc., which for the past month has been counterpunching stock speculators and conservative groups with the stunning force of a corporate Marvelous Marvin Hagler, has prepared a double-barreled legal and regulatory response to Ted Turner's hostile takeover bid.

CBS' countermoves to Mr. Turner's $5.4 billion bid for the media giant were expected to come to light as early as today. Sources said CBS would challenge the way Mr. Turner intends to finance his takeover bid, much as CBS challenged the manner in which arbitrageur Ivan Boesky funded his purchase of an 8.7% interest in CBS last month.

Amid the speculation on Wall Street as to whether Mr. Turner could pull off his bold bid for CBS, most observers overlooked the possible downside for the Atlanta cable mogul. If CBS is able to tie up Mr. Turner in a lengthy and costly regulatory and legal morass, can Mr. Turner afford the interest payments on his "junk" bonds and the legal fees in the anticipated CBS countersuits?

Mr. Turner, who has the image of a modern-day riverboat gambler, may be involved in his biggest winner-take-all poker hand to date. If CBS continues to counterpunch effectively, Mr. Turner could jeopardize the financial strength of his existing base, Turner Broadcasting System.

James Gammon, exec vp, Gammon & Ninowski, the Washington-based broadcast brokerage company, in an earlier interview called Mr. Turner "a good operator." But he noted that any takeover attempt would have to be well timed because the interest on financing, in this case, on the zero-coupon bonds, could "eat you alive."

Last week, Mr. Gammon said, "I think [Mr. Turner's bid] is preposterous. An entity that nets $10 million offering securities of his own for CBS is preposterous. . .It reminds me of the deals I used to try

(Continued on Page 130)

Last Minute News

Four agencies to pitch Lowenbrau

MILWAUKEE—Miller Brewing Co. will hear creative presentations for its $20 million Lowenbrau assignment (AA, April 15) from incumbent Backer & Spielvogel, Chiat/Day, Saatchi & Saatchi Compton and J. Walter Thompson USA, all New York. All but Saatchi currently have other Miller assignments. Separately, Miller has expanded test markets for its Plank Road premium brand (AA, Oct. 25) to include Lexington, Ky.; Raleigh and eastern North Carolina, and San Francisco and northern California. Chiat handles.

Ketchum on line for Honda's new Acura

GARDENA, CAL.—American Honda Motor Co. has named Ketchum Advertising to handle the $10 million-plus account for its new Acura line, ending a yearlong search. As a condition of its appointment, Ketchum will establish a Los Angeles office staffed by Craig Mathiesen, currently senior vp-creative director at the agency's San Francisco branch.

Benton & Bowles makes account Gaines

WHITE PLAINS, N.Y.—Anderson, Clayton & Co.'s Gaines Foods subsidiary has assigned its $2 million Top Choice and Gaines-Burgers soft-moist dog food account to Benton & Bowles, New York, from Young & Rubicam in a consolidation. B&B already handles Gravy Train and Cycle.

Moonlighting aids Eastern's rebound

By BRIAN MORAN

Eastern Air Lines is banking on expansion of its cut-rate, late-night flight service and a leap into London to stay on course after a strong first quarter.

Moonlight Special, the carrier's first attempt to tap into the booming "no-frills" passenger market, has averaged a 90% load factor since its April 1 start, Miami-based Eastern reports. The cross-country service uses planes that double as cargo carriers.

An introductory tv and newspaper campaign for Moonlight, themed "The miracle of flight," has completed its run.

A follow-up print effort is being developed by the carrier's agency, Campbell-Ewald, Warren, Mich., but the airline is in no rush to start it.

"When you're running with such a high load, more advertising right now could lead to a seating problem," said Basil Walsh, Eastern advertising manager. Eastern's total load factor in March was 66.2%.

Eastern, which currently offers Moonlight flights between 10 U.S. cities through its Houston hub, plans to expand the service to its Chicago hub this summer. Because operating costs are covered by a freight-hauling agreement with Palo Alto, Cal.-based CF Airfreight, Eastern so far is turning a handsome profit with the service. The cross-country fare is $98, at least 20% lower than competitors' fares.

Some airline industry analysts initially felt Moonlight was a desperation move of an airline on the skids because of severe labor problems and competition. But off its first two weeks of service, Moonlight is getting high marks.

"It's really been very innovative," said Robert Joedicke, an analyst with Shearson Lehman Brothers, New York. "It's helped them use their fleet of underused wide-body planes more efficiently, and they're getting greater productivity out of their crews."

The new service uses seven of Eastern's wide-body, A-300 Airbus planes. Passengers—who pay extra for meals and cannot check bag-

'Space' shuttles to low-G ratings

By JAMES P. FORKAN

NEW YORK—Liftoff problems for CBS-TV's expensive "Space" miniseries last week were more evidence for tv observers who believe the miniseries format has been overworked.

The 13-hour, $32 million opus last week was averaging a 27 share after four nights of national data from A.C. Nielsen Co., less than blockbuster numbers. The novelty of the miniseries, said some industry observers, had been lost due to scheduling too many too close together. And that doesn't include five more miniseries projects still slated to air in May.

As it stands now, "Space's" four-night 16.9 rating average lags behind nine other 1984-85 miniseries (topping only NBC's "The Sun Also Rises"), while its 27 share level trails eight of those epics, including NBC's "A.D." and CBS' "Mistral's Daughter."

Some agency people have begun wondering whether two-part miniseries, totaling four to six hours, might be a better way to go. This season's ratings statistics were dominated by NBC's "Fatal Vision," with a 47 share for two nights last November, and ABC's

Plug pulled on 2nd network

JWT drops Euro

By DENNIS CHASE

JWT Group, the parent company of J. Walter Thompson Co., last week finally threw in the towel and sold off its second agency network in Europe.

The group announced it was selling its wholly owned Euro Advertising agencies in Duesseldorf, Germany; Bologna/Milan, Italy, and Athens, Greece, back to its equity partners, who are the founder-managers of each agency.

The reasons given include the need to build up the main JWT agency in Europe, and the strong value of the U.S. dollar compared with European currencies, which has cut into Euro Advertising's profits when reported in dollars.

The commissions of Euro Advertising in 1984—$8 million—represent less than 2% of JWT's Group's over-all commissions and fees—which totaled $508 million last year.

In a prepared statement, JWT Group president Don Johnston said, "Although [Euro Advertising] has been operationally profitable since 1983, the margins have never approached levels that are acceptable."

Another exec said, "We're

CORPORATE CLOSEUP

'New' Atari tries to bring back old growth

By CLEVELAND HORTON

SUNNYVALE, CAL.—The sign in front of corporate headquarters is chipped and fading. Inside the entrance, the decor is "modern transition"; moving boxes are stacked nine-high. The two receptionists working behind a counter, a young man and young woman, seem to be pulling triple duty: Answering telephone calls, serving customers and running interference for the accounts payable department.

This is the new Atari Corp., still bearing scars of battles waged within the company nine months ago when Warner Communications sold the once high-flying videogame and home-computer company to Commodore Business Machines founder Jack Tramiel.

A former Atari executive offers a view of his old employer. See Page 28.

With his "Business is war" philosophy, Mr. Tramiel immediately ignited a frenzy of cost-cutting at Atari in an effort to relaunch the company into a leadership position in the home-computer business.

The payoff, if there is one, still is ahead. But central to Mr. Tramiel's plans are two new lines of computers. One, quietly released late last month, is essentially an extension of the 5-year-old Atari 800XL, based on the industry's fading 8-bit technology. The other is intended to be a match for Apple Computer's Macintosh.

Mr. Tramiel, 55, hopes to boost Atari's slim 3% market share with sales of between 3 million and 5 million computers this year, the company says. The goal is admittedly optimistic, since the entire industry sold fewer than 5 million home computers in 1984. But if he even comes close to market leadership, it won't be the first taste of success for either Mr. Tramiel or Atari.

The unkempt appearance of Atari's corporate headquarters reflects Mr. Tramiel's belief that the company will be well served by the same cost-cutting/low-margin strategy he used to build Commodore into a worldwide marketer of personal computers. A cigar-smoking, self-styled tyrant, Mr. Tramiel is prepared to bully his staff, every company doing business with Atari and, some say, even customers in his single-minded effort to market the lowest-price personal computer available.

By emphasizing manufacturing and disregarding marketplace niceties, Mr. Tramiel bucks the current trend in the personal-computer industry, in which the use of slick, sophisticated marketing techniques is gospel. Personal-computer companies turned to traditional package-goods marketing in the early 1980s when Atari Inc., then owned by Warner, recruited James Morgan from his position as exec vp-marketing at Philip Morris USA to take over the ailing company and Apple hired soft-drink marketer John Sculley, president of Pepsi-Cola USA, to assume the helm at Cupertino.

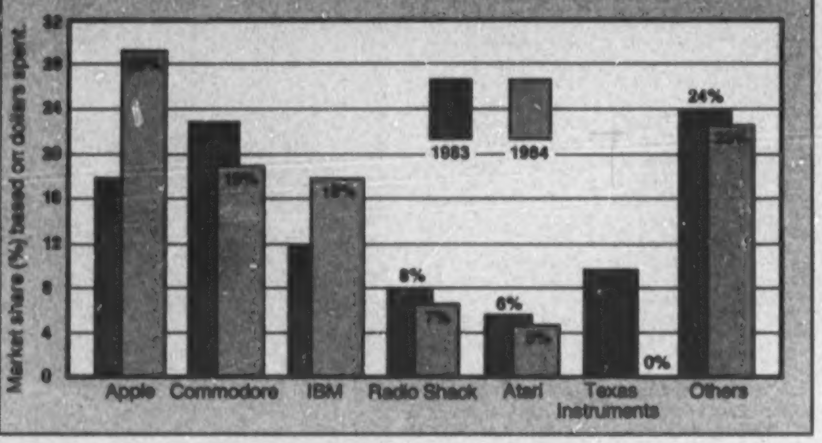
Mr. Tramiel runs against the grain in this and other ways. When he acquired Atari, he promptly installed his three sons in key positions: Sam, 36, as president; Leonard, 30, a former physicist, as vp-software, and Gary, 25, an ex-stockbroker, as vp-administration. Mr. Tramiel managed to work with son Sam while still at Commodore, but his efforts to bring the rest of his family on board contributed to his departure from that company. Family, however, is particularly important to Mr. Tramiel. Born in Poland, he is a survivor of the Auschwitz concentration camp and lost most of his family in World War II.

Mr. Tramiel has transferred his survival instincts to the business world, where his tough-minded tactics turned Commodore, founded as a typewriter repair shop, into a $1 billion international marketer of computers. In taking over Atari, Mr. Tramiel thus carried with him an intimate knowledge of his largest competitor, Commodore, which ranked first in market share based on units sold during the flurry of home-computer

(Continued on Page 112)

Shares of the home-computer market

Even though Atari ranks only fifth among major manufacturers of home computers, the company hopes to regain some of its former glory with ex-Commodore boss Jack Tramiel calling the shots and cracking the whip. *Source: Future Computing Inc.*



Atari bucks CES, cites costs

By CLEVELAND HORTON

Atari Corp.'s unexpected decision to drop out of the upcoming Consumer Electronics Show surprised many observers. But others suggest the move may reflect the company's belief that low prices alone will guarantee success for its new lines of home computers *(see related story above).*

Sunnyvale, Cal.-based Atari introduced those new machines at the January CES in Las Vegas. Its decision not to attend the June show in Chicago was disclosed last week (AA, April 18).

The company will be represented in some manner in Chicago, insisted Greg Pratt, president of Atari (U.S.) Corp., the company's domestic sales subsidiary. It may rent hotel suites near the exhibit hall to meet with retailers, he said.

Mr. Pratt, who said he wasn't informed of his company's decision, said the $500,000-plus over-all cost of exhibiting was too expensive.

Kenneth Lim, an analyst with DataQuest, San Jose, Cal., believes Atari's decision to drop out of the June CES may be based on concern it might suffer by comparison with rival Commodore Business Machines, West Chester, Pa.

Atari has no new products to exhibit, but Commodore may unveil the Amiga, its newest personal computer, at the show.

The "no-show" decision apparently was made by Atari chairman Jack Tramiel himself. Mr. Tramiel was attending a computer show in Hanover, West Germany, at the time the decision was disclosed and could not be reached for comment.

A spokesman for the the Electronics Industry Assn., which sponsors the CES, confirmed that Atari told the association earlier this month that it didn't plan to participate.#

HBO has no place for soft-sell ads

By SUSAN SPILLMAN

NEW YORK—Home Box Office has temporarily shelved its image-building "There's no place like HBO" commercials for a more aggressive $10 million campaign that it hopes will reverse a declining sales chart.

Starting this week and running through mid-June, the pay tv network will hype its upcoming programing with the new theme "HBO all-star summer."

Broadcast tv and cable commercials, page newspaper ads and direct-mail pieces will saturate 35 markets, including Atlanta, Miami, Denver and Houston.

During the six-week period, HBO aims to deliver its message to 45 million households.

While HBO is buying $10 million worth of media, the most it has ever spent in so short a period, the cable network expects participating affiliates to chip in with another few million for this effort.

Between August and mid-October, HBO will wage another acquisition-oriented campaign that may exceed $10 million.

The "HBO all-star summer" and last year's "There's no place like HBO" both were created by BBDO.

The new commercials, with their action movie and concert clips set to fast-paced music and a hard-sell pitch, represent a radical departure from HBO's most recent network tv campaign, in which couples and families were pictured as they cuddled in front of the tube to watch cable.

"Let's face it: We're in a maturing phase of our life cycle. It's harder to get new subscribers now," said John Billock, HBO senior vp-marketing.

"No longer can we count on new markets. We've got to go deeper into the markets where we are already distributed."

HBO netted only 776,000 new subscribers in 1984, compared to 2.2 million in 1983, according to Kagan Associates. Still, Mr. Billock said the company's 1984 campaign was successful in that it improved public awareness of HBO.

"But this year we've been squirreling away our resources for a strong product promotion. You can't do image advertising in a vacuum."

Now we're looking to close the sale."

How many sales is he hoping for? Mr. Billock would not reveal a number, except to say that of the 10 million direct-mail pieces it will distribute, HBO was expecting a 2.5% return, or 250,000.

The campaign precedes the summer, traditionally the period in which both pay tv viewing and disconnecting are at their highest.

Mr. Billock believes the latter phenomenon may be a self-fulfilling prophecy, since cable companies seldom market heavily in the summer.

The "There's no place like HBO" campaign won't be completely bagged.

It may turn up again at a later date or be combined somehow with the new hard-sell strategy, said Mr. Billock.#

BBDO to sharpen Visa's edge

By RUTH STROUD

Visa USA hopes BBDO, the agency that glamorized Pepsi as "the choice of a new generation," will lend similar sparkle to its familiar, but slightly shopworn, blue, white and tan card.

San Mateo, Cal.-based Visa last week named BBDO, New York, to handle its $20 million domestic account (AA, April 18). Visa, which for 10 years has been handling the advertising in-house, is trying to defend its leading position in the bank card industry against the onslaught of new—and old—competitors by creating a new image.

The four-month review whittled an initial list of more than 25 agencies to five. The other finalists were all New York shops: Benton & Bowles; Dancer Fitzgerald Sample; Foote, Cone & Belding, and Young & Rubicam.

"Where BBDO stood out," explained Visa senior vp-marketing John Bennett, "their [ideas were] strategically more practical and their creative work was more unique."

The agency's potential to create "compelling or breakthrough advertising was really the one-two" that won it the account, as well as the "people fit" between the two parties, Mr. Bennett added.

Visa also was impressed with BBDO's work for PepsiCo and Chrysler Corp.'s Dodge division, he said, noting that there are certain similarities between the dealer organizations for these clients and Visa's relationship with its member banks.

Several key people working on the account have worked on Pepsi, including Gary de Paolo, exec vp-senior management representative, and Bill Katz, vp-management supervisor.

Phil Dusenberry, vice-chairman and executive creative director, also will be involved in the Visa account.

BBDO/West, San Francisco, will play a "significant support role" in maintaining day-to-day contact with Visa on the West Coast, said Allen Rosen-

AA builds up staff in Detroit, Chicago

R. Serafin

P. Strnad

S. Stern

CHICAGO—Raymond Serafin has joined ADVERTISING AGE as a reporter in the Detroit bureau. He previously was a columnist for the *Daily Tribune*, Royal Oak, Mich., a Detroit-area newspaper.

In 11 years at the *Tribune*, Mr. Serafin also served as entertainment editor and a reporter covering politics, police, education and government.

He was graduated cum laude from the University of Notre Dame in 1970 with a bachelor's degree in communication arts.

Also in the Detroit bureau, Patricia Strnad has been promoted to reporter from editorial assistant. Ms. Strnad joined AA last year from Maritz Communications Co., Southfield, Mich. She was graduated Phi Beta Kappa from Wayne State University 1983 with a bachelor's degree in English literature.

In AA's Chicago office, Sara E. Stern has joined as an editorial assistant.

Ms. Stern most recently was a creative assistant at Tatham-Laird & Kudner. She is a 1984 graduate of Syracuse University.#

OUR RATINGS ADD UP TO MORE THAN JUST NUMBERS.

They add up to better advertising decisions for agencies and their clients. Because at Arbitron Ratings, we're constantly developing the most advanced methods of putting the ratings to work for you and your clients.

For audience profiles closer to home you'd have to live there.
Product Target AID℠ designs an ideal commercial schedule for the advertiser, agency, and television station. You use an IBM® XT to match the lifestyle profiles of the viewers in a market with the lifestyle profiles of proven users for 600 heavily advertised products and services.

Catch the trends before they catch you by surprise.
Arbitrends℠ delivers a radio market report from our computer to yours. All you do is pick up the phone, turn on your IBM XT and you're ready to keep an eye on audience trends. These computer delivered reports give you an advance picture of a market, allowing you to make timely adjustments in advertising. The user selectable report formats let you pick the demographics, dayparts and estimates you need to study. The computer does the work of turning the numbers into useful information.

One number that puts you in touch with your markets.
At Arbitron Ratings, we give you more than just numbers. So call us today and see how we can help you identify your advertising targets and reach them more efficiently. Arbitron Ratings—we define broadcast audiences like never before. Contact your Arbitron Ratings Representative.

Ad Age revises monthly Flash Report

NEW YORK—ADVERTISING AGE has revised its monthly Flash Report of Newspaper Advertising Investments to more accurately reflect the spending patterns of the industry's largest advertisers.

The changes are effective with the report covering last January's spending. The reports are prepared by Media Records Inc., based on actual measurements of ads in 29 daily and 23 Sunday newspapers in 15 major markets: Atlanta, Baltimore, Boston, Cincinnati, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, New York, Philadelphia, San Francisco, Washington, D.C. and Youngstown, O.

Seven new categories

Seven new categories, two each in the national and financial classifications and three in the retail classification, have replaced seven categories that in recent years had shown little or relatively minor spending activity in newspapers.

The new national categories are: Computers, equipment and services, including marketers of hardware, software, system peripherals and services, and public service utilities and communications, including telephone companies, public electric and gas utilities and providers of long-distance telecommunications services.

The new financial categories: Banks and trust companies and Stock, bond and investment houses.

The new retail categories are: Amusements, including movie and entertainment advertisers; computer stores and supplies, and general merchandise stores, a category that includes several of the nation's largest retailers.

The seven categories no longer covered are: Coffee and tea; beverages: Soft drinks, diet and nondiet; soaps, cleansers and polishes; cough, cold and sinus remedies; headache remedies and sedatives; sporting and leisure time equipment, and cosmetics, make-up and manicure products.

Gains in 14 of 16

Advertiser investments in the measured markets increased in 14 of 16 categories in January from the same month last year, with food stores, new passenger cars and radio-tv-phonographs-records retailers leading in dollar increases.

The food store category rose 21.1% to $27.03 million; passenger cars-new grew 33.3% to $13.81 million, and radio-tv-phonographs-records increased 28.1% to $13.91 million. Among the largest gainers were alcoholic beverages, up 63.3% to $643,278, and computers, equipment and services, up 58.8% to $2.86 million.

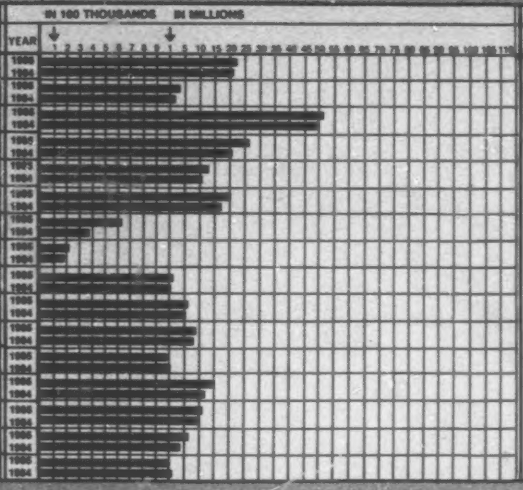
Computer stores and supplies, in the retail category, was up 28.7% to $4.3 million.

Among the other national classifications, cameras-photo supplies and services rose 15.8% to $222,936; public service utilities and communications rose 2.6% to $5.53 million; publishing and media rose 11.5% to $9.3 million, and airlines rose 22.5% to $15.2 million. The only declining category in the national class was cigarets, off 32.7% to $4.3 million.

Among the retail classifications, amusements gained 6.4% to $23.5 million; department stores gained 2.8% to $52.3 million, and general merchandise stores gained 15.3% to nearly $21 million.

In the financial categories, banks and trust companies increased 34.9% to $6.6 million, and stock, bond and investment houses, the other January decliner, fell 32.7% to $1.3 million.#

FLASH REPORT: Newspaper advertising investment for January



January 1985 CATEGORIES	YEAR	DOLLARS 1985	DOLLARS 1984	CHANGE ACTUAL $ G OR L	CHANGE % G OR L

Audit Bureau scraps Zip rule

By WILLIAM F. GLOEDE

The Audit Bureau of Circulations' board of directors quietly has dropped a rule that would have required newspapers to report circulation by Zip code areas.

The board also voted to waive temporarily its prohibition against same-day promotion of the value of all cents-off coupons in a newspaper.

The Zip code rule, which would have taken effect next spring, was opposed fiercely by ABC's newspaper industry members. It was the subject of an unusually harsh debate, most recently during the ABC's annual meeting (AA, Nov. 5).

Newspaper publishers contended reporting circulation by the Zip code in which a paper was delivered would pose serious and costly administrative problems, and that the ABC never had devised an acceptable method of reporting single-copy sales by Zip codes.

The publishers argued that simply reporting a sale in the Zip code where the paper was purchased would not reflect accurately where the reader lived, thereby reporting sales of papers being taken to upscale areas as sales to readers in downtown, urban areas.

Large metropolitan dailies particularly were concerned with the Zip code rule, because they traditionally have large street sales. They feared an unrealistic portion of their circulation would be reported in city zones.

They also were apprehensive that their household coverage within suburban Zip codes with demographics attractive to advertisers would compare unfavorably with smaller, suburban dailies, circulation of which is concentrated in these communities.

Lifting the prohibition on the coupon promotion will enable the newspaper industry to test the effects of such promotion on circulation, coupon redemption rates, product movement and, indirectly, misredemption.

The test is to be conducted next month in four paired markets.

One of the test pairs is Louisville, Ky. (*Courier-Journal* and *Louisville Times*) and Raleigh, N.C. (*Raleigh News & Observer* and *Raleigh Times*).

The other is two Florida cities, Orlando (*Orlando Sentinel* and *Florida Times-Union*) and Jacksonville (*Jacksonville Journal*).

The test will be monitored by the ABC, the Newspaper Advertising Bureau, New York, and the American Newspaper Publishers Assn., Reston, Va.

The industry hopes to convince ABC's advertiser members that same-day promotion of coupon values will increase newspaper circulation, but not redemption or misredemption rates.#

Y&R passes Dentsu as top shop

By DENNIS CHASE

Young & Rubicam supplanted Dentsu as the biggest advertising agency in the world—a position Dentsu has held since 1973.

According to ADVERTISING AGE's annual Foreign Agency Income survey of 892 agencies in 72 countries, in 1984 Y&R's gross income, measured in U.S. dollars, rose to $480.1 million, or 16% more than 1983. The agency's billings rose to $3.2 billion during that period.

Dentsu's gross income, also measured in U.S. dollars, rose to $468.4 million, or 6% more than 1983, while its billings rose to $3.48 billion.

Gross income for all agencies in the survey reached $4.34 billion, or 17% more than 1983, when 895 agencies reported their results.

One reason Y&R was able to usurp the No. 1 position was a strong U.S. dollar compared with other currencies, particularly the Japanese yen.

Because of the strong dollar, Y&R has been cutting into Dentsu's lead for several years.

If Dentsu's and Y&R's gross income this year had been restated at the 1981 exchange rate, Dentsu would have retained its No. 1 position.

However, observers point out that when Dentsu nudged aside J. Walter Thompson Co. as the largest agency in the world in 1973, it benefited from a strong yen relative to the U.S. dollar.

Dentsu also may have suffered because its gross income was calculated as 13.5% of its over-all billings, while Y&R uses a higher percentage—15%—to calculate gross income from billings. Y&R executives say income figures come first, not billings, which are capitalized. Dentsu remains the worldwide billings leader.

Both Y&R and Dentsu benefited from the strong showing of their 50-50 joint venture, DYR Worldwide. With $36.9 million in 1984 gross income, compared with $29.4 million in 1983, DYR ranked No. 41. It did not make the top-50 ranking in 1983.

The DYR venture helped Y&R grow faster in Asia than in Europe. In the U.K., Y&R fell from No. 4 in 1983 to No. 8 in 1984; in Germany, from No. 5 to No. 7; in Italy, from No. 3 to No. 5, and in Switzerland, from No. 1 to No. 7.

Part of this tumble is attributed to the removal of the Marsteller agencies from Y&R's totals in each of those countries, because Marsteller has become part of HCM—a joint venture with Havas Conseil in France and Y&R's Marsteller. HCM's financial totals will be included in Y&R's over-all totals next year.

In other changes, McCann-Erickson fell from No. 6 to No. 8 in the world, and was overtaken by BBDO and Saatchi & Saatchi Compton Worldwide. Ogilvy & Mather moved from No. 5 to No. 4.

Those agencies which have most of their business in the U.S. suffered less because of the strong U.S. dollar than those which have big international businesses.

Agencies with heavy overseas billings sustained a double whammy because growth in U.S. advertising—like the U.S. economy—is outstripping foreign growth.

In a separate AD AGE questionnaire, agencies were asked to pinpoint problems in their markets:

- In Japan, taxes on advertising continue to be the major worry of Japanese agencies.
- In France, the major change expected this year is the growth in private commercial tv.
- In the U.K., inflation and its impact on salaries and media costs is widely viewed as a problem. Also, the growth of independent media-placement companies and erosion of the full-service concept are putting pressure on the commission system there.
- In Germany, some agencies believe growing unemployment and the demand for a 35-hour work week will inhibit the advertising business this year.
- In South Africa, a possible increase in the general sales tax, inflation and the falling value of the rand are cited as problems. Also, marketers with exportable products are positioned better than purely domestic marketers, agencies say.
- In Australia, restrictions on advertising of cigarets, alcoholic beverages, automobiles and advertising to children are cited as problems, along with global campaigns that take business from local agencies.#

Mr. Chase is the international editor of ADVERTISING AGE.

1973 Rankings

1. Dentsu Advertising
2. J. Walter Thompson Co.
3. McCann-Erickson
4. Young & Rubicam Intl.

*With Argentinian agencies, AA altered its procedure of determing an agency's "real growth" (applying 1984 exchange rate to 1983 returns) because it primarily shows the impact of inflation in that economy. Dollar figures for 1983 are based on the average annual exchange rate for that year.

Notes to individual listings

GENERAL

- **Young & Rubicam** does not report billings. Figures listed for Y&R billings throughout the charts are AA estimates.
- **Dorland Advertising**, part of the Saatchi & Saatchi Compton Worldwide network, has not yet finalized the terms of the equity buyout of DFS International's European agency network, and therefore the agencies in the network still are referred to as being part of DFS Intl.

ARGENTINA

Ortiz, Scopesi y Cia. part of Ogilvy & Mather Intl.

David Ratto part of BBDO Intl.

Lautrec Publicidad part of DFS Intl.

AUSTRALIA

George Patterson part of Ted Bates Worldwide.

Clemenger Australia part of BBDO Intl.

Monahan Dayman Adams Group consists of offices in Victoria, New South Wales, Western Australia, two in New Zealand, one in Tasmania and Singapore. Also, MDA Mattingly, MDA Direct, MDA Recruitment, Yardley Logan, MDA Maher, Chandler Hambleton Mier and Foster Nunn Loveder.

Young & Rubicam figures include Burson-Marsteller.

Saatchi & Saatchi Compton formerly Gough Waterhouse.

Neville Jeffress Advertising 1983 gross income AA estimate.

Forbes, Macfie, Hansen 1983 gross income AA estimate.

The Campaign Palace is 25% owned by George Patterson. Gross income figures are AA estimates.

The Weston Co. part of Fortune Communications Holdings.

William Roberts Advertising 1984 gross income and figures for 1983 AA estimates.

Magnus Nankervis & Curl part of BBDO Intl.

Pope & Kiernan & Black part of Kenyon & Eckhardt Intl.

Hammond Advertising part of Fortune Communications Holdings.

Scali, McCabe, Sloves part of Ogilvy & Mather.

DYR Ltd. incorporated November, 1984.

AUSTRIA

Team Austria part of BBDO Intl.

Dorland Advertising part of Dorland/-DFS Intl.

Marketing Studio/FCB formerly NCK/-Austria.

Dr. Kossdorf & Partner part of Needham Harper Worldwide.

*With Brazilian agencies, AA altered its procedure of determining an agency's "real growth" (applying 1984 exchange rate to 1983 returns) because it primarily shows the impact of inflation in that economy. Dollar figures for 1983 are based on the average annual exchange rate for that year.

"Of course I'm sure, I read it in Business Week International."

Marisa Bellisario
Chief Executive
Italtel Societa
Italiana Telecomunicazioni

Marisa Bellisario is the chief executive of Italy's largest telecommunications manufacturing company. And no one knows better than she that no matter what a company's national origin, it has to be international in outlook to prosper.

In just the last three years, she has explored partnerships with companies in the U.S., Japan and France as well as her native Italy.

That's why she and thousands of other top executives worldwide use Business Week International as a source of accurate information, expert interpretation and unique insight on the fast-changing world of international business.

And why both our readers and our advertisers agree that one authoritative voice stands out clearly above the din of worldwide business news.

Business Week International.

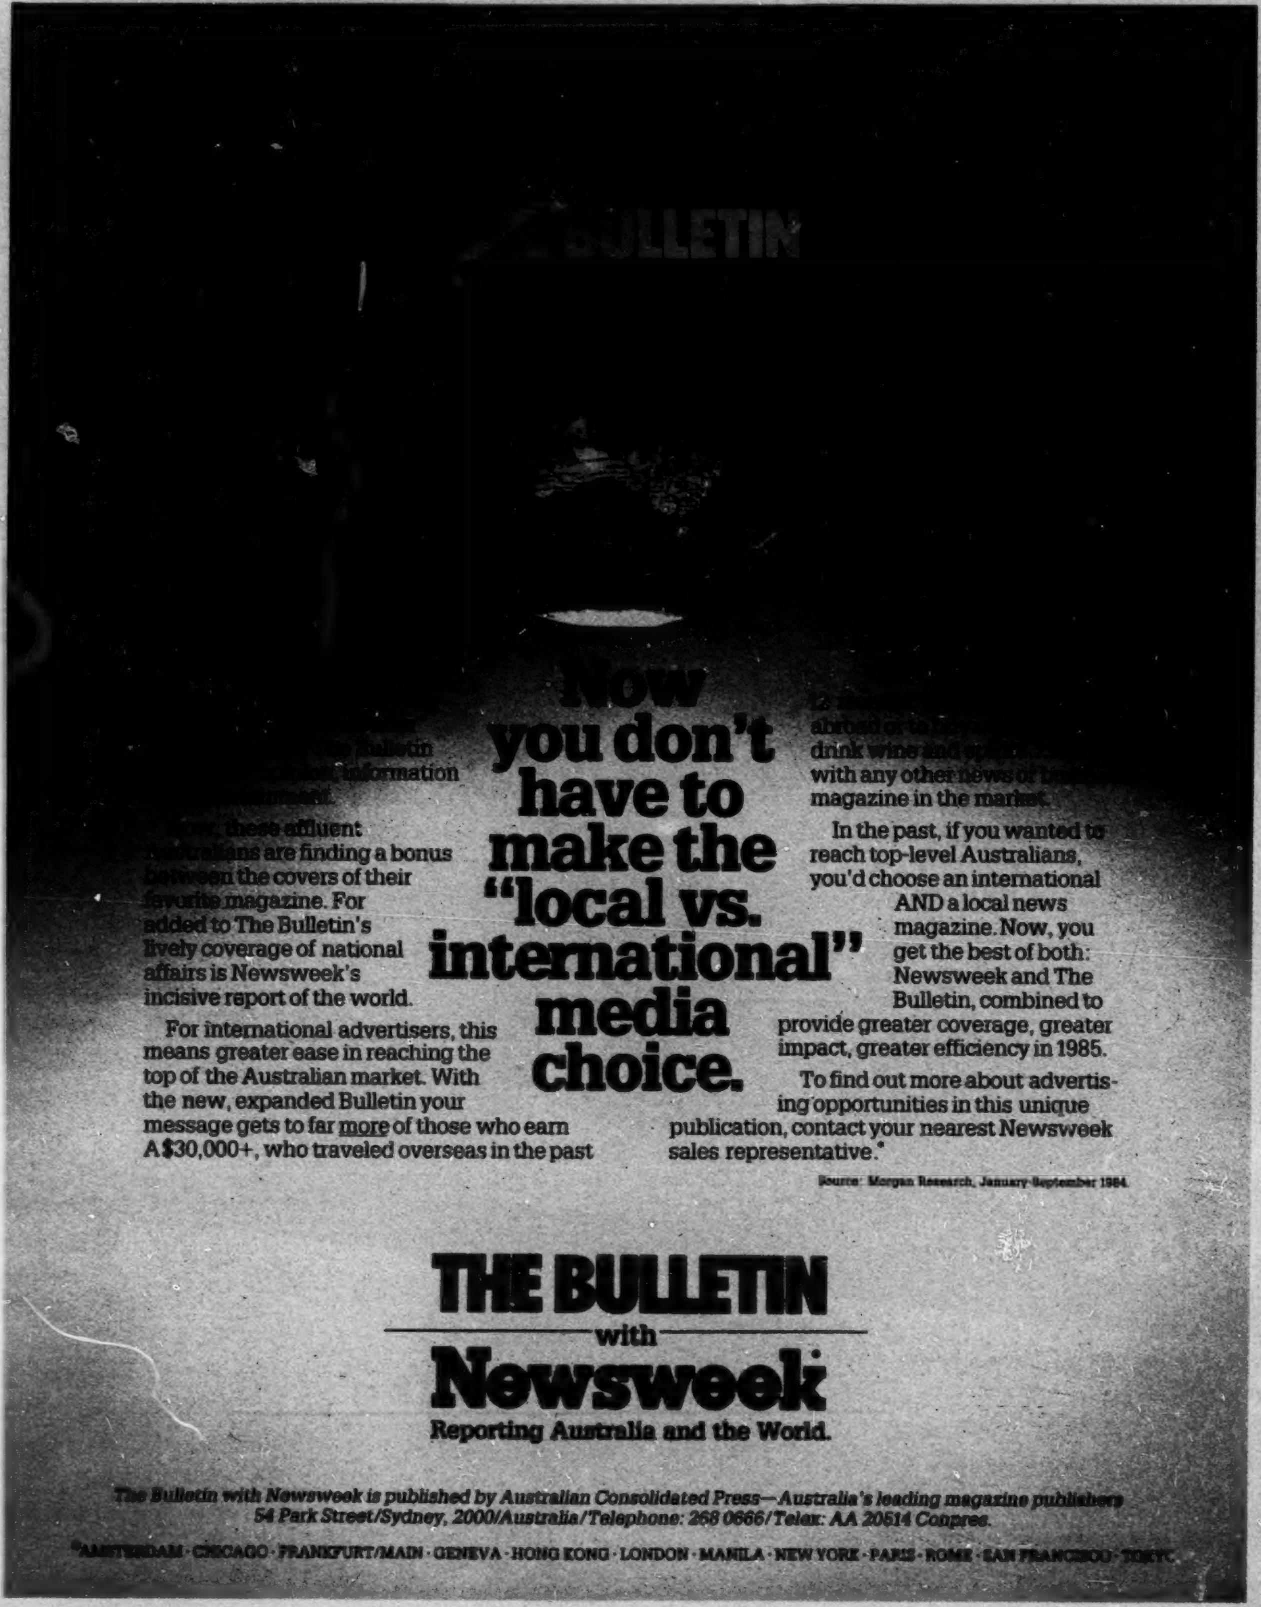
Promedia part of the Publicis International network.
Bergenholz & Arnesen part of DFS Intl.
Egeberg:Denmark part of Lintas:Denmark since 1984.
Berg & Lyhne Reklamebureau member of Affiliated Advertising Agencies Intl. Gross income for 1984 and 1983

(Continued on Page 68)



Now you don't have to make the "local vs. international" media choice.

[illegible] The Bulletin [illegible] information [illegible].

Now, these affluent Australians are finding a bonus between the covers of their favorite magazine. For added to The Bulletin's lively coverage of national affairs is Newsweek's incisive report of the world.

For international advertisers, this means greater ease in reaching the top of the Australian market. With the new, expanded Bulletin your message gets to far more of those who earn A$30,000+, who traveled overseas in the past 12 [illegible] abroad or ta[illegible] drink wine and sp[illegible] with any other news or b[illegible] magazine in the market.

In the past, if you wanted to reach top-level Australians, you'd choose an international AND a local news magazine. Now, you get the best of both: Newsweek and The Bulletin, combined to provide greater coverage, greater impact, greater efficiency in 1985.

To find out more about advertising opportunities in this unique publication, contact your nearest Newsweek sales representative.*

Notes

(Continued from Page 65)

is AA estimate.

DOMINICAN REPUBLIC

Publicidad Siboney part of Foote, Cone & Belding Inc.

ECUADOR

Publicidad Artefilme part of Foote, Cone & Belding Inc.

EGYPT

Americana Advertising gross income for 1984 and 1983 is AA estimate.

FINLAND

Turkama & Kumppanit affiliated with Benton & Bowles.
Oy Mainos Taucher Reklam 1984 gross income figures are estimates.
Mainosrengas Oy 1984 gross income figures are AA estimates.
Tehomainos Advertising 1984 gross income figures are AA estimates.
Oy AC-mainos part of DFS Intl.
Oy Interplan 1984 gross income figures are AA estimates.
Topitorma associated with the Publicis international agency network.
Creator Oy 1984 gross income figures are AA estimates.
Markkinamainos Oy gross income figures for both years are AA estimates.
Mainos H&K Oy gross income figures for both years are AA estimates.

FRANCE

Publicis Conseil includes figures for B.C.A., Beverly-Markagri, De Bonneville Orlandini, C.L.V., Edico, Media-System, Mundoprint Topologies, Orexa, Oscar Intermarco, Projectis, Siquier Courcelle and Success.
HCM France is the result of the merger of Marsteller Inc. with Havas Conseil, EUROCOM's lead agency, in September, 1984. The large difference between 1984 and 1983 figures is the result of the acquisition by HCM in 1984 of the Polaris regional network, with offices in Lyon, Lille, Bordeaux, Strasbourg, Toulouse, etc. In 1983 this regional network came under the business responsibility of Futurs Groupe, another EUROCOM group.
Belier Group consists of Belier Conseil, Alice, Taurus, INF.14, Business, Bombe, Stratege, five specialized and five provincial agencies and Promostyl. Belier has an affiliation agreement with Foote, Cone & Belding.
Roux Seguela Cayzac & Goudard figures include Racines, Chevassus Vadon, Glad, Seven, and Motivente.
Young & Rubicam France totals include figures for Wunderman, Cato-Johnson, Sudler & Hennessey and Burson-Marsteller.
Boulet Dru Dupuy Petit opened in May, 1984.
EUROCOM Group includes Futurs Groupe, Bazaine, Fusion, Unicom, Capricorn, Publi-Est, Uniconseil, D-10, Eldorado, Novation, O.P.F., Campagnes and Optima.

*With Israeli agencies, AA altered its procedure of determining an agency's "real growth" (applying 1984 exchange rate to 1983 returns) because it primarily shows the impact of inflation in that economy. Dollar figures for 1983 are based on the average annual exchange rate for that year.

Makkah
SAUDI GAZETTE
balanced at SR200b
King Fahd reviews

Saudi Arabia is probably the fastest growing economy in the World. In the past 10 years, more industries and companies, schools and universities, houses and institutions have been developed in Saudi Arabia than anywhere else in the World.

Saudi Arabia is now poised to face the challenges of the future

The **Saudi Gazette** is Saudi Arabia's prime English language newspaper, and has developed as fast as the country itself.

The SAUDI GAZETTE reflects the changing society it reports

With an English language circulation of more than 35,000 copies' daily, to an educated, interested, and authoritative readership of Saudi and English speaking businessmen; The Saudi Gazette gives unmatched coverage and penetration to one of the most important and dynamic market places in the World.

BUY THE SAUDI GAZETTE AND SELL

How 12 global ad agencies rank around the world

Note: this table makes no distinction between a wholly-owned subsidiary, a joint venture or any other legal arrangement that an agency may have with a host nation. It shows how selected agencies rank by gross income within the national advertising industry.

Atari

(Continued from Page 4)

buying in the fourth quarter of last year. (For the entire year, Commodore ranked second behind Apple based on dollars spent.)

Mr. Tramiel gained further advantage after joining Atari by taking the company private, slipping out of the spotlight that has followed most of the larger computer companies through their most difficult times. Without public scrutiny of his books, observers and competitors can only speculate about the health of the "new" Atari.

The company began life in 1972 as a coin-operated videogame manufacturer, and by 1981 accounted for about 70% of the burgeoning, $1.1 billion videogame industry. When the "game over" sign flashed for that industry, Atari graduated to home computers but never regained its former position; when Mr. Tramiel took over in July, Atari was the cinder of a falling star. The company that once generated annual profits of more than $200 million was losing about $4 million a week.

Pruning at the "campus"

The staff size now is stable at around 205 people, down from the approximately 1,200 on staff before Mr. Tramiel began cutting overhead and personnel. The new Atari "campus" in Silicon Valley is comprised of five buildings, down from 25. Mr. Tramiel also pruned Atari's existing lines, narrowing the company's products to two models: The 800XL home computer and the 2600 videogame player. His actions apparently succeeded. Today, Atari is operating at a small profit, according to James Copland, Atari vp-marketing.

At the same time, Atari began charting its future by developing two new lines of computers designed to carry the company into the next generation of technology.

The XE line, offering what has become a small-potatoes memory of 64 kilobytes, uses the same 8-bit microprocessor technology employed by the original Apple II, Commodore's Vic-20, the Commodore 64 and Atari's own 800XL. Atari will price the XE line at less than $100, tapping the lowest end of the home-computer market.

"We realize there is a definite retreat from the 64K market and at this point in time, that's the only baby we've got," Mr. Copland said almost cavalierly during a recent interview in his cluttered office. "The XE line is as important as the consumer wants it to be. If the consumer doesn't want an XE product, we won't have an XE product out for very long."

Atari began shipping the XE line last month with little fanfare and no advertising. Mr. Copland discounted the importance of advertising during the first half of the year, traditionally a slow period for home-computer sales.

Higher stakes with ST

The company's forthcoming ST line of computers, however, represents a different story—and higher stakes.

"If the consumer doesn't want an ST version, I don't believe there's a personal computer market," declared Mr. Copland, who headed Commodore's operation in his native Canada and helped establish Commodore as the best-selling computer there.

The ST, nicknamed "Jackintosh" by the industry, is Atari's effort to match Apple's sophisticated Macintosh computer. Atari plans to offer the machine in two configurations, differing only in the amount of memory each model carries. Model 130ST, featuring 128K of memory, and Model 520ST, with 512K, mimic the two basic Macintosh configurations. In addition, the ST computers borrow some of the innovations incorporated in the Mac, such as icons or on-screen picture messages and the optional "mouse" pointing device, which is used instead of the traditional keyboard.

There the supposed similarities end, and Mr. Tramiel begins. He will price the ST at less than $800. Apple's Mac sells for $2,195 to $2,795.

The next round of home-computer battles is not expected until the last quarter of the year, when consumers buy a disproportionate number of home computers. Market researcher Future Computing, Richardson, Tex., estimates that 39% of all home-computer sales in 1984 were in the final quarter.

That's the fight Atari is girding for. By then, the company expects to have its manufacturing and distribution operations in place, and Mr. Tramiel will put his price-driven marketing plans to the test by trying to cloud Apple's highly polished shine.

"When we go out with our ST machine for $779 at retail, we'll ask Apple to justify how they can go out and sell their machine for $4,000," Mr. Copland said. (Apple's so-called Fat Mac, a Macintosh with 512 kilobytes of memory, lists at $2,795, but add-ons can increase the price.)

Mr. Copland said 10% of gross sales will be devoted to advertising, with the majority of ad dollars going to tv. "We start from zero dollars and work up, versus [telling an agency] 'Here's a million [dollar] budget—can you do it?' "

Atari's product ads will carry simple variations on the company's internally developed "Power without the price" slogan. However, the ads also will be called upon for a much tougher task: Selling Atari as a financially stable operation in an unstable market. Since Coleco abandoned the home-computer market early this year and, more recently, IBM ceased production of its PCjr, consumers may be unwilling to purchase a computer, regardless of its price/performance value, from a financially struggling company.

Big job for small agency

The job of selling both the company and its products falls to Goodby, Berlin & Silverstein, a small San Francisco creative shop founded less than two years ago by Ogilvy & Mather alumni (AA, Feb. 18).

Atari surprised no one with its choice of a small agency ($8 million in billings) to handle what it says will be a $100 million account. Both the old Atari and Mr. Tramiel, while at Commodore, clashed with major New York agencies over creative direction and payment, and few full-service agencies expressed interest in pitching the new Atari account unless Mr. Tramiel would agree to sign an irrevocable letter of credit.

Although all other Atari computers will be sold through mass merchandisers, the company plans to sell its top-of-the-line ST models through computer dealers. Customers of the higher-price 520ST, the company believes, will be more likely than other consumers to purchase an entire system, including extra disc drives, printers, monitors and telecommunications equipment. This kind of buy calls for more personal sales attention than a mass merchandiser is likely to offer and the dealer network will be necessary.

But here, Mr. Tramiel's past may haunt him.

Mr. Tramiel revolutionized the home-computer market when he took Commodore in precisely the opposite direction, broadening the company's distribution channels to include mass merchandisers. By doing so, he angered many dealers who carried Commodore computers but could not afford to compete against the low margins on which mass merchants thrive. The experience could hinder Atari's efforts to find receptive dealers, especially at a time when even full-service computer dealers are feeling the pinch of slow sales.

Mr. Copland conceded that dealer reaction has been "mixed" to date. He added, however, that several dealers have collected deposits from potential customers for the unreleased ST line, and several cut-rate mail-order houses already are including the new Atari lines in their catalogs.

The sophisticated nature of the ST may pose yet another problem for Mr. Tramiel's born-again Atari: A perceived lack of software. Even though more than 400 Mac programs exist, the same perception stalks Apple's Macintosh, a situation not helped by Lotus Development Co.'s apparent delays in bringing to market its long-heralded Jazz multifunctional software package for the Mac (AA, March 25). And unlike Atari, Apple has curried the support of independent software developers.

Hope from Spinnaker

But there may be hope for Atari from at least one source. Spinnaker Software, Cambridge, Mass., now is converting some of its best-selling software to the ST operating system and said it expects to demonstrate its ST-compatible software during the summer Consumer Electronics Show in June. It will begin shipping in August.

Spinnaker president William Bowman believes Atari's ST line will allow software publishers to create much more powerful programs.

"The frustration for home software developers has been the need to tame programs down [because of the machines' limited capabilities]," he said. "The ST has warped us [developers of home-computer software] into a new world. Now we have to take advantage of the new power."

What are Atari's chances for success? Apple declined to comment, but a source at Commodore was less reticent—predicting that Atari will file for bankruptcy before the end of the year. "Atari going out of business will be a benefit to the industry," he said, noting that a period of price stability will follow. Atari's biggest problem, according to the source, will be financing the operation and locating a market for its machines.

Nevertheless, Mr. Tramiel may be a hard man to count out. He is, after all, the survivor of many wars.#

Dial's promotion dunked by Salton

By JULIE FRANZ

North Chicago, Ill.—Salton Corp., marketer of Wet Tunes waterproof radios, is confident it one day will be singing "Aren't you glad you sued Dial," says its president, Al Finesman.

Salton sued Armour-Dial, Phoenix, for patent infringement after the soap marketer began a promotion offering a waterproof radio for $12.95 and three Dial wrappers.

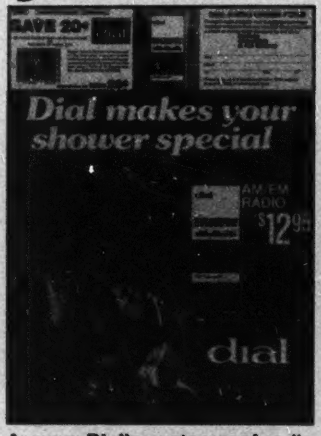
The offer, via freestanding inserts in newspapers April 7, went to 47 million consumers. Point-of-purchase displays also pushed the offer. The promotion was designed in-house.

Salton filed suit April 8, charging Armour-Dial with patent infringement and unfair competition. The damages Salton seeks will be set when the company determines how many radios Armour-Dial shipped, how many orders Salton may lose due to the offer and other factors, said Ronald A. Sandler, partner, Epton, Mullin & Druth Ltd, Salton's Chicago law firm.

Salton won an injunction stopping Armour-Dial from shipping more radios or placing promotional ads until a hearing April 22.

A spokeswoman for Armour-Dial wouldn't say where it's getting the radios or comment on the suit.

Once the supplier is known, Salton said, it may sue that company as well.



Armour-Dial's waterproof-radio promotion, via freestanding newspaper inserts, has landed the soap marketer in court. Salton Corp. contends that Dial violated patent law by offering a waterproof radio by a different maker.

Salton already has successfully filed suit against six importers of waterproof radios, Mr. Sandler said.

Salton has sold 350,000 waterproof Wet Tunes since last May. The line has three items: The original Wet Tunes, selling for $24 to $30; a stepped-up version with a built-in digital clock for $34, and the Beachcomber, a $59 model with built-in cassette tape player, storage compartment and tan timer all in a scuba-yellow, water-resistant case. The company expects to sell 750,000 units this year, Mr. Finesman said.

Salton concentrates on co-op advertising with department stores. Its ads are produced in-house.#

Gurrier moves office

Hampton, N.H.—The Gurrier Co., an agency specializing in banking, industrial and high-tech accounts, has moved its offices to 1 Park Ave., P.O. Box 788, 03842.

Survey bad raps media

WASHINGTON—Newspaper editors and reporters rank below their tv counterparts, but ahead of advertising executives and used-car salesmen, according to a new survey dealing with media credibility.

Commissioned by the American Society of Newspaper Editors and released during the group's annual meeting here recently, the nationwide survey said both newspapers and tv have credibility problems. Many people choose tv news over daily newspapers for many areas of coverage. Local news is an exception.

In talking to focus groups in five cities and analyzing responses to questionnaires from more than 1,000 persons, the survey sought to rate the "honesty and standards" of members of several professions.

Members of the clergy got the highest mark, with 53% of those responding giving them a "high" rating.

Doctors received 48%, police 41%, tv anchors 40%, public school teachers 39% and tv reporters 28%.

Newspaper editors were scored 27% in the "high" classification, followed by newspaper reporters with 18%, advertising executives 12% and used-car salesmen at the bottom with 3%.

Asked about "opinions" expressed in several sections of the daily newspaper, the survey revealed that 24% of readers would like to see more opinion in paid advertisements, 62% thought the degree of opinion in ads was about right and 14% would like to see less. Fifty-two per cent of readers surveyed wanted more opinion on the editorial page, 31% felt the same about the sports pages but only 23% wanted more opinion on the front page.

One respondent among the 39% who believed advertisers influence daily newspapers said, "They [newspapers] make a profit from advertising, and the people who advertise are not people like me who are working for $10 an hour. They're people who are taking out $100,000 in advertising.

"And if there's anyone who we [the newspapers] don't want to make mad," he added, "it's somebody who's taking out $100,000 in advertising."

Media Opinion Research, Minneapolis, conducted the survey for ASNE. Single copies are available for $6.50 from ASNE, P.O. Box 17004, 20041.#

NCS roots around for more shoppers

By JENNIFER LAWRENCE

HOUSTON—National Convenience Stores, owner and operator of more than 1,100 convenience stores, mainly under the Stop N Go name, is going whole hog in a major new advertising effort that mirrors the company's strategy to promote fast-foods.

Last week NCS launched a 30-second tv spot in major Texas markets and Las Vegas featuring Sorrell Booke, better known as Boss Hogg in the "Dukes of Hazzard" tv show now in syndication, swilling down Stop N Go's branded 46-oz. drink called the "Hawg."

Besides this "Boss compares" spot, which is the first time NCS has used tv, the new campaign introduced the company's "neighborstore" positioning in a 60-second radio spot that will be used consistently in key markets throughout the year. A jingle with the theme "We're neighbors—We're Stop N Go" debuted and will be used in all broadcast spots.

The neighborstore spot backs up NCS' new logo, new store design and shift in product mix.

The spring campaign marks the beginning of NCS' greater commitment to advertising, according to Bob Landsdowne, president of GSD&M/Houston, which handles the account.

He noted that initial advertising begins with product ads and positioning, while later ads will be directed toward women to help broaden Stop N Go's customer base.

Although budget was not disclosed, Jerry Welch, NCS senior vp-stores, last fall said he expected the annual ad budget to double to $8 million in the coming fiscal year (AA, Dec. 3).

Dave Mitchener, NCS corporate director of marketing/merchandising, said store sales are expected to increase by 10% by yearend as a result of the new ad push, which also includes direct mail, outdoor and point-of-purchase.

NCS' sales volume of $819 million for fiscal 1984, ending last June 30, places the retailer third in the $28.3 billion industry, behind Dallas-based Southland Corp.'s 7-Eleven chain and Phoenix-based Circle K Corp. NCS operates in 11 Sunbelt states.

In the first wave of product spots, which feature Mr. Booke in both tv and radio, the 46-oz. Hawg soft drink at 99¢ is compared to two 22-oz. McDonald's drinks selling for about $1.40. Besides the cost advantage, Mr. Booke is told the Hawg comes in a reusable plastic container shown with its design of the sporty pig known as the Hawg.

While Mr. Booke does not actually play the part of Boss Hogg, a copyrighted character, the radio and tv spots play off recognition of Mr. Booke as Boss. The humorous spots are intended to inject "some fun," since Mr. Booke is cast in the unlikely role of a serious thirsty jogger, according to Mr. Mitchener, who added the spots promote the value and convenience of buying the Hawg as the soft-drink season gets under way.

The next wave, to air in May, also will feature Mr. Booke in spots that focus on the fast-food segment of the business, while a third wave will be a combination of the first two spots. The campaign will shift gears in summer with other talent while neighborstore spots continue. Specific plans were not disclosed.#

Your G od Neighb Store

New tv spots for Stop N Go stores play on the popularity of Sorrell Booke, who played Boss Hogg in the "Dukes of Hazzard." Mr. Booke is featured as a jogger who quenches his thirst with the chain's branded 46-oz. drink called the "Hawg." GSD&M/Houston handles the account.

Otc products key drug ad spending

By JULIE FRANZ

CHICAGO—Ad agencies looking for new prescription-drug advertising dollars should look instead to drug substances given the government's green light for over-the-counter sales, said speakers at an industry meeting here April 11.

While the Food & Drug Administration has approved only 34 prescription-drug ingredients for over-the-counter use in the last five years, these ingredients are found today in literally hundreds of brand-name otc drugs, according to the Proprietary Assn., the industry's trade group in Washington.

As the number of approved ingredients rises, so competition and the need for advertising rise also, industry sources said.

Sales of otc drugs rose to $7 billion in 1983 (the last year for which figures are available) from $5 billion in 1980. Drug advertising that year was $1.4 billion, industry sources said.

While prescription-drug marketers still are not likely to begin advertising directly to consumers, they do need to change the way they reach physicians, according to William Castagnoli, Medicus Intercon International, New York, a Benton & Bowles company, who addressed the Midwest Pharmaceutical Advertising Council meeting.

Physicians have created a comfortable liability buffer between manufacturers and consumers. Manufacturers' drug-accident liability would increase dramatically if that buffer were removed, he said.

Successful prescription-drug ads should show physicians how a drug will improve their practices as they face mounting pressures from the government, hospitals, third-party payers and patients to reduce costs, Mr. Castagnoli explained.

Prescription drugs that truly reduce costs as opposed to other drugs or advanced medical procedures should trumpet those claims, he said. A drug with fewer side effects can reduce the length of a patient's hospital stay, not to mention patient complaints.#

Highest-paid public-agency execs, 1984

The six top-paid executives at BBDO International last year each earned more than $500,000 in cash compensation, putting them among the 25 best-paid public-ad-agency execs. Source: Advertising Age, agency proxy statements.

Executive	Agency	Title	Cash Compensation
1. Edward Meyer[1]	Grey Advertising	chairman	876,802[1]
2. Philip Geier	Interpublic	chairman	860,513
3. Bruce Crawford	BBDO	chairman[2]	783,750
4. Charles Goldschmidt	Mickelberry's Laurence, Charles & Free	chairman	706,000
5. Don Johnston	JWT Group	chairman	628,906
6. Allen Rosenshine	BBDO	president[2]	645,000
7. Steve Kahler	BBDO	exec vp (chairman, Doremus)	576,000
8. Willi Schalk	BBDO	exec vp (president, int'l)	532,500
9. Denis Lanigan	JWT Group	vice-chairman	532,394
10. William Phillips	Ogilvy	chairman	529,300
11. Tom Clark	BBDO	president (BBDO Inc.)	516,250
12. Phil Dusenberry	BBDO	vice-chairman (BBDO Inc.)	516,250
13. Norman Brown	Foote, Cone & Belding	president	490,000
14. Norman Berry	Ogilvy	president (O&M/NY[3])	485,400
15. Kenneth Roman	Ogilvy	president (O&M Worldwide[3])	475,900
16. William Weithas	SSC&B:Lintas	chairman	463,401
17. Michael Ball	Ogilvy	vice-chairman	435,000
18. Graham Phillips	Ogilvy	chairman (O&M/U.S.[3])	399,300
19. Leo-Arthur Kelmenson	Lorimar's Kenyon & Eckhardt	chairman	393,499
20. Barry Loughrane	Doyle Dane Bernbach	president	376,538
21. Roy Grace	Doyle Dane Bernbach	vice-chairman	374,936
22. J. Donald McNamara	Interpublic	president	368,707
23. Eugene Beard	Interpublic	exec vp-finance	361,203
24. Jack Young	Foote, Cone & Belding	president (FCB/East)	335,455
25. Emine Messiqua	Foote, Cone & Belding	president (FCB/Europe)	323,743

[1] Grey's 1985 proxy statement not yet released; figure is from 1983 for Mr. Meyer.

[2] Reflects BBDO compensation for 1984 titles, since changed, when Mr. Crawford was president-ceo and Mr. Rosenshine exec vp/pres. of BBDO Inc. subsidiary

[3] Reflects Ogilvy compensation for 1984 titles, since changed, when Mr. Roman was president of O&M/U.S., Mr. G. Phillips', now president of O&M/U.S. was managing director of O&M/NY while continuing as chief financial officer; and Mr. Berry, now president of O&M/NY, was creative director of O&M/NY while continuing as creative head worldwide.

It pays to run BBDO, Ogilvy

By STEWART ALTER

New York—Being one of the top six at BBDO International or in the top five at Ogilvy Group was the way to get on the list of best-paid public ad agency executives last year.

All but one of the proxy statements for the publicly owned agencies covering 1984 now have been released. The exception is Grey Advertising, but Grey chairman Edward Meyer's 1983 cash compensation of $876,802 tops the 1984 cash compensation of all others in this year's field. Under Mr. Meyer last year, Grey became the 10th-ranked agency (in terms of world gross income), up from 12th in Advertising Age's 1984 ranking of ad agencies.

First place in stock ownership goes to Maurice and Charles Saatchi, each of whom received the relatively low salary of about $215,000 last year. But the company stock each owns is worth about $17.5 million. Not far behind are former BBDO chairman Tom Dillon, Mickelberry Corp. president James Marlas (also relatively low-paid at $190,000 in 1984) and Mr. Meyer.

Most of those listed among the top-paid in the accompanying chart (in which only cash compensation is included) are top officers, top financial officers and top subsidiary officers of the largest ad agencies.

The most obvious exception is Charles Goldschmidt, chairman of the $215 million agency Laurence, Charles & Free, whose $200,000 base salary was supplemented by a $506,000 bonus. Carl Nichols and Anthony Chevins, agency heads at another, even larger Mickelberry shop, Cunningham & Walsh, received $275,000 each and no bonus. Leo-Arthur Kelmenson, who heads Lorimar's Kenyon & Eckhardt, also was one of the top paid agency executives in 1984, receiving $393,499.

Some agency creative chiefs were listed, too, including BBDO's Phil Dusenberry ($516,250), Ogilvy & Mather's Norman Berry ($485,500), and Doyle Dane Bernbach's Roy Grace ($374,936). Michael Tesch, exec vp-associate creative director of Ally & Gargano, also was among that agency's top five most highly compensated executives: He received $216,058, while president Amil Gargano received $292,916.

FCB had the most unusual grouping of the top five, although that was partly explained by a residential expense equalization allowance for FCB/East president Jack Young, who moved from Chicago to New York, and by payments "in lieu of retirement benefits normally payable to U.S. executives" to FCB/Europe president Emine Messiqua.

James Marlas' 35.1% interest in Mickelberry is the largest single chunk owned by any individual in terms of percentage, though not dollars. He owns about $13.3 million of Mickelberry, while Grey's Ed Meyer owns about $13.5 million worth of his shop. Former ceo Tom Dillon owns about $15.4 million worth of BBDO stock at current market value. Other former executives who own valuable stock are DDB's ex-copywriting great Robert Gage, who owns about $6.2 million worth, and co-founder Ned Doyle, whose ownership comes to $4.5 million.

Other active executives with large stock holdings include A&G's Amil Gargano ($3.6 million); FCB's Norman Brown ($2.7 million); Emine Messiqua and chairman John O'Toole (both $1.7 million); JWT's Don Johnston ($1.9 million) and Denis Lanigan ($1.3 million); Ogilvy's Kenneth Roman ($2.1 million) and William Phillips ($1.9 million), and DDB's Joseph Daly, chairman ($1.9 million), Roy Grace ($1.6 million) and Barry Loughrane ($1.2 million).#

Chrysler

(Continued from Page 3)

heading up a new International Business Operations group, charged with finding less expensive auto parts.

Chrysler has been preparing for these moves for months while publicly continuing to battle the General Motors-Toyota joint venture. In an interview with Advertising Age last fall, vice-chairman Gerald Greenwald said Chrysler was "poised for a massive swing" to imported cars and parts (AA, Oct. 1).

Continuing to rail against U.S. trade policy, deficits and antitrust "laxity," Mr. Iacocca harrumphed that the federal government had, in effect, forced Chrysler overseas by not stopping GM's joint venture and import strategy.

Chrysler cleared the way for its own joint venture by settling a long-standing suit against GM and Toyota. GM and Toyota agreed to end active cooperation after eight years instead of 12.

When Chrysler was under orders from the U.S. government to seek merger partners, Mr. Iacocca used to speak of a "Global Motors" big enough to compete with GM head-on. It would combine "Japanese manufacturing, European technology and American marketing know-how" through mergers.

Chrysler talked to French auto maker Peugeot (of which Chrysler owns 15%), West Germany's Volkswagen AG, Mitsubishi and others, including Ford Motor Co. But nothing came of any of it.

Now that Chrysler is healthier, its executives prefer joint ventures or parts purchases over full mergers.

They remember Chrysler's disastrous 1960s global expansion drive, when it tried to match GM and Ford worldwide efforts with thinly financed acquisitions of marginal producers.#

Late Broadcast News

Movie moves mark NBC-TV's May play

New York—**NBC-TV** has switched the air dates for two May movies. "Alfred Hitchcock Presents" advances to May 5 (opposite ABC's "Lace II" opener), and the theatrical "First Blood" settles in May 12 (versus the openers of CBS' "Malice in Wonderland" and ABC's "A Death in California").

New York—**CBS-TV's** latest May sweeps moves include the slating of "Going for the Gold: The Bill Johnson Story" as its May 7 movie. Mr. Johnson is the maverick gold medalist from the 1984 Winter Olympics. That tv movie bumps "The Lady from Yesterday," a General Foods Corp.-sponsored "Golden Showcase" drama, to May 14.

New York—**ABC-TV**, meanwhile, will preempt its Friday series from 9 p.m. to 11 p.m. (ET) May 3 for a repeat of "Dr. No," the first James Bond film starring Sean Connery. ABC's next two-hour "Battle of the Network Stars," taped in Mexico, will air May 23 at 8 p.m.

New York—**ABC Sports'** "Wide World of Sports" on May 18 will focus on 1984 Summer Olympics medalist Carl Lewis, and his pursuit of Bob Beamon's world long-jump record, at the UCLA Invitational Track & Field Meet.

New York—**NBC** is the only tv network to improve in virtually every major category in this season's A.C. Nielsen Co. demographic breakouts (through March 24), compared with last season. Its gains came at the expense of ABC and CBS. NBC on May 2 will be the first of the Big 3 networks to unveil its new fall prime time schedule. ABC will follow on May 6 and CBS on May 10.

New York—**CBS Sports** plans prime time coverage of the National Basketball Assn.'s World Championship Series, starting 9 p.m. May 30. The June 5 and 7 games also will be prime timers, as will games six and seven on June 11 and 13, if those are necessary.

New York—**NBC Sports** has set a May 12 "SportsWorld" air date for the "Cannonball One-Lap of America," a seven-day auto endurance race around the circumference of the continental U.S. Millsport, Doyle Dane Bernbach's sports marketing subsidiary, sold the tv event to NBC.

Hollywood—**Metromedia Producers Corp.'s** 1985-86 "Metroprime" package of miniseries will, according to some sources, include "Mussolini & I." Meanwhile, NBC is planning "Mussolini: The Untold Story" for next season, starring George C. Scott. Home Box Office this May will show "Mussolini," starring Anthony Hopkins. Orbis Communications, New York, is handling station and ad sales on "Metroprime."

New York—**Television Program Enterprises**, a division of Tele-Rep, will air "Star Search Junior," a two-part special with a May-to-June telecast window. Like "Star Search," the special (featuring only contestants ages 17 or younger) is produced by Bob Banner Associates, Los Angeles.

New York—In **daytime**, NBC plans to slate "Silver Spoons" repeats in the 10 a.m. time slot, starting in July. "Spoons" will follow reruns of "Facts of Life," which replaces "Time Machine."#

Buyout bug bites at Gannett

By WILLIAM F. GLOEDE

Financier Carl Lindner's American Financial Corp. reportedly has joined with media entrepreneur Karl Eller in preparing a takeover bid for the $4.5 billion Gannett Co.

Mr. Lindner's company already has more than a 5% stake in Gannett, and *Mr. Eller, formerly a top* executive at Gannett, also has a substantial holding in the Rosslyn, Va.-based company.

Meanwhile, top executives from Gannett on April 25 met with Turner Broadcasting System chairman Ted Turner at TBS headquarters in Atlanta. Sources speculated that the Gannett officials discussed joining Mr. Turner in his $5.4 billion bid to take over CBS Inc., New York.

In his filing with the Securities & Exchange Commission on the CBS takeover bid, Mr. Turner said he would pay off the stock purchases largely with the proceeds from pre-sales of CBS nontelevision assets.

Gannett has previously stated that it is interested in acquiring more radio and tv stations (it currently owns six tv stations, including WXIA-TV, an NBC affiliate in Atlanta, and 16 radio stations), and sources speculated Gannett's role now may be as a partner to the pre-sell arrangements Mr. Turner is pursuing.

Gannett, which owns *Family Weekly*, also could be interested in pre-buying CBS Magazines, but experts in the magazine field say Gannett has not previously been keen on the magazine business.

TBS and Gannett spokesmen declined comment on the reports.

A knowledgeable source also said that Mr. Turner is preparing to start up another company separate from TBS. It was not known, however, whether that anticipated move was directly linked to Mr. Turner's CBS takeover bid.

Mr. Lindner last week issued a public statement calling on Gannett shareholders to reject several anti-takeover measures currently proposed by Gannett management. American Financial Corp., Cincinnati, had no comment on whether Mr. Lindner was preparing a takeover bid for Gannett.

Mr. Eller, former chairman of Combined Communications Co. and now chairman of Circle K Corp., a Phoenix-based convenience store chain, when contacted by ADVERTISING AGE, said, "So that's

How McCann kept the Coke secret

Reformulation team tells all

Coke '85
I was in the Bunker!

"The bunker" on buttons now sported by McCann-Erickson execs was the code name of the places where the project could be discussed openly.

By NANCY GIGES

Behind the marketing plans for reformulated Coca-Cola is a fascinating tale of intrigue that saw McCann-Erickson executives leading dual lives, holding super-secret meetings, resorting to paper shredders and even a bizarre, frantic search of a London hotel's trash bins.

When the secret group was finished with its advertising work, the result, somewhat surprisingly, is more of the same rather than a totally new approach for the 99-year-old Coke *(see story on Page 101)*.

Fearful during the past three months that word of the reformulation would leak out, Coca-Cola and McCann-Erickson took precautions that could be likened to those for national security. Because of the number of people involved at the end—possibly more than 500—executives still marvel that the secret didn't leak until days before Coke announced it last week (AA, April 22).

"When we were officially notified on Jan. 3, to a man, we were stunned," said Bill Thompson, exec vp, McCann-Erickson Worldwide, New York, and key account man on Coke. "We had no notion they were going to do anything like this."

Coca-Cola says it discovered the improved formula while trying to come up with Diet Coke some four years ago, and has spent time since then perfecting the "sweeter, rounder, less harsh" taste. Others close to the company say the late Paul Foley and others at McCann who had worked with Coke had urged that a sweeter mix be developed—to attract young people—as far back as 20 years ago.

After last Jan. 3, McCann was told to proceed as if the change was inevitable, although checkpoints would occur along the way. The plan still had to be approved by the corporation and the board.

The nature of the assignment called for the best talent McCann could provide. At the same time, "we were very much interested in keeping it to a small group," Mr. Thompson noted.

The first cut brought in as the working group Mr. Thompson, Ira Madras and Bruce Nelson, both exec vps-creative directors, McCann, New York; Barry Day, vice-chairman, McCann Worldwide; Marcio Moreira, exec vp, McCann Worldwide, and John Bergin, president, McCann USA.

Heavily involved from Coca-Cola were Ira Herbert, exec vp-director, corporate marketing, and Sergio Zyman, senior vp-marketing, Coca-Cola USA. Brought in as a business review group—"our conscience," said Mr. Thompson—were Phil Geier, chairman of

Last Minute News

Mennen may cut into paper products

MORRISTOWN, N.J.—Mennen Co. is expected to announce next week that it has reached an agreement in principle to acquire Indianapolis-based Paper-Art, a paper supplies company that reportedly will mark Mennen's first venture outside toiletries. Mennen officials could not be reached for comment, and a Paper-Art spokesman had no comment.

Bloom may get some Bully news

ROCHESTER, N.Y.—R.T. French Co.'s Bully and Swish toilet bowl cleaners, with combined billings of about $8 million, reportedly will move to Bloom Agency, New York, from J. Walter Thompson USA. The move would ensue from the imminent completion of French's acquisition of Airwick Industries, Carlstadt, N.J., and the consolidation of French's household line with Airwick's. Bloom is an Airwick agency. Airwick

GM finds shop ties complex

By JESSE SNYDER

DETROIT—General Motors is having second thoughts about making sweeping changes in its relationship with advertising agencies, sources close to a major review project said last week.

The GM Media Council, formed last fall to seek new efficiencies in the auto marketer's advertising (AA, Sept. 17), is instead broadening the scope of its inquiry and starting to explore what else agen-

BBDO, Hill land Polaroid jobs

By GAY JERVEY

Polaroid Corp.—which last summer made headlines by moving some $30 million worth of amateur photography business from Doyle Dane Bernbach to Ally & Gargano—has quietly assigned project work to both BBDO and Boston-based Hill, Holliday, Connors & Cosmopulos.

Hill, Holliday has produced an ad for Polaroid's amateur instant system that is currently being tested in Tulsa. A Polaroid spokesman confirmed that Hill, Holliday, whose headquarters are across the Charles River from Polaroid's Cambridge, Mass., complex, had completed a "one-time" assignment for Polaroid.

In addition, BBDO is doing direct-response and sales promotion work for Polaroid, again on a project basis. Over the last decade, BBDO has made no secret of its desire to snare a camera account and has had several discussions with Polaroid.

Polaroid says such moves are not new. "We give out assignments

Durfee next in line for Nadler linkup?

By STEWART ALTER

Nadler & Larimer, New York, the smallest of Mickelberry Corp.'s three agency subsidiaries, may be close to acquiring Durfee & Solow, according to sources.

D&S, with billings of $10 million and such accounts as Melitta Inc. and Rossignol Skis, would not be a large Mickelberry acquisition.

But it would be a significant attempt to infuse new creative blood into an agency that has been hard-hit by a string of account losses (CBS Toys in 1983 and Consolidated Cigar and Faberge in 1984), and now finds one of its two largest remaining clients—the estimated $6 million Austin, Nichols & Co. business—under review (AA, April 25).

"We talk to a lot of people about selling, but nothing is happening," said Martin Solow, president of D&S and a onetime copy chief at Kenyon & Eckhardt.

His partner, Jim Durfee, was formerly chairman of Carl Ally Inc., which later became Ally & Gargano. Mr. Durfee is credited with developing many of that agency's well known campaigns in the 1960s and 1970s.

Ricardo Calvillo, president of Nadler since he joined six months ago from Marsteller, has acknowledged he is pursuing acquisitions (AA, April 8) and said he is close to several things, but would not confirm that D&S is a target.

Even if that acquisition did go through, it's questionable whether those well respected creative names would be enough to revitalize the agency. "We creative directors are overrated that way," said one well known creative name. "We can only work in certain environments where there is enough support or energy, and not in frightened or difficult atmospheres."

The Austin review, which is using the Advertising Agency Register to screen agencies, is the latest jolt for Nadler, though not necessarily an actual loss.

Austin has the following brands housed at the agency: Wild Turkey bourbon, liqueur and rye, which account for the bulk of the billings; Paddy & Murphy's Irish whiskies; Wedding Veil German wine; Remy Pannier French wines; Montesquiou Armagnac; and King's Ransom & Abelour Glenlivet scotch whiskies.

Mr. Calvillo, who believes the agency will keep Austin following the review, disputed the widely held view that the agency was in trouble.

But he acknowledged that bill-

COMING THURSDAY

SPECIAL REPORT

When comparing budgets, promotion comes across like a Superman to advertising's Clark Kent. However, in terms of image, it's advertising that comes out of the phone booth in the blue suit and red cape. Now, industry experts even are questioning whether promotion has the bulk of budgets it claims to have.

A-B makes pitch for ballpark beer

By STEVEN W. COLFORD

WILLIAMSBURG, VA.—With the over-all market for low-alcohol beer still in question, Anheuser-Busch is plumping for the right of Major League Baseball fans to grab the brew of their choice at the old ballpark.

Dennis Long, president and ceo at Anheuser-Busch, says the Busch-owned St. Louis Cardinals and Peter Ueberroth, Major League Baseball commissioner, are working "to see if there is some program to be constructed for baseball involving either alcohol-abuse awareness or distribution of reduced-alcohol beer."

"Our preference would be for the consumer to get the beer of his choice and not abuse it," he said. "But if there is continued abuse, something else has to be done, and the question will be which is better —a moderation program versus complete abolition of higher alcohol beer."

Either way, as the nation's largest brewer, A-B is not expected to suffer. Paced by Budweiser, with a 24% market share, A-B has nine beers to choose from, including low-alcohol LA.

While the rest of the industry

Prime time commitments mounting

Nets filling sked

By JAMES P. FORKAN

NEW YORK—With the shaping of the new fall prime time season only days away, the Big 3 tv networks have made no fewer than seven, and perhaps as many as 14, series commitments for 1985-86.

By Dancer Fitzgerald Sample's count, NBC has ordered four series without pilots, ABC two and CBS one, with those seven commitments—drawn from a pool of 90 pilot projects—more than double those made a year ago. Young & Rubicam USA, meanwhile, said there are nine series commitments, five of them NBC's. Several other industry sources, however, put the commitment tally higher: Four shows ordered by ABC, four for CBS and six for NBC.

In any case, agency sources stressed, commitments do not guarantee fall premieres. Those that turn out to be disappointments will be held over to air in midseason or to languish until summer. A couple may never get into the race.

Why, then, make such commitments? Said Paul Isacsson, Young & Rubicam's exec vp-director, network programing and purchasing, it is "not necessarily by choice. Often it is the only way to lock up

CORPORATE CLOSEUP

Honda ready to break from pack—again

By BOB MARICH

Entering the U.S. car market just 15 years ago, American Honda Motor Co. has become the nation's fifth-largest auto marketer by following a strategy that is in some ways typically Japanese and in other ways not.

The company's boldest stroke, a major departure from other Japanese importers, came in 1980 when it began building Accord automobiles at Marysville, O.

Nissan Motor Corp. USA, Toyota Motor Sales USA, Mazda Motors and Mitsubishi are belatedly following Honda's lead with U.S. assembly plants of their own or joint ventures with U.S. car makers. Nissan built its first U.S. Sentra March 25; a Toyota-GM joint venture is shooting for a Chevy Nova production start in June at Fremont, Cal., and Mazda plans to start U.S. production in 1987 in an old Ford plant at Flat Rock, Mich. By late 1988, Mitsubishi will be producing cars in the U.S. under a joint-venture agreement with Chrysler.

But Honda's early start already has paid big dividends. The Marysville plant provided Honda with 130,000 quota-exempt autos last year, enabling Honda to pass Nissan in car sales for the first time. By 1988, Honda's U.S. production is projected to reach 300,000 cars.

Now, Honda is preparing to break from the pack once again.

The Gardena, Cal.-based importer will begin marketing a new, upscale line of cars next year independently of the existing Honda brand, and will sell them through a separate dealer network—another first for a Japanese automobile importer.

Made in Japan and called Acura (pronounced *ak-YOU-rah*), the new line will compete directly against other Japanese luxury cars and European imports, particularly Germany's BMW and Audi lines, and be priced between $10,000 and $20,000. The first two models will be sedans: The Integra and a car code-named Ajax. Unlike Honda's current dependence on four-cylinder motors, the Ajax will be powered by a V-6 engine.

Honda estimates it will sell 50,000 Acura cars in 1986, when they are introduced here, and 250,000 cars by 1989.

"Everybody is going upscale because competition is fierce at the bottom end," said Maryann Keller, an auto industry analyst at Vilas-Fischer Associates, New York. "This is a smart move because there is a limit to what they can do with the Honda brand alone."

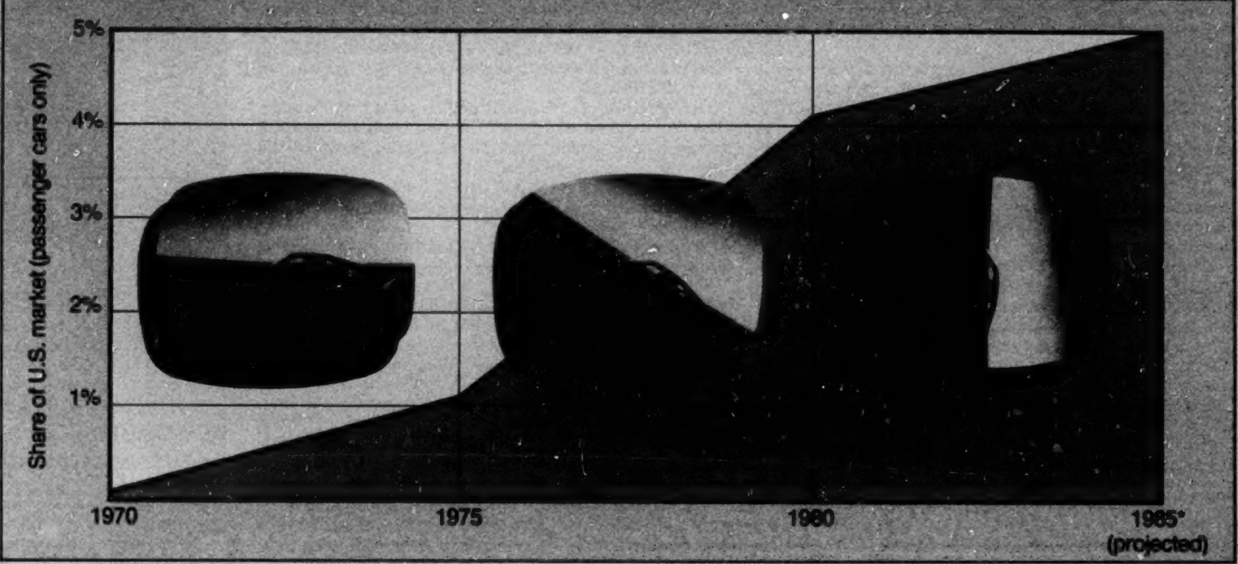
For a company that already outpaces its Japanese competitors in innovative engineering and research and development, the Acura holds the promise of helping Honda make even more giant strides against its competition.

In many ways, however, Honda's experience has been typical of other Japanese importers. It took losses in the early days and stuck by its long-term commitment to the

(Continued on Page 70)

Honda's dramatic climb in the U.S.

Honda's dramatic climb in passenger car sales has made it the fifth-largest auto marketer in the U.S. in only 15 years. Solid value and product-as-star advertising are two keys to the company's success, but so is the boldness with which Honda has moved in the U.S. market. Coming next year: A new luxury import to challenge BMW and Audi. Source of data: J.D. Power & Associates, Westlake Village, Cal., and American Honda.



ADWATCH

Lionel roars for Pepsi

By SCOTT HUME

Instead of changing its formula for Coke, a smarter move for Coca-Cola might have been to lure Lionel Richie away from Pepsi.

The singer/spokesman can't take all the credit, but is it a coincidence that some flashy new executions in Pepsi's "Choice of a new generation" campaign featuring Mr. Richie began airing on the Feb. 26 Grammy Awards telecast and top-of-mind awareness of Pepsi's advertising rose a whopping nine percentage points in March? Coke spokesman Bill Cosby is one of the country's most popular performers, but even he didn't move the needle like Mr. Richie has.

According to ADVERTISING AGE's monthly adWatch survey of advertising awareness, brand Pepsi last month moved back ahead of brand Coke in the hardball soft-drink advertising war. Advertising for Pepsi came to mind first from among all soft-drink advertising for 32.6% of the 1,251 adults surveyed (compared with 23.6% in February). Coke's share of first mentions in March was 31.3%, a slight decrease from its 32.7% share during the previous month.

That meant that Coca-Cola's highly touted reformulation of its Coke brand last week (AA, April 22) comes when it still holds the leadership in cases sold, but has fallen behind in getting its message across and making it stick.

Soft-drink industry observers have speculated that Coke's reformulation move was a response to Pepsi's growing popularity among younger consumers. That trend appears to be true, at least of Pepsi's advertising. Although the two brands' top-of-mind awareness is nearly dead even among respondents ages 18 to 24 (35% recalled Pepsi's advertising, 34% named Coke's), Pepsi led by significant margins last month in the 25-to-34 and 35-to-44 age groups. Coke advertising came to mind more often than Pepsi's for consumers 45 and older.

The question facing Coca-Cola in what is suddenly an underdog position is whether advertising touting the new Coke formula can make a greater top-of-mind impression than Mr. Richie and Pepsi's "New generation" pitch.

Before too much emphasis is put on the value of celebrity spokespeople, however, the awareness scores for Diet Coke and Diet Pepsi should be noted. Despite launching advertising featuring last year's Democratic vice-presidential candidate Geraldine Ferraro and Super Bowl quarterbacks Joe Montana and Dan Marino, Diet Pepsi's share of first mentions dipped a bit last month.

In March, 3.3% of respondents said Diet Pepsi's advertising came to mind first, a little worse than the 3.5% share it received in February. Perhaps Ms. Ferraro made an impression in Minnesota.

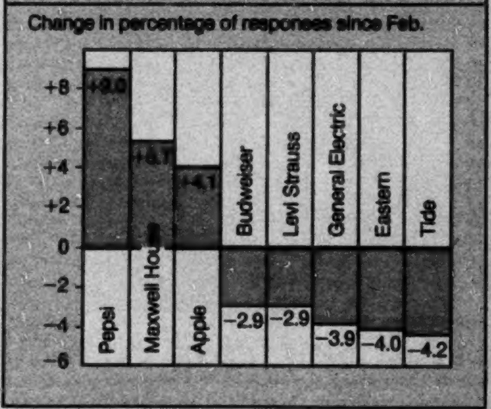
There's nothing in that for Coca-Cola to gloat about, though. The new Diet Coke advertising featuring actor Martin Mull and other celebrities didn't do anything for that brand, either. Diet Coke's share of first mentions was 3.5% in March, down from 4.4% the month before.

Then there's 7UP. Rather than join the derby to sign megabuck celebrities, the No. 3 soft drink brought

(Continued on Page 99)

March winners & losers

Question: Of all the advertising for (product category) you have seen, heard or read in the past 30 days, which ad first comes to mind? *Note:* A change of plus or minus 2.8 percentage points is statistically significant. Source: SRI Research Center Inc., Lincoln, Neb.



WHO SQUEEZED "C" OUT OF SUNKIST?

The same people who would like to put your upcoming success in headlines. The same techniques that developed Sunkist Vitamin C tablets for Rexall, put Baking Soda in more than thirty million refrigerators, developed new Alka Mints for Alka Seltzer and new S.O.S Oven Pads . . . can also work for you.

They could be just what you've been looking for to restage that fading star, or create a successful new product's plan. Gerald Schoenfeld, Inc., consultants to America's major marketers, now offers the "Product Success Program."

- Whether it's developing new products from scratch or treating old products like new;
- Whether your resource is your name, your R&D, your distribution, your marketing insights, your established brand, your interest in a new category, or some combination of these;
- Whether you want us to work with your agency or without, here or abroad;

. . . the "Product Success Program" offers unique and proven techniques.

Bates the latest shop to try brand, film links

By BOB MARICH

Los Angeles—Ted Bates Co. is the latest agency to open a unit to place brand-name products in movies and tv shows.

Through its movie unit, Diener/-Hauser/Bates, the agency this month created a national promotion and product-placement division.

In addition to placing products in movies and tv shows, the division will arrange joint promotions for specific films.

Scott Dorman, associate director-promotions, and national sales director of MFM Corp., a New York placement company, was named national promotions director of the new Bates unit here.

Chiat/Day and Ogilvy & Mather recently hired an independent product-placement company, Youngblood, Levine & Bladd, to place client products in movies and tv shows.

Chiat is seeking exposure for California Cooler, Porsche Cars North America and Home Savings of America.

Hollywood sources say until recently, marketers have handled product placement directly. Agencies are stepping into the process because, in some instances, ad campaigns may play off prominent brand exposure in hit movies.

Brand-name products are even popping up in advertising. Norm Marshall Associates, North Hollywood, got three motorcycles from client BMW of North America in a tv commercial for Slice, the new PepsiCo soft drink. The motorcycles are on screen longer than the beverage.#

Remember the sweepstakes you ran that didn't get one single response and... you later found out that it was due to your address appearing in the ads as 0000 Main Street?

It just goes to show you that something that important can slip by—and has!

But it has never happened with us in the more than 25 years we've been running promotions, contests and sweepstakes.

Our total service approach of creating, producing and managing mistake-free promotions has enabled hundreds of our clients to reap the rewards of successful promotions.

So next time you're planning a promotion, give us a call at (516) 326-3666. You'll be surprised by the response you'll get.

AdWatch

(Continued from Page 4)

back actor Geoffrey Holder—who owes some of his celebrity to the 7UP spots he has done off and on over the past decade or so—and the "Uncola" theme line.

The result? Seven-Up Co. also should have tried to hire Mr. Richie. But the new "Uncola" campaign did manage to move 7UP's ad awareness up, if only slightly. In March, 6% of respondents said 7UP advertising came to mind first, compared with 5.3% in February.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of consumers to name advertising in a variety of product categories that first comes to mind from all seen, heard or read in the last 30 days.

In March, 1,251 adults were questioned by telephone. Under adWatch methodology, an increase or decrease of 2.8 percentage points is considered statistically significant and attributable to more than sample variation.

Among other significant changes in the March survey:

- There were some surprises in last month's list of the **top 10** ad campaigns (*i.e.*, those that came to mind first when consumers were asked to name the advertising they recalled from among *all* they had seen, heard or read, regardless of category). The first surprise is that, on an unaided basis, more people recalled Coke's ad than Pepsi's. The other surprises came at the end of the list.

In descending order, last month's 10 most memorable advertisers were Coke, Pepsi, Wendy's, McDonald's, Miller/Miller Lite, Ford, Burger King, Pizza Hut, Chevrolet and Coors. Last month's appearances were firsts for Pizza Hut and Coors, both of which recently broke campaigns.

Pizza Hut (a unit of high-flying PepsiCo) broke new advertising featuring the unscripted testimonials of such celebrities as Martin Mull (Say, wasn't he doing Coke commercials, too?), the mercifully fictitious MacKenzie Brothers, Rita Moreno and others (AA, Feb. 4).

Adolph Coors Co. also launched new advertising that was a departure from past efforts and a gamble. Its "Coors is the one" campaign (AA, Feb. 11) features actor Mark Harmon calmly extolling what the brewer believes are Coors' virtues.

- The new campaign and an expanded marketing/advertising category helped keep Coors in the No. 2 spot in the **beer** category. But the big news was a drop in awareness for Budweiser advertising. Bud's ads came to mind first for 12.5% of the sample, good enough to keep first place, but a 2.9 percentage-point decline from February's 15.4% share. That was only the second decline for Bud's awareness share in the nearly three years of adWatch tracking.

Miller High Life, backed by the new "American made" campaign, was in the No. 3 spot, close behind Coors, with a 10.5% share. Miller Lite moved back to No. 4 with 8.6%, ahead of Bud Light's 4.3%.

- General Foods' Maxwell House brand is making its move on **coffee** category leader Folgers at the same time GF is moving to broaden its coffee line. Maxwell House advertising came to mind first for 24.3% of last month's sample, a 5.7 percentage-point increase over February's 18.6% and only a demitasse below Folgers 25.2% March share. Sanka was third with a 5.4% share.
- Apple Computer continues to put the squeeze on competitors in the **computer** category. Its share of first mentions last month rose 4.1 percentage points to 39.2%. Some of that came at No.2 IBM's expense, as its share dipped to 12.9% compared to 15.4% in February. Commodore was third last month with 5.4%.
- The initial awareness gains in the **laundry products** category for liquid Tide appear not to have been too solid. Top-of-mind awareness of Tide's advertising jumped nearly 10 points in February after the rollout of its liquid version, but some of that gain fell away last month. Tide's ads came to mind first for 32.9% of the sample last month, a decline of 4.2% percentage points from February's 37.1%.

All moved up to the No. 2 spot with a 3.6% share. Era was third with 3.6%.#

In the news

Getting personal

How old do you think personal ads are? A little research has turned up a 1799 novel called "Advertisement for a Husband," about a fair young maiden who placed just such an ad. What kind of responses did she get? *See Page 4.*

Unbelievably believable

Believable is what Cliff Robertson, Ad Age's Star Presenter of 1985 for his work for AT&T, seems to be. Although he has had a long and distinguished career as an actor, writer and director in motion pictures, he's never been associated with the head-turning aspects of Hollywood. "I've never embraced this life style," said the 59-year-old actor. *See Page 5.*

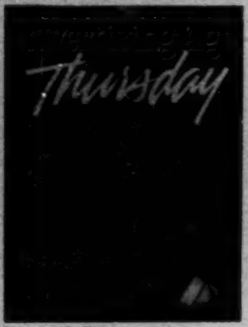

Photo by Hal Fisher

Job hunt

John Sweeney, a former Foote, Cone & Belding associate creative director who now teaches advertising, offers some concrete tips for aspiring copywriters on how to land a job. *See Page 50.*

This ad packs a wallop

Filming a recent Glidden paint commercial was an electrifying experience for actor Jim Frederick. The spot featured him with his hair standing on end at the thought of having to repaint next year, and the effect was produced by a brief jolt of more than 1 million volts of static electricity. *See Page 52.*

Special Report

Premiums & promos

When comparing budgets, promotion comes across like a Superman to advertising's Clark Kent. But in terms of image, advertising comes out of the phone booth in the blue suit and red cape. *In Special Report, starting on Page 15.*

Presstime

Hancock thins field to 4

Boston—John Hancock Mutual Life Insurance Co. has narrowed the review for its $16 million account to four finalists. They are incumbent Arnold & Co.; Cabot Advertising; Hill, Holliday, Connors, Cosmopulos, and Ingalls Associates.

O&M rises, M'berry dips

New York—Ogilvy & Mather International reported increased revenues and net income for the first quarter of 1985, while Mickelberry Corp. saw earnings decline. O&M said revenues were $106.3 million, up 11.7% over the same quarter last year. Net income was up 13.9% to $3.6 million. Mickelberry's revenues rose 28% to $34.7 million, though the gain also reflected the revenues of two companies acquired last year. Net income for the quarter dropped 12.7% to $711,000.

HBM/Creamer perks up

White Plains, N.Y.—Nestle Co. has assigned its $20 million Taster's Choice freeze-dried coffee account to HBM/Creamer, Pittsburgh. Leo Burnett USA, Chicago, resigned the Taster's Choice account earlier this year to take on a substantial part of the M&M/Mars business (AA, Feb. 25).

Allen buys C&W in Frisco

San Francisco—Allen & Dorward, this city's largest independent agency, is buying troubled Cunningham & Walsh here. The move is reminiscent of C&W's actions in Chicago, where its office merged with BBDM (AA, April 4, *et seq.*).

Storer dissidents press on

New York—Coniston Partners (AA, April 29), the dissident group of shareholders trying to liquidate Storer Communications, continues soliciting proxies despite a recent Connecticut district court decision. That decision said the partners must file an application with the state's department of public utility control for the approval of their acquisition.

DDB hooks Sea World

San Diego—Sea World has named Doyle Dane

First anniversary

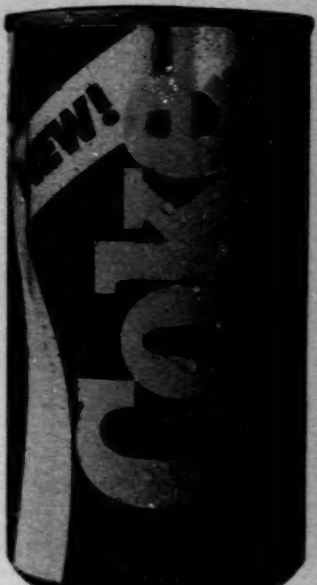
Advertising Age begins its second year of twice-a-week frequency with today's *Thursday*. Following its debut on April 26, 1984, AA's midweek edition has been shaped to serve as a weekly booster shot for the creative side of agency, advertiser and media activity, the support systems they utilize and young people embarking on careers in this business. Reader response to *Thursday* and its unique format clearly tells us we have a hit on our hands, that each week we are filling their needs. So encouraged and appreciative are we that we resolve to continue, in our second year, to add lively, engaging and informative new columns, features and articles to the many that already define *Thursday's* role as "Crain's Magazine of the Creative Process."

The Editors

McCann chefs secretly mixed skills on Coke

By Nancy Giges

McCann-Erickson execs who weathered the Coca-Cola "new taste" shock wave (AA, April 29) speak of the experience well beyond the advertising they created.



The top secret, high-pressure project was also a high-stakes experiment in how super-egos deal with one another—and remain friends—while developing one of the most important campaigns of their careers.

Never before had the top five creative execs at McCann-Erickson's New York office been thrown together into one group—working on the same project.

But there was no doubt about who would be on the team. The nature of the project demanded the best talent McCann could provide.

The secrecy mandated by the nature of the assignment meant that as few people as possible know about the work.

While some of the team members might have anticipated some friction at first, Ira Madris, exec vp, put it into perspective: "The enemy happens to be in Purchase, [N.Y.]," a reference to rival Pepsi-Cola's headquarters.

On Jan. 3, when McCann was officially notified of the super-secret job, two vice-chairmen and three exec vps—each of whom usually runs his own group—were named to the secret team that held clandestine meetings in special offices, fondly dubbed "the bunker."

Commented team member Marcio Moreira, exec vp, "We had all been in new-business meetings together and in presentations. And we all acknowledge each other's strengths, but we hadn't been thrown into the kitchen together. They say too many chefs spoil the broth, but in this case it didn't."

For some two months, these five men—Mr. Moreira; Barry Day and John Bergin, vice-chairmen; Ira Madris and Bruce Nelson, exec vps—essentially carried the creative load on their own. The team also included Bill Thompson, exec vp, as the account man, and two representatives from Coca-Cola Co.

Only after clear direction had been established did McCann expand the team and add other staffers that would carry out the day-to-day work. Even at the end of the project, only about 30 McCann people

(Continued on Page 55)

The secret McCann-Erickson team that worked on advertising for Coca-Cola's new formulation appears for the first time together outside "the bunker," code name for places where the project could be discussed openly. They are (l. to r.) Bruce Nelson, exec vp-creative director, McCann/New York; Ira Madris, exec vp-creative director, McCann/New York; Barry Day, vice-chairman, McCann Worldwide; Bill Thompson, exec vp, McCann Worldwide, and Marcio Moreira, exec vp, McCann Worldwide. Missing from this photo is John Bergin, vice-chairman, McCann Worldwide. *Photo by Arnie Adler.*

Budgets

(Continued from Page 45)

Ms. Schochow says the most mileage will be achieved by running a multifaceted campaign.

The reason promotion experts don't recommend diverting dollars into general advertising is simple: "A spot on the Super Bowl costs $1 million to place and $600,000 to produce. You could take that $1.6 million and give away samples of your products and measure its effect," Mr. Robinson says. "Advertising is measured by awareness; promotion is measured in the hard numbers of success or failure."

There it is: The industry's No. 1 selling point. "Promotional budgets are increasing because promotions are measured to sales to a defined audience over a defined period of time," says Jeffrey McElnea, president, Einson-Freeman, Paramus, N.J.

Jeffrey Feinman, president, Ventura Associates, New York, says promotions' general appeal is another reason companies are investing in them. "Promotion is a psychographic concept, not demographic; it works for everyone."

"Budgets will continue to swing toward promotions," Mr. McElnea says, "because advertisers and retailers are demanding them and consumers are responding to them." Ms. Schochow says the industry is growing because "every product must be promoted properly or it won't succeed in today's market."

The key words are "promoted properly." Until marketers bring the estimated 48% of their advertising-promotion budgets into the spotlight and out of the back rooms, dollars will continue to vault down the vortex unchecked, unmeasured and not doing a thing to build brand credibility and long-term sales. Perhaps it's time Atlas shrugged a bad habit—or at least recognized he has one.

Promoting an international network

Buy Now! *Compre Ahora! Achetez Maintenant! Kaufen Sie Jetzt! Koop Nu!*

Largely because of the efforts of Gerry Postlethwaite, managing director, KLP International, London, and Jeffrey McElnea, president, Einson-Freeman, Paramus, N.J., some sales promotion companies will speak more than one language.

Messrs. Postlethwaite and McElnea helped to establish a network of eight companies in eight countries, each speaking the language of sales promotion in their native tongues. Represented countries include the U.K., the Netherlands, France, Spain, Brazil, Sweden, West Germany and the U.S., through Einson-Freeman.

"Promotion finally goes international," Mr. McElnea says. The network "was formed en masse, instigated by ourselves and KLP. It shows a commitment to create the critical mass needed to operate on a global scale without having to be bought out by an international agency," he says, citing the lack of major independent promotion agencies in the U.S. and abroad.

Mr. McElnea says companies that wished to run international promotions had only one option: "To use an advertising agency network, which doesn't have a commitment to promotions and works more on a piecemeal basis." The sales promotion network, on the other hand, is made up of companies whose primary business is promotion.

The group will operate as a unit only on international business, handling domestic accounts independently. Each company will buy some stock in KLP, which will purchase some of each member company's stock. KLP will coordinate the network's activities.

"The strategy for each international campaign will be universal," Mr. McElnea says. "But the creative approach will be tailored to each locale, as will the legal elements, which are so important in this business."

How much business is the new consortium counting on receiving? "Well, we weren't so much responding to demand, as anticipating demand," Mr. McElnea says. "We hope to create demand that should have been there. It's there for the international advertising agencies; we're assuming it's there for sales promotion as well." *—E.F.*

Prizes become more sophisticated

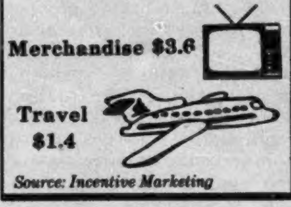
The days are gone when you could pull into the Sinclair station, buy a tank of gas and walk out with enough inflatable dinosaurs to keep the kids happy for a week. Even if Sinclair hadn't closed the pumps, Dino the Sinclair dinosaur and the potpourri of purchase prizes hanging in the gas station probably wouldn't be around today.

"Premiums and incentives are changing as rapidly as people's needs and desires change," says Peggy Schochow, editor of Minneapolis-based *Potentials in Marketing.* "They want current, up-to-date, hot products. Before, pens and pencils were okay, now you have to have cracker-jack incentives—things people want to win, but not necessarily buy for themselves."

What this means is that the numbers involved in offering premiums—whether products or cash—have inflated tremendously. The premium business is now a $4 billion industry, says Bernard Rosten, president, Allied Premium Co., New York, "a good part of which is spent on inexpensive items."

Mr. Rosten recommends using products rather than money as incentives because "you can take a $1 cash prize and convert it into a product prize with a perceived value of $3." Cash usage is on the decline, he says, because "you can get more for your bucks from gifts."

However, even the value of cash prizes has escalated. "To give away $25,000 used to be a big deal," says Jeffrey Feinman, president, Ventura Associates, New York.



Products soar over flights

Sales and dealer incentives ($ billions)

Source: Incentive Marketing

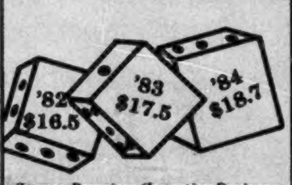
"Now American Family Publishing is going to award $10 million to one person. The same type of thing is happening in the products being offered to consumers," Mr. Feinman says.

Exit Dino, enter high-grade clothing and consumer electronics. "Quality apparel is always a big incentive. And anything in consumer electronics—particularly pocket tvs and credit card-size radios—are hot premiums today," Ms. Schochow says. "The latter can have companies' names printed on them, and they are going to become more popular with companies" —largely because they have become more popular with consumers.

"Everybody's logo crazy," says Mark Kaufman, president, 3 Strikes Custom Design, New York. "The companies are just jumping on the bandwagon the retailers have been on for a while with designer jeans and all.

"This has helped because it's not taboo to wear someone's label, whether it's a designer's or a company's, on your clothes."

Companies are leaning toward labeling everything with their logos because they "are interested in copying the Japanese style of rah-rah, family-type company structures, and giving away corporate clothing fits in well with this," he says. "But now companies have realized that consumers are willing to spend money to get clothing with their logos on it. The number of company store programs has really boomed."



Prizes on a roll

Premiums and incentive growth ($ billions)

Source: Premium/Incentive Business

Ms. Schochow says that for sales and dealer incentives, nothing works like a vacation.

Another area that's really booming, she says, is advertising specialities—where a prize is given away without the salesperson, dealer, distributor or consumer really having to do anything to receive it. "They're perceived as good-will builders and are becoming incredibly popular," she says. After all, everybody likes something for nothing. *—E.F.*

Upscale cigaret brands smokin' for Morris, RJR

By WILLIAM F. GLOEDE

Philip Morris USA, New York, is about to try out the new-product marketing and testing strategy it embraced earlier this year by experimenting in the upscale cigaret market segment with a new brand and a line extension of its Players brand. Also, rival R.J. Reynolds will repackage its upscale entry, Sterling.

PM on June 3 begins testing Dunhill, a low-tar smoke in both 85mm and 100mm styles, in Atlanta and Phoenix. PM has licensed the Dunhill name from Alfred E. Dunhill Ltd. of London, which will continue to market its premium-price and flat box-package cigarets in U.S. hotels and shops.

PM's Dunhill will be made in this country from a "premium" tobacco blend and will use traditional U.S. box packaging. It will sell for the same price as traditional brands. Wells, Rich, Greene, New York, handles.

Also on June 3, PM will begin testing the value-added concept with an extension of its Players line. Players Lights 25s will roll into test in Denver and Des Moines at the same suggested price as 20-unit cigaret packages. Leo Burnett USA, Chicago, handles.

"We've been watching the value-added category for some time, and it's established itself as a franchise," explained a PM spokes-

Murdoch to sell 'Voice'; visits FCC

By VERNE GAY
and WILLIAM F. GLOEDE

Rupert Murdoch's bankers prepared to put his *Village Voice* on the selling block last week while Mr. Murdoch himself called on the Federal Communications Commission in Washington to discuss his efforts to buy several tv stations from Metromedia.

Informed sources reported Mr. Murdoch directed Allen & Co., a New York investment banking company, to draw up a prospectus for the sale of the *Voice* for a minimum price of $55 million. Neither Allen & Co. nor Mr. Murdoch's spokesman would comment on the proposed sale. Mr. Murdoch acquired the *Voice*, New York's alternative newspaper, in early 1977.

As to Mr. Murdoch's broadcasting aspirations, Howard Rubenstein, a Murdoch spokesman, issued the following statement: "Negotiations are in progress among Metromedia, Rupert Murdoch, News America, Marvin Davis and 20th Century Fox concerning the transfer of certain Metromedia properties."

Late Friday, it was learned that Mr. Murdoch, an Australian national, will apply for U.S. citizenship to circumvent U.S. law that would otherwise have prevented more than a 25% ownership of any U.S. tv properties.

John Kluge, chairman of Metromedia, Secaucus, N.J., and something of an empire-builder himself, reportedly has wanted to sell off at least some of the Metromedia stations to amortize the $1.3 billion debt he incurred in taking his company private last year. Few envisioned Mr. Murdoch as a possible buyer, because of his foreign birth. The six stations could sell for perhaps $1.8 billion, exactly double their value when Mr. Kluge and associates bought them in 1984, according to some observers.

Observers had speculated Mr. Murdoch wouldn't challenge the strict foreign-ownership rules the FCC imposed on would-be tv purchasers since 1934. Rather,

(Continued on Page 102)

Last Minute News

Metromedia rumors fuel talk of CBS buyout role

New York—Metromedia offices here were abuzz at press time with rumors that chairman John Kluge *(see related story above)* will sell WCVB-TV, its Boston ABC affiliate, to Hearst Corp. for $450 million. It would be the biggest tv station sale in history. That rumor fueled further speculation at Metromedia that Mr. Kluge would use the proceeds from the WCVB sale, plus the sale of other Metromedia broadcast and communications properties, to join Gannett Co., Rosslyn, Va., in a cash tender offer for CBS Inc. (AA, April 29). Mr. Kluge could not be reached for comment. CBS would not comment on what it called "speculation." Neither John Conomikes, vp-general manager at Hearst Broadcasting, nor Gannett chairman Allen Neuharth could be reached.

New owners plan ad incentives for 'Us'

New York—*Us* plans special advertising incentive programs under new owners Straight Arrow Publishers and Telepictures Corp. (AA, April 11). The new partners will spend about $28 million to buy *Us* and make improvements to boost circulation and advertising. Jann Wenner, chairman

Trimmer ABP is renamed

By STUART J. ELLIOTT

Phoenix—American Business Press is making the most sweeping changes in its 20-year history, from adopting a new name to eliminating its presidency and reducing dues.

Some of the changes, detailed during ABP's 1985 spring meeting here, take effect immediately, such as limiting the operating budget, which was $2.2 million in 1984-85, to $1.75 million. Others, such as rechristening the trade publishing organization as the Assn. of Business Publishers—with ABP still as its acronym—require the full

All-out assault on Big Blue turf

Xerox, Compaq pcs bow

An Advertising Age roundup

Despite IBM Corp.'s move to corner yet another niche in the personal computer market by challenging the Japanese with its own line of printers, Big Blue's competitors are fighting back on the home front.

Xerox Corp., a pioneer in the pc market during the early 1980s but a latter-day dropout, bounced back with its first desktop personal computers compatible with IBM's PC.

Houston-based Compaq Computer Corp., which toyed with IBM last year in tv ads featuring British actor John Cleese as a bumbling businessman who made the "wrong decision," is launching an estimated $25 million ad campaign on behalf of its new Compaq Deskpro 286 and Compaq Portable 286 computers.

And software publisher Microsoft, the company that provides the operating system for the IBM PC, is back in the news on the other side of the fence with its announcement of a forthcoming multifunction program for Apple Computer's Macintosh.

The new Compaq computers, coming from the leader of the "IBM

Chevy's California limited

General Motors' Chevrolet division is rolling out "designed-for-California" limited-edition cars. The Cavalier (above) is getting a bigger engine, and both the Cavalier and Camaro IROC-Z will be clad in more toned-down styling. Chevy is looking to lure older (40-plus) upscale buyers. The move is part of Chevy's California-only marketing effort to reap a bigger share of the nation's largest automobile market. Vic Olesen & Partners, Los Angeles, is handling a $1.5 million tv and print campaign.

Landau snipes at Miller

Claims promo bucks not misused

By ROBERT RAISSMAN

New York—Sports marketing executive Robert Landau has lashed out at Miller Brewing Co., Milwaukee, disputing the brewer's allegations that he diverted money ticketed for Miller promotions in order to buy cocaine, racehorses and luxury apartments.

The counterattack is contained in a deposition filed in Milwaukee federal court to support a motion seeking dismissal of Miller's $19 million suit against Mr. Landau (AA, Feb. 28).

The deposition is but one development in Mr. Landau's ongoing difficulties. Last week, the California commission of labor standards filed 11 criminal misdemeanor charges against Mr. Landau's former company, Robert Landau Associates.

Nine of the charges were related to allegations of issuing insufficient-funds checks to employes who worked for the company's catering operation during the 1984 Summer Olympics. The other two involved allegations of violation of the child labor laws, said Roger Miller, a California labor commission regional manager. Mr. Landau is scheduled to be arraigned on those charges May 16 in Los Angeles.

However, Mr. Landau has begun to regroup. In an interview with Advertising Age, he said he has formed a new company, International Marketlink, which will be based in Westchester County, N.Y. The company will be involved in business areas similar to those in which RLA was involved.

RLA is in liquidation proceedings and under the jurisdiction of a trustee of the bankruptcy court.

Mr. Landau said he is being backed by an investor group but declined to name his backers until the incorporation process is finished. He said he has begun work on a new-business consulting project for Nadler & Larimer, a Mickelberry Corp. agency. Nadler president-ceo Ricardo Calvillo confirmed the Landau assignment. Mr. Calvillo added that neither he nor the agency nor Mickelberry were involved as investors in Mr. Landau's new venture.

Mr. Landau said Miller's lawsuit has no merit. "I'm totally confident that the Miller suit is totally unfounded and untrue," he said. "It's not something that I'm going to be concerned or worried about. I'm certainly going to address it until it gets decided upon or thrown out of court."

Barry Fredericks, Mr. Landau's attorney, said he has not been made aware by authorities of the charges filed by the California labor commission and could not comment on them.

In his deposition concerning the Miller suit, Mr. Landau said the brewery has chosen to pursue "a vendetta against me personally" by filing charges relating to racketeering and drug dealing. He said Miller filed

Cable, Seagram taking ads where nets fear to tread

By GAY JERVEY

New York—Several cable networks reportedly have assured Joseph E. Seagram & Sons they would accept the company's controversial equivalency messages the three major tv networks have rejected.

They reportedly include Cable News Network, MTV: Music Television, the USA Network and Financial News Network, plus Atlanta superstation WTBS.

"We're waiting for the budget to be approved" by Seagram, said John Meskil, exec vp-media & administration at Warwick Advertising, which is handling the campaign. "Then we will be able to run a representative cable schedule."

Sources in the cable industry indicate a great deal will depend on the strength of Seagram's dollar commitment. "This isn't just any run-of-the mill ad," said one cable executive. "Along with it could come a lot of headaches, so we're all pretty insistent that they're in here to stay, not just as a one-shot deal to get some attention."

The campaign, which equates the alcohol content of beer, wine and distilled spirits, has caused a stir among critics who feel it is a veiled attempt to sell hard liquor on the airwaves.

ABC, CBS and NBC all refused to carry the commercial, saying it violates their policies banning distilled spirits advertising (AA,

Diet Coke back for a second 'taste'

By NANCY GIGES

Coca-Cola USA's return to the "Just for the taste of it" campaign for Diet Coke is going almost unnoticed with so much attention devoted lately to flagship brand Coke.

The highly successful earlier theme is back in new Diet Coke commercials breaking this week via SSC&B, New York. Officials had said earlier spots introducing the theme, and replaced in December, "had served their purpose," giving the impression that the theme was gone forever. But now they deny there was any intention to drop the campaign.

Observers at odds over Coke's "big gamble"—Page 100.

Coca-Cola USA, Atlanta, shifted last December to a new theme, "It's one of a kind," when Diet Coke was reformulated with 100% NutraSweet from a saccharin/NutraSweet blend.

Sergio Zyman, senior vp-marketing, Coca-Cola USA, said that burst of comparative advertising is over: "We wanted to make a major statement about the brand when it switched to 100% NutraSweet." Now, he said, it is time to go back to the strategy of "indulgence, fun and lightness."

The new spots feature a host of celebrities, including rock star Chuck Berry, dancer Gene Anthony Ray, rock band Devo, actress Andie McDowell, wrestler Sergeant Slaughter, comedians

FAS-FAX has good reading for big dailies

By WILLIAM F. GLOEDE
and GARY LEVIN

The Pulitzers of St. Louis and Rupert Murdoch appear the biggest winners, while Gannett Co. and Rupert Murdoch look like the biggest losers in the March 31, 1984, FAS-FAX report on newspaper circulation.

The FAS-FAX report, released last week by the Audit Bureau of Circulations, generally augurs well for major-market daily newspapers. The larger, more marketing-oriented dailies, such as the *New York Times*, reported circulation gains, with several showing particularly healthy increases. However, in competitive markets, these increases often came at the expense of the second newspaper.

In Boston and Chicago, the ABC figures showed that newspaper readership over-all is up, a development that can only bring smiles to the faces of publishers in an industry that has seen circulation remain generally flat for two decades. Nationwide, newspaper circulation is reported at an all-time high, and with newspapers focusing more and more on product marketing, those figures are likely to continue rising.

Combined circulation results for the major dailies were up slightly in New York (plus 0.2% over the year-ago period), Chicago (plus 1.7%) and Los Angeles (plus 1.2%).

Gannett's *USA Today's* circulation fell 9.4% from March 31, 1984, and the same date in 1985. However, 1984's 1,284,613 figure was a three-month average for the 13-week period ending March 30, while this year's 1,162,606 is a six-month average. The figure contained in the ABC's initial audit of *USA Today*, based on the 13-week period ending Dec. 31, 1983, was 1,138,030.

Meanwhile, the Pulitzer-owned *St. Louis Post-Dispatch* gained a whopping 7.6% in daily circulation, to 273,784, while posting a smaller percentage gain of 1.2% on Sundays, to 495,111.

The competing (and financially troubled) *Globe-Democrat's* figures were not approved for release by the ABC.

Rupert Murdoch's *New York Post*, which had been showing strong

Squabble in Louisville

Members of the Bingham family, the owners of the Louisville Courier-Journal & Times Co., forced Sallie Bingham (r.) off the board of directors in 1983. It was not an amicable parting and may lead to the sale of one of the last major-market, family-owned newspapers in the country. *(See story on Page 94.)*

Chicago Fair sets $44 million for ads

By PAT McGEEHAN

The proposed 1992 Chicago's World's Fair could be worth as much as $44 million for the agencies involved, ADVERTISING AGE has learned.

The fair's organizers also hope to take some lessons from last year's financially successful Olympic Games in Los Angeles—including using off-site venues and selling worldwide tv packages.

The preliminary operating budget the Chicago World's Fair 1992 Authority is expected to release this week indicates that advertising represents about 42% of the proposed over-all marketing allocation of $104 million. Much of the remaining $60 million will be spent lining up international participants and corporate sponsors and for booking sporting and cultural events.

The decision to appropriate nearly 30% of the fair's total budget for marketing reflects the fair planners' philosophy: Get the word out early and often.

John Kramer, the authority's general manager, said he thinks "previous world's fairs have not done an adequate marketing job." He cited as an example the 1984 fair in New Orleans, which began running ads about three months before it opened, and characterized the effort as "too little, too late."

The authority's financial director, Mark Gordon, stressed that the working budget is "very preliminary." But, he added, the marketing allocation shows that "we don't want to repeat the mistakes of smaller fairs like New Orleans."

The authority's ability to convince critics it can avoid the red ink of past fairs is seen as crucial to getting necessary funding from the Illinois legislature. That body will decide next month whether to provide funding to proceed with the fair.

Three Chicago agencies—Foote, Cone & Belding, Leo Burnett USA and Needham Harper Worldwide—have done some *pro bono* work for the authority since its inception in 1978. Most of the work involved preliminary market research and attitudinal studies. While Mr. Kramer said selection of an agency to handle attendance advertising is "a few years down the road," he expects a marketing effort targeted to potential exhibitors to begin by

Tartikoff sees 'incredibly tight' ratings race

NBC aims for No. 1

By JAMES P. FORKAN

NEW YORK—NBC Entertainment president Brandon Tartikoff, first out of the gate with a new fall prime time tv schedule, predicted "an incredibly tight race" for the 1985-86 prime time A.C. Nielsen Co. ratings crown.

Ignoring ABC, the ratings-plagued also-ran that is to announce its lineup today, Mr. Tartikoff told several hundred agency buyers at a Waldorf-Astoria breakfast that NBC and CBS will be "fierce" competitors this fall. NBC's "balanced menu of programing" will, he said, build on the turnaround success of last season, when NBC gained on every night. "Clearly, the momentum is with us."

NBC, as expected, is replacing four hours from last year's schedule (four dramas, two comedies)—"the least amount of change NBC's had in 15 years," he boasted. A year ago, NBC had to ax 7½ hours. Five of last fall's nine freshmen shows are being renewed, he added. A Ted Bates Advertising/New York report said NBC could have gone as high as 5½ new hours for fall.

CBS, to announce its new slate May 10, remains confident of victory in the 1985-86 Nielsen households battle. CBS, having taken its sixth straight Nielsen ratings title, largely on the strength of its weekly series, needs to replace only three hours, although agencies such as Dancer Fitzgerald Sample; Foote, Cone & Belding, and Young & Rubicam USA agreed that could swell to five hours, if it replaces its disappointing Wednesday movie.

Shortly before NBC's schedule announcement, David Poltrack, vp-research, CBS/Broadcast Group, forecast that CBS would win the 1985-86 season by 1.1 ratings points over NBC, a greater margin than last season.

ABC, coming off its worst season in a decade, needs at least five hours of new product, according to a fall analysis from FCB's FCB/Telecom, Chicago. Others, such as Y&R and Bates, felt ABC should replace as many as eight or nine hours.

Stressing "stability, momentum and innovation," Mr. Tartikoff said 15 of NBC's 18 returning series will remain in their current slots—including "Hunter" and all its other 10 p.m. (ET) incumbents. NBC's strong Monday, Tuesday and Thursday shows will remain

A total of 550 people labored for six months to produce Honeywell's pop-up corporate print ad. The hand-assembled, die-cut insert—which is scheduled to make its first and only appearance in the June 3 issue of *Business Week*—cost approximately $1 million. The ad was created by BBDO, Minneapolis.

Honeywell pops for $1 million ad

By SCOTT HUME

BBDO, Minneapolis, next month gives a new definition of advertising that "pops off the page" with a four-page, pop-up corporate ad for client Honeywell.

Guaranteed to make admakers' eyes pop is the approximately $1 million cost for the labor-intensive ad, the first and only appearance of which will be in the June 3 issue of *Business Week*.

The first of the four pages contains this rather copy-heavy introduction against a black background: "So our customer said, 'How in the world can we automate six different kinds of manufacturing, create one database for 2,603 users, control everything from energy to security in 120 buildings and then tie it all together under one complete system?' And we said. . ."

When the reader turns the page to the color spread, up pops a 6-in.-high, five-story glass headquarters for a mythical paper-products company. Surrounding the headquarters building is a corporate park that includes a paper-products mill and manufacturing and distribution center (minus roofs so that activities inside the buildings can be seen in surprising detail). Across the top is the theme "Together with Honeywell."

"This is the first time we've done corporate advertising that stresses the integration of all Honeywell's divisions," said Jim Read, senior vp-advertising director for the Minneapolis-based company. "In the past we've advertised the information, building controls and communications divisions' products separately, but not the interfacing of those systems."

The ad will appear in the full run of *Business Week*, with its 856,000 circulation. With overage allowances for copies spoiled in printing and Honeywell's desire to have several thousand to use for internal projects and a direct-mail campaign later, about 1 million copies of the four-page ad have been produced.

What backed up the schedule was the need for *each* pop-up spread to be hand-constructed, a process requiring 20 different glue points.

"For what we're spending, we could have bought two 30-second spots on the Super Bowl," Mr. Read said, "but I doubt that would have had more impact than this."

"I certainly wouldn't want to have to rationalize this ad on a cost-per-thousand basis," said Tom Wolf, BBDO vp-management supervisor on the account. "But we needed to do something that would draw attention to our message, and on that basis I'm confident we've succeeded."

Returning to the drawing board in November, art director Rich Nead and copywriter Ann Olson saw creative use of pop-ups in a children's book and suggested that approach. The agency created a solid mockup of the proposed ad. Mr. Wolf, senior vp-creative director George Hermelink and account supervisor Jennifer Grismer then ran it by Honeywell executives.

"They loved it, which I think was a pretty gutsy move by a conservative company—and I mean that as a compliment," Mr. Hermelink said. "They're a company that is well known and respected in its niche, but which has kept a fairly low mass-market profile. But they supported the idea from the start."

The agency brought in illustrators Dave Olmstead (who worked on the tower) and Jan Wellem Boer (who concentrated on the mill buildings) to do the artwork, which took 3½ weeks. Production manager Emmett Morgan took it from there, working with Intervisual Communications, Los Angeles, the design and assembly supplier.

The BBDO team said it considered using a microchip in its print ad, an approach competitor IBM Corp. recently used in France to create an ad that lights up and plays music (AA, April 25). They rejected it, Mr. Wolf said, because it was "too great a 'stretch.' It didn't tie constructively to what our client produces. I'm not sure that ad ties to what IBM does, either."

IBM's musical ad cost $2 apiece to produce; Honeywell's, about $1.#

CORRECTIONS & CLARIFICATIONS

- Minnesota Opinion Research Inc., Minneapolis, conducted the media credibility survey for the American Society of Newspaper Editors (AA, April 22, P. 118). An article misidentified the company as Media Opinion Research. Clarifying another aspect of the report, the survey found 24% of respondents said paid ads contained more opinion than the rest of the daily newspaper with which they were most familiar, 62% said the paid ads carry "about the same" degree of opinion and 14% found them to contain "less opinion." The article incorrectly attributed those percentages to readers who wanted more, about the same and less opinion, respectively, in paid ads.#

Final figures: 1984 ad spending up 16%

By ROBERT J. COEN
Senior vp,
McCann-Erickson

Final figures for 1984 U.S. advertising confirm what had been expected ever since the current economic expansion started two years ago.

A year ago it was apparent that with 1984 being an election and Olympic year following immediately after the beginning of a strong economic recovery, we could be assured of excellent ad spending increases. In terms of advertising revenues, this resulted in a $12 billion-plus surge for this industry, representing 16% growth.

A year ago, the only caution about 1984 related to the possibility of a slackening in the economy and a moderation of some ad budget increases after the exceptional gains posted in 1983, but we still expected a very healthy growth of 14%. The final returns now show an increase that exceeds 16%, which is even more outstanding in light of last year's relatively low inflation rate.

Therefore, the real dollar growth in advertising spending in 1984 was the second-highest since the end of World War II. In constant dollars, advertising grew by about 12% in 1984, compared with the record, in recent history, of slightly more than 13% in 1976, also an Olympic year and a year of strong economic recovery, which was also our country's bicentennial.

The slight hesitation in the economy in one quarter of 1984 had practically no influence on ad budgets, except for a few isolated cases. Established national marketers increased their activity in '84 and new products and new marketers appeared to add more steam to the expansion.

Local retailers returned to much heavier promotional activity last year as their business optimism improved in direct relation to better consumer sales levels.

New media breakouts

This year, for the first time, an advertising spending figure for the cable tv medium is shown separately in the advertising volume table. Previously, any money spent for advertising on cable feeds was included in the miscellaneous category. Although cable ad revenues are still relatively small and reporting on them is still limited, it is felt they will grow significantly in the next few years and, therefore, should be monitored and reported separately.

Another media sector that has been gaining significant advertising is barter-syndication. The producers of certain syndicated programs retain some commercial time slots in return for reduced program charges to the carrying stations.

Essentially, spot tv commercial time on a station is bartered for tv program material. The syndicated program's producers sell the retained commercial time directly to national advertisers. These barter-syndicated ad dollars were not previously reported by the stations as spot tv advertising revenue, and they were assumed to be covered by our miscellaneous estimate. Now we have developed estimates of the ad revenues that are spent in this sector, and the figures are reported separately.

Barter-syndication is a significant new development on the media scene, and it is growing quite rapidly. The reported estimates have been derived from extremely limited hard-data sources, and they can hardly be described as much more than horseback guesses.

It's hoped that interested professionals involved with barter-syndication will finance the development of more objective measurements of the true dimensions of this new sector so that we can track its development accurately.

However, there is an upper limit to the amount of station time available for bartering and, if reliable measurements cannot be provided, it will be fairly easy to adjust the miscellaneous category estimate to accommodate its approximate size.

Post-Olympics broadcasting

As 1985 unfolds, many of the broadcast media are being forced to compare their ad growth with last year's exceptional performance. Post-Olympic broadcast advertising traditionally slows down simply because of the exceptional performance in the previous year.

Although it was expected that last year would turn out to be a good year for the broadcast media—especially network tv—because of the Olympics and the election campaign, the performance of all sectors of tv far outpaced expectations.

In dollar terms, this meant a 21.5% increase in revenues for the network tv medium. That's the best yearly performance since 1976, when advertising figuratively exploded after stagnating in the early half of the 1970s due to various economic and political conditions. In contrast, the exceptional performance for net tv in 1984 came on top of a string of very good prior growth years.

Local ads and the consumer

Before 1983, local retail advertising and classified volume performed sluggishly but then turned upward in '83 and '84. The excellent performance in terms of local newspaper and local broadcast advertising in 1984 is explained by the strong consumer economy and the reappearance of intense competition for the consumer's personal spending in the local marketplace.

In 1985, consumer spending should be up in real terms. The stronger sector in total ad spending in '85 probably will result from the continued momentum in advertising promotions at the local level combined with further growth in classified-help-wanted and real estate activity.

Caution for national ads

National marketers have increased their budgets at an exceptional pace for the last two years. The total economy in 1984 rose nearly 7% in real terms and in current dollars by close to 11%, but advertising continued to take on a more important role in the marketing process as it again far outpaced economic performance.

However, a more cautious outlook is suggested for this year.

The economic recovery, which got under way more than two years ago, is beginning to show signs that it is running out of steam. In 1985, many national marketers are beginning to anticipate waning profit expectations, and they are viewing their ad budget increases with growing concern.

Nevertheless, we probably shall experience some unanticipated new advertising demand, as we have nearly every year for almost a decade.

New-product plans and introductions already on the drawing boards are not likely to be affected by a gradual moderation in the rate of economic expansion. Much of last year's momentum will continue this year, and advertising growth should still manage to outpace economic growth.

In summary

The final figures for 1984 prove that it was one of the best growth years for U.S. advertising since the end of World War II. Ad spending rose by $12.2 billion to $88.08 billion—an increase of 16.1% over 1983. Although the increase is well below the record gain of 19.4% in 1976, the differential nearly disappears when we adjust for a much lower rate of inflation in '84 than in '76. Last year was definitely a boom year for advertising, and a more moderate growth rate must be expected for 1985.

We do not expect last year's boom to be followed by a bust, but we look for a much closer relationship between economic growth and advertising growth.

In spite of these cautions, it appears very likely that advertising growth will still manage to outpace the expected growth of 7.5% to 8% for the gross national product in 1985.

Ad spending probably will rise by close to 10% in 1985, with the grand total for all media rising to more than $96 billion. In 1986, the U.S. ad industry will pass the $100 billion level.#

National advertising index - 1984

The McCann-Erickson national advertising indexes are key barometers of the month-to-month changes in national advertising spending. These indexes are seasonally adjusted measures of the monthly advertising revenues for the major national media. The general index is a composite of net tv, spot tv, magazines and newspaper expenditures by national advertisers, and 1967=100. *Source: McCann-Erickson*

'SI' gets Vedder award

CHICAGO—*Sports Illustrated* continued the Time Inc. "tradition" by winning the second annual Blair Vedder Award sponsored by Needham Harper Worldwide.

The company's flagship magazine—*Time*—won the award last year.

The award honors magazines offering advertisers "the most innovative, flexible and imaginative" way to match marketing needs with the publication's editorial environment.

Mike White, senior vp-media director at Needham here and one of seven judges in the competition, cited *SI's* Olympics preview issue as one example of advertiser tie-ins: Those who bought space in the issue also were given trips and tickets to the Olympic Games for clients and salesmen.

Sports Illustrated has chosen Northwestern University's Medill School of Journalism, Evanston, Ill., as the recipient of its $1,000 award money.

Other finalists were *Bon Appetit*, *Parade* and *Southern Living*.#

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS/SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA/NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page.....
   Width and Depth in Inches.
2. Determine Square Inches of Page.....
   Multiply Width by Depth Inches.
3. Determine the Number of SAU Inches of Page.....
   Divide the Square Inches by 2.0625 (SAU inches).
4. Measure the Total Lines of the Page.....
   Multiply Column Depth Agate Lines by the Number of Columns on the Page.
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches.....
   Divide the Total Lines of Page by the Number of MRCS/SAU Inches of the Page.

Bingham battle rattles Louisville media

By WILLIAM F. GLOEDE

In Kentucky, a land of grace, gentility and gender gaps, Sallie Bingham does not fit in.

Though she is graceful and something of an aristocrat by birth, she's also a feminist. When her father and brother forced her and her sister off the boards of directors of the family publishing, broadcasting and printing companies in 1983, she deplored the ousters as sexist and decided to act, regardless of the kinships or the future of the family businesses.

The result has been a genteel but bitter family squabble over the Bingham companies that Ms. Bingham's broker believes could lead to the sale of one of the last major-market, family-owned newspapers in the country. Ms. Bingham is trying to sell her approximately 18% share in the family companies, though no buyers have yet come forth.

Others, however, believe none of the other family members would even entertain offers to purchase the family companies.

The Bingham family owns the Louisville Courier-Journal & Times Co., which publishes the *Courier-Journal* and *Louisville Times*; WHAS Inc., which operates WHAS-TV and WHAS (am and fm), and Standard Gravure Co., a major printing company in the Southeast. All of the holdings are based in Louisville.

"I made it clear to everybody in the family that I was not going to take this lying down," she said in an interview with ADVERTISING AGE.

She hired Shearson Lehman/American Express to evaluate her holdings shortly after she was voted off the board of directors in late 1983. She believes she was voted off the board in a sexist maneuver that was designed to strengthen the board of directors—with men. The men in the family, she believes, look upon their female relatives as "the girls" who "are interested only in money."

Shearson, after evaluating her holdings, came in with a figure of $21 million, discounted 60% because it represented a minority position, she said.

Ms. Bingham, 48, considered that too low. More recently, she hired John Morton, newspaper analyst with Lynch Jones & Ryan, Washington, to reevaluate the worth of her holdings. He put a figure of $42 million on her stake.

"I assumed the family would buy me out," she says. But the Binghams did not. They rejected her offer, and posed none of their own. This was, she says, "a gross error in judgment."

The three companies, by the estimate of Ms. Bingham's broker, Henry Ansbacher Associates, New York, are worth between $420 and $470 million.

Her 18% stake, as a minority position in the companies, includes only 5% of the voting stock and would not necessarily be worth the $82 million-to-$92 million price tag Ansbacher has attached to her holdings, unless someone else in the Bingham family—or the lawyers that control stock that is held in trust for fourth-generation Bingham progeny—follows her lead and sells. That's what Ansbacher and Ms. Bingham believe may happen. Others who are close to the family, however, believe it is Ms. Bingham's impossible dream.

Ms. Bingham said she believes "it's a possibility" that her sister, Eleanor Bingham Miller of Louisville, may be willing to sell her 18% stake, portions of which also are in trust. Ms. Miller could not be reached for comment.

Ms. Bingham said when Barry Bingham Sr., the 79-year-old chairman of the companies, acted earlier this year to consolidate the voting shares in the company in a trust he controlled, Ms. Miller "made it perfectly clear she would not sign it if she couldn't sell."

That trust, however, controls only the election of members of the board of directors. Ms. Bingham's sister-in-law, Joan Bingham, the publisher of *Washington Weekly*, controls another 18% of the companies' stock in a trust set up for her children. Her husband, Robert Worth Bingham, was Barry Bingham Sr.'s heir apparent until he died in an auto accident in the early '60s. Joan Bingham is not likely to sell, according to Sallie Bingham. Sallie said Joan wants her children to participate in the family companies.

"I very much want to keep this a family [owned] newspaper," said Joan Bingham in a telephone interview. She said she believes Sallie and Ansbacher have "skewed" information regarding the manner in which the Bingham family trusts are set up. And she believes a price of between $82 million and $92 million "is a laugh. I think it's just preposterous."

Barry Bingham Jr., who at 50 is the publisher of the newspapers and holds another 18% of the family companies, also with portions in trust, has been on educational sabbatical in New England since September. Mr. Bingham "doesn't like newspapers," according to Sallie Bingham. Mr. Bingham could not be reached for comment.

"He's been carrying an enormous load," she said. "I think there's a chance he may look at this as a way out, [but] he'd have to get my father to agree."

And that may not be possible, she concedes. "My father is deeply committed to keeping it a family newspaper. His hope is to preserve the company for his seven grandchildren."

However, there are parents and lawyers who are charged with the duty of watching out for those grandchildren, and they're bound by fiduciary responsibility to run the trusts in the manner most beneficial for the trustees. That's what Ansbacher is counting on in its bid to get between $82 million and $92 million for Ms. Bingham's stock.

As explained by Christopher Shaw, managing director of Ansbacher, Ms. Bingham's 18% stake now generates $300,000 a year in pretax dividends. If she got her price, and paid roughly $25 million in tax, the $60 million or so that she would net would generate nearly $6 million annually in simple interest. That's a return 20 times greater than the stock is now producing, and Mr. Shaw believes the lawyers and family members who control the trusts are bound to consider that if a media company or other party makes an offer of $420 million to $470 million for the Bingham family holdings.

George Gill, president of the Courier-Journal & Times Co., explained that Mr. Bingham Sr. controls 77% of the voting stock in the companies (minus only Sallie's share), but that voting stock is applicable only to the election of the board. Another 18% of the voting stock is in a trust set up in 1937 upon the death of Mr. Bingham Sr.'s father, Robert Worth Bingham, also controlled by Mr. Bingham Sr.

Mr. Gill would not comment on the trusts set up by individual family members. He also would not comment on the possibility that an outsider could acquire the Bingham family companies.

Ms. Bingham believes that if a "white, middle-aged male" were to come to the Binghams with an offer, "I think there would be at least a chance that my father and brother could deal."

Fifth artificial-heart patient dies 10 days after implant
Class act
A Derby Calendar

Sallie Bingham, rejected by her family as a director, may exact revenge if her broker can muster a $420 million-plus offer for the three Bingham family companies, including the flagship *Louisville Courier-Journal*.

Therein lies the base of the family feud.

"There is a profoundly sexist bias," said Ms. Bingham. "I don't think there's any other way to look at it."

The entire "ruckus," as she calls it, "has to do with the way families malfunction. I think nepotism doesn't work very well."

She does regret what the business battle has done to her family.

"The family stopped communicating," she said. "There's a silent acrimony. My family, like a lot of southern families, does not argue verbally.

"All my father said to me is he's heartbroken. He didn't want to have to choose among the children."

But that doesn't mean he will yield, she said. "I think he will fight tooth and nail."#

Dailies

(Continued from Page 3)

circulation gains since his News America Corp. bought the paper in the mid-'70s, experienced its largest circulation loss to date in the April 1, 1984, through March 31, 1985, period. The paper lost more than 60,000 daily sales during that period, a drop of 6.4%, to 901,313 daily sales.

The *New York Daily News*, the *Post's* primary competitor, posted a 1.1% increase in circulation between March 31 last year and the same date in 1985. The paper's circulation was up by roughly 15,000, to 1,390,955. The Sunday *News*, however, lost 2.2% of its circulation, now at 1,773,676.

The *New York Times* posted healthy increases in both daily and Sunday sales, with the daily figure up 4.4% to 1,013,211 and the Sunday figure up 1.9% to 1,623,562.

Times-Mirror Corp.'s Long Island *Newsday*, which also sells newspapers in New York, gained roughly 9,000 daily sales, a 1.6% increase, to 542,073 from the March, 1984, FAS-FAX report, and added about 3,000 sales on Sundays, a 0.4% gain to 611,403.

In Chicago, the *Tribune* and *Sun-Times* each gained 1.7% in daily circulation from the year-ago period, with the *Tribune* reaching 775,664 and the *Sun-Times* hitting 639,187. Despite circulation promotion contests begun under the stewardship of Mr. Murdoch, who bought the paper in November, 1983, the *Sun-Times'* daily circulation still is below that posted two years ago, though it has increased in the last year.

On Sundays, the *Tribune* widened its lead with a 1.8% gain, to 1,165,605. while the *Sun-Times'* numbers were up 0.5%, to 690,904.

All three Los Angeles-area dailies posted small percentage circulation gains with the exception of the *Herald Examiner*, which lost 2.7% in Sunday circulation (now at 213,898), though gaining 0.3% daily, to 237,424.

The Times-Mirror flagship *Los Angeles Times* gained 1.1% daily, to 1,069,564, and 0.8% Sundays, to 1,332,138. Tribune Co.'s *Daily News* gained 2.7% daily (to 145,523) and 1.4% Sundays (165,119).

Mr. Murdoch's *Boston Herald* circulation was up 13.2% daily to 368,027 and up 11.7% Sundays to 308,823. The *Boston Globe*, owned by Affiliated Publications, posted a slight daily circulation increase to 542,073 daily and a 1.2% increase to 802,891 on Sundays.

In Washington, the *Washington Post* gained slightly in daily sales, now 771,253, and gained 2% on Sundays, now 1,065,782. The *Washington Times*, owned by the Unification Church, appeared in the audit report for the first time with a daily sales figure of 83,962.

The hotly contested Detroit paper wars saw Knight-Ridder's *Free Press* catching up with the rival *News* in daily circulation but suffering Sunday losses, in part due to a January price increase from 50¢ to 75¢. (The *News* followed suit in April, after the latest circulation reporting period.) The *News* gained 2.7% in Sunday numbers, to 884,763, while the *Free Press* lost 1.1% Sundays, to 778,178.

Free Press numbers were up 2.4% daily, to 646,476, while the *News* also gained 1.5%, to 666,949. The *News* sells for a nickel more than its rival daily.

Newspapers in Texas markets showed combined net readership gains.

The *Dallas Morning News* dramatically widened its circulation lead over the Times-Mirror owned *Dallas Times-Herald*, with daily circulation at 368,683 and Sunday circulation at 476,004, showing 10% gains in both categories. The *Times-Herald*, meanwhile, lost 6% daily and 1% Sundays, finishing the March 31 period at 241,055 and 345,932, respectively.

In Dallas County circulation, the *News* overtook the *Times-Herald* on Sundays for the first time. (Previous-year numbers for both Dallas papers were adjusted by the ABC to reflect audited figures.)

The *Houston Post* did not report its figures by ABC's deadline, nor did the *Baltimore News-American* or the *Denver Post*.

The *Houston Chronicle*, however, gained 1.4% in daily circulation, to 433,580, and 1.2% on Sundays, to 536,585.

The Scripps Howard-owned *Rocky Mountain News* in Denver showed greater increases of 3.2% daily (to 329,381), and 4.6% Sundays, to 385,807. (Like Dallas, the March, 1984, averages for Denver also were adjusted to the ABC's audit.)

The *Baltimore Sun* posted a 4.8% increase in morning daily sales, now 194,426; a 5% loss in afternoon daily sales, now 155,475, and a 1.6% Sunday increase to 414,330.

The joint operating agreement between Chronicle Publishing Co. and Hearst Corp. in San Francisco registered gains at the morning *Chronicle*, up 2.8% to 554,979; a slight loss at the afternoon *Examiner*, now 151,758, and a 1.5% increase in the Sunday *Chronicle & Examiner*, now 717,426.

Across the bay in Oakland, publisher Robert Maynard posted the first circulation increase in years at the *Oakland Tribune*, which was up 1.5% daily to 150,336 and up slightly on Sundays to 156,944.#

Defending themselves

Grunts and groans at Campbell-Mithun, Chicago, aren't coming from overworked artists or noontime aerobics instruction. They come from women employes taking self-defense classes from veteran copywriter Mike Vassolo. *See Page 4.*

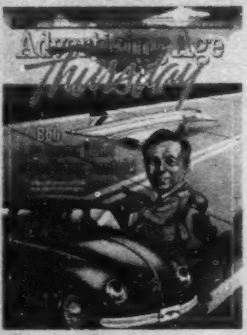

Illustration by Steve Boswick

A big move

No recent ad agency job change has been as highly charged symbolically as Robert Levenson's move this month to Saatchi & Saatchi Compton, New York. After 26 years, Mr. Levenson left Doyle Dane Bernbach International, where he not only was one of the agency's great copywriters, but also the creative executive most identified with the late William Bernbach. *See Page 5.*

Bless you, Saatchis

Saatchi & Saatchi Compton is turning its Detroit account-service outpost into a full-service agency to coincide with client Jeep Corp.'s fall *launch of Comanche, a pivotal effort to enter the* two-wheel-drive pickup market. *See Page 11.*

Advertising that's kosher

Adman J.J. Gross is a black sheep turned shepherd. With his knowledge of the New York Orthodox Jewish community, having been a rabbinical student, plus fluency in Yiddish and Hebrew, he handles some tricky accounts. *See Page 52.*

Special Report

The affluent market

Appealing to the affluent takes special positioning and careful references to status, emotion and other abstract qualities. Tactics marketers use are studied in the Special Report on Marketing to the Affluent, starting on *Page 15.*

Presstime

Nadler to absorb LCF&S

New York—Nadler & Larimer reportedly will absorb LCF&S, another Mickelberry Corp. agency, and rename the agency to reflect the new management. Thus, it is expected to be called Calvillo, Goldberg & Shevack for Nadler president Rick Calvillo, exec vp Irwin Goldberg and LCF&S president Brett Shevack. LCF&S had functioned as a unit of Mickelberry's Laurence, Charles & Free agency.

Christian Dior tags Chiat

New York—Christian Dior has named Chiat/Day to its $3 million account (AA, April 15). Chiat/Day reportedly has the option to continue working with photographer Richard Avedon, who is responsible for the current Dior campaign. Chiat/Day did not present specific creative ideas; sources said agency chairman Jay Chiat was "impressed with the previous 'Three Diors' campaign," also by Mr. Avedon. Sources said the next campaign will likely be more like "Three Diors" than the current product campaign. J. Walter Thompson USA previously handled.

Kliger suits 'GQ'

New York—*Gentlemen's Quarterly* will name Jack Kliger as its publisher, effective later this month. Mr. Kliger is associate publisher at *California*, Beverly Hills, and a former *GQ* West Coast advertising manager. At *GQ*, he will succeed Steven Florio, who is now exec vp at The New Yorker Magazine Inc., and publisher, *The New Yorker*, new posts created following shareholders' approval May 7 of the company's acquisition by Advance Publications (AA, May 6).

Seafood gets $12 million

Camden, N.J.—Campbell Soup Co.'s Mrs. Paul's Kitchens has set an ad budget between $10 million and $12 million for the rollout of Seafood En-Croute, a five-product line of frozen fish-in-pastry entrees. The line has been testing for four months in Albany, Atlanta and New York and may roll national within nine months, a spokesman said. Needham Harper Worldwide, Chicago, handles. The company also has begun testing a five-item line of individually quick-frozen raw fish fillets in Chicago, Dallas and Detroit.

Haagen-Dazs into sorbet

Minneapolis—Pillsbury Co.'s Haagen-Dazs unit next month introduces nationally Sorbet & Cream, creating a new dessert category combining ice cream and sorbet products. McCann-Erickson, New York, handles.

Le San*wich ads move up

Deerfield, Ill.—Kitchens of Sara Lee on May 27 breaks tv spots for its Le San*wich line of filled croissants (AA, Jan. 21). A freestanding coupon insert supports on June 9. Sara Lee says it has moved up the campaign from its originally planned July kickoff because of high retailer interest. Foote, Cone & Belding, Chicago, handles.

Nissan account splits

Los Angeles—Nissan Datsun Dealers Assn. of Southern California has split its $5 million ac-

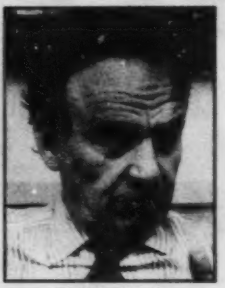
Murdoch move sets stage for fourth network

By Verne Gay

New York—Rupert Murdoch did not simply sneak into the tv business; he pounced.

The Australian publisher and his partner, oilman Marvin Davis, with their $2 billion acquisition of Metromedia's tv stations became—overnight—the biggest group broadcasters this side of the network-owned station groups.

That is no small feat in itself, but its consequences are enormous. There was immediate talk that Mr. Murdoch would seek the longtime dream of Metromedia: The formulation of a viable fourth tv network. There were insurmountable stumbling blocks for Metromedia in that quest, and those same problems no doubt will beset Messrs. Murdoch and Davis. But owning the Metromedia station group and being able to forge a synergy with other entertainment properties such as 20th Century Fox, gives the newcomers leverage that most in the tv business will never acquire.



R. Murdoch

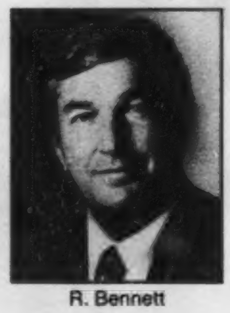
There will be no first-run syndication scheme that won't have to clear Mr. Murdoch's forces to have a fighting chance to succeed. If knowledge be power, Mr. Murdoch will be a very powerful tv force indeed. And the station group, with its nearly 20% U.S. tv household clearances in six major markets, will provide the financial underpinnings for any original tv project Mr. Murdoch believes has a chance to attract and hold a mass audience.

J. Kluge

If his record in newspaper publishing has proven nothing else, it has shown Mr. Murdoch is a master at understanding and exploiting all those things that appeal to the masses. Some observers fret that Mr. Murdoch will treat tv as he treated the print media. But there is something those observers have overlooked. In newspapers, Mr. Murdoch was hit by critics from the medium who felt the Australian was downgrading a proud and noble forum for information.

At the *New York Post*, the story goes, upscale retailers balked at his pitches for advertising.

Bloomingdale's allegedly told one of his executives, "Your readers are our shoplifters." Now, with his tv clout and reach, Mr. Murdoch can tell Bloomingdale's, "Your shoppers are our video pirates."



R. Bennett

Mr. Murdoch appears to be gravitating toward the realization that tv, not publishing, is his true home. Tv is purely the selling of tonnage. People are rewarded for delivering high audience numbers, and even someone as noble as NBC's entertainment president Brandon Tartikoff, who stuck by "Hill Street Blues" and "Cheers" and "St. Elsewhere's," will admit that it was the "A-Team" that started to turn things around for the network.

Mr. Murdoch understands such things without remorse. He can be expected to excel in tv as an idea man, and the leverage in the industry that he purchased for that $2 billion merely insures that he will have the power to execute that instinct for mass appeal which he has so finely honed in print.

Mr. Murdoch's interest in tv was demonstrated by Skyband, a U.S. direct broadcast tv venture now on hold. But now he's apparently become convinced regular broadcast is the way to go.

There can be little doubt of Mr. Murdoch's determination. He will seek U.S. citizenship to comply with U.S. policy barring foreign control of tv and radio stations (AA, May 6), a step likely to complicate his status as owner of Australian tv interests. *(See related story on Page 55.)* And by seizing the chance to acquire tv stations in New York and Chicago, he runs the risk—a high risk, say many—of being forced by the U.S. government to sell or close his flagship U.S. newspapers—the *Post* and the *Chicago Sun-Times*. Federal Communications Commission policy aimed at insuring local media diversity bars common ownership of tv stations and newspapers in the same market.

Already, Murdoch bankers have been directed to find a buyer for another of his print properties, New York's *Village Voice*.

Another Murdoch paper, the *Boston Herald*, is safe from a government-ordered sale. The seventh Metromedia station in the deal, Boston's WCVB-TV, will be sold by Messrs. Murdoch and Davis for $450 million to Hearst Corp., from whom Mr. Murdoch acquired the *Herald*.

(The newspaper-tv combinations of a major Murdoch competitor, Chicago-based Tribune Co. [the *New York Daily News* and WPIX-TV, and the *Chicago Tribune* and WGN-TV], predate the cross-ownership ban and are allowed to operate under a "grandfather" clause).

Murdoch has yet to announce his intention to build a fourth network to rival NBC, CBS and ABC, but many believe he has the compo-

(Continued on Page 55)

Auto makers use soft sell to move soft ride

By Ralph Gray

In the battle for dollars from the affluent, luxury cars compete against condominiums, boats, vacations and other expressions of the wealthy life style. Despite the competition, the sell is as soft and elegant as some of the vehicles, with the genteel tone of the marketing masking a brawl for sales and share.

Ralph Gray is a longtime automotive expert, a former ADVERTISING AGE *Detroit bureau chief and currently a relaxed free lance writer.*

Some mass media advertising is used, but the emphasis is on a sharpshooter target marketing. Cadillac is the volume leader in hitting the small bull's-eye, yet it accounts for only 2.9% of total U.S. sales. Import luxury cars account for less than 1% of all U.S. car sales.

The buyers of luxury cars are well past the need for just a set of wheels. "Nobody needs to buy a Porsche," says John Cook, president-chief executive officer of Porsche Cars North America, Reno, Nev.

While *need* may not be the motivating factor behind a purchase, luxury auto marketers are working hard to convince consumers they *want* a certain model. The marketing shots are being fired from both sides of the Atlantic. Ford Motor Co.'s battle tactics include bringing over cars made by its European affiliates.

General Motors' Cadillac division, Detroit, will offer about a $50,000 convertible in the fall of 1986 that will have a distinct European influence. The convertible's body (termed coachwork at those prices) comes from Pinifarina of Italy and will be mated to Cadillac underpinnings.

Cadillac named the car Allante, thinking the word sounded like a nice combination of sporty and elegant.

"Allante is targeted at the European imports, but we are not looking for high volume," says John Grettenberger, general manager of Cadillac and a General Motors vp.

"Allante is not designed to move Cadillac's market share as a result of its presence," Mr. Grettenberger says. "The idea is to bring European craftsmanship from the body-builder side to the high-tech world of the new Detroit plant."

In another move to compete against the power of imports, Cadillac installed a V-6 engine in the Cimarron subcompact, which was designed to appeal to BMW buyers. But until the new engine was installed, the Cimarron was underpowered against that rival.

> **"We have a wave of the affluent—not only yuppies, but people who represent gold plate."**
>
> ***—Hans Riedel BMW***

"That package equals some of the high-price imports, like BMW, that we wanted to compete with," Mr. Grettenberger says.

Cadillac's conquest rate for Cimarron and the Seville, the highest price Cadillac, is rising from 2% to about 9% in some parts of the nation, he says. A conquest is when a Cadillac buyer turns in a competitor's car in trade.

While BMW is considered by some to be the ultimate yuppiemobile, BMW says it isn't limited to those buyers. "We have a wave of the affluent—not only yuppies, but people who represent gold plate," says Hans Riedel, vp-marketing BMW of North America, Montvale, N.J.

BMW raised its sights on a bigger potential market by offering larger, more powerful cars in its 600 and 700 series. Sales in February ran 25% ahead of the year-earlier period. Many of those sales came from the top of the line.

Ford's Lincoln-Mercury division, Detroit, has found its Lincoln customers, in general, are "people who reward and indulge themselves and who want to be seen having youthful, contemporary and responsible values," says Mary Ann Roberts, L-M media coordinator.

Lincoln recorded sales of 82,035 for the first half of the 1985 model year, up 36% from the previous year, and Ms. Roberts knows who bought what.

Buyers of the Continental, an intermediate luxury car, have annual incomes of about $50,000 and are about 50 years old. The Mark VII aerodynamic coupes attract buyers 15 years younger than the Continental's buyers. The Mark VII buyers have about the same earnings. About 60% of Lincoln buyers are male.

To reach these buyers, Lincoln uses a personalized direct mail program, Ms. Roberts says. For the past three years, Lincoln has sent 500,000 direct mail

pieces to domestic and import luxury car owners.

"The response has been tremendous. Upwards of 17% have bought Lincolns," Ms. Roberts says. "That's three times the buy rate of a control group which did not receive mailings."

The direct mail campaign, prepared by Young & Rubicam, Detroit, seeks to address specifics such as that in followup mailings. "We suggest you question the myth of European supremacy in automotive engineering," one brochure is titled. Other brochures address quality and warranties, luxury touches and technology. By the third mailing in the series, the prospects are getting information on specific cars.

Lincoln sales are up and so is market share for the early months of 1985, rising to 1.6% from 1.2% for the similar period in 1984. "Lincolns have shown the greatest gains in the luxury segment over the past two years. The Mark VII has retained the two-door business, and the Continental is setting new records in the midsize luxury market," says L. Ray Windecker, market analyst with Ford.

"The Town Car serves the traditional Lincoln market so all the bases are covered," he says.

That kind of closely disciplined target marketing is typical of the way luxury car marketers slot their efforts.

"Media for luxury cars is often regionally based. We want to place media in the pockets of affluence," Ms. Roberts says. That includes financial, life style and some automotive enthusiast publications.

Lincoln's biggest departure from traditional car advertising is its tie to classical music through the Lincoln's Music in America radio series. The weekly program, distributed by the Concert Music Network, New York, previews coming music events ranging from opera to symphonies and the opening of new concert halls.

Auto advertising on Concert Music Network, a subsidiary of Concert Music Broadcast Sales, has increased along with the prices of new cars, says Peter Besheer, exec vp, Concert Music Broadcast Sales, New York.

> **"Media for luxury cars is often regionally based. We want to place media in the pockets of affluence."**
>
> *—Mary Ann Roberts*
> *Lincoln-Mercury*

"We're seeing a greater volume of spot advertising on classical stations. We are more valuable to them as a format than 10 years ago," Mr. Besheer says.

The demographics of classical music listeners are especially favorable to luxury cars marketers, he says. Compared with the average radio listener, classical listeners are 50% more likely to have bought a car in the past year, Mr. Besheer says. They are more than twice as likely to own an imported car and four times as likely to have bought a BMW or Porsche than other listeners. Income levels are generally more than $50,000, and most classical radio listeners are college graduates.

Mr. Besheer says the yuppies "are just a new word for the segment that has always been there."

In addition to classical radio stations, luxury car marketers use sports to strike a chord with affluent consumers. Lincoln-Mercury uses network tv golf coverage. Other marketers get directly involved.

"Our whole sports involvement is driven by research. We've identified the sports our people participate in," says Robert Owens, general marketing manager of Mercedes-Benz of North America, Montvale, N.J.

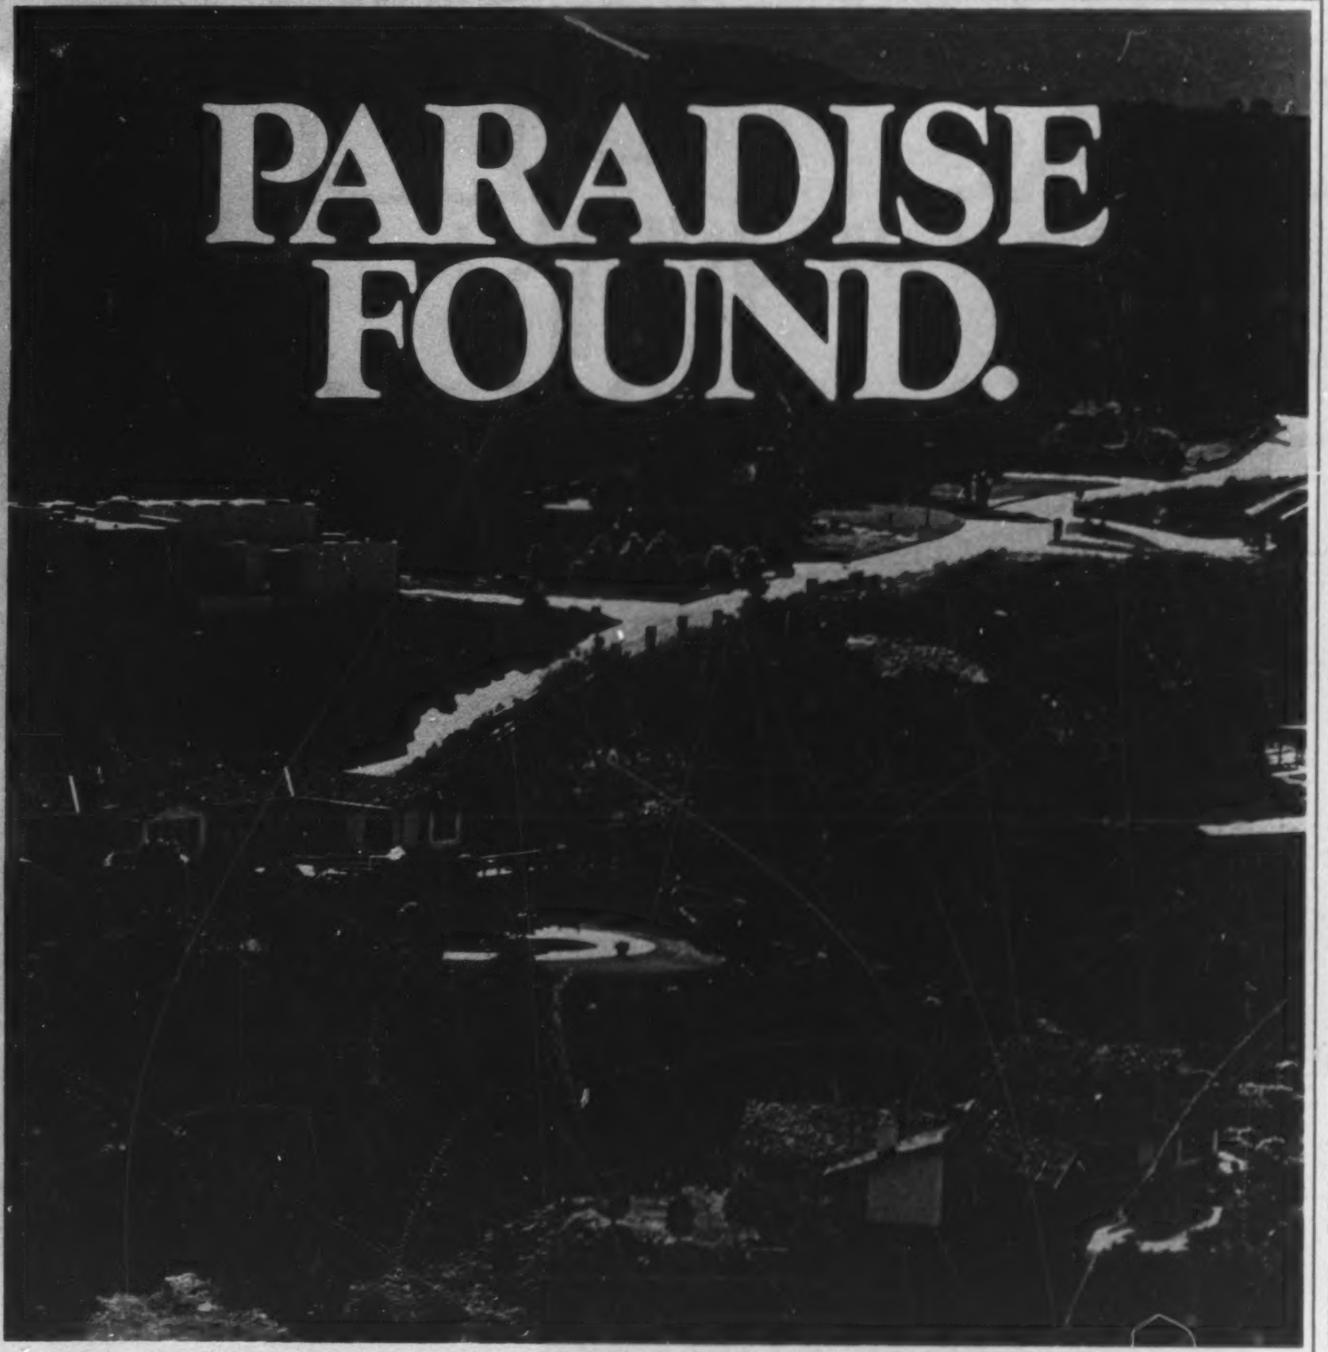
"We know from research that more of our people run than play any other single sport. We also know a high percentage of owners are into horses from the ownership side," Mr. Owens says.

So Mercedes-Benz participates in the American Grandprix Assn.'s horse jumping competitions. Mercedes-Benz is a presenting sponsor in the Mercedes Grandprix Circuit, awarding a car to the top rider and horse owner.

Mercedes-Benz was the sole automotive sponsor for the New York Marathon in 1984 and is in the same position for 1985. College basketball also attracts its tv dollars. Magazine spending equals tv expenditures because Mr. Owens believes it takes long copy to get the message across.

Mercedes-Benz used radio to launch the roadside service program, which provides just that to stricken Mercedes. "So far that program has been enor-

(Continued on Page 24)



Santa Clara County holds the richest 1.4 million consumers in Northern California.

Fifty miles south of San Francisco lies a marketer's dream, the San Jose PMSA (Santa Clara County). Its 1.4 million residents live in the center of what may be the largest concentration of New Money in America, money from high technology.

The average Santa Clara household earns the richest EBI of any metro area in Northern California. That's $33,780 of spendable income per household[2]

Last year, Santa Clara County residents spent over $9 billion among their local retailers with remarkable amounts concentrated in the medium and high priced lines[3]

The only way to reach this seller's paradise effectively is with the Mercury News. The Mercury News reaches Metro San Jose's New Money—52% daily, 5-issue reach 65%. The San Francisco Chronicle/Examiner barely reaches 9% on a good day[4]

So if you're looking for sales, look for the people with money to spend. California's New Money is in the San Jose PMSA (Santa Clara County). That's why the Mercury News produces such heavenly results.

THE SAN JOSE MERCURY NEWS

Reaching Northern California's richest million people[1]

Soft

(Continued from Page 22)

mously successful. People say that's what they would expect Mercedes-Benz to do," Mr. Owens says.

Cadillac has been using horses of only a slightly different color. It sponsors polo. "It helps create awareness," says Frank Cadicamo, director-merchandising, of the sponsorship. The Seville is the official car of Palm Beach Polo.

BMW sponsors polo and tennis matches and is "embarking on cultural events like ballet that are geared to upmarket people," Mr. Riedel says. "We sponsored the first airing on cable [Arts & Entertainment network] of the finding of an undiscovered Mozart symphony."

Tv is mostly limited to news and events like tennis. BMW, through Bozell & Jacobs, New York, is interested in perpetuating its image through targeted efforts, such as direct mail.

But the targeting isn't limited to direct mail. BMW and Jaguar buy spots on a Dallas tv station because the station convinced them that tv, despite its wide appeal, could deliver upscale viewers.

WFAA-TV, serving Dallas-Fort Worth, developed what it calls a Lifestyle Locater to zero in on demographic groups using PRIZM, a method of defining consumer life styles created by the Claritas Corp.; A.C. Nielsen Co. ratings, and data from the Simmons Market Research Bureau, Media Market Research and R.L. Polk & Co., which provides information on car registrations.

"We use the Polk data to analyze and profile the affluent car customer against the PRIZM life-style groups," says Terry Pittman, director-research and marketing for WFAA-TV.

"The 10 p.m. news is the real key. News programs are excellent vehicles for targeting to the affluent," Mr. Pittman says. "The Dallas-Fort Worth area has more of those type of life styles than most markets. We have a 9% greater concentration of households earning over $25,000; we're younger with 75% of adults in the key 18-to-54 age group and better educated—half either graduated from college or attended," Mr. Pittman says, making comparisons with the whole nation.

"Our late news delivers more than twice the number of affluentials [the combination of four PRIZM clusters: Money and brains, furs and station wagons, pools and patios, young influentials] than do the other network affiliates here," Mr. Pittman says. WFAA is an ABC affiliate.

"Our mission here is to explain how tv can be used to target. Doing it on a cost per rating point overlooks the subtleties of the market when you want to reach upscale," he says.

To attract the upscale market, quality of product is paramount for luxury car marketers. "You need to reek of quality and not just in the car," says Michael Dale, vp-sales and service for Jaguar Cars Inc., Leonia, N.J.

He speaks from experience. Quality was Jaguar's Achilles' heel. "We've gone from sales of 3,000 in 1981 to a record 20,000 in the last calendar year. It took 13 months—a year's lag—between the establishment of quality and its perception," Mr. Dale says.

Jaguar used a quality tracking system to accelerate the process. Long telephone conversations were held with customers 45 days, 8 months, 18 months and 32 months after purchase.

"Every time there was a complaint we pushed it back through the field and got service managers to call and cure the complaint," he says. "Very quickly the cocktail circuit was talking about how well Jaguar owners were looked after. We reversed the cocktail conversation that you need two Jaguars—one for the road and one for the shop.

"The market is responsive to doing things right. Promotional efforts are not really the secret of selling high-price car lines; you have to take the long view and satisfy the customer."

How to get inside the homes of the very rich.

No other leading market in America has such a concentration of affluence as metropolitan Washington, D.C. It leads the top ten SMSAs with an average household income of more than $37,000.

Washington also has the highest proportion of college graduates, high-tech people, lawyers, working women—and one of the higher percentages of 25-49 year olds. It's exactly the young, affluent market you're trying to reach.

And from so many upwardly mobile people comes new potential. Washingtonians have the greatest potential to travel more places. Buy more stocks. And use their credit cards more than any other top ten market.

Yet, although Washington leads in so many things, there is one area in which it's well below the average.

Television viewing. Washington's prime time ratings are 16% below the U.S. average.

Instead, the most affluent, educated major market *reads*. And this market reads The Washington Post. Every day, we reach 74% of all Washington adults with household incomes of $75,000 or more.

So, if you want to get inside the homes of those who spend their time spending, you should get inside The Post.

Toasting wealth with sparkling wines

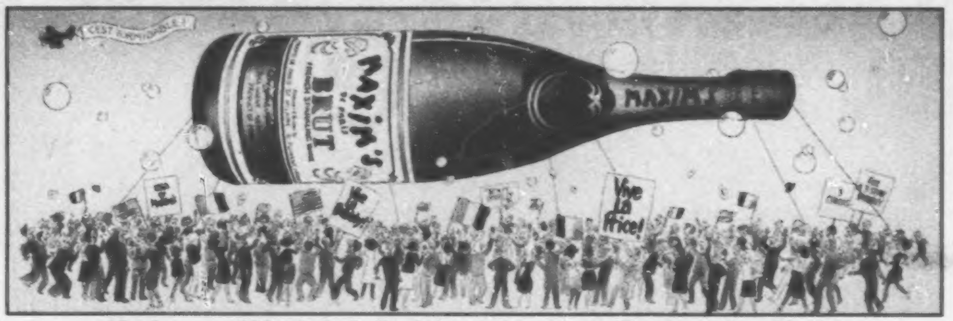
By Len Strazewski

"My God! I'm drinking stars!" With this exclamation, legendary French monk Dom Perignon allegedly discovered the process by which champagne is made.

He probably didn't know that it wasn't only wine he was making, but also a life style for the rich and famous—and aspirants.

Today, Dom Perignon is recognized as the name of the most famous of prestige sparkling wines made in the tiny Champagne area in the north of France and a cousin to such other prizes as Cristal, Fleur de Champagne, Comtes de Champagne and Cordon Rouge.

The American market has learned these names so well that champagne sales have increased more than 30% in each of the past two years, jumping from 7 million cases in 1982 to about 9.7 million in 1983 and 12.8 million cases last year.



Marketers of Maxim's de Paris hope the name will attract the affluent.

Image and price are spurring the growth, says Marvin R. Shanken of M. Shanken Communications, New York. The prestigious image of champagne always has been attractive to the affluent, and the strength of the U.S. dollar abroad has put the highest quality products within the reach of a larger market.

"Sparkling wines are a major growth area," says Mr. Shanken, editor and publisher of New York-based *Market Watch* and *Impact*, publications for wine marketers and the *Wine Spectator*, a newspaper for sophisticated wine consumers. "Sparkling wine has grown faster than any other wine category except wine coolers."

In 1980, sparkling wine shipments in the U.S. totaled 30.1 million gals. and by 1983 had increased to 43.6 million gals., a jump of 45%. For the first nine months of 1984, sparkling wine shipments were up 4.9% over the similar period a year earlier, says Frank Walters, director-research for M. Shanken Communications. Unpublished full-year results indicate substantially more growth, he says.

"We've never had to advertise Dom Perignon," says Clint Rodenberg, vp-group product director at Schieffelin & Co., New York, importer of Moet & Chandon champagnes, including top-of-the-line Dom Perignon. "The market built slowly over many years and we sell on allocation all we can import.

"Dom Perignon has come to be synonymous with the ultimate in luxury. James Bond drank it in movies. Elizabeth Taylor, when she was drinking, drank it exclusively. It became known as the drink of royalty," Mr. Rodenberg says.

Those aspiring to the ultimate luxury status sought out the product, which for many years held a retail price point of about $50.

However, the strength of the U.S. dollar has dropped Dom Perignon to as low as $39 in some areas, but that hasn't hurt sales. Moet & Chandon retains its place as the biggest champagne seller in the U.S. with 375,000 cases in 1984, up 21% from the previous year and up an average of 16% a year since 1979.

Moet does actively promote products other than Dom Perignon, spending about $1 million in spot tv advertising and $1 million in pr. Cunningham & Walsh, New York, manages the advertising.

The next largest champagne label in the U.S. is Mumm, marketed by Seagram Classic Wine Co., New York. For many years, Mumm's vintage and nonvintage Cordon Rouge, named after the French Legion of Honor medal, has been the label's hallmark, priced from $15 to $30 a bottle. If Dom Perignon was the wine a maven drank as a dinner aperitif, Cordon Rouge was what one drank for a seaside lunch at the Cote D'Azur.

"Because of Dom Perignon, we and other high quality champagnes were able to get on the wine list," says John Agate, Seagram's senior product manager. "Then it was up to us to create our own business with aggressive marketing."

The Mumm label has done well, selling 175,000 cases in the U.S. last year, up 17% from 1983, according to Shanken's Mr. Walters. The label has grown so strong that Mumm is taking on Dom Perignon directly this year with a prestige champagne, Renee Lalou, priced comparably. Only about 700 cases will be available for U.S. consumption this year, compared with several thousand cases of the competition.

Seagram's advertises the Mumm's label in publications such as *Architectural Digest*, *Smithsonian* and *Town & Country*. Doyle Dane Bernbach manages the $500,000 ad budget.

Behind these big two champagne sellers are three other competitors, each less than half the size of Mumm and less than one fourth the size of Moet & Chandon.

Final case figures for 1984 are as yet unavailable from M. Shanken Communications, but Mr. Walters places Piper-Heidsieck, marketed by Renfield Importers, New York, as third largest and Perrier-Jouet, marketed by Seagram Chateau & Estate Wines Co., New York, and Taittinger, marketed by Kobrand Co., New York, in "a virtual horse race," for fourth.

Another famous name, Roeder's prestige Cristal, is imported by several companies, but in very small amounts.

Piper-Heidsieck markets three vintage and nonvintage bruts in the U.S. in the $15-to-$30 price range and a very limited prestige champagne, Piper Rare.

Piper-Heidsieck also operates a joint venture with Sonoma Vineyards, Sonoma, Cal., to make two Piper-Sonoma sparkling wines that compete with U.S. sparkling wines such as Domaine Chandon.

Renfield is promoting labels during the 200th anniversary of the winery this year with personal appearances by the winery's founding family and sponsorship of equestrian events around the country. A small print ad budget earmarked for upscale publications, such as *Town & Country*, is managed by Brain Reserve, New York.

Perrier-Jouet also targets affluent publications, with William Esty, New York, managing a $500,000 ad budget, Seagram vp-marketing, John Laird says.

Known for its enameled floral design on the bottle, Fleur de Champaign undersells Dom Perignon by a few dollars and is also available in gift sets with enameled champagne glasses.

Sales were up about 20% to about 50,000 cases for all Perrier-Jouet champagnes in 1984, Mr. Laird says.

Closing in on the leaders with sales of nearly 50,000 cases is Kobrand's Taittinger label. Like Moet & Chandon, Taittinger has carved out a prestige reputation with Comtes de Champagne, which wine critics rank with Dom Perignon.

A rose Comtes de Champagne is also available in limted quantities, usually priced about $55. The rose is developing a strong following among wealthy champagne drinkers who continue in their search for another distinctive wine, senior vp-marketing Richard Shriner says.

Sparkling

(Continued from Page 30)

The Comtes de Champagne and other Taittinger wines, which include the usual second-tier price ranges of about $10 to $30 a bottle, are advertised in upscale publications such as *Bon Appetit, Institutional Investor, Town & Country* and *Travel & Leisure*. Jordan, Case, McGrath, New York, manages an undisclosed ad budget.

The premium French champagnes, however, do not have a stranglehold on affluent consumers and aspirants. From the low end of the price spectrum, $4 to $8, Italian asti wines under the Fontana Candida, Gancia and Martini & Rossi labels and Spanish sparkling wines such as Freixnet, Cordiniu and Paul Cheneau compete for everyday consumption.

At the low to medium price points, the champagnes also are getting competitive pressure from nonchampagne French sparkling wines from the Loire Valley and other wine regions.

New this year, for example, is Maxim's de Paris, a Loire Valley product, marketed by Dreyfus, Ashby & Co., New York.

Dreyfus, which has an exclusive license to the name of the famous Parisian restaurant for wine, hopes an affluent and aspirant market will respond to the name and the price point of about $7, marketing director Steve Sarle says.

The strongest competition for the affluent market comes from California wineries, some of which, such as Domaine Chandon and Piper-Sonoma, are owned or partly owned by French companies. But there is some strong competition from U.S.-owned wineries, too.

One of the several California wineries attempting to compete with French champagnes and their U.S. clones is Chateau St. Jean, Kenwood, Cal. Chateau St. Jean introduced two 1980 vintage sparkling wines in 1983.

In the first year, the wine sold a modest 12,000 cases at $13 a bottle, according to winery president Allan Hemphill, but last year the 1981 vintage sold about 21,000 cases.

Chateau St. Jean sparkling wine is distributed nationally, but the winery is emphasizing promotion and distribution in "neglected" urban markets, Mr. Hemphill says.

"There are so many competing products in New York, Los Angeles and Chicago, that the reception for a relatively new label is generally unenthusiastic. But there are many important urban markets such as Minneapolis and Tampa-St. Petersburg that have been neglected by wine marketers and are very open to trying new products."

Chateau St. Jean does not advertise the sparkling wines, but it actively promotes products with special tastings held in remodeled rail cars, which the winery takes to new markets. The rail cars were rebuilt at a cost of about $100,000.

Another relatively new competitor among California sparking wines is Sebastiani Vineyards Brut Three Star. The Sonoma, Cal.-based winery introduced the wine in 1982, shipping "several thousand" cases to local consumers. Since then, sales have increased an average of 60% a year, according to director-marketing William T. Harper IV.

Sebastiani advertises its Three-Star Brut in prestige publications such as *Bon Appetit, Food & Wine, Gourmet, Metropolitan Home* and *Smithsonian*.

The market for the sparkler tends to be somewhat affluent. "This isn't the kind of wine sold to a general audience in supermarkets. At our price [$12 a bottle], the average consumer would pass it up for something cheaper," Mr. Harper says. ■

Champagne anyone?

Number of cases sold by state, 1983 (in thousands)

Dressing up an image

What catches the eye of the affluent buyer?

That's the question Blau/Bishop Ltd., Chicago, asked as it set out last year to design packaging for two new imported sparkling wines aimed at competing with French nonvintage champagnes and top-end California sparklers.

"The champagne product category appeals to an affluent market, and if you want to compete in that market, you've got to give the feeling of richness," says Meredith Blau, senior vp, Blau/Bishop. "The packaging must clearly express that the product is in a separate category—a category that is affluent and tasteful."

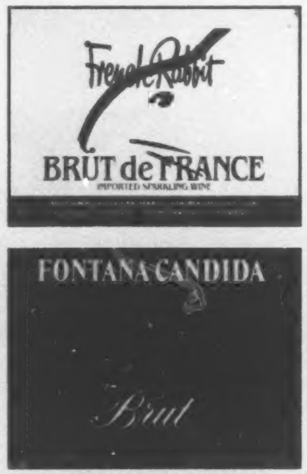
Blau/Bishop's assignment covered two sparkling wines imported and distributed by Crosse & Blackwell Vintage Cellars, San Francisco. Both wines were part of a well known and respected, though not particularly upscale, line of table wines.

Fontana Candida Brut is an Italian sparkling wine made in Alba, by one of the largest makers of frascati, a dry and crisp table wine that is a dinner standard in Italian restaurants in the U.S. and Europe.

The sparkling wine is aimed at an affluent market and priced at $9 a bottle—about twice the price of the table wine. C&B predicts sales of 20,000 cases this year.

The design problem, according to Ms. Blau, was maintaining the product line continuity while distinguishing the product for an affluent market. The redesign answer was practically a reverse of the label's black-on-white label.

"We chose a very sophisticated gold on black design—a very serious and rich statement about the product," she says. "Gold, of course, always conveys richness, and the black clearly distinguishes the label from the table wines."



Blau/Bishop used black and gold on labels to convey the feeling of richness.

To keep within the line continuity, designers retained the red winery seal that appears on all Fontana Candida products. The seal fit nicely with the new color scheme, Ms. Blau says.

Gold also fits the demands of the other wine design project for Crosse & Blackwell—a new French sparkling wine under the French Rabbit label that of which the company predict it will sell 50,000 cases this year.

Blau/Bishop was instrumental in the 1984 introduction of the line, devising the distinctive name and the contemporary abstract label of the two French Rabbit table wines.

With a mandate to design a wine line that would penetrate the volume-price ($6 a bottle) import wine market, Blau/Bishop chose an "American cognitive," the rabbit, as the primary symbol for the wine to convey a casual and inexpensive position of the product. The addition of "French" as a modifier clearly identified the imported character of the product.

"The name conveyed all the feeling we wanted, it identified the imported character and had the added benefit of being easy to pronounce—which underlines the accessibility of the wine," Ms. Blau says. The designers further emphasized the youthful and casual appeal of the product with a contemporary, almost abstract rabbit label and a very modern script logo. Red graphic highlights identified the red table wine and green graphics identified the deep-straw colored white wine.

In modifying the label for the sparkling wine, Blau/Bishop again emphasized the richness of the product with gold against a white backdrop and black type. Fontana Candida and French Rabbit lines are supported by regional radio and tv spots produced by Allen & Dorwood, San Francisco. —L.S.

PEOPLE PATTERNS

Researchers, businesses strike gold with data

By PETER FRANCESE

When I moved to Ithaca, N.Y., (population 28,000) 20 years ago, there were no suburban shopping malls and no fast food restaurants. The first mall developer didn't need any data to tell him this was a good market. His big parking lots were full from opening day.

The first McDonald's restaurant opened shortly thereafter and required help from the police to control the crowds.

The police no longer are required and the big crowds are gone from both places because now there are six suburban centers, a downtown shopping mall, three McDonald's restaurants and about a dozen other similar eating places. The story of intense retail development during the past two decades can be told in every town of 25,000 or more inhabitants across this nation.

Twenty years ago, the U.S. population was growing almost everywhere, and there were lots of untapped markets. Today, a number of major states and metropolitan areas have little or no population growth and most communities are saturated with malls and restaurants.

To be successful in the retail or restaurant businesses today it takes research and lots and lots of data. This is because it is now much cheaper to buy data than risk a failure.

In 1965, a detailed demographic report for a proposed shopping center cost at least a couple of thousand dollars. Then the data from the 1970 census came out in computer-readable market reports, costing about $50 each.

Market research data simply had become too cheap not to use. So most developers began using it, bankers began demanding it, and an industry that processed census data into reports for potential retail or restaurant sites had been born.

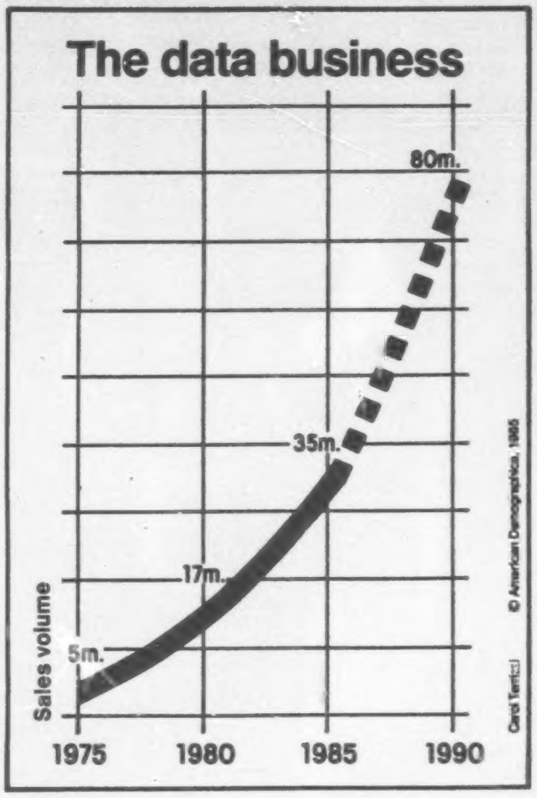
In 1975 there were perhaps five small companies providing about $5 million worth of data on population and housing for many market research purposes. When the 1980 census was taken, this industry had more than tripled in size, with 15 to 20 companies selling data for an estimated $17 million. This year, about 45 companies say they are in the data business; it is estimated they will gross about $35 million.

Considering the high risk in starting almost any kind of consumer business and the difficulty in maintaining the growth of an existing one, it is no surprise that the market-research industry is flourishing.

Not to use consumer market data in business planning today is to invite disaster; there are enough empty and half-empty shopping centers and boarded-up stores around as reminders of that.

Given the high demand for such products and services, it would not be surprising to see the consumer data business become an $80 million to $100 million industry by 1990.

A few big companies with substantial marketing expertise have entered the business, and some of the smaller companies have been bought by foreign investors eager to get in early at the high-growth stage.



There already have been a few business failures and near-failures by people who did not understand how to market data.

But there still is immense opportunity and growth potential in the business of providing people with statistics that they can use to increase their success and profits in providing consumer products and services.

Of course, some of today's most valuable data sources are virtually free for the asking.

Some semiliterate prospector in 1849 was supposed to have said, "There's gold in them thar hills." If he were alive today, he might say, "There's more gold in this here book than in them thar hills," in reference to the 105th edition of the "Statistical Abstract of the United States."

Compiled and published by the Bureau of the Census, this fact-filled publication has nearly 1,000 pages of data on American social, economic and political trends.

This 1985 edition's 119 new tabulations give us some fresh trend data on such diverse topics as the number of lawyers (more than 500,000 and growing about five times faster than the population), the trends in church attendance (up slightly), the use of individual retirement accounts (highest among people aged 45 to 64), the number of robots (more than 50,000 worldwide), alcohol consumption (one-third of us claim that we abstain) and membership in Health Maintenance Organizations (more than 12 million, double the number six years earlier).

One important fact that cannot be found anywhere in this book is its price. For the 2 lbs., 4 ozs. of abstracted statistics, the U.S. Government Printing Office charges $19 for paperback and $23 for the hardbound edition. Virtually all libraries have a copy, but if you want your own and have a credit card you can dial 202-783-3238 and order one by phone.

Unless you are naturally fascinated with facts you might ask why this book is so valuable. We have been told often enough that this is the information age, so the data in this book are coin of the realm.

Many of the tables also have a demographic component such as age or income that gives us clues as to how that activity will change as the population gets older or wealthier.

Reference books, like people, usually have an appendix, but this book has five of them. One is a 40-page guide to other sources of data, including where to get statistical abstracts for each of the 50 states. Another appendix ranks states according to many different demographic and economic indicators.

There is no copyright on this book. Almost all of its data tables can be copied freely in any form. In the past, enterprising publishers have photocopied the entire thing and sold it in bookstores with a slightly different cover. Yet this immense collection of statistics has never been put into any computer-readable form.

This 105th "Statistical Abstract" no doubt will sell more copies than any previous edition because of our growing appetite for data about people and how we live. An industry now has emerged that serves our desire for that data.

Peter Francese is publisher of American Demographics.

New logo will solve P&G rumor trouble

What does poor Procter & Gamble have to do to shake a rumor?

P&G, of course, is the Cincinnati-based company best known for soaps and detergents, and, as we all know, cleanliness is next to godliness. And P&G has been unsparing in its support of such religion-oriented tv mini-series as "Jesus of Nazareth," "Peter and Paul" and, most recently, "A.D."

But still, the rumor refuses to die that P&G is linked, through its man-in-the-moon logo, with Satan. Actually, the rumor has to do with the way the stars in the logo—the ones the man in the moon is reaching for—are said to form three sixes (a biblical reference to Satan) when they are connected.

By mid-1982, when the rumors were drawing some 12,000 calls a month to P&G headquarters, the company launched a vigorous, highly publicized campaign—involving endorsements by Jerry Falwell and lawsuits against rumor propagators when they were found—to squelch the devilish problem.

I was inclined to believe that P&G's efforts would help spread the rumor. I thought the company would be better off taking a devil-may-care attitude about the whole thing instead of giving the rumors national publicity. A survey Advertising Age took at the time seemed to verify that line of thinking. So Ad Age suggested in an editorial that P&G made a big mistake by publicizing the rumor. We said it would have run its course if the company had laid low.

Most companies that are the targets of such rumormongering don't call attention to themselves. When McDonald's Corp., for instance, was the subject of whispers that its hamburgers had worms in them, McDonald's dispatched representatives to local community groups to put down the rumor. But the reps didn't put anything in writing, and they certainly didn't go on tv.

P&G has decided to remove its logo from packages. But the question that keeps occurring to me is why P&G persists in using its out-of-date logo at all?

P&G normally is pretty tight-lipped about its operations, so the world doesn't really know why the company chose the approach it took. Some speculate that chairman John Smale, who was then newly in place and considered by some to have injected a new aggressiveness into the place, wanted it that way. Others point out that the rumors surfaced at a time when P&G was attempting to boost consumer identification of its corporate name for new product introductions ("new" from Procter & Gamble).

At any rate, it's safe to say the company's tactics haven't worked. The Satan rumor has surfaced again, this time in the Big Apple and environs. This time around, though, the company is trying to exorcise the problem on a regional basis rather than beaming its publicity across the nation.

P&G has decided to remove its logo from packages. But the question that keeps occurring to me is why P&G persists in using its out-of-date logo at all? Wouldn't it be the better part of valor for P&G to say a design consultant recommended that Procter adopt a new corporate symbol, using the stylized P&G letters? I'll bet not one person out of ten can identify the man in the moon reaching for the stars as the P&G logo now, so the company's argument that it has poured millions of dollars into promoting it doesn't wash.

I realize that those intent on spreading the rumor probably would seize on P&G's move and say that the devil is just going undercover. Or the logo change could be considered capitulation to the purveyors of the rumors.

But all that soon would be forgotten. P&G's spiffy new logo would conjure up better brand identification, and that sure beats the hell out of the company's present dilemma.

GM's media buying shuffled

Shifts are worth $250 million

By VERNE GAY

General Motors, Detroit, has reassigned network tv media negotiating for all its divisions. The juggling among GM shops makes them agencies of record for negotiating according to daypart, cutting across the previously rigid divisional lines. The new assignments affect the placement of about $250 million.

Leo Burnett USA, Southfield, Mich., will now handle network prime time entertainment negotiations for all GM divisions, while maintaining its creative assignment for Oldsmobile.

Network sources said GM divisions spend more money in prime time than any other daypart. Broadcast Advertisers Reports lists 1984 GM spending as $114 million in prime time, $88.4 million in weekend sports, $25.3 million in news and $3.7 million in daytime.

The prime time figures include GM divisional buys on ABC's "Monday Night Football," which is now part of the sports buy, and network prime time news shows such as ABC's "20/20."

D'Arcy MacManus Masius, Bloomfield Hills, becomes agency of record for news. DMM also continues as creative agency for the Cadillac and Pontiac divisions.

Warren-based Campbell-Ewald is agency of record for sports and remains creative agency for Chevrolet.

N W Ayer, Detroit, will handle the GM corporate public relations account, the smallest piece of the GM media pie. The corporate pr account, however, is charged with production of GM's network specials and miniseries. Ayer helped produce GM's "George Washington" miniseries that was telecast in 1984. A sequel is in the planning stages.

GM late Friday confirmed the assignments, adding, "Our individual agencies will continue to place the network orders." Sources said GM had yet to name agencies to handle negotiations for tv syndication, newspapers, radio and outdoor. GM said magazine responsibilities had been assigned, but declined to identify the agency.

McCann-Erickson is the only GM divisional agency (Buick, GMC trucks) yet to be publicly named to a media-negotiating assignment.

The agency-of-record assign-

Juicy product for Seven-Up

Seven-Up Co.'s Foods unit today breaks national advertising for its five-item JuiceUp line of frozen lemonade and lemon-limeade concentrates (AA, May 6). The campaign, themed "A big squeeze in every can," includes network and spot tv, and couponed print advertising. Doyle Dane Bernbach, Los Angeles, handles.

Buyout pitch goes to board

Boston Ventures, execs want more of their MTV

By SUSAN SPILLMAN

New York—Top executives at MTV Networks Inc. and Boston Ventures Limited Partnership have made an offer to buy out Warner Amex Cable Communications' two-thirds ownership of MTV.

The MTV Networks board of directors is considering the proposal made by MTV Networks president David Horowitz, exec vp Bob Pittman and other MTV Networks executives, along with Boston Ventures. It is not known when the board will announce its decision.

While the price that the group has offered for Warner's share of MTV Networks is not known, Wall Street sources have placed the total company value at $370 million. It was not known at press time whether the management group also would bid for the one-third that is publicly held. Since not all of the MTV managers participating in the offer are known, it is not possible to calculate how much MTV Networks stock the participants hold.

MTV Networks went public last summer, selling at $15 a share. The stock is trading over-the-counter in the $25 range.

MTV posted a profit of $4.5 million on revenues of $34.5 million in the fourth quarter of 1984. For the year, the company reported a profit of $11.9 million on revenues of $109.5 million.

MTV Networks includes three cable services: The popular MTV: Music Television; Nickelodeon, a channel for children, and the 6-month-old VH1, an MTV spinoff.

Regarding the plan, an MTV spokesperson said, "We do not comment on speculation." Boston Ventures principal Anthony Bolin likewise refused comment.

Boston Ventures is the venture-capital group that in 1984 helped insiders at Metromedia Inc. take that company private. Boston Ventures played a similar role earlier this year when Billboard Publications' top management bought out Billboard.

Boston Ventures is comprised of five principal partners, including

Last Minute News

Ponderosa cuts McCann, gives stake to K&E

Dayton, O.—Ponderosa has moved its $15 million-plus account to Kenyon & Eckhardt, New York, a mere four months after awarding it to McCann-Erickson (AA, Jan. 24). The "mutual" split was ascribed to potential conflict over the steak house chain's long-term growth plans. McCann recently won McDonald's Corp.'s accounts in Brazil and Mexico (AA, April 8), and was a finalist for Big Mac's U.K. account that went to Saatchi & Saatchi. Ponderosa has two stores and great expectations in the U.K. Avrett, Free & Ginsberg handled the account before McCann.

B&B firings follow account losses

New York—Benton & Bowles has let go two of its top creative executives and dissolved one of its creative groups as part of a series of cutbacks brought on by the Hardee's Food Systems and Nabisco Brands account

Nestle's 'big bite' gobbles MJB

By GAY JERVEY
and JENNIFER PENDLETON

Nestle Co.'s acquisition last week of MJB Co., a family-owned-and-operated West Coast coffee marketer with sales of about $150 million, is the latest indication of the Swiss-based company's determination to create a formidable presence in the U.S.

Financial terms for the deal were not disclosed. MJB will report to Nestle Holdings, Solon, O. Nestle and MJB officials could not be reached for comment.

The MJB move is the fourth major acquisition by Nestle in the last 18 months, and reflects the company's plan to make the U.S. its biggest money-maker and most exciting growth vehicle.

It also further illustrates Nestle's "big bite" policy of growth predominantly through acquisition, rather than internal development of new business arenas (AA, Jan. 9, '84, *et seq.*).

In addition, the sale of MJB is another indication of the difficulty smaller roasters face in staying independent in the face of industry

Saturn borrows package tactics

By JESSE SNYDER

Detroit—General Motors' pioneering Saturn Corp. will break tradition by marketing its cars as package goods. That may give package-goods specialist agencies an advantage in the selection process, but Saturn executives refuse to rule out any of the dozens of agencies that already have contacted them.

GM is determined to rewrite the rules on how cars are made, marketed and advertised with its new subsidiary, and then spread Saturn concepts rapidly throughout the company.

Saturn Corp., expected to introduce its first model in 1988 or later, doesn't have a full sales/marketing staff and is still generating new marketing proposals internally. But several key concepts are forming a working framework, say sources both inside and outside Saturn. Most of the sources requested anonymity because of a news blackout imposed by Saturn president William Hoglund.

Among the new principles:

- Saturn will be sold as a package. Buyers will purchase not just the car, but a complete "transportation contract" package that includes financing through General Motors Acceptance Corp., a service contract either through the dealer or a GM service center, collision insurance through GM's Motors Insurance subsidiary and an optional extra-cost provision that would entitle the buyer to a loaner during repairs or maintenance. The entire transaction will be made on a GM-issued general purpose credit card good for repairs, parts and accessories—and eventually other non-auto financial and communications services. Instead of the extensive choice of options common on domestic cars, Saturn will come as a complete package with the only choices being color and dealer-installed options such as sound systems and sunroofs.
- Saturn will be treated more like an appliance than machinery—much the way tvs became appliances when printed circuits and modular construction replaced vacuum tubes and hand wiring. Repairs on Saturn cars will be done by replacing modules—body panels,

Bigger Whopper lets BK throw its weight around

By BRIAN MORAN
and SCOTT HUME

The focus in fast-food marketing is about to return to the scales.

Burger King Corp. in a few weeks will attempt to flatten its big-burger competition with a new, larger Whopper that packs more beef than McDonald's Quarter Pounder or Wendy's Single.

The "new" Whopper's beef patty will weigh in at 4.2 ozs., compared with its current 3.6 ozs. As a result, it will outclass not only McDonald's 3.2-oz. Big Mac and 4-oz. Quarter Pounder sandwiches but also Wendy's 4-oz. Single hamburger.

BK will crown its new champion with a kaiser roll (the current Whopper is couched in a plain burger bun), and the item will receive a slightly different mix of toppings.

And to make sure that burger eaters make no mistake about which burger has the most beef, BK will shrink the diameter of the Whopper roll from 5 ins. to 4.5 ins., according to industry sources. Reports conflict over whether the newfound beef will make the Whopper patty wider or thicker.

Wendy's, of course, made its cash registers sing last year when its "Where's the beef?" campaign trumpeted the Single's weight superiority over both the Whopper and Big Mac (conveniently ignoring the parity of the Quarter Pounder).

And how will Burger King announce that it's found the beef? Could Clara Peller's quest for more tv burger work finally be over?

Executives at BK headquarters were mum last week, but a source close to the company's ad and mar-

Software makers cool to IBM's bundling up

By BRIAN MORAN

ATLANTA—IBM Corp.'s temporary offer of free software with models of its PC XT personal computer is not expected to send independent software marketers scurrying for cover, say industry analysts and software publishing executives.

Those attending the Comdex computer trade show here last week downplayed the long-term impact of IBM's latest promotion effort.

Observers pointed out that so-called "bundling" of software with computers is common and has not cut deeply into third-party marketers' sales.

Most bundling promotions involve hardware companies packaging their machines with programs from software developers, so IBM's plan to throw in its own software initially raised some eyebrows here.

But other leading computer hardware companies—including Apple Computer, Hewlett-Packard Co., Kaypro Corp. and Tandy Corp.—have bundled their own programs with computers, with mixed success.

"The software market is a lot more fragmented than the hardware market—there are many more niches to target," said William Gates, chairman, Microsoft Corp., the Bellevue, Wash.-based software giant.

"You don't need to be No. 1 in this business to do well," Mr. Gates added.

Until the end of July, Armonk, N.Y.-based IBM is sending dealers two free software programs with each model of the PC XT. Retailers are to decide whether to pass along the free programs to customers, so the 90-day promotion is not getting ad support.

Despite IBM's massive marketing muscle, consumers are likely to continue to cast a wary eye on Big Blue's software offerings, said Philippe Kahn, president, Borland International, a Scotts Valley, Cal., marketer of application programs.

"Customers will still look for a better product, for an upgrade of what IBM is offering," Mr. Kahn said. "If software companies can come up with better technology, they're still going to make it."

Although IBM is positioning the offer as a boost to its PC XT sales, many observers here viewed the move as a tactic to pump up IBM's lackluster pc software sales.

Few software executives saw the giveaway as a desperation move, but Albert Vezza, chief executive officer at Infocom, Cambridge, Mass., quipped in reference to IBM's ill-fated PCjr: "The last time [IBM] ran a promotion like this, they ended up discontinuing the product."

IBM gave away software last Christmas in an attempt to revive the PCjr before halting production earlier this year.

Tandy, Fort Worth, Tex., has bundled its own Deskmate integrated applications program with the Tandy 1000 pc since the marketer introduced that machine last November.

Deskmate—which features word processing, spreadsheet, filing and communications functions—is included in the $1,199 suggested retail price of the IBM-compatible 1000.

Apple, Cupertino, Cal., bundles MacWrite, an Apple word-processing program, and MacPaint, a graphics program, with every Macintosh pc.

The free software, with a retail value of $500, originally was a limited promotion when Mac was introduced, at a time when only a handful of independently published Macintosh programs was available.

Apple has decided to continue giving away the software, even though more than 500 Mac programs currently are on the market.

Hewlett-Packard, Palo Alto, Cal., until recently bundled two of its own applications software programs, MemoMaker (a word processor) and Personal Card File (a limited database) with its Touchscreen pcs.

H-P's latest Touchscreen model does not come with free software. H-P's original personal computer, the HP-150, came with Lotus Development Corp.'s 1-2-3 integrated package.

Kaypro Corp., Solano Beach, Cal., and Osborne Computer Corp., Fremont, Cal., both pioneers in the portable computer segment, bundle extensive amounts of software as part of their "total solution" marketing strategies.

All the free programs, which are published by third-party developers, are licensed to the computer marketers.#

CORRECTIONS & CLARIFICATIONS

- Gross income for agency Howard Miller Associates, Lancaster, Pa., was $1,260,619 in 1984 and $880,404 in 1983, instead of the figures the agency reported in the Agency Income Report (AA, March 28, P. 80).
- Manhattan Design, not Fred Seibert and Alan Goodman, conceived and designed the MTV logo (AA, April 25, P. 9). Likewise, Corey & Co.: Designers created the new Nickelodeon logo. Messrs. Seibert and Goodman, now operating as Fred/Alan, New York, acted as creative directors and producers on these projects.
- A late-news item about Nabisco Brands point-of-purchase promotion (AA, May 6, P. 8) incorrectly stated that the fourth item was Twix cookie bars rather than Twigs snack sticks. Twix cookie bars is a product of Mars Inc.
- McKesson Corp.'s Armor All Products unit is advertising its protectant, not its cleanser as reported (AA, April 4, P. 39).
- A story on newspaper circulation figures incorrectly listed the date of the Audit Bureau of Circulations' most recent FAS-FAX report (AA, May 6, P. 3). Figures were averages for the six months ending March 31, 1985.
- Leo Burnett USA, Chicago, art director Mary Martin should have been credited for creating the Obie Award-winning outdoor ad for United Airlines (AA, April 29, P. 50).
- Kenneth Hieronymus' name was misspelled in an earlier issue (AA, April 23, P. 94). Mr. Hieronymus is the new president of Kenrick Advertising, St. Louis.#

FINALLY A COUPON VEHICLE WITH REDEEMING QUALITIES.

CouponCounter
FREE

At last there's a coupon vehicle that offers you efficiency, security and reliability: The Coupon Counter®

The incredible in-store Coupon Counter
The Coupon Counter machine instantly delivers your coupon right inside the store. Which means shoppers don't have to hunt for it through a cluttered newspaper. Or clip it. Or remember to bring it. Your coupon is always right there where decisions are made.

Triples your redemption rates
Our 1984 results prove that shoppers who use the Coupon Counter are three times more likely to redeem your coupon. Which means you get three times the power to stimulate trial. In fact, shoppers are so likely to redeem Coupon Counter coupons, many of our clients tell us they can lower the face amounts and still get impressive results.

Tightens security
With misredemption on the rise, the Coupon Counter offers virtually fool-proof security. Your coupon can only be validated when the shopper enters a personal code.

Delivers demographics
Because every Coupon Counter cardholder is listed in our data bank, we know exactly who redeems your coupon. This vital tracking information is now available for the first time…just ask and find out exactly how our research capabilities can help you.

Join the revolution
If you're not getting these kinds of results from your current coupon vehicle, it's time to try the Coupon Counter. You'll join a long list of top companies who've had remarkable success with us.

Just call 1-617-329-5800.

It could be the most redeeming thing you've done for your couponing effort.

1st quarter not bad omen

By STEWART ALTER

NEW YORK—The first quarter, during which most of the publicly held ad agencies already have reported net income declines from last year, looks worse than it actually is.

JWT Group, Interpublic Group of Cos., BBDO International, Doyle Dane Bernbach International and Mickelberry Corp. all reported drops in their net income in the first three months of 1985 compared with the similar period in 1984.

Ogilvy & Mather International and Ally & Gargano, both of which gained a lot of new business last year, reported increases.

Grey Advertising also reported a very strong first quarter, with net income up about 50%, from $1 million to $1.5 million.

But the picture has been colored a bit by how strong the U.S. dollar has been recently and by how strong advertising spending was in the first quarter of 1984. The Winter Olympics and telephone deregulation were major contributors to the 1984 boom.

There also were some unusual circumstances. DDB's net income dropped 16% from $1.3 million to $1.1 million.

The company explained that "comparative earnings were affected by the reversal of previously accrued compensation costs of $2,115,000 in the 1984 first quarter." Without that, net income would actually be up 228%.

Similarly, JWT's net income drop from $3.8 million to $209,000 included a $2.8 million tax writeoff from disposing of its E-A International network, a move that has been generally praised. Moreover, there's no real money loss here; good will from the previous acquisition of E-A was being written off over an extended period, but with the E-A divestiture all the remaining good will has to be written off all at once.

JWT earnings still would have declined, but that's compared with the first quarter of 1984 in which its net income leaped an amazing 254% to $3.8 million.

O&M had a very good first quarter, with net income up 13.9% to $3.6 million, owing to its many new-business gains in 1984 that have started billing.

The story is similar for Ally & Gargano, which earned $400,000 in the first quarter, compared with a loss of $160,000 in the year-ago quarter.

BBDO's net income dropped 18% to $4.2 million.

Also Mickelberry Corp., whose Cunningham & Walsh unit lost its huge Brown & Williamson account last year, suffered a 12.7% net income drop, to $711,000, in spite of having made a direct-marketing agency acquisition last year that should have boosted 1985 results.

So there is a bit of a slowdown. "The general impression is that business is a little bit softer than expected," said Alan Gottesman, an analyst at L.F. Rothschild, Unterberg, Towbin. "It looks like the typical first-quarter blahs may be a little longer lasting than usual, but I would say it's normal first-quarter malaise."

The one figure Mr. Gottesman does consider important to look at is rate of growth of expenses. "If expenses are kept under good control, any increase in revenues can produce a disproportionately large gain in income," he said.

He considered BBDO's 9% increase satisfactory. Interpublic Group of Cos. had only a 3% increase in expenses.

IPG also had a net income drop of 22% to $3.8 million. Eugene Beard, exec vp-finance, explained three reasons for the drop. "We had an incredibly strong first quarter last year," he said, noting also the disadvantages of a very strong U.S. dollar relative to other currencies.

Additionally, "The economy of European countries, especially Germany, is still soft."

IPG picked up $202 million in net new business in the first quarter, which it expects will improve second-quarter results.

Part of the decline affecting IPG, JWT and BBDO was due to the strength of the dollar. BBDO, which had a 10% increase in domestic revenue, would also have had a non-U.S. revenue increase of 11%, instead of a 10% decrease.

Mr. Gottesman said he has "a difficult time getting excited or upset about the strength of the dollar" because it doesn't tend to change an agency's competitive situation.

Revenues are generated and expenses incurred in whatever the local currency is, he said, so one agency's situation in a country is the same as another's.#

Agency financial results

The first quarter for the public ad agencies proved to be mixed. Some agencies reported declines in net income, while others reported impressive gains. NM means not meaningful. Source: Advertising Age.

	Income ($000)			Revenues ($000)		
Agency	1984	1985	(%)	1984	1985	(%)
First quarter						
Ally	(160)	400	NM	4,257	6,327	+49
BBDO	5,172	4,219	−18	71,861	75,818	+ 6

JWT	3,754	209	−94	120,795	125,993	+ 4

Mickelberry backs shops despite losses

By STEWART ALTER

Mickelberry Corp. earnings were down in 1984 and again in the first quarter of 1985. And Mickelberry does not expect a quick recovery in its advertising agency businesses.

But chairman James Marlas said at the company's annual meeting May 7 that the holding company for such ad agencies as Cunningham & Walsh, Laurence, Charles & Free and Nadler & Larimer is in the agency business to stay.

Several times during his speech, Mr. Marlas emphasized Mickelberry is the boss in running its shops, even though it is not involved in the daily management of the agencies. Mr. Marlas appeared to be responding to criticism that he has maintained too passive an approach toward the agencies.

"We at Mickelberry are in the advertising and related marketing-service business because we *chose* to be here," he said. "We decided to invest in this business over an array of other opportunities that were available to us. As we have become more involved in the business, we are convinced we made a good decision."

The loss by C&W/Chicago of the huge Brown & Williamson Tobacco account was a big blow to the company last year. Combined with other account losses, including Faberge by Nadler & Larimer, the company's net income declined last year to $1.3 million from $2.6 million in 1983. In the first quarter of 1985, earnings dropped to $711,000 from $801,000 in the first three months of 1984.

"Margins fell and we were forced to do some restructuring," Mr. Marlas said of the effect of the account losses. "Although a number of steps were taken to strengthen our advertising businesses during 1984, the reduced margins there will continue to affect our results in 1985," he said.

Mr. Marlas maintained the company would look for long-term growth, not short-term improvements in margins.

He also emphasized Mickelberry has been making changes. "We have looked very hard at our business over the last six months. We found some weaknesses, and we are working to fix them," he said.

Those changes are clearly C&W's acquisition of BBDM in Chicago and the sale of its San Francisco agency office to Allen & Dorward. Nadler & Larimer, which brought in Ric Calvillo as its new ceo, also has been reported to be making a change, involving absorbing the LCF&S subsidiary of Laurence, Charles & Free.

"A degree of constructive innovation is taking place at Mickelberry's units through a stimulating process of self-analysis," he said.

Until late last year, Mickelberry's track record had been an impressive one, although most of that was through acquisitions. The revenues for the advertising agency sector of its business rose from $11.8 million in 1980 to $71.9 million in 1984. The marketing-services sector rose from $14.7 million in 1980 to $52.4 million last year.

Also, as the company's annual report indicates, Mickelberry continued as a reasonably aggressive acquirer last year, though not of ad agencies. It spent $8.4 million to buy three companies last year: Ventura Associates, a sales promotion company, for $1.8 million in cash and stock worth $647,000; $2.8 million for Caribiner, a producer of business conferences, and the Direct Marketing Agency, for $3.2 million in cash.

Mr. Marlas said the growth trend and the financial dynamics of the ad agency business were good. "Average margins in the industry exceed 10% of revenues, capital requirements are low, cash flow is positive and returns on capital are favorable," he said.

"It is a fundamentally sound business, and the degree of success you achieve is directly related to how well management performs," Mr. Marlas added.#

Silicon Valley shops seek injection of hope

By CLEVELAND HORTON and JENNIFER PENDLETON

A national slump in personal-computer sales, already afflicting computer marketers and suppliers in California's Silicon Valley, also is having an impact on ad agencies that serve those companies.

Hard times have hit the estimated 50 full-service agencies and at least 100 assorted creative boutiques and design studios that built their business on once-booming high-tech accounts. Several agencies have cut personnel during recent months. Many are bracing for what may be a long recession, and others are predicting the trend will intensify.

"A lot of people are feeling it now, and I expect they'll be feeling it a lot more by the third quarter," said George Parker, vp-creative director, Coakley Heagerty Companies Ltd., Santa Clara, Cal., the area's fourth-largest ad agency.

Tycer-Fultz-Bellack, Palo Alto, Cal., the largest of the Valley's high-tech agencies with $35 million in billings, is one recent victim. TFB's spectacular growth ground to a halt in the last quarter of 1984, and the agency last month dropped 14 staff members from its payroll (AA, April 22).

Most Silicon Valley people view TFB's cutbacks with the attitude of "There but for the grace of God go I." Said Robert McManus, senior vp, Winkler Tawa McManus, Santa Clara, an agency that represents several technology accounts, "Realistically, when you look around the Valley, it could happen to any one of us."

Agencies representing computer-chip manufacturers—which have seen their business decline drastically during the past year—have been particularly hard-hit. National Semiconductor, a leader in the chip business, stopped advertising for two months earlier this year. Foote, Cone & Belding, San Francisco, is the agency.

Likewise, Intel, one of the area's larger business-to-business advertisers with an $8 million ad budget, reportedly has cut its budget by 15%. Chiat/Day, San Francisco, handles.

To cut costs, some high-tech companies are moving their advertising in-house. TFB was pinched earlier this year when two of its accounts, NEC Electronics, San Mateo, Cal., and Cromemco, Mountain View, Cal., did just that with their combined $4 million business.

Meanwhile, agencies are finding fewer new-business prospects in high-tech, and some are turning to consumer accounts.

Livingston/Sirutis, Belmont, Cal., formerly technology specialists, recently added two new pieces of business outside their usual area—the Four Seasons Clift Hotel, San Francisco, and a portion of Saga Corp., Menlo Park, Cal.

TFB recently added its first consumer account, Jacuzzi Whirlpool Bath, Walnut Creek, Cal. The agency hopes it will be the first of several nontechnical pieces of business in its future.

Reiser Williams DeYong/Cunningham & Walsh, Santa Clara, the northern California arm of the Irving, Cal.-based high-tech agency, says it isn't actively seeking business outside the technology field. But, says senior vp-general manager John Pagliaro, the agency won't turn down any consumer accounts that come its way.

Battenberg, Fillhardt & Wright president Curtis Wright said his San Jose-based agency is working to broaden its client base, but not because high-tech is dead. "It's not prudent for any agency to rely solely on one industry," Mr. Wright observed.

"Agencies have to make drastic changes with their mix [types of accounts] or be content to remain much smaller," said Doug Gotthoffer, president of Doug Gotthoffer Co., San Francisco, a recent emigre from Palo Alto. Mr. Gotthoffer recently closed his full-service agency in Silicon Valley.

Mr. Parker of Coakley Heagerty said his agency has avoided personnel layoffs by sticking to a long-practiced policy that no more than 40% of its business be high-tech.

One reason many agencies have been hard-hit is that they took on undercapitalized accounts in hopes they would become "the next Apple," according to Mr. Parker. That rarely happened.

Livingston/Sirutis president Tom Livingston contends many high-tech startups are less than candid about their financial position. "The Valley startups lack a certain integrity," lamented Mr. Livingston, whose agency had to go to court to collect an $80,000 payment from Cogito Systems Corp., Santa Clara, a disc-drive marketer.

Mr. Pagliaro of RWDY/C&W said success in the Silicon Valley ad business requires prudent selection of clients and knowledge of the high-tech marketplace.

"There were a lot of consumer agencies that went into the high-tech field not attuned to the extreme competition and rapid pace of this market," he declared. "Many found out the hard way how volatile this industry can be." Mr. Pagliaro said his agency just experienced the best month in its history, a performance he attributes to agency expertise and, he admits, luck.

While some agencies are developing consumer accounts as a way to sustain their business, some are sticking with the high-tech business they know best. John Brown of Cortani/Brown/Rigoli, Mountain View, believes the current downturn is cyclical and will end. "This occurs every three years," said the agency president.

Mr. Brown believes the consumer advertising business is incompatible with the high-tech ad business, but he hopes other high-tech agencies dilute their business by going after consumer accounts. "We'll hang in and end up the better for it," he said.

Winston Advertising, Palo Alto, is another agency with an upbeat look at the downturn. Despite a flat year, the agency is adding senior personnel and reaffirming its commitment to high-tech. "We see this [the recession] as an outstanding opportunity for growth," said exec vp John Wickett. "We're doing what we tell our clients to do—steal market share when the industry's weak." ∮

Shop saw high-tech as past, not future

By CLEVELAND HORTON

The first signs of trouble in Silicon Valley for ad agencies as well as high-tech advertisers could be seen more than a year ago, according to Tom Livingston, president of Livingston/Sirutis Advertising, Belmont, Cal.

While most computer magazines remained thick and appeared to be thriving, close observation revealed that "as many companies were dropping out as were coming in [and] we weren't seeing the growth anymore," Mr. Livingston said.

Mr. Livingston decided in August to steer his 5-year-old agency away from high-tech work and point it toward consumer-oriented accounts. Since then, many other agencies have followed suit.

But making the change may be easier said than done.

With a reputation as a high-tech agency, L/S had to deal with the perception that computer-related advertising is only business-to-business advertising, and that the skills of that discipline are not easily transferrable to consumer accounts.

The $10 million agency was fortunate. Most of its senior management began their careers in consumer advertising, a background that helped L/S land its initial high-tech accounts and that now helps the agency pitch consumer business.

High-tech accounts grew to represent more than 80% of the agency's billings, even though "the idea wasn't to be totally high-tech" when the agency was formed, Mr. Livingston said.

He now considers the computer industry off limits for new business. "We will continue to avoid high-tech with a vengeance." ∮

CONSUMER WATCH

Outlook brightened by boomers' babies

By LEO J. SHAPIRO
and DWIGHT BOHMBACH

If it weren't for sex, business wouldn't be as good as it's been lately. Love not only "makes the world go 'round," it also moves merchandise. ADVERTISING AGE National Poll data for the first four months of 1985 show how and where.

We have more than 78 million "baby-boom" generation members between age 20 and 39 among us. They are all of an age to make the most expensive investment most of us ever make—having babies. One-fifth of the 1,344 households we talked with are planning for babies. In homes in which the adults are under age 40, 45% expect to have babies.

The differences in attitudes, income, buying plans and active shopping between these tens of millions of prospective parents and the population in general have major sales implications.

For contrast, let's first look at how consumers viewed the world and their own situation during the first four months of 1985.

First-quarter 1985 saw relatively few sharp or drastic changes in the way consumers perceived the specific problems facing the nation. With the U.S. and U.S.S.R. finally getting ready to "reason together," Americans' concern about foreign affairs/war cooled a bit, with 40% mentioning foreign affairs/war as a major national problem in January and 37% in March and April. Concern about possible recession/unemployment grew during the quarter, from 24% in January to 29% in March—then sank back to 24% again in April. Only 13% of consumers considered inflation a major national problem in January; this dipped midquarter, then rose to 12% in April.

Generalized uneasiness

But while Americans worried less about specific national problems, there were signs of a generalized uneasiness that grew month to month.

The year began with half the population feeling "things are getting better for the country." However, this enthusiasm waned to 44% in March and April. Currently, 37% of Americans say they think "things are getting worse"—up five points since January.

What seems to be making people uneasy is the economic environment. Most Americans (52%) thought the economy was improving in January; but this per cent has fallen to 47% in April. The per cent who expect the economy to get worse has ticked upward each month since January and now stands at 26%.

So far, this uneasiness doesn't seem related to recent employment difficulties. Eight in ten households report no layoffs or reductions in hours or pay during the past year.

This ratio has been steady since January. However, even though seven in ten tell us they expect no job problems during the coming months, this ratio has drifted down from 72% in January to 68% in April.

Four in ten households (38%) report that it is "easier to pay bills and get by" this year than last and slightly more (41%) find it *harder* to do so. The proportion finding it easier to make ends meet dropped just one point since January; those finding it harder increased three points. The balancing change is a two-point gain in those who see no change in their ability to pay bills and get along.

At the end of each month in 1985, more people tell us they've had money left over for saving. Nevertheless, most don't expect to increase savings next year. Since January (when 45% reported having cash to save at the end of the month), this proportion inched up to 51% in April.

At the same time, there was a steady downtrend (44% in January to 38%) in the per cent who expect to increase savings next year. It looks as if people may be saving money now that they expect to spend later this year.

We make the protein of lean meats easy for Terry to enjoy.
Gerber

Marketers such as Gerber have recognized that about 45% of the baby-boomer families expect to have babies.

The proportion of consumers who tell us they expect to increase their total debts in the next year has climbed from 17% in January to 24%. This sounds like as many as one in four households expects to make some major purchases in coming months.

Spending selective

Day-to-day spending for consumable goods remained quite steady through the first quarter, with 71% of consumers reporting spending freely for consumables in January and 68% in April. But consumers have become increasingly selective. Most continue to buy food freely, but, as gasoline prices rose at the pumps during the quarter, the per cent reducing their driving to cope with higher gasoline costs promptly went up five points to 30%. Americans are sensitive to price shifts these days. They can change buying plans and shopping behavior overnight to cope with price changes.

This could affect big-ticket purchases in months ahead. At the beginning of the year, just 38% of consumers expected financing rates on housing or a new car to rise in months ahead; now 45% expect this. The per cent expecting housing prices to go up was just 48% in February; now it's up 11 points to 59%. The per cent expecting higher prices for new cars was down to 56% in February; now it is 63%. How may all this affect future buying? We may already be seeing some indications: The number of consumers planning to borrow money or use credit for major purchases was 39% in February, but has dropped to 34% in April. Borrowing plans for new cars remain high (19% in April) but are down a point since December-January.

Plans to buy housing, furniture, appliances, color tvs, used cars and air travel all declined between January and April. Plans to buy a new car, carpeting and hotel/motel accommodations either remained steady or moved up a bit. As we move further in 1985, one gets an impression that consumers still feel secure about work, and although fewer expect their income to go up in the coming year (47% vs. 52% in January), they still feel cautiously confident about managing to get by. But it's as if most people are waiting to see what happens next before making big moves.

Sex

Now here is where sex rears its profitable head. Let's take a look at the buying plans and shopping behavior of all those young Americans now planning to invest in a baby. (And what an investment that becomes!) Government estimates show that just raising a child through the first five years, with one parent at home, costs more than $20,000. (This may be why almost half of all new mothers now go back to work outside the home within the first year after their baby is delivered.)

As the new child grows, so do the dollar outlays. A recent *Wall Street Journal* estimate placed the cost of raising a child born in 1980 to age 22 at just under $215,000. And that doesn't include college costs. It does include food, housing, transportation, healthcare, clothing and other miscellaneous costs—with practically every area in American marketing sharing in the expenditures.

In a household with a new baby, the parents change diapers—but the baby changes everything. Beginning with housing. During first-quarter 1985, 11% of all consumers who were *not* planning to have a baby expected to buy housing during the year ahead. But (get this), 27% of those planning to have a baby also were planning to buy housing. These baby-planners also are the most active housing-shoppers. Only 8% of those Americans not planning for a baby were shopping actively for housing (studying ads, comparing prices and visiting the housing sites) during first-quarter 1985—but more than twice that proportion of those planning for a baby (17%) were shopping actively.

The average first-time home buyer in 1984 saved money for almost two years to get the down payment together. No wonder these baby-planners were more likely to plan on increasing their savings in the coming year and much more likely to have saved money during the past month than Americans who were not planning for a baby. Baby-planners collect dollars the way birds collect twigs—to build a nest.

In fact, baby-planners are the prime prospects for major goods of all kinds. During first-quarter 1985, we found baby-planners across the nation *twice* as likely to be planning to buy and twice as likely to be actively shopping for new cars, used cars, furniture and color tvs. They were also more likely to be shopping actively for appliances and air travel and to be spending freely for medical services, food and gasoline.

Baby-planners are much more likely to report higher income this past year and expect higher income next year than are people not planning for a baby. They have the wherewithal to be prime prospects and customers for most of whatever you sell, not only now but in the future. And they are uniquely impelled toward spending because such a high proportion of this generation's babies (more than 40% last year) are firstborns. The "hand that rocked the cradle" may steady and support your sales picture for a long time to come.#

Private-label, generic food sales drop

NEW YORK—Price brands offered by food retailers have fallen to 14.6% of sales, down from 16.8% in 1982 when the country was in the midst of a recession, according to a new study by Selling Areas-Marketing Inc.

SAMI, a subsidiary of Time Inc., reported that regular private-label and generics both have recorded losses.

The downward trend has continued during the full year ended March 29, 1985, and for the 12-week period ending on the same date.

The only product department measured by SAMI showing any gain was health & beauty aids of regular private-label for the most recent 12-week period.

The dollar share rose from 3.03% of sales to 3.06%, but for the year the share declined to 2.93% from 3.05%.

Other departments measured by SAMI are dry grocery-food, dry grocery-nonfood, frozen and refrigerated.

Despite the downward trends, several specific product categories showed some gains.

These included canned spinach, coffee filters, international-style prepared vegetables, refrigerated apple juice/cider and baby oils, creams and lotions.#

Private label share trends

Kelly's hot

Patrick Kelly is appreciated mainly for his comic skills on the multi-award-winning Federal Express commercials ("Absolutely, positively has to be there overnight"). His latest venture, though, is directing a film spoof, "Beer," about an ad agency threatened with the loss of a major beer account. Made by Orion Pictures, it takes Kelly down the alluring celluloid path so successfully trodden by fellow ad directors such as Alan Parker and David Puttnam. *See Page 5.*

A well bread twosome

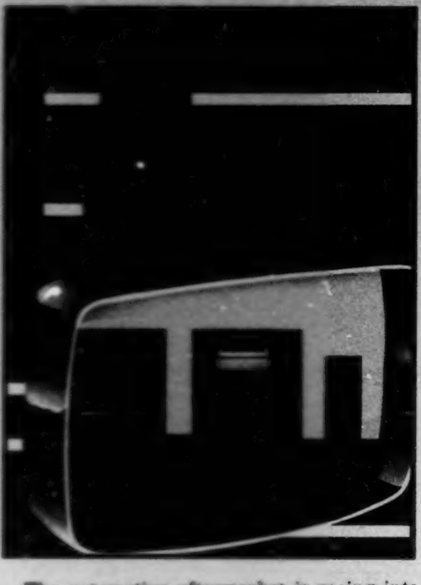
You'll probably never see the names of Jean-Michel Savoca and Boyce Brawley emblazoned on a marquee, even though the duo has played some of the best known theaters in New York. Savoca and Brawley are creative caterers. They design intimate dinners for 10 and huge galas for 2,000. *See Page 46.*

He's got a reel-y neat job

Jim Byerley watched 500 movies last year—and got paid for it. He helps Home Box Office pick its movies. *See Page 48.*

Special Report

Automotive Marketing



The automotive aftermarket is racing into consumer marketing, with specialty service chains, auto-parts stores and high-tech add-ons. A profile of the issues facing this industry appears in Special Report, *starting on Page 13.*

Presstime

Agency sought to chip in

Los Angeles—Famous Amos Chocolate Chip Cookie Corp. is looking for an ad agency to handle its $1 million cookies account. Until now, Famous Amos had relied solely on public relations for support. The company is now developing an ice-cream line, a chocolate milk and is working with White Rock Beverages, New York, on a line of diet chocolate soft drinks, says recently named Famous Amos president Donald Sawyer.

BK beefs up Whopper ads

Miami—Burger King Corp. will spend $30 million on an eight-week tv effort backing introduction of its new, beefier Whopper sandwich (AA, May 13). The campaign, via J. Walter Thompson USA, New York, will break in early June.

Hyundai narrows search

Garden Grove, Cal.—Hyundai Motor America, which will begin marketing South Korean-built automobiles in the U.S. later this year, has narrowed its agency search to three finalists: Backer & Spielvogel, Benton & Bowles and Jordan, Case & McGrath, all New York. The decision on the $25 million account will be made July 1.

Canon develops new ads

New York—Canon USA will back its two latest entries to the amateur photography market—the Snappy S and the Canon Sprint—with an estimated $7 million consumer network tv and print campaign, beginning this month. The cameras, priced at $90 and $160, respectively, will be available in late June. Grey Advertising handles.

AHP signs NBC deal

New York—American Home Products Corp., network tv's fifth-largest advertiser, has cut a major three-year upfront deal with NBC-TV Network (AA, March 11). AHP is coming off a three-year, multi-daypart buy with NBC worth $250 million.

Cap Cities ponders sales

New York—Capital Cities Communications says it would sell four tv stations, 15 radio stations and 54 cable systems to meet Federal Communications Commission requirements in its proposed $3.5 billion takeover of ABC Inc. Cap Cities, however, says it will seek an FCC waiver to keep WPVI-TV, its Philadelphia station. WPVI and WABC-TV, the ABC flagship in New York, have overlapping coverage areas, a violation of FCC rules. If the waiver is granted, Cap Cities says, it

ABP ANPA

Chiat/Day's Nike sportswear ads dominated the One Club for Art & Copy's One Show awards program this week with work like this (above). Art directors Gary Johns and Jeff Gorman and photographer Mark Coppos are credited for the ad, winner of the One Club gold award for a magazine color page.

Chiat golden at One Show

By Stewart Alter

Who would think an ad campaign that glorifies agony and uses sweaty, out-of-breath people to extol the "play is work" ethic would emerge as the campaign of the year? But that's just what has happened with Chiat/Day's campaign for Nike sportswear.

Chiat/Day's work for Nike, previously picked as the Magazine Publishers Assn.'s best magazine campaign of the year (AA, March 25), has gone on to grab more kudos, dominating the One Club for Art & Copy's One Show awards program May 14 in New York.

Los Angeles-based Chiat/Day took away five gold awards (all for Nike), two more than the next-highest gold award winner, Ally & Gargano three. Nike also accounted for two of Chiat's six silver awards and its one bronze. The agency's total of 12 awards was by far more than any other agency's. Winners of two golds each were Fallon McElligott Rice; Levine, Huntley, Schmidt & Beaver; Livingston & Co., and Scali, McCabe, Sloves.

In a way, Nike's victory is not so strange. For if 1984 was, in *Newsweek's* phrase, the "Year of the yuppie," Nike is clearly the campaign most in touch with what the yuppie phenomenon is about, at least insofar as it affects marketing.

ONE OF THE DRAB HOMEBODIES
WHO READS McCALL'S.

This McCall's campaign won a One Club gold for Levine, Huntley, Schmidt & Beaver, New York.

Various pieces of research on young urban professionals show the "work hard, play hard" generation is conscious of and very serious about brands. They're shown to be status-conscious without wanting to admit it. And with distinctions being blurred between work and play, symbols of leisure can become the substitutes for leisure.

Marketers, who might once have been thrilled just to know consumers were brand loyal, have in yuppies a transcendent quality: Brand passion. And the Nike campaign benefits from this by embodying such yuppie tenets as "achievement is worth the agony," "be serious about yourself" and "there's no room for any play that isn't work."

The No. 2 winner of One Show gold awards turned that last statement inside out. Federal Express, and its humor-rich approach, seems to say, "There's no room for any work that isn't play." Federal, accounting for two of New York-based Ally & Gargano's three gold awards, has, of course, been winning awards for years.

But Federal has been more than just a funny campaign. It has been on target not just in its message but in its insights about the environment in which its service is sold.

Its sensibility parallels the same brilliant format that characterized "The Mary Tyler Moore Show" in the world of tv programing: It recognizes that the sitcom of office life is both funnier and more neurotic than anything that goes on at home—at least as depicted on tv.

In terms of total One Show awards, the second-highest number, after Nike, went to BMW of North America. It won five awards (one gold, three silver, one bronze) for Ammirati & Puris, New York, which has been turning out first-class work for BMW ever since the agency opened for business more than a decade ago.

In fact, there were many other long-running campaigns in the One Show's latest awards program. Perdue Inc., the poultry marketer, and Volvo of America, won two gold awards for Scali, McCabe, Sloves, New York, which also won a silver and a bronze award. Campaigns for Lite beer from Miller and Pepsi-Cola won one gold each for Backer & Spielvogel and BBDO, both New York, respectively.

There also were some new, relatively unfamiliar client names.

Muffler shops search for golden touch

By Len Strazewski

Once upon a time there was a king whose touch turned everything to gold and whose domain extended from shore to shore.

The king was a great success, taking over more and more territory and even expanding into foreign lands. However, the more attention he gave foreign campaigns, the greater the risk that competitors would win the hearts of his people.

A familiar fairy tale? In the muffler division of the automotive aftermarket, it's more like a market report as everyone keeps one eye on their image and the other on the industry kingpin, Midas International.

Midas dominates the installed replacement muffler field with 1,415 franchised shops in the U.S. and more than 400 more outside the country. That's more than three times the size of its nearest competitor.

Part of Chicago-based IC Industries, 29-year-old Midas generated record revenues of $298 million in 1984, up 10% from the previous year, according to the parent company's annual report. Midas franchisees also generated record revenues—$649 million, up 19% from 1983.

Midas opened 74 service shops in the U.S. last year and completed a major expansion of its muffler manufacturing facility in Hartford, Wis. The company currently supplies 98% of all exhaust components installed by its franchisees.

Midas International would not discuss its marketing strategy with ADVERTISING AGE, but industry observers say the future of Midas and the muffler specialty shop business, including the rapidly expanding regional muffler chains, is limited only by the imagination and skill of its managers.

"There's still plenty of room for growth and competition in the muffler specialty business," says Jim Wilder, editor of *Muffler Digest*, a Springfield, Mo.-based industry trade publication. "Midas is a leader, of course, but there are plenty of other competitors. It by no means has a stranglehold on the business."

A market study sponsored by *Muffler Digest* and released early this year reveals that the nation's 11,000 muffler specialty shops control about 43% of the muffler/exhaust system replacement market. The specialty shop portion is up 50% over six years ago, the study says.

The remaining 57% of the market is split over many other competing outlets including jobbers (15%), service stations (10%), repair garages (8%), mass merchandisers (7%), car dealers (5%), discount department stores (4%) and miscellaneous outlets (8%).

"The trend has been for the business to move from service stations and repair garages toward specialty stores, and there's no particular reason for that trend to change," Mr. Wilder says.

"And, of course, these specialty shops aren't just selling mufflers; they are into brakes, shocks, suspensions and front-end service and that business has much more room to grow."

Among the specialty store portion of the exhaust replacement market, Midas, with about 12.9% of the outlets, has about 25% of the business, according to industry observers. But the market, they say, hardly is saturated.

"Market saturation is always a question people ask, but as long as there is an opportunity to grow, there's no saturation," says Barry Zeigler, vp and analyst with Tucker, Anthony & R.L. Day, New York. "One way for Midas to grow is by offering other services—which it has done. Another way to grow is for it to continue what it has been doing: A good product, good service and good advertising."

Another industry observer, Lee Tawes, senior vp and analyst with Oppenheimer & Co., New York, agrees. "Sure there's a lot of competition, but there is still room for greater market penetration, both in the U.S. and overseas."

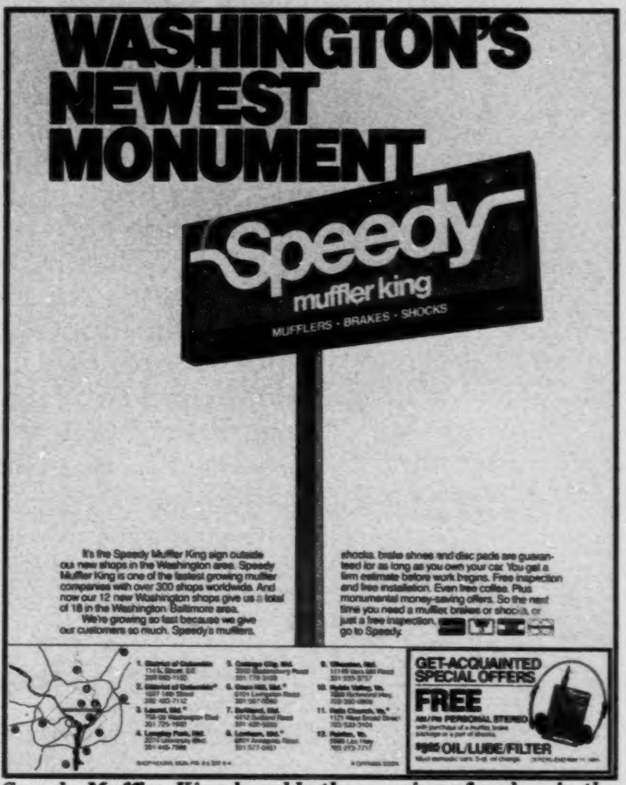
Midas is also a marketing dynamo and that can't hurt either, the analysts say. According to the IC Industries 1984 annual report, Midas International and its franchisees invested more than $46 million in advertising, primarily spot tv.

Although the Midas agency, Wells, Rich, Greene, Chicago, would not discuss ad strategy, automotive advertising insiders and industry observers note that in the past couple of years, Midas set the industry on its ear by marketing a lower-priced "economizer" muffler with a one-year guarantee, a maneuver soon imitated by its competition.

This year, however, the "Trust the Midas touch" series slowly is abandoning price to focus on reliability and product quality.

"There was no real trend to price marketing," says Myron P. Gordon, executive director of the National Midas Dealers Assn., an Irvine, Cal.-based trade group representing the Midas franchisees. "Midas does what it has to to respond to market needs. People wanted a lower priced muffler option and so it was provided."

The "Trust the Midas touch" campaign is the more traditional approach, he says.



Speedy
muffler king
MUFFLERS · BRAKES · SHOCKS

WASHINGTON'S NEWEST MONUMENT

It's the Speedy Muffler King sign outside our new shops in the Washington area. Speedy Muffler King is one of the fastest growing muffler companies with over 300 shops worldwide. And now our 12 new Washington shops give us a total of 18 in the Washington Baltimore area.

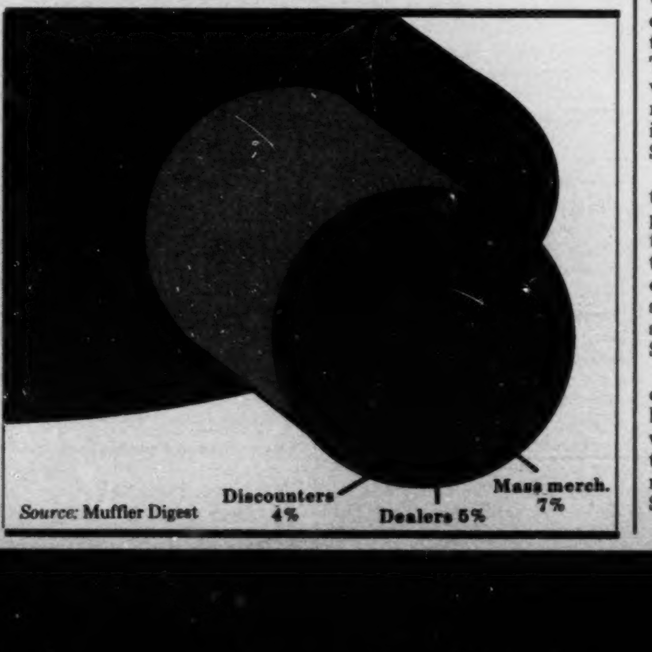
We're growing so fast because we give our customers so much. Speedy's mufflers, shocks, brake shoes and disc pads are guaranteed for as long as you own your car. You get a firm estimate before work begins. Free inspection and free installation. Even free coffee. Plus monumental money-saving offers. So the next time you need a muffler, brakes or shocks, or just a free inspection, go to Speedy.

GET-ACQUAINTED SPECIAL OFFERS

FREE AM/FM PERSONAL STEREO with purchase of a muffler, brake package or a pair of shocks.

OIL/LUBE/FILTER

Speedy Muffler King heralds the opening of a shop in the District of Columbia as "Washington's newest monument."



Source: Muffler Digest

Other muffler specialty competitors are taking a similar approach. Toronto-based Tenneco, marketer of Walker mufflers, controls two major chains, Car-X and Speedy Muffler King, whose combined 434 shops in the U.S. and Canada rank it a distant second behind Midas. Both chains are marketing reliability and security to a marketplace hungry for those qualities.

"People are still looking for the same things: Service, speed and a quality product," says Fred Karp, senior vp-general manager of Tenneco Automotive Retail. "That's what we are marketing. Automotive service consumers are extremely value-conscious and generally feel that the credibility of dealers is very low. We are trying to establish and improve that credibility."

In Canada, the company-owned Speedy Muffler King chain emphasizes a corporate theme, "At Speedy you're a somebody," in tv spots and last summer promoted the dealerships with a "Scratch and Win" sweepstakes offering a one-in-ten chance to win free repair work or a cash prize.

In the U.S., where the chain opened 26 stores last year for a total of 136, tv and radio advertising created by Bozell & Jacobs, New York, echoed the corporate theme within spots titled "That Speedy feeling."

"Awareness is most important for Speedy Muffler King in the U.S.," says Vic Kaminoff, vp-account supervisor at B&J. "And that continues to be our target." The 30-second tv spots featured vignettes of consumers with bad mufflers receiving personal and informed service from their Speedy Muffler King dealer.

This year, the tv campaign is taking a more aggressive approach. In a 30-second spot, titled "Next time, go to Speedy," the company takes a shot at the competition by showing a consumer who had received poor service from a rival coming to Speedy for new repairs.

"We are assuming that the consumer has had some kind of bad service—bad product, poor work, lousy service or just poor treatment as people," Mr. Kaminoff says. "We are saying that Speedy is the exact opposite."

The spot is running in 18 northeastern and midwestern areas of dominant influence in prime time and sports programing. The company would not disclose the ad budget for the Speedy Muffler King chain.

The agency also prepared print advertising to herald new dealers in Washington and Detroit. One print ad features a new Speedy Muffler King store in the District of Columbia with the headline "Washington's newest monument."

Tenneco's other retail muffler operation is the Car-X Service Systems chain, purchased in August. Car-X has about 100 dealers in the U.S. that run 47 company-owned stores in Chicago, Indianapolis, Milwaukee, Cincinnati and Tampa, Fla., and 53 franchised stores throughout the Midwest.

Car-X continues its "Rattle, rattle, thunder, clatter, boom, boom, boom," musical tv spots in 11 major midwestern markets and parts of Florida during news, sports and late-night programing. The current annual budget is $2.5 million.

"The average consumer who doesn't know much about cars is always of the opinion that he or she is not always being treated fairly in the automotive aftermarket. That's the feeling we are trying to counter with these spots," says Robert Kaplan, exec vp of Dawson, Johns & Black, Chicago, agency for Car-X. "We are trying to show that the guys who operate the Car-X shops are dedicated operators who try to relieve your fears and are willing to show you what needs to be done. They are reliable."

The punch line of the jingle, "Don't worry, call the Car-X man," emphasizes that reliability.

The Tenneco operations are not the only competitors eyeing Midas' success.

Meinecke Muffler Co., Houston, ranks as the third largest muffler shop chain in the nation, according to industry sources, with about 400 locations primarily in the South and Midwest. Meinecke would not discuss its marketing plans with ADVERTISING AGE, but the company is known to be abandoning its price-oriented advertising in favor of a stronger image presentation.

Meinecke's spot tv ads, "Meinecke Muffler shatters prices," which have been running for the past two years, still are playing in some Midwest markets courtesy of local operators. But new ads, produced by M&N Advertising, Houston, follow the industry trend of image over pricing.

Another strong regional competitor is Tuffy Muffler Shops, Saginaw, Mich. Founded about 10 years ago by several disgruntled Midas dealers in Michigan, Tuffy now has about 65 franchised shops in the upper Midwest.

Will these pretenders ever come close to the Midas throne? Probably not soon, but when it comes to marketing, everyone has their eye on the king. ■

Len Strazewski is an associate editor of ADVERTISING AGE.

Mass-outlet retailers gear up automotive sections

By Faye Brookman

Although aspirin and motor oil usually do not mix, many mass marketers are finding the combination a profitable one.

During the past few years, mass-outlet retailers—drugstores, supermarkets, discount retailers and convenience stores—have been scurrying to enrich their automotive selection as a vehicle for tapping into the $30 billion auto parts and accessories market.

Faye Brookman is a free lance reporter specializing in retail topics.

The product mix, according to Margaret Kelch, managing editor of *Home & Auto*, a Harcourt Brace Jovanovich publication based in Cleveland, has ballooned from just oil and waxes to so-called "hard" parts and ignition systems. Today it is not uncommon to find a mini specialty auto shop housed under a drugstore or discount store roof.

It is not surprising that mass retailers plunged into this lucrative market.

With automotive items carrying gross profit margins as high as 45%, the market offers retailers much higher profits than traditional fare. Those margins in a typical drugstore, for example, hover between 25% and 30%. Then, too, the automotive department produces net profit of 5%, compared with the traditional 2% to 3% produced by drugstores and discount retailers.

Although mass retailers' sales of automotive products have slowed somewhat since the early 1980s, growth is pegged by Fairfield, N.J.-based market researcher C.H. Kline & Co. at 8.9% a year through 1988—a rate outpacing growth in many other product categories sold through mass outlets.

At the same time, there has been a 13% decline in the number of U.S. service stations, according to the Lanham, Md.-based Automotive Parts & Accessories Assn. That little shop around the corner where a customer used to get his car fixed may no longer exist. If it does, it probably does not do repair work. The result is an increase in the number of do-it-yourselfers—often looking for the best price on auto parts and chemicals.

Mass operators are not blind to trends. In fact, the number of nonauto retailers selling auto items jumped 9.6% last year, according to *Home & Auto*. The magazine reports that nonauto operators now account for about $2.83 billion of total auto aftermarket sales.

Although mass retailers' sales of automotive products have slowed somewhat since the early 1980s, growth is pegged by C.H. Kline & Co. at 8.9% a year through 1988.

The growth is perhaps strongest in drugstores, where industry publication *Drug Store News* reports that auto product volume rose 8.5% last year to $170 million. "Drugstores have not been sleeping. They represent a great growth opportunity for us," says a spokesman for STP Corp., Fort Lauderdale, Fla.

The first drugstore chain to charge into a full-line auto department was Pontiac, Mich.-based Perry Drug Stores. In

Retailers

(Continued from Page 22)

1976, the chain started sprinkling more auto items into its product mix. The philosophy was that auto departments would help bring in more male shoppers; drugstores traditionally attract three women to every one man.

Perry's strategy proved so successful that the 338-store chain started opening large, drug/auto combination stores equipped to produce 25% more sales than the traditional prototype.

Now the company operates 65 of these combos, which devote anywhere from 1,500 to 8,000 sq. ft. to auto items, ranging from Perry private-label filters to foreign car parts.

Just two years ago, Perry drove even harder into the auto business when it began opening free-standing auto stores called Auto Works. Combined, these two auto-store formats accounted for 22% of Perry's 1984 sales of $372 million.

Along the way, Perry discovered other perks associated with the automotive business. "While drugstores enjoy the highest sales and earnings during Christmas—our first quarter—auto sales hit their peak in the second quarter," says Alvin Wander, exec vp-treasurer. Auto retailing, in other words, is at least a partial cure for the cyclical nature of the drugstore business.

PERRY GASKET HEADQUARTERS
8

Perry Drug Stores, Pontiac, Mich., operates 65 drug/auto combination stores.

Because auto sales are so strong in the spring, Perry and others tend to sock their promotional dollars into ads aired or printed in April and May. According to Bev Lyons, media representative, Perry promotes its auto selection via 22 circulars (used for the free-standing auto stores) and 28 full-page newspaper ads during the year. Some spot tv is used in Michigan, especially to launch a new store.

Price is a key factor in the ads, as it is in most mass retailers' messages. Motor oil is the primary ad item and chains usually sell it at cost.

"Sure, we don't make any money on the advertised loss leaders," says Don Gross, vp-marketing for Genovese Drug Stores, Melville, N.Y., "but the ads help bring in customers who will buy other items."

Genovese hopes so; it recently opened a 3,000-sq.-ft. auto section in the basement of a new 12,000-sq.-ft. store in Jackson Heights, N.Y. To herald the opening, Genovese took out full-page ads in the *New York Daily News*—an unusual tack for a one-store auto department.

The chain expects the inventory—which totaled $70,000 at opening—will turn over eight times a year, and the auto department will produce annual sales of between $500,000 and $700,000.

That is on top of the sales amassed in the conventional part of the store, which will be about $3 million a year, sources estimate.

"We really feel the auto aftermarket is burgeoning," Mr. Gross says, "and we'll open more Genovese Auto Warehouses in the 10 to 12 units we open this year."

Troy, Mich.-based K mart Corp. also is testing the automotive waters. Although the retailer always has offered a wide selection of batteries, accessories and chemicals, it most recently unwrapped four test units in Mobile, Ala., featuring separate auto service centers, averaging 4,500 sq. ft. to 6,700 sq. ft.

The K mart centers include two features generally lacking in mass marketers' auto stores: Trained personnel and a catalog through which out-of-stock parts, even some foreign and obscure ones, may be ordered.

To launch the four test stores, K mart devoted 75% of its ad budget for the openings to print, with the rest split between tv and radio. The chain will not comment on further plans for the auto departments.

Local sources, however, report that the system is working well, especially because K mart does not butt heads with any of the strong specialty auto parts chains in its Mobile market.

Another drugstore chain seizing the opportunity to fill a niche in its marketing area is Liverpool, N.Y.-based Fay's Drug Co. Late last year, Fay's introduced Wheels, its entry into the auto aftermarket. Wheels, according to chain president Dan Herrmann, was conceived based on the chain's success with automotive products in its super-drugstores.

Fay's plans to open two more free-standing Wheels units in Albany and Syracuse, N.Y., this year.

"It is not surprising that drug chains are branching out to add free-standing auto store chains, because the margins are so much better," says Dan Barry, vp, Kidder Peabody & Co., New York.

He cites Shiremanstown, Pa.-based Rite Aid Corp. with its ADAP auto stores and Pay 'n Save Corp. in Seattle with Schuck's as prime examples.

Even Perry, Ms. Lyons says, will open free-standing auto units in the future rather than combination drug/auto stores. "We'll probably open more auto units side-by-side with a drugstore," she says.

The obvious reason for the split, sources say, is that it keeps the product categories separate, yet attracts both the shopper who wants toothpaste and the one who wants exhaust pipes. Drugstore chains pursuing this route include Harco Drug, Northport, Ala., with its Carport units and Malone & Hyde, Memphis, with its Auto Shack Stores.

It is both the image problems—motor oil next to shampoo—and space restrictions that have kept some retailers from jumping into the fray.

"We stick to the basics in our sections," says Joe Pollard, vp-advertising for Alexandria, Va.-based People's Drug Stores. "We try to carry what our customer might need as a convenience."

Then, too, J.C. Penney Co., New York, withdrew from the business when it repositioned itself as a department store. "Auto just does not cut it in Penney's new image," a company spokesman says.

Other mass marketers believe the do-it-yourself repair business has peaked. Many home centers, according to trade newspaper *National Home Center News*, are leaving the automotive market. Busy Beaver in Pittsburgh, Lloyd Lumber in Danbury, Conn., and Mr. How Warehouse in Margate, Fla., head the list of home centers cutting the department because they believe the business is leveling off.

Yet there's no denying the success achieved by retailers that really pursue the business, says one retail analyst who follows the industry. "Auto retailing is very similar to running drugstores. If anything, the addition of auto just makes better economies of scale."

Concludes a spokesman for Rite Aid, "With the drugstore industry maturing and consolidating, auto retailing promises better long-term growth." ■

Do-it-yourselfers build parts market

By Cathy Curtis

"I once had a manager put his arm around me when I said we had no competition," says Schuck's Auto Supply president Ron Weinstein. " 'Everybody who sells spark plugs is competition,' he told me."

Once the province of the warehouse distributor—who was generally too busy selling to service stations to bother with the lone retail customer—automobile parts retailing has become a highly competitive and increasingly consumer-driven field in recent years.

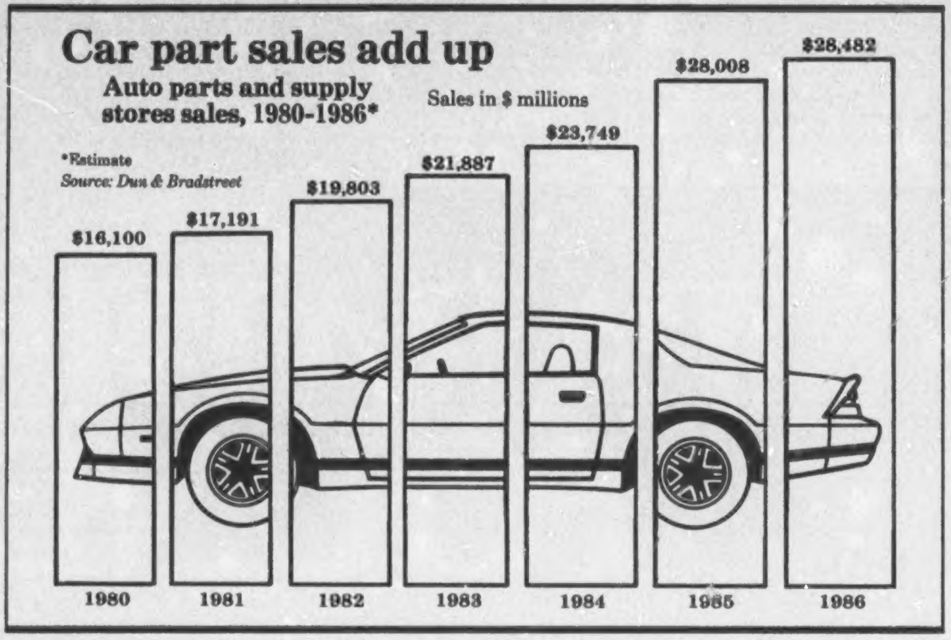
More than 2,600 retail companies, most operating 10 or fewer stores in specific geographic regions, are fighting for their share of the over-the-counter parts and accessories market, which climbed to $30 billion last year, according to Ed Kaufman, president of Lindsey-Kaufman Co., Tenafly, N.J.

The so-called "traditional" parts aftermarket consists of the independents with fewer than five locations, the warehouse distributors and the jobber-retailers—whose walk-in retail trade has expanded to 35% of their sales, Mr. Kaufman says. (Sarah Frankson, publisher of *Automotive Marketing*, a Chilton Co. trade publication, puts this figure at 28% to 30%.)

The other, larger and faster growing chunk of the parts aftermarket is the turf of the volume retailers—the high-volume auto chains, mass merchandisers, hardware-home centers and discount retailers.

The market everyone wants to reach is the do-it-yourselfer. According to the *Automotive Marketing* 1984 Vehicle Maintenance Study, 71% of car owners think of themselves as do-it-yourselfers, even if they do little more than change their own oil—without bothering to replace the filter.

But the hard-core do-it-yourselfer is the man (the market is 85% male) in his late 30s who owns a single vehicle and whose income is less than $30,000.



Car part sales add up

Auto parts and supply stores sales, 1980-1986*

Sales in $ millions

*Estimate

Source: Dun & Bradstreet

Selling products that may or may not encompass hard (replacement) parts, chemicals, accessories, "performance" products and tires, the volume retailers already control about 84% of the do-it-yourself market, according to Lindsey-Kaufman estimates.

Ms. Frankson says the field is "filled with very successful entrepreneurs . . . even when they go into a public company, they're so small a part of a much larger fish."

One of the new breed of professional managers, Fran LaBrecque of Avon, Mass.-based ADAP (American Discount Auto Parts), was profiled last December in *Esquire's* 1984 Register of superachievers younger than 40. Mr. LaBrecque, a former car salesman, started his company on borrowed money, saw it grow at an average rate of 37.5% for five years, and sold its 62 New England area stores in 1984 to Rite Aid, a drugstore chain, for $28 million.

Acquisitions by mass retailers of free-standing parts store chains are increasingly common. Perry Drug's acquisition of Auto Works and Fleenor (now the 163-unit FAS/Auto Works chain, with 1984 sales of $80.7 million) and Dart Drug's takeover of Trak Auto were both cases of chains with strong auto departments gaining more clout in the aftermarket.

Other similar arrangements include Pay 'N Save Corp.'s takeover of Schuck's Auto Parts (65 stores in the Northwest), Auto Shack (a Memphis-based division of Malone & Hyde), Chief Auto Parts (a 435-store division of Dallas-based Southland Corp.) and Lucky LKS Automotive (a 379-unit, Phoenix-based subsidiary of Lucky Stores).

The diverse nature and ownership of these parts outlets, however, makes it almost impossible to come up with an over-all reading of market share.

Some chains sell mainly home and hardware items; auto parts account for only 8% of 250-unit, Tulsa, Okla.-based OTASCO's $325 million in 1984 retail sales, for example.

Others focus on specific aspects of the aftermarket; Super Shops, San Bernardino, Cal., sells only high-performance products in its stores, which registered about $75 million in 1984 sales.

Market share varies by product line, Ms. Frankson says. The nonautomotive stores tend to sell fast-moving, high-volume products such as chemicals, wax, polish and antifreeze. Although the discount stores "probably

Print is 'backbone'

Auto parts store advertising traditionally has been funded by a co-op allotment from product suppliers. Historically, says Ed Kaufman of Lindsey-Kaufman Co., the aftermarket hasn't always made the best use of advertising.

But things are changing. Ron Weinstein speaks for many when he says his company, Schuck's Auto Supply, has "tried virtually all forms of media—sides of buses, billboards—but print appears to be the backbone of our business." Schuck's blankets the 31 newspapers in its market with page ads, generally featuring a single item. With direct mail, Schuck's reaches some 2.2 million prospective customers—"the universe," according to Mr. Weinstein.

R&S Strauss Stores, Union, N.J., has been running tv spots for the past three years, using mostly co-op funds. "Those suppliers with whom we do sufficient business to pay for tv time are few and far between," says Joe Kratka, exec vp for the 48-store chain, which had 1984 sales of more than $50 million. "It's expensive for us, making new commercials every year." Currently, the company's focus is on drive-time radio, metropolitan newspapers and shoppers in the outlying suburban areas.

One auto parts company executive, who wishes to remain anonymous, says, "When you're on tv you reach all the motoring public, male and female. In the newspaper, buried in the sports pages, we feel we're reaching the male customer only."

On the other hand, he says there is "an immediate aspect when you're on television, but the consistent customer base seems to come from the newspaper." —*C.C.*

have a predominant share of the chemical business," Ms. Frankson says, the jobber will sell heavy-duty engine parts the chains won't touch.

One of the jobber's advantages over the volume retailer is a broader selection, including items that aren't sufficiently profitable for the chains. The jobber also has more space and in-depth product knowledge, Mr. Kaufman says.

But what the jobber can't do is compete with the chains in pricing.

The current trend among the volume retailers is toward a supermarket-style store in which the motto is self-service. Stores run anywhere from 1,800 to 15,000 sq. ft., with the average between 10,000 and 12,000 sq. ft. There is a growing awareness of the importance of appearance.

At Pep Boys, Los Angeles (there is also a Philadelphia-based division), Chuck Fox, vp-advertising and sales, stresses "cleanliness . . . sparkle . . . an atmosphere of excitement" in his company's 150 stores.

The chain, which chalked up 1984 sales of $350 million, looks for properties near discount stores and other automotive dealers.

Super Shops, which is adding to its 70-store count at a breakneck pace—three to five a month—currently is locating in shopping mall areas vacated by Kinney Shoe Stores.

Pricing manager Wayne Osburn says Super Shops "don't have to put stores in what most people think is a desirable area . . . since 1963 [the founding year], we've never closed down a store."

Mr. Osburn emphasizes the cleanliness and eye-catching displays in the Super Shops stores. "Our windows aren't all cluttered up with gobbledygook," he says.

Certain auto chains haven't joined the rush toward the superstore idea, however. Action Auto's Jim Sabo, one of three brothers who own the chain, was quoted in an *Automotive Marketing* story last year as saying many smaller stores in the right locations are infinitely preferable to one giant store.

The catch is that this Flint, Mich.-based chain of stores—which average 1,800 to 3,000 sq. ft.—all sell gas. Action takes over abandoned gas stations, fills the store area with parts, chemicals and accessories, and requires customers to come inside to pay for filling the tank, thus exposing the consumers to the merchandise.

Schuck's Auto Supply, Tukwila, Wash., also sees its 5,000-sq.-ft. stores as marching to a different drummer. The units, which together had 1984 sales of $70 million, are "a throwback to yesterday and part of tomorrow," Mr. Weinstein says. "Self-service? By every definition I could come up with, no . . . ideally, we would like to make personal contact with every customer."

That includes helping with needs the do-it-yourselfer may not even know he has.

But there are other ways to reach the do-it-yourself market, if high-tech promises can be believed. Just as in-store computerization has made significant inroads in auto parts chains, by connecting the cash register with the stockroom and the warehouse with the network of stores, computer access is affecting the customer directly, too.

Both Crown Auto, Minneapolis, and its major competition, Champion Auto Stores, New Hope, Minn., use a system developed by ARIS (Automated Retail Information Services) in which information the do-it-yourselfer supplies about his car is encoded on a magnetic card. When the card is read by a computer, it yields information on the kind of products the car owner needs.

Crown, which registered 1984 sales of about $36 million, is testing Autofax in half of its 51 midwestern stores, while Champion is experimenting with this costly (more than $250,000, according to Dean Billbe, vp-sales and marketing) venture in 30 Twin Cities area stores. (Champion operates 115 stores in nine states.)

Other signs of the times include videotaped aids for the perplexed consumer. Lucky Automotive is using videotapes to steer the do-it-yourselfer to the right product.

At the videotext center at Champion stores, videodiscs extol the virtues of products, explain how they are used and how they will suit the do-it-yourselfer's needs.

"We give away knowledge," Mr. Billbe says.

Despite new ways of reaching the consumer and increased attention to the mood and look of the chain stores, some aspects of the parts aftermarket probably never will change. As surely as spring is in the air, the tuneup special will make its comeback, and when the icy blasts of winter are just around the corner, it's time to crank up the annual antifreeze promotion.

Still, the future does hold some major questions for the auto parts retailers. On a nuts-and-bolts level, because the market share held by the volume retailers is already so high, continued growth will be a matter either of expansion of the do-it-yourselfer base (its share of the total parts market is expected to reach 25% to 40% by the 1990s, according to Ford Motor Co. spokesman Mike Davis, as quoted in a January *Automotive Marketing* article)—or of slicing up the existing pie in different ways.

With the emphasis on a quantitative, analytical approach to the market favored by today's managers and increasing retail activity on the part of the warehouse distributors and jobbers, creative answers might be in the offing.

The announced goal on the part of car manufacturers of a "maintenance-free" automobile also may have a profound impact on parts retailers.

During the past 12 years, Ford

Parts

(Continued from Page 31)

has eliminated 22 former maintenance operations.

Such bolt-on parts as water pumps, fuel pumps, alternators, starters and generators may not be needed in the car of tomorrow.

At the same time, the trend toward electronically controlled systems—expected to be a major feature in cars from 1987 onward—is likely to make the do-it-yourselfer increasingly leery of doing some work he used to take in stride.

The flip side of this innovation is that some of it (such as automatic warnings that it's time to change the oil) might encourage more product sales. The kind of tasks that most do-it-yourselfers perform probably won't be affected much, despite the increasingly cramped design of engine compartments.

In addition, while amateur mechanics who grew up working on the old jalopy may be dismayed by the mysterious workings of their new cars, children born of the electronic age take high-tech innovation for granted.

Finally, there's a time lag involved. In 1995, according to Predicasts, a Cleveland-based research company, two-thirds of the cars on the road will be 1987-and-later models. But most people still will be working on 1986-and-earlier cars.

The forecast for parts sales, according to a 1983 Dun & Bradstreet Credit Services report, "Automotive Aftermarket Retailing," is an "optimistic" 4.2% annual growth rate, in constant dollars, for the next three years.

With that short-term view and a glimpse of the innovation ahead for the next decade or so, it seems that most signs point to a revved-up future for the do-it-yourselfer and the parts chains that serve him.

Independents pitch quality to outrun chains

The caller dialing Thrifty Auto Parts in Santa Barbara, Cal., who happens to be put on hold is not left listening to elevator music. Instead, the store uses the time to make a pitch for its services. "Now your foreign parts headquarters, with over 1,000 parts," the recording says.

It's all part of being a small fish in a pond of barracudas—the situation today's independent auto parts retailers face.

Thrifty partner Scott Campbell says his business is basically retail, although he does sell to gas stations. Thrifty's two stores—the other in Carpinteria, a town of 10,000 halfway between Ventura and Santa Barbara—feature open-aisle merchandising in 2,300 and 2,800-sq.-ft. locations. The emphasis is on quality brands, Mr. Campbell says. "The first thing we look at is the quality of the line; price is second."

He says that, while Pep Boys is "clear at the other end of town," Trak Auto is "now really running roughshod." But he's not worried about Trak cutting into his business.

"I know people . . . when Pep Boys or Trak came in right near them, their business went up," he says.

His own business increased 10% in the first month the local Pep Boys opened in Santa Barbara, where Thrifty has been since 1965 and chalks up annual sales of $1 million.

"They really rely on fast-moving chemicals," he says of Pep Boys. On so-called "hard" parts, "their prices are different and they don't have the selection we do."

Patrick Mahoney, owner of Mike's Auto Parts, Portland, Ore., gets off the line in the middle of a brief conversation to confer with a customer. ("Oh, okay, what size engine?") His two stores in the Portland area began on a small scale in 1972 "in my mama's basement."

Although "a lot of people are out here selling auto parts," he says, Mr. Mahoney believes there's plenty of room for stores such as his that emphasize customer service and price.

Although he believes hard parts sell best through newspaper ads, there's nothing like the radio for responding swiftly to weather conditions.

If there's a sudden snowstorm, "I hurry and buy radio time . . . with newsprint you're looking at a minimum of a week's lag time," he says.

At Phil's Home & Auto Store, Wintersville, O., owner Alan Silberman says, "Our forte is stocking just brand-name parts."

An independent merchant associated with Ace Hardware Assn., Phil's was founded in 1961. In a self-service atmosphere catering mainly to the do-it-yourselfer, with some dealer business, Mr. Silberman says he does a "high volume" of business but won't reveal sales figures.

Although Nationwide Auto Parts and Sears, Roebuck & Co. offer major competition, Mr. Silberman says the difference of $1 or $1.25 between branded and off-branded merchandise makes little difference to his primary consumer.

Someone who takes the time off to work on his car "wants to do it right the first time," he says. "Statistically, I think we were ahead of the industry—we realized this years ago." —C.C.

Competition fuels service bays

Service is one of the biggest competitive variables—and one of the potentially biggest growth areas—for the nation's automotive parts chains. Some retailers offer service across the board, others dabble in it and still others have ruled it out, at least for now.

Pep Boys stores, for instance, always have contained between four and ten service bays. "We do a very big business in service," says Charles Fox, vp of the Los Angeles-based company.

R&S Strauss stores contain between six and eight bays; Champion Auto Stores typically offers about 30. "It has not been a strong suit in the past," says Champion vp Dean Billbe, but with "electronics in the future," he can see the possibilities for expansion of service facilities.

In the wake of gas station closings, and with today's increasingly sophisticated automotive engineering scaring off many do-it-yourselfers, demand for service is high.

Still, Schuck's Auto Supply and Lucky LKS Automotive stores offer no service at all. Auto Works services only brake drums, and Action Auto finds that its service department, offered in only a few of its stores, accounts for just 4% of sales.

From the perspective of "dry" stores—those with no service—the outlay for equipment, trained personnel and space may not be worth the return.

"The cost of equipping a facility of seven to ten bays is about $100,000—and climbing," says Ed Kaufman of Lindsey-Kaufman Co.

According to the most recent statistics available through Lindsey-Kaufman, auto supply stores with service bays account for 2.5% of the auto service market. The Foundation for Aftermarket Industry Research, a part of the Auto Parts & Accessories Assn., Lanham, Md., reports that 7,600 parts stores are service-equipped, with an average of four bays an outlet.

Mr. Kaufman says that whereas conglomerate-owned auto parts chains primarily are concerned with growth over a broad geographic area, service-oriented retailers are more interested in cultivating every possible segment of their existing markets—from the serious do-it-yourselfer to the consumer who shuns any form of car repair and service.

In such cases, the availability of service facilities may make the difference between succumbing to competition from the dry stores and fighting to hang on to an existing customer base. —C.C.

Security marketers strive for lock on awareness

By Frank Vizard

When car security marketers go to bed at night they don't pray for more stolen vehicles. Instead, they pray to a god that lives somewhere in Detroit. If their prayers are heard, that god may persuade the city's auto makers to get into the security business.

The people on their knees work for aftermarket car-security companies. It is their belief that the advertising clout that could be brought to bear by the auto makers would increase dramatically public awareness of their product.

"General Motors' involvement would probably be a plus, if only to increase consumer awareness of auto security," says Stu Sharenow, president of Primary Security, Mineola, N.Y.

Ultimately, it is likely their prayers will be answered. Car makers are taking more notice of car theft and have offered security devices as options on a few models. However, Detroit's advertising muscle is not likely to be felt for some time.

In the meantime, national attention for auto security will come at the largess of Alpine Electronics of America. The Torrance, Cal.-based company, known principally for its car audio products, has diversified into auto security and cellular phones. Alpine is positioning itself as a mobile electronics company; a $5 million ad campaign this year, using sports and news tv programing and a variety of men's magazines, will feature all three product categories.

Alpine believes auto security is a solid category, according to Jim Sala, ad manager for Alpine. "We've noticed a great response from our dealers."

Other companies from the consumer electronics arena soon may be adding to the over-all ad impact. Pioneer Electronics, Long Beach, Cal., is beginning an ad schedule with an undisclosed car buff magazine this month. Panasonic Co., Secaucus, N.J., looms on the horizon, but its security product is still being tested.

The entry of electronics giants such as Pioneer and Panasonic is welcomed by most other auto security marketers. "They realize that auto security is a viable product category," says Sheldon Kirschner, president of Anes Electronics, a Marina del Rey, Cal.-based manufacturer. "When companies like that get into the business, their advertising and marketing clout increases consumer awareness."

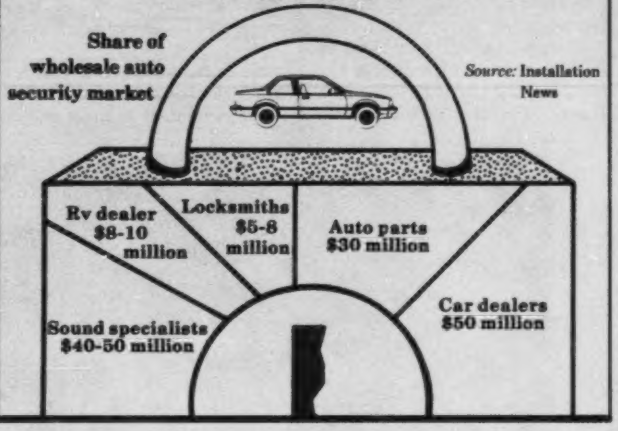
Among those that manufacture car security systems exclusively, only Techne Electronics of Palo Alto, Cal., has developed any real brand name awareness nationally, using a regular print schedule in *Car & Driver*.

And that's about where it ends for car security on a national basis.

About 80 companies are in the automotive security business. That's up somewhat from a year ago; in April, 1984, *Auto Sound & Communications*, a New York-based trade publication owned by International Thomson Co., listed 70 companies involved in auto security.

"New companies are starting up in local markets every day," Mr. Sharenow of Primary says. All this entrepreneurial activity makes tracking the auto security business very difficult, says Ron Berger, national sales manager of the auto products division of Panasonic.

All 80 of these companies carve up a market estimated between $155 million and $200 million at wholesale, according to industry executives and John Runnette, editor-publisher of *Installation News*, a Los Angeles-based trade magazine for auto security installers. Market penetration is minimal.



Locking up profits

Source: Installation News

The type of product sold can be defined somewhat by distribution channels, with lower-priced items sold mostly through automotive parts stores and higher-priced electronic alarms the province of consumer electronic dealers. Car dealers generally sell both types.

At the car dealer level, Elk Grove Village, Ill.-based Chapman Industries Corp. may have as much as 50% of the market. Audiovox Corp., Hauppauge, N.Y., a major car audio company that has created a separate auto security division within its $100 million-plus company, is also a strong presence.

Within consumer electronics stores, Chatsworth, Cal.-based Crimestopper and Torrance, Cal.-based Auto Page have gained significant shares although the specter of electronics giants Alpine, Pioneer and Panasonic promises to make this segment very competitive. Alpine reports that 45% of its dealer base already is involved with its car security product.

In the do-it-yourself area, made up of automotive parts stores and similar outlets, Anes Electronics owns more than 50% of the market. Anes recently has spun off a new company, Senaco, aimed at penetrating the consumer electronics market.

While some companies have specialized successfully within a certain distribution channel, many others have specialized in marketing their product in specific geographic areas, mostly urban.

Most ad campaigns by auto security companies, therefore, are regional in nature. Chapman recently spent $50,000 on advertising in Chicago, Cleveland and Los Angeles. Code-Alarm/Tacco of Troy, Mich., last month began a radio campaign in Detroit that is being augmented by dealer advertising in local newspapers. Crimestopper has met with success in advertising in West Coast regional magazines.

The growth rate for the auto security industry is about 30% a year, according to industry consensus. That and the desirable target market—males between the ages of 29 and 55 years—are attracting the interest of many. But most of the new companies and a large portion of the older players do suffer from the same two problems: Lack of money and product negativity.

Auto security is a need-driven product rather than one desired by consumers. Often the purchase is made after a bad experience. Insurance companies offering up to 15% discounts to owners of cars equipped with security devices probably spur more sales than any advertising the industry has done.

"It's time for a real smart marketer to come in and build awareness," says Mr. Runnette of *Installation News*.

That smart marketer may be an auto maker. An amendment adopted by Congress, mandating that car security devices be offered as options in 1987, will bring the car companies into the business in a big way. As a result of this "black box amendment," as it is called in the industry, the size of the aftermarket easily could triple as consumers discover the alternatives available.

Marketing muscle also may come from a major national retail account, says Mr. Kirschner of Anes.

A national retail chain with installation facilities could provide the push an auto security product would need. Such a scenario could happen at any time, he says, putting auto security at the forefront of auto aftermarket purchases.

Frank Vizard writes for a variety of consumer and trade magazines, specializing in the auto security and consumer electronics industries.

4A's seeks advertisers' respect

Four A's president Len Matthews (l.) and his wife, Dottie (r.) flank outgoing association chairman John O'Toole (center) of Foote, Cone & Belding, and his wife, Phyllis, and incoming chairman Lou Hagopian of N W Ayer. The change took place at the Four A's annual meeting. *(Staff photo by Mary Herlehy.)*

Group will honor innovative clients

By STEWART ALTER

White Sulphur Springs, W. Va.—Advertisers found themselves both chastised and lionized at the American Assn. of Advertising Agencies' 67th annual meeting at the Greenbrier here last week. They were chastised by Four A's chairman Len Matthews for, among other things, encouraging speculative presentations, and in another speech for not fully appreciating the creative nature of advertising.

Yet advertisers will be the recipients of a new honor that will become a regular feature of future Four A's annual meetings. And the crowd of 720 agency executives and wives found each session punctuated with short, videotaped case histories in which different advertisers talked about campaigns their agencies had developed.

The Four A's new Advertiser Recognition Program, unveiled here, is at the heart of a new direction the association is taking. Last year it began an effort aimed at improving advertising's image to the general public. This year the focus is being narrowed to improve the attitudes of the general business community—the world of agency clients—toward agencies and the work they do.

Last year's effort included an ad campaign developed by Fallon McElligott Rice, Minneapolis. This year there will also be a campaign developed by Jim Johnston Advertising, New York, to which publishers will be asked to contribute space. But the new element in the Four A's strategy is the recognition program.

Matthews raps some client, agency practices. Page 106.

Hagopian sets his program as 4A's chairman. Page 106.

"There is evidence that American business, including major advertisers, does not place the same importance on advertising as we do," said John O'Toole, outgoing chairman of the Four A's in a speech Saturday morning announcing the program. "There is evidence that they regard it as playing a relatively minor role in increasing their volume and profit. . .and that they look upon it as too unpredictable, too ambigu-

Ban on 'unfair' rules expected in FTC bill

By STEVEN W. COLFORD

Washington—Congress is nearing a consensus on a Federal Trade Commission bill that gives advertisers continued security against industrywide regulation aimed at "unfair" ads.

Though FTC bills that cleared key Senate and House committees this month are at odds on this point, observers believe Congress will ultimately adopt Senate provisions that bar the commission from writing industrywide bans on "unfair" ad practices.

The eventual final bill is also expected to include congressional language, first proposed by the FTC, clarifying what's meant by "unfairness." But an additional, more controversial, definition of "deception" that had been sought by Republican FTC chairman James Miller and the major ad industry trade associations, was rejected by both Senate and House panels.

The Senate and House bills fall far short of the ad industry's desire for a total exemption from the Federal Trade Commission Act ban on "unfair" practices.

Instead, FTC would retain the freedom to challenge individual ads on fairness grounds on a case-by-case basis, even if the claims made in the ad are truthful.

Such fairness cases have been very uncommon in

Will sell L.A. daily, cable systems

Tribune gets its KTLA link

By GARY LEVIN and JENNIFER PENDLETON

Los Angeles—The Tribune Co., having forged the final link in a chain of independent tv stations that now stretches from New York to California, will not fight a federal rule that obliges it to sell its *Los Angeles Daily News* and neighboring cable systems.

With the Tribune Co.'s successful $510 million cash bid to acquire KTLA-TV, the leading independent tv station here, the Chicago-based communications company owns major tv stations in Atlanta, Chicago, Denver, New Orleans, New York and—now—L.A.

The purchase price is the highest ever to be paid for any tv station, beating the $450 million offered by Hearst Corp., New York, for Metromedia's WCVB-TV in Boston (AA, May 9).

If approved by the Federal Communications Commission, the deal will bring the company's tv stations into 19.6% of U.S. tv households, roughly the same percentage as the six Metromedia stations being sold to Rupert Murdoch. (Tribune Co. stations now reach

NBC sets Super Bowl price of $550,000 per 30

New York—NBC-TV is charging Super Bowl XX sponsors $550,000 per 30-second spot, says Robert Blackmore, senior vp-sales. The event, NBC's first Super Bowl in two years, is due Jan. 26 from the New Orleans Superdome. Last season, ABC charged early-bird clients $500,000, which later rose to $520,000 per 30.

California Cooler pours into Japan

Stockton, Cal.—California Cooler is introducing its wine cooler in Japan, making it the first U.S. cooler to sell outside the country. Tv, radio and print ads, in a joint effort with CC's Japanese distribution partner, POKKA Corp., Nagoya, will start soon. POKKA's agency, Dentsu, Tokyo, will handle. Chiat/Day handles California Cooler domestically.

Gitano on binge, adds 12 licensees

New York—Gitano, marketer of jeans, sportswear and swimwear, is adding 12 new licensees, including Gitano pantyhose (to be made by L'eggs). The pantyhose are being tested in St. Louis and will be handled by Long, Haymes & Carr, Winston-Salem, N.C. All other products, including shoes, socks and underwear, will be handled by Gitano's new in-house agency, Ad Group; Kolker & Gill is previous agency of record for Gitano. Budget will be doubled to almost $12 million.

United ads fly as pilots walk

Elk Grove Village, Ill.—United Airlines had a campaign rolling less than seven hours after 5,000 pilots struck the nation's largest airline late last week. Radio and tv spots, as well as newspaper support, in 11 major United markets said "Flying is our job. And we're staying on the job." Leo Burnett USA, Chicago, handles.

Just 8 of top 30 Four A's shops see profit hike

White Sulphur Springs, W. Va.—Only eight of the 30 largest American Assn. of Advertising Agencies members are forecasting an increase in 1985 profit margins, says 4A's chairman Len Matthews. Of those 30, 22

GM's media revamp crafted for efficiency

By VERNE GAY

New York—The dramatic changes in the magazine and network tv negotiating assignments for all General Motors division agencies (AA, May 13) are designed to maximize the giant advertiser's leverage in getting lower media prices; better tv positions and outdoor boards, and to take immediate advantage of magazine rate discounts, according to sources.

GM's Media Council, which set up the changes, also is consulting with the GM divisions to standardize guidelines for sponsoring tv programs with varying degrees of sex and violence. The sources said GM was concerned since the parent company generally receives public complaints about such sponsorships, rather than the division.

In another twist, each agency has been given responsibility for a specific group of magazines. Before this, each agency would buy for its own division account. Now, each will negotiate prices and contracts with its group of magazines for all divisions. Billings still will be handled by the divisions' agencies.

For now, the Media Council has assigned three GM agencies to handle network negotiations for specific dayparts. However, the commission fees for GM's five agencies remain intact, and the negotiation assignments are in effect only for the 1986 model year beginning this fall.

A GM spokesman confirmed that the agency tv assignments outlined by Advertising Age last week are "essentially correct." Asked whether the assignments were a test, the spokesman replied: "Not a test, but a first step."

The GM division agencies tapped for specific network negotiating duties are D'Arcy MacManus Masius, Bloomfield Hills, Mich., for news; Campbell-Ewald, Warren, Mich., for sports, and Leo Burnett USA, Southfield, Mich., which will negotiate upfront prime time buys for all GM divisions. Each agency is responsible for the production of its own tv specials.

McCann-Erickson, Troy, Mich., and N W Ayer, Detroit, GM's other top shops, were not assigned negotiating responsibilities. Sources said that while they could get other duties later, the prestige jobs clearly have been spoken for.

Negotiations for network radio, national spot radio, tv syndication and cable continue to be handled by each agency. Also, each GM agency will keep responsibility for its own network tv scatter buys.

GM's roster of agencies includes Ayer (corporate pr), Burnett (Oldsmobile), D'Arcy (Pontiac and Cadillac), McCann (Buick and GMC trucks) and C-E (Chevrolet).

Under the new system, Burnett, for example, will ascertain the total amount all divisions will

Ritz Group calls to 'child of '60s'

By PAT SLOAN

New York—After all the talk of aging baby-boomers, yuppies and musical blasts from the past in advertising, Squibb Corp.'s Charles of the Ritz Group has come up with a campaign targeted squarely at that part of the population that was born in the '50s and grew up in the '60s.

Entitled "Confessions of a child of the '60s," the campaign is for Charles of the Ritz skincare products and is the first effort by Lord, Geller, Federico, Einstein. That agency succeeded Advertising To Women on the Ritz account last fall.

Charles of the Ritz has cast model Maria Holve to play the part of the now grown-up flower child. She will be associated with Ritz products in much the same way that Karen Graham's face became almost synonymous with Estee Lauder.

The national print and spot tv campaign is Ritz' first major effort for its skincare products since 1981, when the brand was introduced under the umbrella Prescribed Skin Care (a tag line that has since been dropped), said Ritz senior vp-marketing worldwide Sherry Baker. She estimated fourth-quarter spending alone at a national rate of $4 million.

For all of 1984, Leading National

Ads must ID celeb doubles: Judge

Send in the clones

By JAMES P. FORKAN

New York—It looks like look-alikes will remain a popular category of advertising, so long as those celebrity clones are clearly identified as such in the ads.

That was the gist of the verdict handed down here May 16 by Manhattan federal Judge Constance Baker Motley. Woody Allen had sued look-alike Phil Boroff and Ron Smith Celebrity Lookalikes, Hollywood, seeking $10 million in damages for violating his privacy and allegedly misleading the public that he was endorsing National Video, a Portland, Ore.-based home video retail chain. In a magazine ad that ran in home video publications, Mr. Boroff was shown renting videocassettes, including two of Mr. Allen's films.

In her decision, Judge Motley awarded no damages, but she said that the ad could no longer run. She added that Mr. Boroff should

CORPORATE CLOSEUP

Seven-Up stands up to cola's challenge

By SCOTT HUME

On April 25, Coca-Cola Co. announced it would reformulate the world's best-selling soft drink, Coke. The merits of that move still are being discussed and debated by marketers around the world.

Seven-Up Co. chose the same week to announce it would reformulate its Like and Sugar Free Like colas. Only Seven-Up's bottlers seemed to care.

Obviously, Like is not St. Louis-based Seven-Up Co.'s flagship product, but the contrasting receptions for those two announcements reflect the most serious problem Seven-Up faces in long-term growth: It's a cola-drinking world, and Coke and Pepsi have divided that world between them.

Seven-Up, the No. 3 soft-drink company, operates in the No. 2 soft-drink market—lemon-lime—of which its 7UP and Diet 7UP command better than a 50% share. That category grew 7.8% in 1984 compared to a 5.6% increase in shipments of colas, according to figures from Furman Selz, New York, analyst John Maxwell in *Beverage Industry*.

While industry analysts credit the company's management with intelligent marketing efforts to keep that share high and growing, they also see Coca-Cola and Pepsi starting to put the squeeze on other players in the soft-drink industry. The main target of that squeeze, they say, is Seven-Up.

Seven-Up has been battling Coke and Pepsi with the well capitalized vigor characteristic of Philip Morris, which acquired Seven-Up in 1978 for $520 million. In the past year alone, Seven-Up has made several important marketing moves in its fight to at least keep up with its rivals, if not get ahead of them:

- To bolster the 7UP brand, it returned to the aggressive and comparative "Uncola" advertising positioning it first used in 1968 and backed the return with a five-week network tv campaign via N W Ayer, New York.
- It reformulated Diet 7UP and Sugar Free Like cola to be sweetened 100% with NutraSweet shortly after PepsiCo made a similar move for its diet drinks, but before Coca-Cola followed suit.

To further buttress Diet 7UP's growth, it launched advertising that borrowed a favorite ploy of Coke and Pepsi, citing taste-test results in its favor.

- Its newly formed Foods Group began testing a line of freeze-dried soups under the Nouvelle name and this month introduced nationally a five-item line of frozen lemonade and lemon-limeade concentrates called JuiceUp. The line includes the first "diet" versions of juice concentrates to be offered.
- It expanded its line of budget-price Howdy brand soft drinks to give its bottler network additional flavors to distribute.
- It purchased Country Club Soda, a Springfield, Mass.-based bottler of mixers, as a means of getting a foothold in that potentially significant market.

"When I came to the company six years ago, I said we're going to try to make Seven-Up a full-line company, and that's what we're doing," explained Ed Frantel, whom PM moved from its Miller Brewing unit to become Seven-Up's president. "Anybody who thinks we've stopped thinking about expansion and new products hasn't been watching us very closely.

"But there's no question that soft drinks, which used to be called a 'mature and stable' business, has become more dynamic lately. Our job is to stay close enough to the leaders to feel the heat, but not so close that we get burned."

The good-news result of Seven-Up's PM-backed investments in such areas as new products, more aggressive marketing and research is that its revenues rose from

Cherry Coke hits fountains. . .

By NANCY GIGES

Coca-Cola USA, Atlanta, is continuing to pour on "new and improved" beverages with the national introduction of a fountain version of Cherry Coke.

Lawrence Cowart, senior exec vp-general manager, fountain sales, predicted May 19 at a Chicago press conference that Cherry Coke will put his company even farther ahead of Pepsi-Cola USA, Purchase, N.Y., in fountain sales.

Coca-Cola says its brands now lead Pepsi's in fountain sales by an over-all margin of 2.4 to 1.

The cherry-flavor cola has been testing for several months in the retail market in Atlanta, Charlotte, N.C., Denver and Hartford.

The fountain rollout, expected to be completed by fall when the retail test results will be evaluated, will be supported primarily by in-store materials and promotion. No agency is involved, the company said. SSC&B, New York, handles advertising for the retail version of Cherry Coke.

The Denny's, Hardee's and What-a-Burger fast-food chains have committed to selling the new drink on at least a test basis, Coca-Cola said.

The target market for Cherry Coke is males and females, aged 12 to 29, who drink sugar-cola products and want an alternative cola taste.

The company says Coca-Cola is the No. 1 fountain product, outselling Pepsi 2 to 1. Diet Coke, the No. 2 soft drink in foodservice over-all, is the No. 1 diet cola at soda fountains, outselling Diet Pepsi 2.5 to 1. Sprite, the No. 1 lemon-lime, is the third-largest-selling soft drink in fountain sales.

Of the chains that have agreed to test Cherry Coke, only one—Hardee's—is among Coca-Cola's top 10 fountain accounts, which also include Kentucky Fried Chicken, McDonald's, Southland Corp. (7-Eleven stores) and Wendy's International.#

. . .as diet colas hit road to Rio

By JULIA MICHAELS

Sao Paulo—Brazilians may get their first taste of Diet Coke and Diet Pepsi next year if Brazil's new government goes ahead with plans to lift its ban on diet soft drinks.

A Brazilian agriculture ministry official said the ban could be lifted within months.

Brazil ranks fifth among world soft-drink and cola markets. The U.S.S.R. is the only other major country that bans diet drinks.

In the past, a powerful sugar lobby convinced the previous military government to hold out against diet soft drinks. But the agriculture ministry official noted that sugar producers now have a relatively new market: Sugar-cane alcohol fuel for the country's growing fleet of alcohol-fueled cars.

Coca-Cola Refrescos, which claims more than half of the 4.2 billion-liter soft-drink market, has been lobbying for permission to manufacture and sell diet soft drinks in Brazil for four years.

"This is the light at the end of the tunnel," says Luis Lobao, Coca-Cola Refresco's administrative director.

Coca-Cola said it would need 8-to-12 months to put its diet products on Brazilian supermarket shelves.

Pepsi-Cola, which has just relaunched its flagship brand in Rio de Janeiro and has a much smaller over-all market share, said it would need more time.

Opinions differ on the potential size of the diet soft-drink market.

Mr. Lobao said it would come to about 2.5% of current annual volume, taking total volume up to about 4.3 billion liters a year.

Coca-Cola claims diet soda drinkers are a totally untapped market here, and thus wouldn't take market share away from sales of sugared Coca-Cola.

In the health-conscious Rio de Janeiro market, diet soft drinks could account for as much as 10% of the total market, according to Edward Moerk, president of Pepsi-Cola do Brasil.

Advertising expenditures would increase substantially, with gains for Coke's agency, McCann-Erickson Publicidade, and Pepsi's J. Walter Thompson Publicidade, sources speculate.

Mr. Moerk said a Diet Pepsi launch would cost about $1 million to cover Rio de Janeiro and Sao Paulo, the principal markets.

The one hitch in a Brazilian diet soft-drink launch is that G.D. Searle & Co.'s NutraSweet isn't produced here and the government isn't likely to permit its importation.

But marketers say a saccharin/cyclamate mixture has worked well elsewhere in Latin America.#

Time Inc. readies snappy 'Picture Week'

By STUART J. ELLIOTT

NEW YORK—Whether lightning will strike a third time for Time Inc. is the question being asked by media, agency and marketing figures as they peruse some 3,000 prototype issues of *Picture Week* being circulated by the company's magazine development group (AA, May 16).

Twice before, Time Inc. had the idea to bring out a news and human-interest photo weekly with editorial copy in b&w only.

But the prototype suggests that, were Time Inc. to make *Picture Week* its eighth magazine early next year, it would be trying to reinvent the photo-weekly concept for the '80s. Or perhaps more, for the *PW* prototype is to the traditional definition of a magazine what *USA Today* is to the traditional definition of a newspaper.

The 88-page prototype depicts *PW* as a slick version of the *New York Daily News'* centerfold, the quickest of quick reads, a print product for members of a generation whose exposure to 30-second commercials and MTV: Music Television has shortened their attention spans.

After reading *Picture Week*, *People* reads like *The New Yorker* or the *Atlantic*.

Of course, it must be added the *PW* prototype is, as the saying goes, subject to change without notice. The concept could be modified between now and July, when *PW* is slated to begin tests in 13 markets nationwide *(see related story, Page 82)*. One change already being made: Richard Burgheim, assistant managing editor, *Life*, and formerly managing editor of *TV-Cable Week*, is joining the *PW* project in the No. 2 editorial post behind managing editor Richard Stolley.

Yet the prototype follows closely the appearance and approach it took during earlier direct-mail testing (AA, March 4). It carries the date May 13 and a cover price of 95¢. The cover story is "Having babies for cash"—surrogate mothers. The cover photo, like all other photos in the magazine, is b&w. The cover logo, headlines and other art work are in a bright yellow and a *Life*-type red.

Inside are one and two-page photos, accompanied by easy-to-read captions ranging in length from about 50 to 135 words. They are arranged by departments given titles such as Breakthrough, Luck, Guts, New Look, Heroes, Sneak, Tears, Wheels, Off Guard, Friends, Odd Job, Animals and Tasteless. All copy and logos inside are b&w save for occasional splashes of red.

These are not *Life*-style photo essays or *People*-style illustrated interviews. Almost every *PW* department in the prototype consists of one or two photos with a short caption—then it's on to the next one. In its focus on photos, sparcity of text and wide variety of subjects, *Picture Week* resembles *Newlook*, Daniel Filipacchi's French magazine recently introduced in the U.S. by Penthouse International. The major differences: *Newlook's* editorial is all color, it includes nudity and it costs $3.50.

PICTURE WEEK
Having Babies for Cash

The **prototype** issue of *Picture Week* being circulated by Time Inc.'s magazine development group features a cover story on surrogate mothers. The cover photo, like all editorial inside, is b&w; logo, headlines and other cover art are red and yellow.

A handful of *Picture Week* prototype departments carry more text or run beyond two pages: The Big Picture, an opening section (five photos, five captions); Essay, the cover story (seven pages, seven photos); 7 Days, a review of the week; a page apiece for book, tv and movie reviews, and a photo quiz.

The prototype issue includes ads from marketers such as Borden, Ford, General Foods, J.C. Penney, L'Eggs, Lorillard, Philip Morris, R.J. Reynolds, Sony and Toyota—for package goods and mass consumer items.

This jibes with opinions expressed by Madison Avenue observers that Time Inc. would have to position *Picture Week* as a mass-market magazine.

A related observation they make is that for *PW* to succeed, it must be, as one put it, "priced low enough to make it attractive, strictly an economic proposition." This means *PW* must offer marketers a high circulation, perhaps 1 million, and a low cpm. As a result, the magazine is being planned with relatively low editorial costs—b&w photos picked up from outside sources, a small staff—to help make it feasible for Time Inc., which analysts say could spend $20 million to introduce *Picture Week* if the test results are judged satisfactory. Young & Rubicam here will handle promotion for the tests, for which Time Inc. is considering different campaigns at different spending levels, in the 13 test markets.#

AA sales names Holm

CHICAGO—Deborah Holm has been named to handle classified advertising sales in the Chicago office of ADVERTISING AGE. She succeeds Louise Durfee, who left the company.

D. Holm

Ms. Holm, a graduate of Indiana University, was previously classified advertising production manager for AA. She joined the company in August, 1984.#

CORRECTIONS & CLARIFICATIONS

- Jack Marks, director of marketing communications worldwide, Parker Pen Co., Janesville, Wis., is leaving the company at the beginning of June, not May as reported in "Parker Pen dropping its global plans" (AA, May 13).
- Micro Mart, an Atlanta-based computer retail chain, has not awarded Smith Burke & Little its $3 million account, as was earlier reported from incorrect information from SB&L (AA, May 6, P. 8). Micro Mart says SB&L will handle advertising for the June 3 opening of its Atlanta store. Micro Mart says it is considering SB&L, incumbent Bleichner Bonta Martinez & Brown, Atlanta, and several other agencies and will choose an agency of record within 30 days.
- The following additions and corrections refer to the recently published Foreign Agency Income report (AA, April 22).

Ogilvy & Mather (Malaysia) figures were listed incorrectly by the agency and should read as follows: Gross income, 1984—$3,639,000; 1983—$3,630,000. Billings, 1984—$24,274,000; 1983—$24,213,000, which puts O&M in first place in Malaysia.

Ogilvy & Mather, Singapore, figures were reversed by the agency and should read as follows: Gross income, 1984—$2,502,000; 1983—$2,197,200 Billings, 1984—$16,697,000; 1983--$14,655,700.

Teran Publicidad, Mexico City. Figures received too late for inclusion. Gross income 1984—$1,502,600; 1983—$719,400 Billings, 1984—$7,925,500; 1983—$3,561,300.

Ogilvy & Mather's affiliation in Chile is with Northcote & Asociados, Santiago, not with Promoplan, as stated in a footnote.

Needham, Harper of Canada's 1984 gross income should have been $2,592,000 instead of $3,146,100. Needham is agency of record in Canada for Kraft Ltd. and figures for 1984 for Kraft were not included in the agency's gross income total.

Feldman Calleux Associes, Paris, showed gross income of $8,900,800 and $6,362,000 for 1984 and 1983, respectively, and billings of $59,338,400 and $42,434,800 for the same years, putting the agency in ninth place in the French rankings. Figures for 1984 are AA estimates. FCA figures include FCA Lyon, FCA Mediterranee, LK and Marketware.#

Seven-Up's stand

(Continued from Page 4)

$274.8 million in 1978 to $734 million in 1984. The bad news is that operating profits, which were $40.3 million the year PM acquired the company, were $5.3 million in 1984 (and that was the first year since 1979 that Seven-Up finished a year in the black).

Despite the Uncola company's unprofitability, PM chairman Hamish Maxwell repeatedly and vehemently has denied rumors that Seven-Up will be unloaded.

"Seven-Up's losses don't mean anything to Philip Morris," said Kidder Peabody analyst Roy Burry, who notes that the parent's total operating revenues last year were $13.8 billion. "Sure, they'd like Seven-Up to make a profit, but PM is looking at the potential of the market more than Seven-Up's bottom line."

Mr. Frantel doesn't sound like an executive who is getting heat from his superiors.

Pushing, probing, prying

"The corporation realizes this is a long-term business," he says. "We could have made a lot of money in the past six years if we weren't pushing, probing and prying. But you have to do that unless you want to be a parasite."

Still, one industry observer speculates that PM eventually will spin off the company to its shareholders. "That's what you do with a division nobody else wants to buy," he said.

Even with the heavy influx of cash from PM, Seven-Up's over-all share of the soft-drink market essentially has been unchanged for the past several years. Its ad expenditures and case sales have grown, but so, too, have Coke's and Pepsi's.

One explanation of why Seven-Up has been running in place is that it's suffering from the same ironic backlash afflicting Miller Brewing, its sister company in the Philip Morris stable. With PM's backing, both Seven-Up and Miller came on strong as serious marketers—and woke up their slumbering competition.

Seven-Up's advertising resurgence in the past few years "has had a substantial effect on making Coca-Cola as tough [a marketer] as it is," said Prudential-Bache analyst George Thompson. "Coke saw what happened with Miller [which dramatically increased ad spending after PM acquired it] and got going."

$15 million in '77

In 1977, $15 million was spent on measured-media advertising for brand 7UP, according to Leading National Advertisers. Coca-Cola spent $24 million for brand Coke. By 1979, 7UP spending was up to $25 million, but Coke's media spending had increased to $42 million.

Last year, Coca-Cola spent about $50 million for its flagship brand. Seven-Up spent $23 million for its primary brand (having put additional emphasis on Diet 7UP).

While increasing support for their primary products, Coca-Cola and Pepsi also have been building their secondary brands into stronger competitors and exploring new products.

They want new worlds to conquer and divide.

Coca-Cola has reformulated grapefruit-flavored Fresca and appears poised to rebuild that brand's declining market share. Its Sprite and Diet Sprite brands, the strongest competitors for 7UP, also are receiving new attention and stronger marketing and advertising support from Coca-Cola. Waiting in the wings for rollouts are Cherry Coke and Minute Maid orange soda.

The testing that produced Cherry Coke also encompassed vanilla and chocolate versions, raising the possibility of Coca-Cola developing a completely new category of flavored colas.

Pepsi's near-term focus apparently is the with-juice category. Its Slice brand, which contains 10% fruit juice, is being readied for a rollout that means another competitor for 7UP.

Mr. Frantel isn't worried about the brand proliferation, seeing it instead as a dilution of Coke's and Pepsi's consumer franchise that can only help 7UP stand out as what it always was meant to be: A cola alternative.

But Seven-Up's critics wonder how long it can withstand the cola giants' concerted challenges.

Philip Morris spent like crazy

"Philip Morris has spent like crazy for Seven-Up, but it's going to get more difficult for it to increase its market share," Mr. Thompson said. "Philip Morris admittedly is one of the great marketers in American business. But it takes more than marketing in the soft-drink industry. It takes distribution, and that is Seven-Up's problem."

Its bottler and distribution networks long have been Seven-Up's bottleneck. The question is whether that problem is going to worsen.

Seven-Up Co. in the past has not represented enough volume annually to support a complete national network of bottlers whose top priorities are producing 7UP, Diet 7UP and the rest of its product line. The company has had to hook up with a Coke bottler here, a few Pepsi bottlers there and many smaller independent bottlers in between to fill out its system.

That setup has worked fairly well for producing and distributing the 7UP line. But Like cola, introduced in 1982, still is not available nationwide because bottlers affiliated with Coke, Pepsi or Royal Crown can't touch it.

Despite being coupled in advertising with 7UP, Like has had trouble catching hold; it commands approximately a 0.5% share of the total market.

Even flagship 7UP may be facing trouble from the same bottler system, observers say.

As vulnerable as anyone

"If Coke says to a bottler, 'We know you have 7UP, but we'll give you the chance to carry Minute Maid orange soda instead,' Seven-Up's in trouble," Mr. Thompson said. "People talk about the small companies getting caught in a squeeze [between Coke and Pepsi]. But Seven-Up's as vulnerable as anyone."

"Rubbish," Mr. Frantel said. Establishing a third major bottler network is one of the goals Seven-Up has worked hardest to achieve, he said, and the expansion of its own product line will help realize it. Fewer than 25% of its bottlers now are affiliated with Coke or Pepsi.

"There's no question there's some leveraging against bottlers, distributors and retailers going on out there," he added. "But our bottlers realize that they're going to have to fight and be strong."

"Don't count Seven-Up out," insists one of those independent bottlers, who asked to remain anonymous. "They've shown me that they can respond to Coke and Pepsi. And they're bringing back the 'Uncola' theme at the right time. If the new Coke tastes like Pepsi and Pepsi tastes like new Coke, there's all the more reason for people to try something else."

"Uncola" hit airwaves in '68

The first "Uncola" campaign hit the airwaves in 1968, developed by Seven-Up's agency at the time, J. Walter Thompson USA, Chicago. Different from anything that had been done in soft-drink advertising before, the campaign put 7UP on the marketing map.

For one thing, it was "negative": The product was positioned as being "unlike" its competitors. And its spokesman was a little-known, Trinidad-born actor named Geoffrey Holder, with a shaved head and deep, booming voice and laugh that were, well, un-forgettable.

"We took a product that was largely known as a digestive aid out of the medicinal field and into the soft-drink business with that campaign," recalled Orville Roesch, then Seven-Up's advertising manager. "Everyone else [in the soft-drink market] only had these cutesy little jingles for their products. We went with Geoffrey Holder and Milton Glaser-designed outdoor boards."

He credits the campaign's success to the JWT creative team that, after first resisting the Uncola idea, he claims, went all-out with the offbeat positioning. Among the team members were Bill Ross, now managing partner at Tatham-Laird & Kudner, Chicago, and Charles Martell, now executive creative director, JWT/West, San Francisco.

Despite the cleverness of the original campaign, Mr. Roesch doubts it can be resurrected to the same effect.

"The best advertising is written for a time as well as a market," he said. " 'Uncola' was perfect for 1968, what with the hippies and Woodstock. It was the perfect anti-establishment campaign for its time. But you say 'Uncola' today and what does it mean?"

Mr. Frantel believes that, given Coke's reformulation as well as all the other changes in the cola category, the phrase means even more than before.

"Bringing back 'Uncola' now is a tremendous opportunity for us," he said. "For one thing it has the word 'cola' but it says 'un-cola.' It's unique. It's us and it has been for all these years, even though we haven't reinforced it.

With all the changes in formula and categories, 'Uncola' is something traditional. People know what it means."

Another element of "Uncola's" strength is that it can't be absorbed by competitors, as was the daring "No caffeine" marketing campaign launched by Seven-Up and Ayer in 1982, and for which Mr. Holder returned as spokesman. Their gamble in raising the specter of questionable ingredients hit a responsive chord among consumers, but was like a stick in the side of its competitors.

Coca-Cola responded with its own uncaffeinated Sprite, Caffeine Free Coke and Caffeine Free Diet Coke. PepsiCo rolled out Pepsi Free.

"Seven-Up simply did no-caffeine testing for Coke and Pepsi and [when it proved to be a popular attribute] they put their own products on the opposite end of the grocery-store aisle and cleaned Seven-Up's clock," said Mr. Thompson.

More rubbish, Mr. Frantel said. Sales of 7UP jumped after the "No caffeine" campaign. "If you're the leader with the most shelf space, why incur the expense and hard work" of innovating, he asks rhetorically of Coke's response. "Besides, the 'No caffeine' campaign stimulated the whole industry to rethink the opportunities in this business."

With "Uncola" positioning protecting its primary soft-drink products once again, Seven-Up is confident enough to take an even bigger gamble: Building its fledgling Foods Group.

One of that group's units, Albany, Ore.-based Freeze Dry Foods, is test-marketing the Nouvelle line of freeze-dried soups. Chef Master, Irvine, Cal., produces flavorings.

Citrus Products most promising

But the Food Group's largest and most promising unit is the Citrus Products division, based in Ventura, Cal. Known as Ventura Coastal Corp. when it was purchased by Seven-Up in 1973 to be a supplier of lemon extract for its soft drinks, the company last year processed and packaged more than 60% of all frozen concentrate for private-label lemonade.

Now Seven-Up plans to get a bigger piece of what the company estimates is the $125 million lemonade market. It showed last week that it was serious by introducing nationally the JuiceUp line of frozen lemonade and lemon-limeade concentrates (with fresh lemon juice added).

And it backed the rollout with network tv spots from Foods Group agency Doyle Dane Bernbach, Los Angeles, supported by local tv, couponed print ads, point-of-purchase tags and in-store sampling programs.

Even more significantly, the technology involved in producing the concentrates easily could be adapted to producing juice-based soft drinks, a la PepsiCo's Slice.

Unlike the soups, the juice line prominently carries the 7UP logo. "When your parent has a name as widely known as 7UP's, you can clear a lot of hurdles quickly by riding on that name," said Citrus Products division general manager Dean Ulrich. "7UP signifies everything we want to be in the juice category—natural ingredients and top quality."

The product was tested with and without the 7UP Foods name, he said, and it tested consistently higher with the logo.

During initial test-marketing in Erie, Pa., and Phoenix, the product garnered an 18%-to-20% share of sales.

The move from the aisle to the freezer case is a major one, but that only changes the playing field, not the game. Even if JuiceUp gets all the space it needs in grocers' freezers, it still will pace its old rival, Coca-Cola, whose own foods division makes the Minute Maid line.

"Minute Maid is the No. 1 frozen-food product in American stores," Mr. Thompson said. "Coke has been kicking Seven-Up in soft drinks and it will be worse in frozen foods."

Ed Frantel doesn't believe that for a minute. Taste tests tell him JuiceUp has a competitive edge, and his gut tells him that Seven-Up can't be run out of the business.

"Every company is trying to do all it can to be dominant in every segment," he said. "But we're a pretty stubborn cat. And I can assure you we'll do whatever is necessary to protect our position wherever we operate."#

SOLUTIONS FOR THE NEW INDUSTRIAL REVOLUTION

New ad, new revolution

Raymond Corp., Greene, N.Y., is broadening its business-to-business marketing horizons with a print campaign breaking this month in *Electronic Business, Grocery Distribution, Materials Handling Engineer* and *Modern Materials Handling*. The ad, themed "Raymond—Solutions for the new industrial revolution," was created by Eric Mower & Associates, Syracuse. Raymond markets materials-handling products and flexible manufacturing systems.

Tampa is tops

AA poll ranks Florida airport best in U.S., while Chicago's O'Hare leads list of losers

By Robert Goldsborough

Tampa, si, Chicago, no!

That was one verdict of Advertising Age readers who responded to the Going Places questionnaire (AA, March 21) that asked air travelers to rate their favorite and least favorite U.S. airports.

Tampa International was the over-all winner, edging out Washington's Dulles, while O'Hare International in Chicago was the runaway "worst" choice among the almost 200 ballots received.

We asked readers to base their ratings on "accessibility to the central city; parking; rental cars and taxicabs; ease of moving through the terminals; sign clarity; pleasantness of surroundings; speed of claiming baggage; quality and placement of restaurants and bars, and quality and variety of shops and other facilities."

We also asked respondents to name their three favorite airports, in order, and give a single "least favorite" nomination.

Ballots came from 30 states, the District of Columbia and Canada; those responding average 44 flights per year.

Tampa International, ranked No. 1 on ballots from 13 states, was praised most often for its cleanliness, ease of movement within the terminal and the friendliness of employes. The food quality in the terminal also was praised, and one respondent added that "the restaurant at the Tampa Airport Marriott [hotel] is probably the best in the U.S."

The Tampa terminal, which also has finished first in other surveys of air travelers, was built in 1971 and pioneered a people-mover system in which transit-like trains carry passengers from the terminal to the aircraft on an elevated track. Similar systems have been constructed since at other airports.

Dulles International, located south of Washington in Virginia, finished in the runner-up spot, largely because of a write-in campaign from members of the Washington Dulles Task Force, a nonprofit, tax-exempt organization made up of some 400 companies in the Washington area. A major purpose of this group, according to its president, Thomas Morr, is to attract more passengers and more service to the facility.

AA readers rate U.S. airports

Advertising Age asked our readers to rate the nation's airports. The results, listed below, were derived from totaling three points for each first-place vote; two points for second; one point for third. First-place votes are listed in parentheses. Total points are at right.

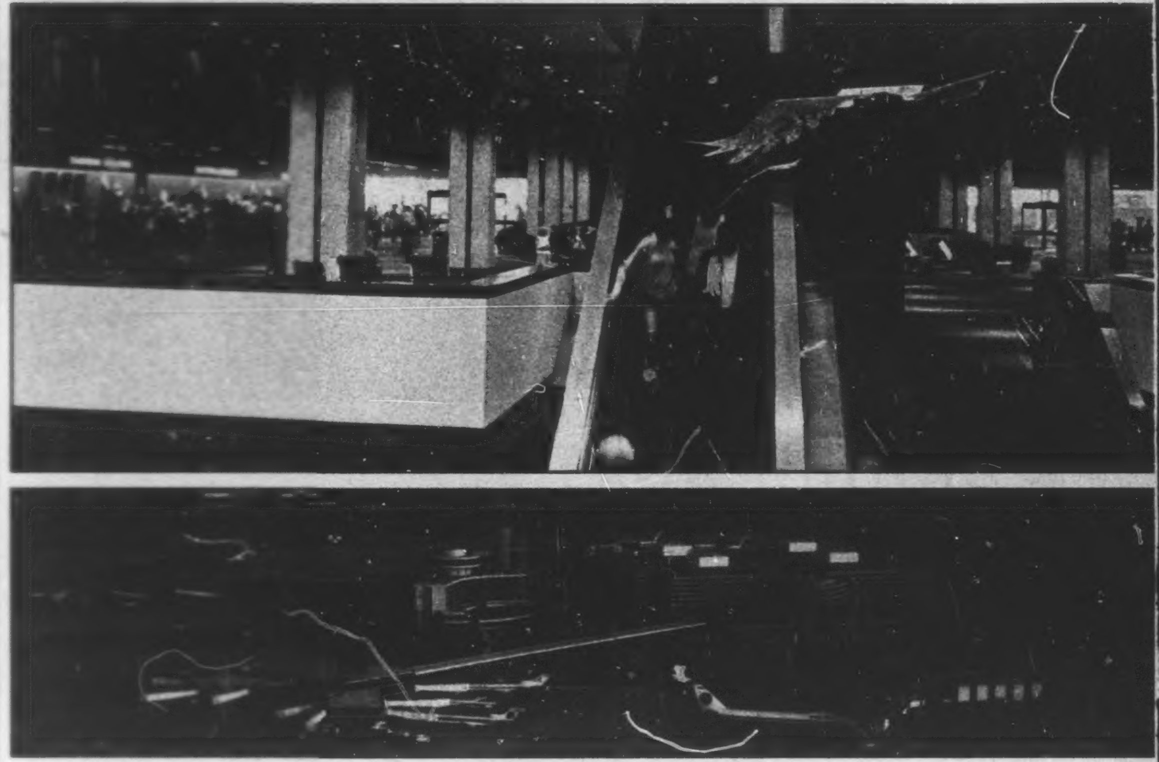
10 favorite U.S. airports	
1. Tampa (23)	125
2. Dulles—Washington (31)	108
3. Hartsfield—Atlanta (21)	93
4. Kansas City (12)	54
5. Dallas/Fort Worth (5)	45
6. Newark (9)	39
7. Seattle/Tacoma (7)	34
8. Orlando (5)	30
9. Baltimore (4)	29
10. LaGuardia—New York (3)	28

Least favorite U.S. airports	Votes
1. O'Hare—Chicago	43
2. National—Washington	25
3. JFK—New York	20
4. Hartsfield—Atlanta	19
5. Dallas/Fort Worth	15

Mr. Morr sent a memo to task force members along with a photocopy of our ballot, suggesting that they might like to participate in the survey. "But," he said when called by Advertising Age, "I didn't tell people who to vote for."

Nonetheless, most of the photocopied ballots mailed in listed Dulles as their favorite airport and competing Washington National as their least favorite.

Indeed, Dulles actually received more first-place votes than Tampa, but with our graduated scoring system (three points for favorite, two points for second favorite and one point for third), Tampa easily outdistanced the Virginia airport. (Dulles' first-place votes, incidentally, came from respondents in only three states.) The Tampa and Kansas City airports had the distinction of receiving no "least favorite" votes. As a favorite, Kansas City finished fourth.



Tampa International Airport offers an aesthetically pleasing interior and easy access to arriving and departing flights.

Our readers unleashed most of their venom on Chicago's O'Hare International Airport, which consistently duels with Atlanta's Hartsfield to be the world's busiest airport. O'Hare far outdistanced Washington National and New York's John F. Kennedy in the least-popular category.

Respondents from 18 states named O'Hare their "worst" airport, citing such factors as long delays, the difficulty in making interline connections, a lack of moving sidewalks or other people-moving devices, overcrowding, poor restaurants and, mentioned numerous times, rude personnel. A lack of cleanliness also was cited on several ballots.

"Filthy," "a pit," "a nightmare of delay," "disgusting" and "confusing" were among the comments, and one Chicago-area reader said that "world's busiest [airport] translates as 'too crowded for passengers but good for public relations.'"

O'Hare's rival for the "world's busiest" title, Atlanta's Hartsfield Airport, had the distinction of getting a high ranking in both categories, finishing a strong third on the "favorite" list and landing a fourth-place slot in the "worst" balloting. Similarly, Dallas-Fort Worth finished fifth on both sides of the ledger.

The three New York-area airports had generally low profiles. Newark finished sixth in the favorite category, while LaGuardia was tenth. John F. Kennedy received no first-place votes, and only one second and two thirds. Los Angeles International was 11th in the "favorite" balloting.

In all, 66 airports in 33 states were mentioned. And while most respondents made their selections for such basic reasons as ease of movement, cleanliness, food and the demeanor of the terminal personnel, a few had unusual reasons for their picks:

- "Great access to the bars" was why one Kansan prefers the Greensboro-Winston-Salem (N.C.) airport.
- A Clevelander says of Milwaukee's Mitchell Field: "Friendly. The employes remember me from trip to trip, even after long absences."
- And a North Carolinian likes the Casper, Wyo., airport because it has "antelope on the runways and great kitsch in the gift shop."#

What is your favorite domestic airline? See Going Places on Page 7 for the latest Ad Age poll and cast your ballot for the carriers you like best—and least.

The traffic jams outside O'Hare International Airport add to travelers' frustrations.

In the news

Looney (car)toons

Roz Chast, the 30-year-old cartoonist for *The New Yorker*, takes real-life absurdity to its cosmic cartoon conclusion. Since age 5 all she really wanted to be was a cartoonist, so even though "it didn't seem practical" she decided to give it a shot. *See Page 4.*

The lady and the sponge

Mary George, a woman who has helped sell more than 35 million contraceptive sponges to 2 million-plus American women, hasn't yet told her Catholic parents what she does for a living. For the past year she has been vp-marketing of VLI Corp., marketer of the Today contraceptive sponge. *See Page 5.*

Presstime

Swedish shop gets SAS

NEW YORK—Scandinavian Airlines System has awarded its $4 million North American account to Hans Brindfors, Stockholm, Sweden. It previously was at Ally & Gargano here (AA, May 20). The Brindfors agency, which handles SAS' corporate account, plans to open an office here.

Roman Meal for Ketchum

TACOMA, WASH.—Roman Meal Co. is consolidating its estimated $4 million-to-$8 million account at Ketchum Advertising/San Francisco. Cole & Weber, Seattle, previously handled Roman Meal Whole Grain breads. DYR, Los Angeles, had Roman Meal cereals and baking mixes. Those three agencies, as well as J. Walter Thompson USA, San Francisco, and McCann-Erickson, Seattle, pitched the account.

Indy tv sponsors lineup

NEW YORK—ABC-TV's Indianapolis 500 coverage, set for a same-day, tape-delay basis from 9 p.m. to midnight (ET) May 26, will have Chevrolet, Goodyear and Miller as major sponsors.

ABC Radio wins Derby

NEW YORK—ABC Radio Networks has obtained the live radio rights to the May 27 Jersey Derby, the horse race featuring Spend A Buck. Garden State Park, Cherry Hill, N.J., will pay Spend A Buck's owners $2.6 million (including bonuses for winning the Cherry Hill Mile, Garden State Derby and Kentucky Derby) if the horse wins the Jersey Derby. ABC will offer stations one-hour coverage as of 4:30 p.m. (ET). ESPN also is covering the event.

Holmes rings up 18.7 rating

RENO, NEV.—The Larry Holmes-Carl (The Truth) Williams heavyweight championship bout May 20 on NBC had a 10-market weighted average Nielsen overnight rating of 18.7 and a 29 share. The rating was down slightly from previous prime time boxing title fights but still proved the strength of the heavyweight champion Holmes as a tv draw.

Danish smoke lands in U.S.

LOS ANGELES—Scandinavian Tobacco International, Albertslund, Denmark, is bringing Prince cigarets to the U.S. The smoke has a 43% share of the Danish tobacco market. Ads in Scandinavian language publications will start in July. Richard Somers Associates, Fairfax, Cal., handles.

'Runner's World' to Rodale

EMMAUS, PA.—Rodale Press is buying *Runner's World* from Runner's World Magazine Co., Mountain View, Cal. Terms were not disclosed.

'NY' to move account

NEW YORK—*New York* is moving its trade advertising account, estimated at $500,000-plus, from Levine, Huntley, Schmidt & Beaver. Publisher Carolyn Wall says three agencies are being considered after the incumbent, which had the account for 7½ years, was asked to participate but declined. There is speculation one contender is

Creativity isn't right & wrong, it's right & left

By Stewart Alter

In the desire to free the creative spirit from the chains of rationality and analysis, what's the best technique? Trickery, at least of a special sort: One has to trick one's own mind.

This became stunningly evident in a speech given by Betty Anne Edwards, author of the book, "Drawing on the Right Side of the Brain," at the American Assn. of Advertising Agencies' annual meeting last week at the Greenbrier, White Sulphur Springs, W. Va.

The professor of art at California State University, Long Beach, spoke about the different characteristics of the right and left sides of the brain. The left side, which is usually dominant, is the verbal, analytic, rational side, explained Ms. Edwards. The right side is the pro-verbal, emotional, intuitive side. But the key problem with tapping into the creative, right side is that the left side of the brain is always eager to jump in, she said. It will leap in to render things in familiar symbols. Visual complexity will be sacrificed for the fast processing of data.

Therefore, to give the right side freer rein, she advised, "It is necessary to present the brain with a job that the left mode will turn down. You cannot go up directly against the left mode. It is dominant, accounts for 95% of waking hours, is competitive and aggressive and tends not to want to give up dominance."

"But the left brain is amenable to being tricked out of the task." And, she continued, "I feel I should say this quietly, the left side never learns."

This was one of those examples in a lecture in which a demonstration was much more powerful than explanation of the theory. Ms. Edwards had given an assignment to non-art students to reproduce a famous Pablo Picasso line drawing of Igor Stravinsky, the composer. She showed a slide of what one student, working totally from the analytic left side of his brain, had produced. It looked nothing like the Picasso original. For the factual data of a man in glasses sitting in a chair is the information that the left side of the brain had processed and reproduced. The left side of the brain, although it did not have the skills for the drawing, jumped into the task anyway, Ms. Edwards said.

This is the typical reaction of the left side, said Ms. Edwards. But in order to release the right-hand side, a trick was necessary. In this case, Ms. Edwards asked the students to draw the picture upside down. When the student who previously had done a second-grade job did just that, he reproduced the Picasso drawing in amazing likeness.

Indeed, this was only one set of the amazing before-and-after slides that Ms. Edwards showed.

Ms. Edwards claimed that these amazing differences could be accomplished in five days through training in perception. "It's not something you learn over time. It's something you own right now," she said of the quality that turned seemingly untalented people into artists. The training, which she did not go into, involved improving perception of edges, of spaces, of relational angles and proportion, of lights and shadows and of the whole.

Although not pretending to be familiar with advertising, she gave an example that seemed to ring true for admen. "A creative art director wants to work something out in its full complexity. But the client may say, 'That's good enough. Let's slap it together,' " she said.

But is there a real value in a business like advertising to giving the right-hand side more leeway?

The answer to this came with another set of slides Ms. Edwards flashed on the screen. These were pictures in which people were asked to draw things without reference to symbols, only in lines or abstract forms. One person started out drawing a calm person, but instead found himself drawing "a block of ice or granite without knowing it," Ms. Edwards said. "You start to draw and allow it to tell you what you didn't know you knew."#

The Nation's Top

40

Marketing/Advertising Research Companies

Including rankings, revenues, company profiles, trends and major personnel changes

FOR THE FIRST TIME

A listing of leading marketing information service companies

Top research companies' revenues rise 13.7%

By Jack J. Honomichl

The U.S. marketing/advertising/public opinion research industry's top companies increased worldwide revenues 13.7% in 1984—a year characterized by changes in ownership—over 1983, according to ADVERTISING AGE's 11th annual review of industry performance.

The 1984 listing, expanded to the 40 leading U.S.-based research organizations, differs from the 1983 listing in that one company, Audits & Surveys, is not included because of lack of data, and six companies have been added: Decision/Making/Information, Ad Factors Marketing Research, Kapuler Marketing Research, Oxtoby-Smith, Response Analysis and Decision Research Corp.

Also new this year is input from the Council of American Survey Research Organizations, providing revenues of 54 survey research companies that are members of CASRO and reveal revenues on a confidential basis but are not among the top 40.

Analyzing this data from the 94 research companies shows healthy revenue growth throughout the industry.

U.S. revenues were up 17.4% in 1984 over 1983 for the top 40 research companies. For the 54 other CASRO members, U.S. and worldwide revenues both increased 12.5%. U.S. revenue growth for the top 40 and the others combined was 16.9% and worldwide growth was 13.6%.

Two huge international research companies, A.C. Nielsen Co. and IMS International, heavily weight the worldwide volume. In recent years, both have been hampered by the strong U.S. dollar, and in 1984 their combined non-U.S. revenues of $339.2 million were up only 3.4% over 1983.

The U.S. inflation rate in 1984 was 4.3%, according to the U.S. Department of Labor Consumer Price Index-U, monthly average, making the total industry's 1984 "real growth" 12.6%. For worldwide revenues, real growth was 9.4%.

For the top 40 companies, the U.S. growth rate of 17.4% compares to 17.3% for U.S. ad agencies (AA, March 28). However, these numbers are not perfectly comparable because growth attributable to acquisitions among the top 40 research companies has been calculated out.

For example, if a research company purchased another during 1984, revenues of the two companies for all of 1983 and 1984 were used to calculate growth. If that weren't done, the industry's growth rate would appear higher than is the fact. It was impossible to do that for the ad agencies, so their growth rate probably is inflated by acquired revenues.

The factoring out of growth through acquisition was important because, since this analysis was published last year, there has been an unprecedented number of ownership changes. Among the top 40 companies:

- Dun & Bradstreet Corp. acquired A.C. Nielsen Co. (No. 1 on the list) for about $1.1 billion.
- Harte-Hanks Marketing Services Group (No. 25) divested two research properties. TRIM Inc. was sold to MAJERS Corp. and the MARKETRAX service in Los Angeles and St. Louis was sold to the NPD Group (No. 10).
- ASI Market Research (No. 17) acquired Teaman/Lehman Associates, Norwalk, Conn.
- Arbitron Ratings Co. (No. 4) bought about a 40% interest in Burke Marketing Services (No. 5), with an option to purchase the balance by 1990.
- Admar Research Co. (No. 27) was acquired in January, 1985, by Sprigg Lane Investment Co.
- Information Resources Inc. (No. 8) signed a letter of intent to acquire Management Decision Systems, Waltham, Mass. (No. 31).
- YSW Group (No. 15) was acquired by Saatchi & Saatchi, the British ad agency.
- Data Development Corp. (No. 23) divested its interest in Central Location Testing, a subsidiary.
- IMS America (No. 2) acquired Pipeline Research in the fourth quarter of 1984.

The 94 research organizations had gross worldwide revenues of $1.566 billion in 1984; $1.22 billion—or 78%—was from U.S. operations. It is estimated that number accounts for more than 85% of the commercial market for marketing, advertising and public opinion research (excluding nonprofit research organizations, survey work done in-house by agencies of the federal government, and research done in-house by marketers and ad agencies). So the size of the total market is still left to estimation, as is the industry growth rate.

The 1984 figures dramatize again the degree to which the U.S. research industry is big business. Ownership is in the hands of large nonresearch corporations, such as Control Data Corp., Dun & Bradstreet, Time Inc., Maritz, Equifax, Saatchi & Saatchi, American Broadcasting Co., IDC Services, Gannett Co., Arthur D. Little, JWT Group, Harte-Hanks Communications, Booz Allen & Hamilton, Temple, Barker & Sloane and Mills & Allen International.

Of the $1.449 billion in 1984 revenues from the top 40 companies, only 13% is controlled by privately held corporations. That percentage should be significantly lower next year.

Profiles of each of the top 40 research organizations follow, with a summary of changes they made in 1984—and intend to make in 1985.

Jack J. Honomichl writes a regular column on research in ADVERTISING AGE.

Research Business Review
The Nation's Top
40
Marketing/Advertising Research Companies

1 A.C. Nielsen Co., Northbrook, Ill. Founded in 1923; since late 1984 a wholly owned subsidiary of Dun & Bradstreet Corp. Research revenues in 1984 were $491 million, up 5.9% from 1983.

For the 12 months ended Nov. 30, the world's largest marketing/advertising research organization had research revenues of $491 million, about 52% of which is estimated to have come from Nielsen operations in 24 countries outside the U.S. (Total revenues for all Nielsen operations are no longer public because of the acquisition, but in 1983, research operations accounted for 67% of the total.)

Of the $491 million, 79% was accounted for by Nielsen's Marketing Research Group; the $388 million was an increase of 5.3% over 1983. The Media Research Group accounted for $103 million, an increase of 8.2% over 1983.

The Marketing Research Group basically provides custom and syndicated measures of product movement on both a national and local market level. This group does about 65% of its business outside the U.S. and continues to be hurt by foreign currency exchange problems.

In 1984, the Test Marketing Services unit of Marketing Research Group USA set up a profit center called ERIM to develop a new, single-source product/advertising exposure measuring service called Testsight. It now is in two markets—Sioux Falls, S.D., and Springfield, Mo.—and several more markets are planned to come on line through 1985 and 1986. The Testsight system can make tv commercial cut-ins to specific households (in Testsight consumer panels of 2,500 households per market) on-air, bypassing cable transmission on which other such systems are dependent.

Media Research Group in the U.S. during 1984 continued its expansion of local tv meter measured markets, opening up Washington, Dallas and Boston, bringing the total so-equipped to 10; Miami and Denver will come on line this fall. The Media Group also has expanded its national people meter test to 300 households, and further expansion is planned for later in 1985.

Nielsen chairman-chief executive officer Henry Burk, 58, also is a member of D&B's board.

Mr. Burk studied at the Universities of Zurich, St. Gallen and Freiburg in Switzerland and has a degree in economics. N. Eu-

Henry Burk
A.C. Nielsen Co.

gene Harden, 50, is president-chief operating officer; he is a graduate of Lawrence University. Richard W. Vipond, 57, is president of the Marketing Research Group, and James D. Lyons, 50, is president of the Media Research Group. Arthur C. Nielsen Jr. is now a member of the D&B board.

2 **IMS International**, New York. Public corporation traded over the counter; founded in 1954. Research revenues in 1984 were $151.4 million, up 10.1% from 1983. (Revenues do not include Pipeline Research, which IMS America acquired in the fourth quarter of 1984.)

Of this worldwide conglomerate's total revenues of $223 million, about 68% were from its marketing research operations in 60 countries. Of the research revenues alone, 44.6%—or $67.5 million—was from the IMS subsidiary in the U.S., IMS America, headquartered in Ambler, Pa.

IMS U.S. revenues in 1984 were up 30.6% over 1983, and international research revenues

Robert Dreyfus
IMS International

were down 2%, in part because of the same currency exchange problems besetting the other big international on this list, A.C. Nielsen Co.

IMS market research activities are divided into pharmaceutical audits, reports on the sale of ethical (and in some cases, proprietary) pharmaceuticals collected from panels of drugstores (which account for 21% of total research volume); medical reports based on information collected from panels of practicing physicians who report on the diagnosis and treatment of patients (12%); other syndicated audits of purchases made by hospitals, and cosmetiscs and toiletries (13%); sales territory reports—customized geography started in the U.S., now being expanded to other countries—(34%); custom ad hoc surveys and studies in such industries as cosmetics, veterinary pharmaceuticals, medical supplies and equipment, office equipment and agriculture. Some IMS data are available in numerous countries via an on-line database network.

The IMS marketing research operation has 2,300 fulltime salaried employes.

In 1984, Robert Louis Dreyfus, 38, became president-ceo of IMS International, succeeding Lars H. Erickson, who became chairman. Mr. Dreyfus has an M.B.A. from Harvard University, and his office is in London. Serge Y. Okun, 38, is president of the U.S. subsidiary and also a vp of the parent company. He is a graduate of the National School of Statistics and Economic Administration in Paris.

3 **Selling Areas-Marketing Inc.**, New York. Wholly owned subsidiary of Time Inc.; founded in 1966. Revenues in 1984 are estimated at $118.4 million, up 19% from 1983.

SAMI's main service amalgamates warehouse withdrawal data on thousands of package goods items sold through food stores and produces 13 reports a year separately for each of 51 marketing areas representing about 86% of the U.S. all commodity volume. Spinoffs of this main service produce customized reports on stores servicing minority segments of the population and product availability (SARDI service).

In March, 1985, SAMI added three market areas—Portland, Me./Concord, N.H.; Shreveport,

Carlyle Daniel
SAMI

La./Jackson, Miss., and Green Bay, Wis., bringing the total system to 54 markets representing 88.4% ACV.

In addition, SAMI operates three minimarkets, each with 2,500-household panels, where purchases can be recorded via UPC scanner at checkout and then related to individual households. Sales and service of this system, called SAMSCAN, are handled by the BMSI Test Marketing Group (No. 5).

Starting this year, SAMI will operate a drugstore reporting system comparable to its basic grocery store service, beginning in Chicago, New York, Los Angeles and San Francisco. Ten market areas will be on-line by the end of 1985, and 18 by mid-1986, SAMI says.

SAMI has 344 fulltime, salaried employes in three offices.

Carlyle C. Daniel, 54, is president of SAMI; he is a graduate of Lynchburg College. Mr. Daniel also is a vp of Time Inc.

4 **Arbitron Ratings Co.**, New York. Founded in 1949; since 1967 a wholly owned subsidiary of Control Data Corp. Revenues in 1984 were $105.8 million, up 12.3% from 1983.

During 1984, Arbitron purchased about 40% of Burke Marketing Services Inc. (No. 5) and an option to purchase the balance by 1990.

Arbitron produces radio, tv and cable tv audience studies at the local market level using mail diaries or panels of meter-equipped households. Surveys in 210 tv markets account for 52.7% of Arbitron revenues; 47.2% comes from measurement of 261 radio markets. Customers include radio and tv stations, advertisers and agencies. There are 1,020 fulltime employes in eight U.S. offices. A phone interviewing center with 55 stations

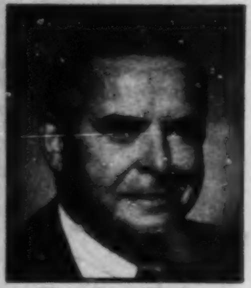
Research

(Continued from Page 17)

is located in Laurel, Md.

During 1984, Arbitron completed a long-range meter-market expansion program, and meter service is now on-line in 11 major markets. Also in 1984, Arbitron introduced a number of microcomputer systems to help stations manage and analyze radio and tv ratings. Product Target Aid, a new service, uses life style cluster information to help tv stations plan a commercial schedule to target customers of a product or service.



Theodore Shaker
Arbitron Ratings Co.

In 1984, Arbitron and BMSI jointly started to develop an advanced market measurement service—linking tv viewing with purchases of specific package goods—called ScanAmerica. A pilot panel of households in Denver is equipped with special equipment that enables the consumer to scan, via wand, the UPC code on products purchased. That information then can be accessed via telephone lines along with viewing data. First data from Denver are expected in late 1985.

Arbitron chairman-ceo Theodore F. Shaker, 63, attended Colgate, Northwestern and New York universities. A.J. (Rick) Aurichio, 48, is president-chief operating officer. He has an M.B.A. from Fairleigh Dickinson University. Both are Control Data vps.

5 **Burke Marketing Services Inc.**, Cincinnati. Privately held corporation founded in 1947. Revenues in 1984 were $66 million, up 9.8% from 1983.

In the fall of 1984, about 40% of BMSI was purchased by Arbitron Ratings Co., a wholly owned subsidiary of Control Data. Arbitron holds an option to buy the balance of BMSI. Infratest, a German research company, owns 5% of BMSI, and BMSI owns 5% of Infratest.

The BMSI conglomerate consists of: Burke Marketing research, which specializes in custom survey research and pre and post-tv copy testing; Test Marketing Group, a unit consisting of what was AdTel and Market Audits, which operates six controlled test markets and which, through a joint venture, markets and services SAMI's three test market SAMSCAN service; BASES, which specializes in market modeling; Burke Institute, which conducts seminars and courses for students of marketing/advertising research; Burke Canada, a wholly owned subsidiary, which accounts for about $1.7 million in revenue; Burke International, a joint venture with Infratest, and COMTEC, a joint venture with the Gartner Group, to operate a panel of 8,[illegible]00 business establishments that report on their intention to buy a variety of computer and telecommunications products.

Starting in 1984, BMSI entered a joint venture with Arbitron to develop a new electronic market/advertising measurement system, ScanAmerica *(see above)*.

Burke has 475 fulltime employes in 42 offices in the U.S. A central WATS phone center has 200 stations, 140 of which are cathode ray tube-equipped.

This month, about 1,000 BMSI employes now located in five office sites in Cincinnati will move to one headquarters building, a 21-story structure in the downtown area.

Jack Brown
Burke Marketing Services

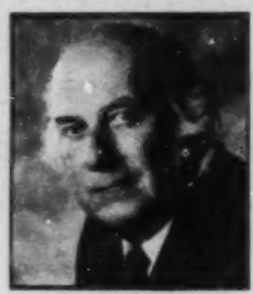
Also, in early 1985, Burke plans to add a seventh market to its AdTel system.

Jack E. Brown, 41, is BMSI chairman. He attended the University of Cincinnati.

6 **M/A/R/C Inc.**, Dallas. Publicly held corporation traded otc; founded in 1965. Research revenues in 1984 were $37.6 million, up 39.8% from 1983.

Total M/A/R/C revenues for the fiscal year ended March 31, 1985, were $41.4 million. (Excluded from the revenue trends above are nonresearch activities.)

1984 was an eventful year for M/A/R/C. The company's name was changed (from Allcom Inc.), and in December, it filed with the Securities & Exchange Commission for a public offering, which since has occurred. Also, M/A/R/C broke ground for a new six-story corporate hadquarters near Dallas-Fort Worth airport, and early in 1984, it constructed a new 144-station, CRT-equipped central interviewing facility in Denton, Tex.



Cecil Phillips
M/A/R/C Inc.

M/A/R/C, with 314 fulltime, salaried employes and 162 hourly staff workers in 10 U.S. offices, has the following divisions: Corporate Group, which supplies support services such as personnel, marketing and accounting to the operating groups; Marketing Research Group, which provides syndicated buyer studies, computer software systems, interviewing and marketing research consumer panels; Marketing Services Group, which develops and maintains databases of prime users of products and develops, executes and fulfills promotion efforts, and operates the Promotion Test Lab. (About 67% of this group's revenues are from research activities.)

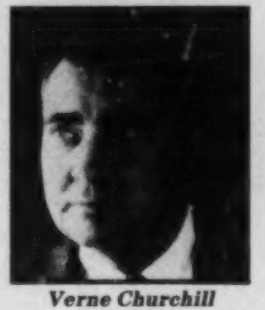
Plans for 1985 include expanding the LMN network to 30 markets, consolidating the New York and Boston client service groups into a Westport, Conn., facility, and bringing on-line an IBM 4381 to handle large databases.

M/A/R/C chairman-president-ceo Cecil (Bud) Phillips, 60, is a graduate of Southern Methodist University. President of M/A/R/C's Corporate Group is E.L. (Jack) Taylor, 58; he has an M.B.A. from the University of Texas.

7 **Market Facts Inc.**, Chicago. Public corporation traded otc; founded in 1946. Revenues for 1984 were $3[illegible]9 million, up 26.7% from 1983.

Market facts revenues do not include those of Market Facts-Canada ($5.7 million in 1984), which is 50% owned by MF.

MF's U.S. operations include: Consumer Mail Panel, a fixed mail panel of more than 220,000 households; Consumer Opinion Forums—six uniform shopping mall interviewing facilities; Marketest, a store auditing and controlled store testing service in seven permanent markets; focus group facilities, and two WATS telephone interviewing centers with a total of 104 stations, about 65 of which are CRT-equipped. The survey research activities at MF are separated into operating groups—consumer, public sector and financial services.



Verne Churchill
Market Facts

During 1984, MF introduced a new system for evaluating tv commercials. Called PEAC, the system utilizes microprocessors to obtain moment-to-moment reaction to commercial messages and other advertising stimuli.

There are six client service offices and 16 other field organization offices in the U.S. (four others are located in Canada). Market Facts has 520 fulltime, salaried employes.

President-ceo Verne B. Churchill, 52, received his M.B.A. from Indiana University. Chairman David K. Hardin, 57, received his M.B.A. from the University of Chicago and is past president of the American Marketing Assn.

8 **Information Resources Inc.**, Chicago. Public company traded otc; founded in 1977. Revenues in 1984 were $35.8 million, up 69.7% from 1983.

The main business of this much-publicized company is the BehaviorScan system, a network of eight minimarkets equipped for advertising and control store testing.

In each BehaviorScan market, the service does several things: It captures consumer purchase behavior of a wide variety of package goods via UPC scanner equipment in major grocery stores; collects purchase data from a panel of about 2,500 households via the use of plastic identification cards that tie in panel households with point-of-sale scanner data; alternates tv advertising over cable tv to groups of preselected households that are meter-equipped, and collects other measures of in-store merchandising/promotions.

During 1984, BehaviorScan added drugstores to its system in two more markets, making a total of six so equipped.

Another service, Marketing Fact Book, provides access to a database of consumer purchasing activity on a large number of package goods. During 1984, IRI added data from selected neighborhoods in Chicago, Los Angeles and New York to the Marketing Fact Book system.

Gian Fulgoni
Information Resources Inc.

Also in 1984, IRI introduced a new service called TV Buying Guide, which provides media planning information based upon integrated scanner-collected purchase data and metered by tv viewing data for a sample of 7,000 households. In another 1984 development, IRI introduced FASTRAC, a system for evaluating the volume potential of new products before test marketing.

IRI has 496 fulltime employes, and most of them were consoli-

How the top 40 U.S. research companies compare with the top 40 U.S. advertising agencies

	Top 40 U.S. advertising agencies*	Top 40 U.S. research companies**
Revenues—1984 (in millions)		
Worldwide	$5,779.2	$1,449.1
U.S. only	3,876.1	1,104.3
Revenue growth rate—(1984 over 1983)		
Worldwide	+16.3%***	+13.7%
U.S. only	+17.3%***	+17.4%

*Source: ADVERTISING AGE U.S. Agency Profiles, 3/28/1985.

**Top 40 (see accompanying article). These figures account for marketing/advertising research operations only. In fact, many of the companies listed have larger total revenues, as is explained in individual company profiles.

***These percentages are not perfectly comparable to the top 40 research growth rates in that some of the agencies may reflect revenue growth in '84 attributable to acquisitions. In the top 40 research list, this has been corrected for by using the two (company plus acquisition) total revenues for both '83 and '84 to calculate growth rate. It was not possible to do this for the advertising agencies.

Research

(Continued from Page 18)

dated into a 150,000-sq.-ft. corporate headquarters building during 1984.

In a letter of intent signed in February, IRI announced its plans to purchase for stock worth about $30 million research/marketing information company Management Decision Systems, Waltham, Mass. (No. 31).

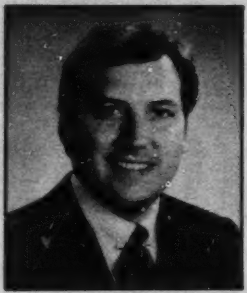
During 1985, IRI plans to add drugstores to its BehaviorScan system in two more markets and selected neighborhood data from 10 additional major cities to its Marketing Fact Book database.

Chairman-ceo of IRI is one of the founders, John Malec, 40, a graduate of the University of Wisconsin. President-chief operating officer Gian Fulgoni, 37, has a master's degree from Manchester University in England.

9 NFO Research, Toledo, O. Founded in 1946; since 1982 a wholly owned subsidiary of AGB Research. Revenues in 1984 were $29.5 million, up 10.1% from 1983.

NFO, with 675 employes (340 of whom are fulltime, salaried), has offices in Toledo, O.; New York; Chicago; St. Louis, Mo.; San Francisco; Newark, N.J.; Greensboro, N.C., and an executive headquarters recently relocated to Greenwich, Conn.

The main business of NFO is a fixed mail panel, which was expanded to 320,000 households in 1984. Multi-client Services Division of NFO offers TRAC syndicated research based on diary-type purchase panels to report on consumption of beverages, men's tailored apparel and the personal home computer and videogame market.



William Lipner
NFO Research

NFO operates two telephone interviewing facilities with more than 200 interviewing stations with interactive interviewing capabilities in both locations.

In 1984, NFO formed a new company, NFO International Research, in New York to specialize in European research for American multinational companies. Also in 1984, NFO entered into a joint venture with MMSL (an AGB Research subsidiary in London) to form Patient Searchlight, a New Jersey-based unit specializing in research for the pharmaceutical industry.

NFO president-ceo William E. Lipner, 38, is a graduate of the University of Toledo.

10 NPD Group, Port Washington, N.Y. Privately held corporation; founded in 1953. Revenues in 1984 were $29.2 million, up 17.7% from 1983.

NPD Group, which has 560 employes, 320 of whom are full-time salaried, has these divisions: NPD Research, a 14,500-household national diary purchase panel specializing in package goods and more than 25 local-market panels with about 40,000 households; NPD Special Industry Services, purchase diary and mail panels specializing in such product classes as toys/games, textile/apparel, petroleum products, sports equipment, and records/tapes; GDR/CREST Enterprises, a panel reporting on meals eaten away from home and also providing custom research and consulting to the food service industry, and Home Testing Institute, a fixed mail panel of 175,000 households. A new unit, Marketing Models Division, which specializes in proprietary models such as ESP (for pre-test marketing, new product forecasting) and PSA (for Preference Structure Analysis), was created in 1984.

Tod Johnson
NPD Group

New in 1984: Special Industry Services Division started a jewelry tracking service, and an apparel point-of-sale tracking service was added to the toy p.o.s. database.

The Packaged Goods Division introduced a behaviorally derived nutritional segmentation system, a joint venture in the apparel diary panel area was established with Kurt Salmon Associates, and the HTI Division established a 150,000-household syndicated survey regarding insurance and related financial products. NPD's Chicago office was relocated into a new 24,000-sq.-ft. facility, and a new office was opened in Los Angeles.

In early 1985, NPD purchased the Marketrax scanner-based consumer panels in St. Louis and Los Angeles from TRIM, a Harte-Hanks subsidiary. This service, used to analyze consumer response to promotional activities, will be expanded to other major markets this year.

NPD Group president-ceo Tod Johnson, 40, holds an M.S.I.A. degree from Carnegie-Mellon University. Founder,

OUR RATINGS ADD UP TO MORE THAN JUST NUMBERS.

They add up to better advertising decisions for agencies and their clients. Because at Arbitron Ratings, we're constantly developing the most advanced methods of putting the ratings to work for you and your clients.

For audience profiles closer to home you'd have to live there.
Product Target AID℠ designs an ideal commercial schedule for the advertiser, agency, and television station. You use an IBM® XT to match the lifestyle profiles of the viewers in a market with the lifestyle profiles of proven users for 600 heavily advertised products and services.

Catch the trends before they catch you by surprise.
Arbitrends℠ delivers a radio market report from our computer to yours. All you do is pick up the phone, turn on your IBM XT and you're ready to keep an eye on audience trends. These computer delivered reports give you an advance picture of a market, allowing you to make timely adjustments in advertising. The user selectable report formats let you pick the demographics, dayparts and estimates you need to study. The computer does the work of turning the numbers into useful information.

One number that puts you in touch with your markets.
At Arbitron Ratings, we give you more than just numbers. So call us today and see how we can help you identify your advertising targets and reach them more efficiently. Arbitron Ratings—we define broadcast audiences like never before. Contact your Arbitron Ratings Representative.

chairman and joint owner is Henry Brenner, 70.

11 **Maritz Market Research**, Fenton, Mo. Founded in 1973; wholly owned subsidiary of Maritz Inc. Revenues in 1984 were $24.7 million, up 24.3% over 1983.

The Maritz organization includes: Full-service divisional offices in six cities (Parsippany, N.J., was new in 1984); CRT-aided WATS survey centers in three cities (totaling 115 stations); single client, dedicated interviewing and data processing centers in three cities, and a network of field interviewing facilities (phone, focus group, central location and mall studies) in 16 major cities.

The company's Econo-Net Interviewing system grew in 1984 to a network of 12 cities utilizing a total of 200 microcomputers for telephone and mall interviewing. Each city's system communicates with any one of three HP mainframes. Maritz's Agricultural Research Division, with annual revenues of nearly $2 million, is one of the largest specializing in that market.

Maritz has 150 fulltime, salaried, exempt employes and about 2,500 parttime interviewers and supervisors.

In 1985, Maritz will open new client service offices in Dallas and Atlanta and plans two new services: MAPPS for product planning and positioning and MIVIS for interactive videodisc interviewing.

William Lewellen
Maritz Market Research

Maritz Market Research president William H. Lewellen, 54, has an M.S. from St. Louis University.

12 **Westat Inc.**, Rockville, Md. An employe-owned corporation founded in 1961. Revenues in 1984 were $24.5 million, up 3.8% from 1983.

Revenues include Crossley Surveys, a wholly owned subsidiary. Westat specializes in survey research, and about 85% of the work is done for the U.S. government.

Staff includes 240 salaried, exempt professionals and an average of 60 salaried, nonexempt, plus about 350 employes involved in telephone interviewing, support and survey processing, and national field studies. There is an office in New York in addition to the headquarters in Rockville. Phone facilities include 75 dialing stations, half of which are equipped for CRT interviewing.

Joseph Hunt
Westat Inc.

President-ceo Joseph A. Hunt, 49, has an M.S. from Massachusetts Institute of Technology. Edward C. Bryant, 69, the founder of Westat, is chairman; he has a Ph.D. from Iowa State University.

13 **Elrick & Lavidge**, Chicago. Founded in 1951; a wholly owned subsidiary of Equifax Inc. since 1980. Revenues in 1984 were $23.3 million, up 21.4% from 1983.

Revenues include those of Quick Test Opinion Centers, a separate operating unit within E&L, with a network of 18 shopping mall interviewing sites, plus a new one in Manhattan devoted to focus groups.

Robert Lavidge
Elrick & Lavidge

E&L, which specializes in survey research for consumer and business-to-business clients, operates six telephone interviewing centers, two dedicated to the TELSAM/PULSE system for Bell operating companies. The other four have a total of 144 interviewing stations, 112 of which are CRT-equipped.

There are 163 salaried, exempt employes at E&L, plus 55 salaried, nonexempt and 761 hourly paid in-office, located in 29 offices throughout the U.S.

During 1985, E&L plans to relocate and expand its San Francisco facility, which will include 24 CATI interviewing positions. New Quick Test Opinion Centers are being added in the San Francisco area and Denver, and the one in the Tampa Bay area is being doubled in size. Plans also call for two new full-service offices, one on the West Coast and one on the East Coast.

(Continued on Page 28)

Elrick and Lavidge meets your research needs

with the right experience,

the right people,

the right facilities...

in the right locations

At Elrick and Lavidge, our professional staff has the marketing experience and know-how to plan, implement, and analyze a research project. But the work of even the best people is only as good as the interviewers, facilities, and locations to which they have access. That's why we've developed our own network of research facilities in more than 20 locations, so one local contact can provide you with the best facilities and field staff possible.

Elrick and Lavidge facilities include mall interviewing centers throughout the U.S. equipped for computer-assisted face-to-face interviewing, computer-assisted telephone survey (CATS) centers for nationwide and local telephone interviewing, focus group facilities, and more (see chart). Our staff of over 500 full and part-time employees, assures you of uniformly trained and supervised interviewers, even when a project involves many locations.

These extensive resources mean we can handle all, or any part of your research project. And one Elrick and Lavidge representative, in any of our full-service offices, coordinates everything, from start to finish.

THE OPINION CENTER

Research

(Continued from Page 24)

President-ceo Robert J. Lavidge, 63, received his M.B.A. from the University of Chicago.

14 **Walker Research,** Indianapolis. Privately held corporation; founded in 1964. Revenues in 1984 were $19.4 million, up 21.7% from 1983.

Walker, a survey research company, has these divisions: Custom Research Division, which provides traditional ad hoc marketing research services through client service offices in six U.S. cities; Operations Division, which offers data collection and data processing services through a network of six offices and interviewing via telephone, mall intercept, prerecruited central location and direct mail. Walker has more than 240 telephone interviewing stations, the majority of which are outfitted for CATI.

During 1984, Walker started two new marketing divisions: Performance Measurement Systems, which specializes in ongoing service industry measurement research, and Market-PULSE Measurement Systems, which offers syndicated research programs to the healthcare industry. Also in 1984, Walker established a Marketing Science Group, which provides advanced conceptual and analytical consulting services.

Frank Walker
Walker Research

In 1984, Walker started constructing a 90,000-sq.-ft. corporate headquarters building, which will be ready for occupancy in October. Also in 1985, Walker plans additional client service offices in Cincinnati and Winston-Salem, N.C., and a new telephone center in Cincinnati. Walker employs 128 fulltime salaried, 152 fulltime hourly and 476 parttime workers.

Chairman-ceo Frank D. Walker, 50, is a graduate of DePaul University. President-chief operating officer James E. Sammer, 46, received his M.B.A. from Michigan State University.

15 **YSW Group,** New York. Founded in 1958; since 1984, a wholly owned subsidiary of Saatchi & Saatchi. Research revenues in 1984 were $17 million, up 13.3% from 1983.

YSW Group includes what was Yankelovich, Skelly & White and McBer & Co., a research-based consulting company. (McBer's research revenues only are reflected.) YSW was acquired by Saatchi & Saatchi in late 1984.

This multifaceted organization consists of: Consumer Marketing Group, which includes, among others, TRAC Forecasting models, LTM simulated test marketing system, Monitor tracking study and custom surveys; Corporate Communications Group, corporate image studies, corporate advertising assessments; Policy Planning Group, public policy, corporate priorities, multiclient studies; Industrial Marketing Group; Human Resources Group, work force attitudes, and McBer & Co., selection, training, rewards, key employes. There are 195 fulltime, salaried employes in three offices.

Florence Skelly
YSW Group

About 5% of YSW revenues come from operations outside the U.S. In 1984, YSW inaugurated three new multiclient studies under the "Viewpoint" name (Architect Viewpoint, European Viewpoint and Hispanic Viewpoint), and during 1985 it plans to add a Small Business Viewpoint.

YSW Group chairman Daniel Yankelovich, 60, is a graduate of Harvard University. President-ceo Florence R. Skelly is a graduate of Hunter College.

16 **Chilton Research Services,** Radnor, Pa. Founded in 1957; since 1979 a wholly owned subsidiary of American Broadcasting Co. Revenues in 1984 were $16.5 million, up 23.1% from 1983.

This survey research organization does custom, ad hoc marketing and social science studies for industry and the federal government. While a significant number of CRS surveys use mail or face-to-face interviewing, the majority are conducted via telephone on one of the industry's largest and most sophisticated CATI systems, which has on-line sample control and interactive cross-tabulations. This system

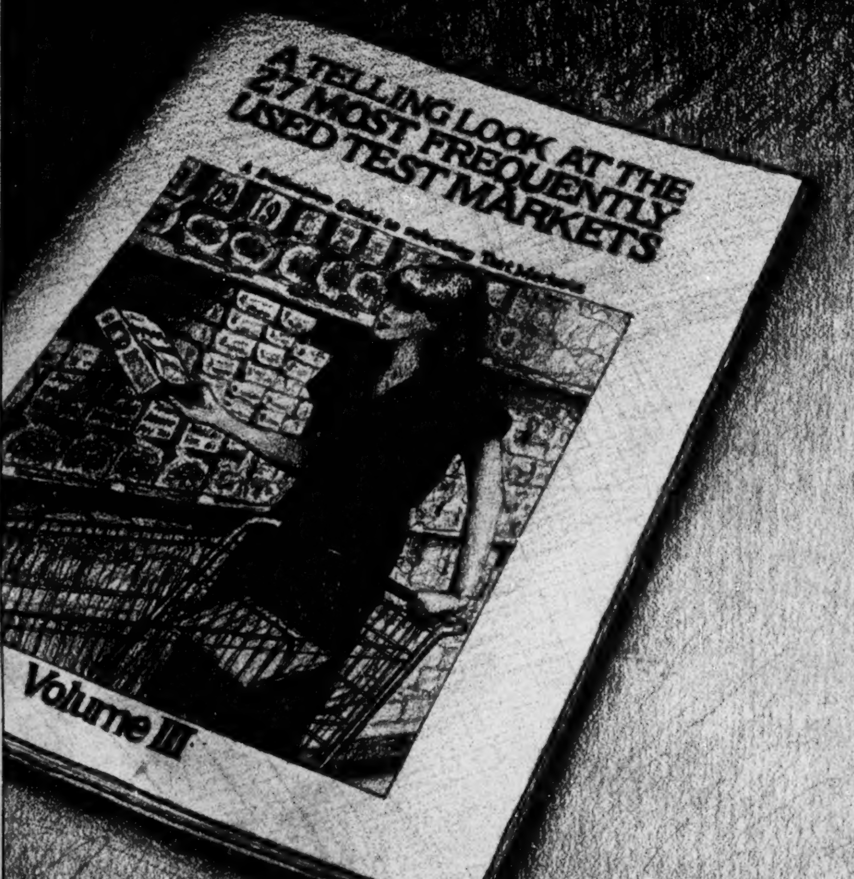
WHERE WILL YOU TEST YOUR PRODUCT... AND HOW MUCH WILL IT COST?



A TELLING LOOK AT THE 27 MOST FREQUENTLY USED TEST MARKETS
A Reference Guide to selecting Test Markets
Volume III

If you have been [illegible] reports of the "best" test markets, [illegible] the paper work and research necessary to select your own test market, we may have the solution.

A TELLING LOOK AT THE 27 MOST FREQUENTLY USED TEST MARKETS, VOLUME III is an expanded 28 page guide to selecting test markets. This newly updated study contains the research data and documented statistics you will want to review before selecting your test market. Such topics include:

- Why, when, where, and how to conduct a test.
- [illegible] the experts.
- How to evaluate and select a test market based on:
  1) Population
  2) Demographics
  3) Effective Buying Incomes
  4) Purchasing Patterns and how all of these compare to the national norm.
- Media Coverage, Cost and Control comparisons using a media mix with specific reach and frequency goals.

This free brochure also analyzes matched markets using demographic and geographic profiles, media coverage, market isolation and more. To receive your copy, send in the coupon below.

Please send me a free copy of your test marketing brochure.

Research

(Continued from Page 28)

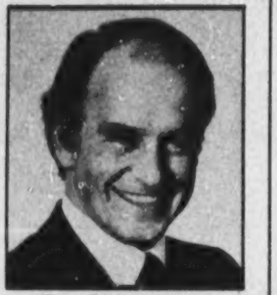
Gilbert Barrish
Chilton Research Services

has 185 interviewing stations and is linked to Chilton's twin IBM 4341 computers.

CRS has 142 fulltime, salaried employes. Director Gilbert Barrish, 45, is a graduate of Temple University.

17 ASI Market Research, New York. Founded in 1962; a wholly owned subsidiary of IDC Services since 1983. Research revenues in 1984 were $16.4 million, up 20% from 1983.

Revenues include those of Teaman/Lehman Associates, a full-service survey research company, Norwalk, Conn., which ASI acquired in January, 1984. Also during 1984, ASI divested some of its properties. The gross revenues for both years have been adjusted accordingly to a common base to calculate growth rate.



Gerald Lukeman
ASI Market Research

ASI, which represents about 90% of the total, is organized into two divisions: Advertising Research, which specializes in controlled audience pretesting and on-air testing of tv commercials, testing of print ads and evaluation of entertainment projects, including pilots for tv and movie films; and Marketing Research Division (more than $5 million), which conducts custom, ad hoc surveys, focus groups and—in 1984—set up a qualitative division in New York. The Marketing Research Division operates central telephone interviewing facilities with 120 stations, 20 of which are CRT-equipped.

During 1984, Advertising Research Division launched Apex, a new tv copy testing system that provides on-air recall, on-air persuasion and diagnostics, with all exposure occurring naturally within the home.

President-ceo Gerald Lukeman, 53, is a graduate of Dartmouth College. He is also exec vp of IDC Services.

18 Louis Harris & Associates, New York. Founded in 1956; a wholly owned subsidiary of Gannett Co. since 1975. Revenues in 1984 were $15.3 million, up 13.3% from 1983.

Twenty-six per cent of Harris revenues come from subsidiaries outside the U.S.: Louis Harris International, headquartered in London; Louis Harris France, headquartered in Paris, and Louis Harris International Medical Surveys in London.

The U.S. operation is made up of seven divisions, five of which are located in New York, one in Washington and one in San Francisco. They specialize in public opinion and attitude research in the following markets: Telecommunications, computers, healthcare, banking and financial services, automobiles, public policy and corporate public affairs. Multiclient surveys track corporate, financial, public and leadership opinion.

Louis Harris
Louis Harris & Associates

A CATI-based telephone interviewing facility with 52 stations (34 CATI-equipped) is located in New York. There are 137 fulltime, salaried employes.

Company founder, chairman-ceo Louis Harris, 64, whose syndicated column appears in 170 newspapers, is a graduate of the University of North Carolina at Chapel Hill. President-chief operating officer Humphrey Taylor, 50, is a graduate of Cambridge University in England.

19 Opinion Research Corp., Princeton, N.J. Founded in 1938; since 1975, a wholly owned subsidiary of Arthur D. Little Inc. Revenues in 1984 were $14.5 million, up 34.3% from 1983.

ORC provides survey research, analytical and consulting services, with emphasis on: Market research, modeling and simulation, corporate relations, cable and video, financial services, telecommunications, healthcare, government research, employe relations and public opinion research.

In addition, ORC periodically conducts several shared-cost surveys—the Financial Relations Image Assessment Pro-

(Continued on Page 32)

Now It Covers The Country.

For years, TV commercial testing services have been telling you where your commercial would be tested.

Now, you can tell us.

On-Air Lab's unique "CHOICE OF MARKET" Service can give you almost any of the top 100 markets for your commercial test. It's the **only** service that can get the job done when you have a particular reason for wanting to test in a particular market.

"CHOICE OF MARKET" Service costs somewhat more than On-Air Lab's regular service, but the price is still no more than that of other testing services who cannot even offer you this special option.

Use our regular service and test in one of our seven regular markets, or use our "CHOICE OF MARKET" Service and test wherever you want. The choice is there. The choice is yours.

"CHOICE OF MARKET" Service from Westgate Research's On-Air Lab. State-of-the-Art advances again. Call or write for complete details.

Irwin Miller
Opinion Research Corp.

gram, the Corporate Reputation Survey, the Executive Corporate Image Survey, the Business and the Media Survey, the Public Opinion Index and Caravan Omnibus Surveys. There are more than 200 fulltime, salaried employes in Princeton and four branch offices.

In early 1985, ORC opened a new 100-station (30 equipped with CRT) telephone center in Somerset, N.J., in addition to its 25-station facility in Princeton.

Chairman-ceo Irwin Miller, 56, has a Ph.D. from Virginia Polytechnic Institute. Vice-chairman Harry O'Neill, 56, has a master's degree from Pennsylvania State University. President Andrew Brown, 40, has an M.B.A. from Temple University.

20 **Ehrhart-Babic Group**, Englewood Cliffs, N.J. Privately held corporation; founded in 1959. Revenues in 1984 were $13.2 million, up 5.6% from 1983.

Louis Babic Jr.
Ehrhart-Babic Group

The Ehrhart-Babic Group, with 110 fulltime, salaried employes, specializes in "in-store" research through the following four groups: E-B Custom Research, which executes sales measurement studies including minimarkets, controlled store tests, sales audits for projections and the spotting of trends, weekend audits and product purchases; National Retail Tracking Index, which conducts regularly scheduled syndicated retail observation studies in 110 major markets, including all SAMI areas (see No. 3)—a total of 8,000 retail outlets, including food, drug, mass merchandisers, convenience and hardware/home centers; National Liquor, Wine & Beer Index, which provides comprehensive distribution information quarterly in more than 2,600 off-premise outlets and semi-annually in more than 3,100 on-premise outlets, and—new in 1984—Measurement of Trade Cooperation, a syndicated survey of weekly in-store promotional support by chain supermarkets for all or selected brands within a category. About 1% of E-B revenue comes from outside the U.S.

Chairman Thomas A. Ehrhart, 60, a graduate of Pace University, and president Louis J. Babic Jr., 52, a graduate of Boston University, are Ehrhart-Babic co-founders.

21 **Winona Research**, Minneapolis. Privately held corporation; founded in 1953. Revenues in 1984 were $12.9 million, up 9% from 1983.

Richard McCullough
Winona Research

This full-service survey research company has 125 fulltime, salaried employes in four offices—Dallas, Minneapolis, New York and Phoenix. The Phoenix site houses a WATS phone interviewing facility with 160 stations, 120 of which are CRT-equipped.

In addition to large-scale telephone interviewing, Winona also does product testing and custom retail store audits of product movement.

President-ceo Richard McCullough, 41, is a graduate of the University of Minnesota. He is the immediate past chairman of the Council of American Survey Research Organizations.

22 **Simmons Market Research Bureau**, New York. Subsidiary of JWT Group; founded in 1978. Revenues in 1984 were $12.5 million, up 21.4% from 1983.

Frank Stanton
SMRB

This survey research/database organization was created in 1978 through the merger of W.R. Simmons & Associates (founded in 1952) and Axiom Market Research Bureau.

Each year, SMRB creates a database from a survey of 19,000 adults. Through several interviews with each respondent, data are obtained on: Purchase and use of products and services in 800 categories, including some 3,900 brands; media exposure; demographics, and lifestyle orientation in terms of VALS classifications.

The data are merged with a Donnelley Marketing Information Service database to create a service called ClusterPlus and with the Claritas Corp.'s PRIZM system to pinpoint geodemographic market segments. Clients are offered on-line access to this database, which also is used by SMRB in conjunction with pro-

prietary marketing research and media surveys conducted for individual clients.

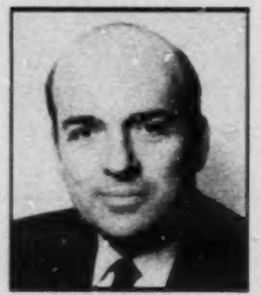
During 1984, SMRB started a joint venture with Scarborough Research Corp. to provide syndicated newspaper audience measurement in major markets; data from the first survey will be released in June.

Also in 1984, SMRB launched Trade Magazine Total Audience Studies and announced a tie-in with A.C. Nielsen Co.'s Media Research Group through which ClusterPlus data were related to local broadcast audience ratings. In another 1984 development, Teen Study, a study of product and service usage and media exposure among 2,000 teen agers, was published.

SMRB has 125 fulltime, salaried employes.

President-ceo Frank Stanton, 55, has an M.A. from the University of Pennsylvania.

23 **Data Development Corp.**, New York. Privately held corporation founded in 1960. Revenues for 1984 were $10.5 million, up 16.7% from 1983.



Joseph Goldstein
Data Development Corp.

DDC revenues for both 1984 and 1983 have been adjusted to reflect the sale of DDC's equity position in Central Location Testing, a subsidiary.

This full-service, custom survey organization, which has 100 fulltime, salaried employes in three offices, includes DDC, New York Conference Center and Telephone Center, which has 70 interviewing stations, 45 of which are CRT because of installation of a larger computer (HP-3000-48) during 1984.

DDC emphasizes strategic research and its proprietary services include COMBO (product testing); COPY II (copy strategic development), and ADOPTER (pretest market measurement system), which is a joint venture with Edward Tauber, University of Southern California.

During 1984, DDC opened an office in San Francisco, and three offices in Connecticut, New Jersey and Rye, N.Y. were consolidated into one facility in New Rochelle, N.Y.

Jerry Rosenkranz is chairman and Joseph Goldstein is president-ceo. Both are 49 years old and graduates of the City College of New York.

24 **Decisions Center Inc.**, New York. Privately held corporation founded in 1965. Revenues in 1984 were $10.2 million, up 15.9% from 1983.

Bernard Ruderman
Decisions Center Inc.

DCI, which has 115 fulltime, salaried employes, includes Decisions Center, Qualitative Decisions Center, Analytic Insights, DCI International, Murray Hill Center (three focus group conference rooms) and Facts Center, a 94-station telephone interviewing facility.

DCI specializes in custom survey research—large-scale market and strategy studies, tracking and trade studies, copy research, concept testing and product testing.

In 1985, DCI will launch Express Data Center, which features computerized transmission of survey data from a network of locations around the U.S. to the company's mainframe in New York. Tabulation is instantaneous, and clients will be able to access the data through their own computers.

DCI is managed by three partners: Bernard Ruderman, 53, who has an M.S. from Pennsylvania State University; Bernard Levine, 59, and Steven Roth, 39, both of whom received their M.B.A.'s from New York State University.

25 **Harte-Hanks Marketing Services Group**, River Edge, N.J. Wholly owned division of Harte-Hanks Communications; founded in 1975. Revenues in 1984 were $9.7 million, up 25% from 1983.

During 1984, Harte-Hanks sold two research units: Tele-Research, a tv copy testing operation, and TRIM, which specialized in controlled store tests.

Richard Hochhauser
Harte-Hanks Marketing

ingly to calculate growth.

This conglomerate, put together by a large Texas-based publishing company—which went private in 1984—consists of RMH Research, a full-service survey company specializing in communications/media research; National WATS Service, a telephone interviewing facility with 60 stations, 12 of which are CRT-equipped, and Urban Data Processing, a Burlington, Mass.-based EDP service company specializing in custom processing of census data for marketing uses.

There are about 100 fulltime, salaried employes in three offices.

Harte-Hanks's Marketing Services Group president Richard Hochhauser, 40, holds an M.B.A. from Columbia University.

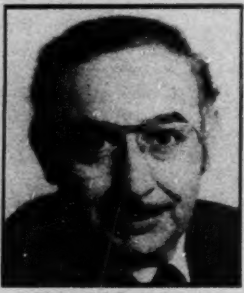
26 McCollum/Spielman & Co., Great Neck, N.Y. Privately held corporation; founded in 1968. Revenues in 1984 were $9.4 million, up 10.6% from 1983.

M/S activities are divided into two groups: Communications Division, which does quantitative/qualitative—effectiveness/diagnostic testing of tv and radio commercials and print advertising using closed-circuit, theater-like interviewing facilities in 12 cities, and custom studies in the communications area; and Associates Division, including child research services, which tests children's (and frequently parents') reactions to commercials, programs, packaging, products and concepts, as well as custom studies in ad tracking, corporate image and syndicated services.



Harold Spielman
McCollum/Spielman & Co.

In 1984, the Communications Division introduced two new services: STEP ONE, an early, primarily diagnostic service for advertising development, and AC-T/SP (a joint service with NPD Research), which predicts sales volume for new products and is based on NPD's ESP model combined with AC-T advertising information. Some M/S services are available in Japan, the U.K., Canada and West Germany through affiliates.

M/S has sales/servicing representation in four U.S. cities, and there are 90 fulltime, salaried employes.

Ceo Harold S. Spielman, 58, received his B.S.S. from City University of New York. President Donald H. McCollum, 62, received an M.A. from the University of Denver.

27 Admar Research Co., New York. Founded in 1960; since January, 1985, a wholly owned subsidiary of Sprigg Lane Investment Corp. Revenues in 1984 were $9.3 million, up 8% from 1983.

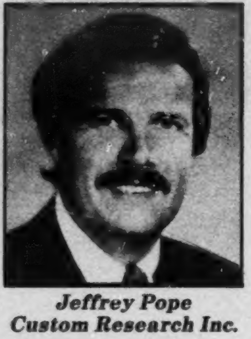
Revenues include three subsidiaries: Market Trends, Amherst Research Group and Consumer Interviews (a central WATS phone facility with 28 stations in Floral Park, N.Y.). There are 60 fulltime, salaried employes.

Henry Ostberg
Admar Research Co.

Admar specializes in tracking surveys, product testing and advertising studies, employing research programs copyrighted by the company. A central phone facility has 22 stations.

Founder, chairman-ceo Henry D. Ostberg received his Ph.D. from Ohio State University. President William J. Battison, 38, joined the company in early 1985. He received an M.B.A. from the University of Virginia.

28 Custom Research Inc., Minneapolis. Privately held corporation founded in 1974. Revenues in 1984 were $8.6 million, up 34.3% from 1983.



Jeffrey Pope
Custom Research Inc.

This custom survey company has the following divisions: Consumer Research; Medical Research Bureau; Custom Business Research; Custom Research Telephone (central telephone WATS interviewing facility, CRT-equipped, with 50 stations), and Corporate Services. There are 70 fulltime, salaried employes and branch offices in Union, N.J., and Chicago.

During 1984, CRI introduced "The System," a new product development system that consolidates all the research steps a company normally goes through into one system.

CRI is managed by two partners: Jeffrey L. Pope, 44, who received his M.B.A. from the Kellogg School of Management, Northwestern University, and Judith S. Corson, 42, a graduate of the University of Minnesota.

29 National Analysts, Philadelphia. Founded in 1943; a division of Booz Allen & Hamilton since 1970. Revenues in 1984 were $7.9 million, up 8.2% from 1983.

National Analysts, with 81 fulltime, salaried employes in Philadelphia and New York, conducts custom qualitative and quantitative studies in support of its strategic research and consulting services, and commercial clients account for about 80% of its business.

The balance is accounted for by the federal government, universities and other not-for-profit institutions.

National Analysts' professional staff specializes in such fields as telecommunications, financial services, pharmaceuticals and medical equipment, automotive, package goods and litigation support. During 1984, National Analysts converted to a new integrated EDP system to support its specialized work in market segmentation, tradeoff analysis and other multivariate modeling.

Marshall Greenberg
National Analysts

President Marshall G. Greenberg, 49, received his Ph.D. from the University of Michigan.

30 Decision/Making/Information, McLean, Va. Privately held corporation; founded in 1969. Revenues in 1984 were $7.8 million, up 100% from 1983.

This survey company, with 65 fulltime employes (34 of whom are salaried and exempt), is divided into two divisions: Marketing Research and Political/Public Affairs. One major reason for the extraordinary revenue gain in 1984 was D/M/I political work for the Reagan-Bush '84 Committee and numerous other Republican candidates. D/M/I's nonpolitical business grew considerably too.

PRS
The PROMOTION PRODUCT RESEARCH SYSTEM

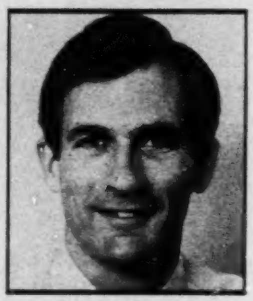
Ana, Cal., and Provo, Utah, where the company's phone interviewing facility (100 stations, 40 of which are part of a PC-driven computerized interviewing system) is being centralized.

Founder-chairman Richard B. Wirthlin, 52, holds a Ph.D. from the University of California at Berkeley. He is best known as President Reagan's pollster. Vincent J. Breglio, 44, rejoined D/M/I in early 1985 as president and head of the Political/Public Affairs Division. He holds a Ph.D. from Brigham Young University.

31 Consumer Research Division, Management Decision Systems, Waltham, Mass. Privately held corporation; founded in 1967. Research revenues were $7.7 million in 1984, up 8.1% from 1983.

Of total MDS revenues of $25 million, about 31% are attributable to the Consumer Research Division.

CRD's primary research service is the ASSESSOR simulated test market system, which predicts the probable market performance of a new product before market introduction. ASSESSOR's predictions are based on consumer response to advertising, shopping in a simulated store and repurchase after in-house use. Although originally developed for consumer package goods, modifications of the ASSESSOR system have been used for automobiles, other consumer durables and services.



James Findley
Consumer Research Div.

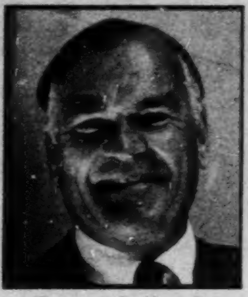
CRD also provides a wide range of research and consulting services to support early opportunity identification and positioning stages. DEFENDER, CRD's newest service, is a model and market measurements system for determining the best response to a competitor's new product.

In February, 1985, Information Resources Inc. (No. 8) signed a letter of intent to purchase Management Decision Systems.

There are 34 fulltime, salaried employes in CRD offices in Waltham, Chicago and Los Angeles.

CRD manager James J. Findley, 40, has an M.S. from the Sloan School of Management, M.I.T. He is a vp of MDS.

32 Gallup Organization, Princeton, N.J. Privately held corporation; founded in 1935. Revenues in 1984 were $7.7 million, up 14.9% from 1983.



George Gallup Jr.
Gallup Organization

This survey research organization was founded by the late George H. (Ted) Gallup Sr., who died in 1984. The company's syndicated newspaper column, Gallup Poll, appears in 100 newspapers, specializes in quantitative attitude and public opinion research. About one-half of this work is custom, ad hoc, and the balance comes from syndicated surveys in the area of financial services, package goods and video products.

Data collection is through face-to-face interviewing (national sample, 360 primary sampling units, and about 50,000 interviews a year) and a WATS telephone facility with 72 stations located in a facility outside Princeton. There are 115 full-time, salaried employes.

During 1985, Gallup announced a joint venture with SRI Research Center to conduct hospital market research.

Acting chairman George H. Gallup Jr., 56, is son of the founder. He is a graduate of Princeton University. Joint ceos are Andrew Kohut, 42, a graduate of Seton Hall University, and Leonard A. Wood, 45, who has an M.B.A. from Rider College.

33 Starch INRA Hooper, Mamaroneck, N.Y. Public corporation traded otc; founded in 1923. Revenues in 1984 were $7.5 million, up 19.6% from 1983.

William Wilson
Starch INRA Hooper

Revenues for this survey research organization, best known for print ad and print media audience studies, include those of a wholly owned subsidiary, the Roper Organization, New York, the newly resurrected Hooper Telephone Interviewing Service

A lucky guess is OK... when you're lucky.

Chilton Research Services. A way to base business decisions on what's happening. Not what you think might be happening.

In business you need to know exactly what outcome a course of action is likely to bring. Which is why Chilton Research is proving to be an invaluable tool for decision makers.

We start by combining the best in human and technological resources. The result is research studies pinpointed to exactly what needs to be known.

Positioning a product, for example, requires defining the market and interpreting customer needs. Accurately. That calls for state-of-the-art data collection and analysis, careful planning and meticulous execution.

At Chilton your assurance of meaningful research is backed by the experience and professionalism of 160 specialists in statistics, marketing, communications, psychology, economics and data processing.

Whether your needs call for insight into specialized industrial markets or in-depth understanding of consumer attitudes, Chilton Research is ready. Give us a call.

Because research is the best way to ensure a lucky future.

A good reputation is the best recommendation.

- **Nuclear plants find out if tone alert works**
  CRS is currently conducting a three-year series of surveys to determine the effectiveness of nuclear power plant alert systems. Within 2 hours of the tone alert, CRS completes all interviews with a sample of representative households in the alert area to find out whether the siren was heard. Specific areas are then identified for siren enhancement.
- **Industrial survey determined size of market for 30 products**
  Employing a two-phase approach, CRS conducted 3,000 CATI interviews in the United States and Canada to determine brand share and market size for 30 products used by craftsmen and manufacturers in 60 end-user classifications.

  A custom-designed program, based on incidences determined in phase one, was used to allocate optimal sample sizes for the second interview phase. This two-step procedure ensured greater reliability of results within each industry grouping.
- **Insurance survey probes needs of older Americans**
  To determine the perceived coverage shortcomings of Medicare, 1000 CRT interviews were conducted with Americans over 65 about supplemental health insurance coverage. Results are being used to design health insurance programs that better meet the needs of the elderly.

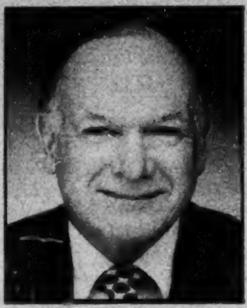
President-ceo William J. (Jay) Wilson, 48, is a graduate of Yale University.

34 Mediamark Research Inc., New York. The company, founded in 1979, is 80% owned by Mills & Allen International and 20% owned by its principal officers. Revenues in 1984 were $7.2 million, up 23% from 1983.

Mediamark operates a syndicated media/product research service based on personal interviews with 20,000 adults each year regarding their exposure to advertising media and, via a leave-behind questionnaire, purchase data on a broad line of products and services. There is online access to this databank, and ad agencies, advertisers, broadcasters and cable networks subscribe to MRI's 25 reports.



Timothy Joyce
Mediamark Research Inc.

MRI also produces three special reports each year based on a two-year database: A business-to-business report and the Upper Deck (affluent market), as well as reports related to the Top 10 local markets, including data on newspapers and broadcast stations. Also, in 1984 MRI produced a report on Consumer Innovators, describing the purchasing behavior, demographics and media exposure of those people identified as innovators and their propensity to try new products. In January, MRI set up a custom studies division.

The company has 24 fulltime, salaried employes.

Chairman-ceo Timothy Joyce, 51, has a Ph.D. from Cambridge University. President-chief operating officer Alain J. Tessier, 51, has an M.A. from the University of Notre Dame.

35 Market Opinion Research, Detroit. Privately held corporation; founded in 1941. Research revenues in 1984 were $6.8 million, up 13.6% from 1983.

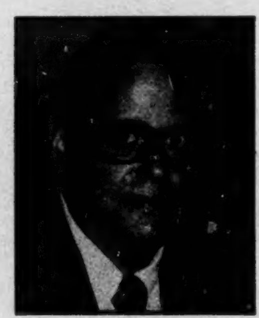
About 81% of this company's revenues are derived from research-related activities. This survey research organization has the following divisions: Consumer and industrial marketing research; media studies; social and public research; information systems, and political. Because Robert N. Teeter, MOR's president, is prominent as a political pollster/consultant and MOR has as clients numerous Republican congressional and gubernatorial candidates, 1984 was a boom year.

Robert Teeter
Market Opinion Research

MOR has 80 fulltime employes (48 of whom are salaried, exempt) located in five offices, one of them in Toronto. The Washington office opened in January. A central phone survey facility includes 86 stations, 20 of which will be CATI-equipped by mid-year.

Chairman-ceo Frederick P. Currier, 61, received his M.A. from the University of Illinois. President Robert N. Teeter, 46, received his M.A. from Michigan State University.

36 Kapuler Marketing Research, Arlington Heights, Ill. Privately held corporation, founded in 1974. Revenues in 1984 were $6.0 million, up 34% from 1983.



Stanley Kapuler
Kapuler Marketing Research

Kapuler, through branch offices in Los Angeles and Dallas and a fulltime, salaried staff of 51, offers a complete array of marketing research services and consultation.

Quantitative services are based on telephone surveys through the Kapuler Survey Center, a 120-station facility with 28 CRT-equipped. Qualitative research is centered in Uni-Focus, a system that completes more than 3,000 one-on-one in-depth interviews a year to obtain data on life style, social trends, benefit-value structures, new product development and diagnostics for advertising creative.

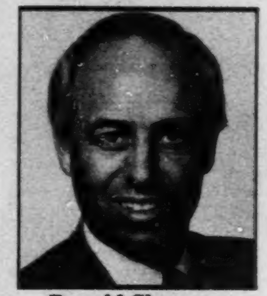
President Stanley J. Kapuler, 44, has an M.B.A. from the University of Chicago.

37 **Ad Factors Marketing Research**, Glen Ellyn, Ill. Privately held corporation; founded in 1975. Revenues in 1984 were $5.9 million, up 66.1% from 1983.

Primary business is custom, ad hoc surveys, both consumer and industrial, through continuous market measures, tracking studies, test market evaluations, product in-home use tests, and general opinion/attitude/viewership studies. Services include computer generated national-local samples, questionnaire development, interviewing, data processing and analysis. In-house WATS telephone facilities include 240 monitored dialing stations, 100 of which are CRT-equipped.



Donald Chapman
Ad Factors Marketing

Ad Factors employs about 300 people, 44 of whom are fulltime, salaried, exempt. There are branch offices in Montrose, Conn., and Cinnaminson, N.J. During 1984, the company installed fully interactive CRT/DP computer system with data transmittal capabilities linking all offices.

President Donald B. Chapman, 43, is a graduate of Portland State University.

38 **Response Analysis**, Princeton, N.J. Privately held corporation; founded in 1969. Research revenues in 1984 were $5.6 million, up 44.6% from 1983.

Herbert Abelson
Response Analysis

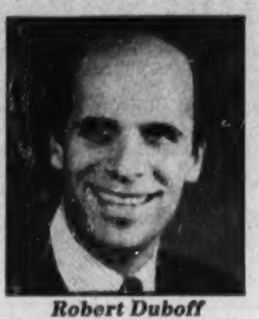
Revenues do not include RA's ARRO Division in Bethesda, Md., which specializes in human factors and performance evaluation/skill testing procedures.

This survey research organization, which specializes in large-scale projects for the U.S. government, nonprofit organizations and private sector commercial clients, has 99 fulltime, salaried staff members.

RA mainatins a central telephone interviewing facility with 40 stations, 15 of which are CRT-equipped.

Ceo Herbert I. Abelson, 59, received his Ph.D. from the University of Maryland. He is past president of American Assn. for Public Opinion Research and past chairman of Council of American Survey Research Organizations.

39 **Decision Research Corp.**, Lexington, Mass. Wholly owned subsidiary of Temple, Barker & Sloane; founded in 1971. Revenues in 1984 were $5.5 million, up 36% from 1983.



Robert Duboff
Decision Research Corp.

This full-service marketing research company specializes in custom, ad hoc survey work for consumer goods and business-to-business marketers. In addition, DRC does jury simulation work for legal clients, running mock trials during which various arguments and appeals are rated. There are 40 fulltime, salaried, exempt employes, and a phone center has 30 interviewing stations.

During 1984, DRC opened an office in Palo Alto, Cal.

General manager Robert S. Duboff, 36, received his J.D. degree from Harvard Law School.

40 **Oxtoby-Smith**, New York. Privately held corporation; founded in 1956. Revenues in 1984 were $5 million, up 18% from 1983.

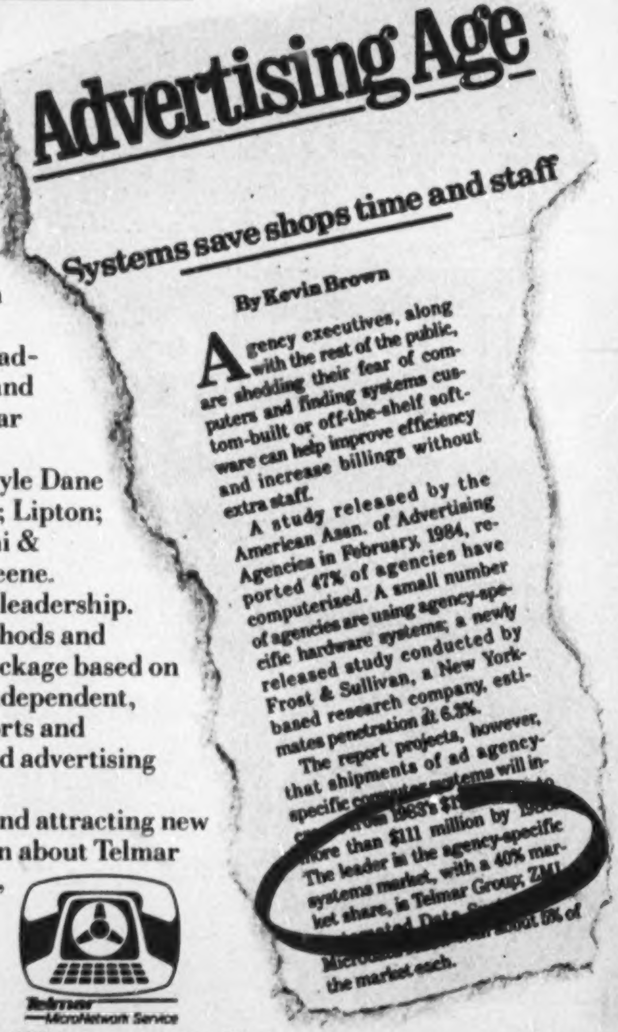
WHO IS THE LEADING ADVERTISING COMPUTER SERVICE FIRM?

ADVERTISING AGE REPORTS:

TELMAR.



Advertising Age

Systems save shops time and staff

By Kevin Brown

Agency executives, along with the rest of the public, are shedding their fear of computers and finding systems custom-built or off-the-shelf software can help improve efficiency and increase billings without extra staff.

A study released by the American Assn. of Advertising Agencies in February, 1984, reported 47% of agencies have computerized. A small number of agencies are using agency-specific hardware systems; a newly released study conducted by Frost & Sullivan, a New York-based research company, estimates penetration at 6.3%.

The report projects, however, that shipments of ad agency-specific [illegible] will in[illegible] from 1983's $1[illegible] more than $111 million by 19[illegible] The leader in the agency-specific systems market, with a 40% market share, is Telmar Group; ZMI [illegible] about 5% of the market each.

In fact Telmar has *always* been the leader. We pioneered marketing and media computers and software nearly two decades ago. We've made quite a difference. As you can see in the Advertising Age article, Telmar has 40% of the total information systems market.

Today, Telmar serves over 900 advertisers, broadcasters, advertising agencies, publishers, research and educational organizations here and abroad. This year alone, Telmar has added over 150 new users of its MicroNetwork services. Among them: ABC TV; Doyle Dane Bernbach; HCM (Marsteller); Kenyon & Eckhardt; Lipton; National Geographic; North Castle Partners; Saatchi & Saatchi Compton; TDI Winston and Wells, Rich, Greene.

There are several reasons for this continuing leadership. Telmar is on the cutting edge—introducing new methods and technology. Telmar alone offers a fully integrated package based on the personal computer for all media. Telmar is an independent, objective and privately-held company; Telmar's reports and formulas are accepted throughout the marketing and advertising world.

If you are responsible for profit, productivity and attracting new business, Telmar can help you. For more information about Telmar and its services, write to Stanley P. Federman, CEO, Telmar Group Inc., 902 Broadway, New York, New York 10010. You can also call him at (212) 460-9000 or toll free at 1-800-367-3655. Do it now, while it's on your mind.

Telmar
MicroNetwork Service

Telmar is IBM's largest personal computer VAD for the advertising/marketing industry.

Marketing information service business growing

By Jack J. Honomichl

They don't look like research companies, they don't talk like research companies, and they don't walk like research companies.

A large, fast-growing genre of marketing information service companies is increasingly competitive with the traditional marketing/advertising research companies in providing decision-making data.

Because of that growing presence, ADVERTISING AGE is publishing profiles of such marketing information service companies in conjunction with its annual list of the top U.S.-based marketing/advertising research companies.

The six organizations profiled—Claritas L.P., EPSILON, Interactive Market Systems, MAJERS, Management Decision Systems and SPAR—had combined revenues of $115.7 million in 1984, up 30% from 1983. Their activities are becoming more intertwined with the traditional marketing research companies, and their business sprawls around the world.

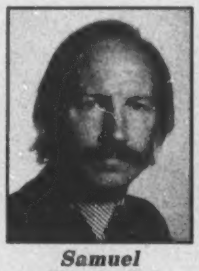
Because most of the companies that fit naturally into this category are privately owned or subsidiaries of large, public corporations, they are not accustomed to making their revenue data public. Donnelley Marketing Information Services, a Dun & Bradstreet corporate unit; American Demographics Inc., a subsidiary of Dow Jones & Co., and the Market Analysis Division of C.A.C.I., marketers of the Acron Market Segmentation & Targeting System, are not allowed by their parent companies to reveal revenue data.

Other privately held companies, such as National Decision Systems and Marketing Intelligence Service, when invited by AD AGE to participate in this listing, replied in essence, "Not this year, but probably next." Others, including Telmar, declined. And others—notably, Urban Decision Systems, Data Resources and National Demographics & Lifestyles—didn't acknowledge AD AGE's request.

Marketing information service organizations probably represent between $300 million and $400 million in annual revenues, and judging from the six organizations listed below, they are growing much faster than most marketing research companies.

Following, in alphabetical order, are profiles of some leading members of the marketing information service category.

Claritas L.P., Alexandria, Va. Founded in 1971; since 1984 a partnership that includes Claritas senior management and a noncontrolling interest held by VNU Amvest, the U.S. subsidiary of VNU (United Dutch Publishing Co.). Revenues in 1984 were $6.2 million, up 41% from 1983.



Samuel Barton III Claritas

Thomas Jones EPSILON

Richard Makely IMS

Adrian Scribante MAJERS

John Wurts MDS

Robert Brown SPAR

A specialist in market segmentation and target marketing, Claritas is best known as the developer of PRIZM, a neighborhood classification model that assigns each census block group and tract, postal carrier route and Zip code to one of 40 lifestyle groups.

The PRIZM Interlock concept permits marketers to cross-correlate PRIZM profiles drawn from nearly 25 PRIZM-coded survey research databases and services, including Arbitron, Birch, Home Testing Institute and NPD, Market Facts, Accountline, Scarborough/LNR, Simmons Market Research Bureau, SRI/VALS and SRI/Financial, and TRW.

Claritas' software and databases are used in support of its analytical project services, and they also are distributed under license to end users for operation on their own computers.

A key resource is the Claritas GeoBase, an integrated database of census demographics, geographic code systems and mapping boundaries, used for retail trading area analysis, sales potential studies and computer mapping applications.

During 1984, Claritas launched a new service for targeting the affluent market.

The 75 members of Claritas' professional staff are located in its central r&d production facility in Alexandria, Va., and four regional client service offices. Two more regional offices will be opened in 1985.

President-ceo Samuel G. Barton III, 42, has an M.B.A. from Stanford University.

EPSILON, Burlington, Mass. Public company, traded NASDAQ; founded in 1969. Revenues in 1984 were $44.7 million, up 34% from 1983.

EPSILON, which refers to itself as "The Database Marketing Company," was founded by four graduates of Harvard University's Business School. In 1979, the company went public, and today more than half its revenues come from commercial clients.

EPSILON provides a full range of data management and direct marketing services, including marketing database management; market research and analysis; direct response/direct mail creative and production; inquiry fulfillment; inbound and outbound telemarketing; sales lead management, and strategic consulting.

Research

(Continued from Page 37)

that about one-half its revenues come from clients for whom Oxtoby-Smith assumes responsibility for all, or almost all, of the consumer research functions, filling the role of both "internal" department and "outside" research supplier. Among such clients are American Motors, Block Drug and Coca-Cola Foods.

The balance of Oxtoby-Smith volume comes from custom, ad hoc survey projects and, of growing importance, consultation, research and testimony relating to legal regulatory matters, among them trademark litigation and advertising claim substantiation.

On-site facilities include a central telephone interviewing facility with 20 stations, all of which are being CRT-equipped this year and a focus group facility.

President-ceo Joseph Smith, 58, received his Ph.D. from the University of Iowa. He is one of the company's founders.

Apple shifts execs, slashes ad budget

Apple II, Mac get new chiefs

By CLEVELAND HORTON

Apple Computer, seeking to end infighting among its separate Macintosh and Apple II divisions and spur new growth, has brought in two new executives to reshape its senior marketing team.

The changes, confirmed last week by Apple, bring Jean-Louis Gassee, a French Apple exec with a hot sales record, and Michael Lorelli, a former top marketing hand at International Playtex, into key slots. The corporate moves come as sources predicted Apple will slash 1985 ad spending to as little as $50 million, half the company's 1984 ad spending pace. Chiat/Day, Los Angeles is the Apple agency.

Apple declined to comment last week on the size of its ad budget cuts. Top execs had previously conceded that sales growth rates at Apple have slowed, prompting a bout of cost-cutting that includes not only ad cutbacks but plant closings and employe layoffs.

An Apple spokesperson said the management changes are designed to develop strategic plans to "grow Apple's markets." Industry observers, however, see the shuffle as an effort to quell internal wrangling between the Apple II and Macintosh divisions.

Apple created separate divisions last year for each product line to better address its respective markets. Sales of the lines, however, drifted into each other's markets, and the divisions reportedly began accusing each other of cannibalizing their sales.

Sources close to Apple believe the company is considering ways to sell products from both lines to the same markets. For example, Macintoshes may be sold to schools,

Eastern's Moonlight Special is a hit, but when Ad Age rode along, it discovered, not yuppies and designer suits (a la EAL's commercials at left), but wailing children and bag lunches.

The Moonlight Special: It's no flight of fancy

By BRIAN MORAN

When Eastern Air Lines announced plans last February for the Moonlight Special—a gimmick offering passengers low fares on middle-of-the-night cargo flights—most airline and marketing people scoffed.

To many observers, the Miami-based carrier couldn't have picked a more inopportune moment to unfurl a wild new marketing ploy. Eastern was teetering toward bankruptcy, reeling from five years of losses and fighting a bruising battle with its unions.

But the airline directed its agency, Campbell-Ewald, to come up with a tv campaign pitching its slow-boat-to-the-coast flights to a target audience of college students, backpackers and yuppies who wouldn't mind switching planes in Houston at 2:30 a.m.

The Warren, Mich.-based agency's resulting pool of commercials feature a well-heeled, air-guitar-playing singles crowd high-stepping into an Eastern terminal to get on board.

The message was clear: Eastern's Moonlight riders were in for an all-night, cross-country party for only $98, a buck cheaper than People Express. (Eastern raised Moonlight fares $10 to $20 last week.)

Advertising Age got the message. Curious about the rousing success of Eastern's creative new marketing program—Moonlight has

Bosee leaves after 'disagreement' with Newhouse

First fallout at New Yorker

By STUART J. ELLIOTT

New York—The departure of J. Kennard Bosee as president of The New Yorker Magazine Inc. follows disagreements with new owner S.I. Newhouse Jr. about business operations, say magazine-industry sources.

Mr. Bosee is "retiring," effective June 1, according to a memo from chairman Peter Fleischmann. But these sources said Mr. Bosee resigned after meeting with Mr. Newhouse, chairman-president of Advance Publications, May 21—two weeks after Advance's acquisition of the magazine company took effect (AA, Feb. 14, *et seq.*).

Sources said Mr. Bosee and other New Yorker executives have been unhappy with situations in which they believed Advance's Conde Nast Publications was getting involved in internal New Yorker business matters, such as personnel, printing and insurance coverage.

Under the agreement reached before the buyout, Advance pledged to operate New Yorker as a separate, stand-alone company.

There are reports other top business-side executives have resigned, or are about to, including Mr. Fleischmann, whose father, Raoul, 60 years ago helped found the company and its flagship weekly, *The New Yorker*. He was out of town and could not be reached for com-

Davis angered by CBS suit

'Car & Driver' chief peels off

By JESSE SNYDER

ANN ARBOR, MICH.—David E. Davis, long considered the personification of car-buff magazine publishing, has resigned as editor-publisher of *Car & Driver*. His departure stems from the bitter lawsuit between CBS Inc. and Ziff Corp.

CBS bought *C&D* and 11 other publications from William Ziff late last year. Since the deal was completed, a virtual barrage of memos from CBS headquarters and other lingering transition problems were making Mr. Davis restive. But staffers weren't overly concerned until the CBS suit was filed, characterizing as fraudulent Mr. Ziff's statement of operating profits for the publications and demanding a $40 million refund on the selling price of $362.5 million (AA, May 20).

Mr. Davis fired off a telegram to CBS the same day the suit was filed, May 15, resigning in protest of the characterization of his mentor.

Mr. Davis described Mr. Ziff as "the man who made me what I am" when he quietly called together the magazine staff the following day to explain. He said he felt an obligation to take a stand.

CBS magazines execs reportedly spent several unsuccessful days in Ann Arbor attempting to change Mr. Davis' mind. He will leave July 31.

Mr. Davis was in California last week on assignment and unavailable for comment.

A former adman and race driver, Mr. Davis is one of Detroit's most recognizible faces in automotive and publishing circles. Even competitors in the close-knit circle of car-buff writers acknowledge him one of the last writer personalities to completely dominate a

Lorimar among three wooing Bozell & Jacobs

By STEWART ALTER

NEW YORK—Bozell & Jacobs has stepped up sale or merger conversations in the last few weeks, talking to as many as three agencies.

Talks have been revived with two suitors, including Lorimar, the Culver City, Cal.-based entertainment company that acquired Kenyon & Eckhardt a few years ago. Talks between Lorimar and B&J had been terminated previously (AA, Dec. 3).

"We've talked to Lorimar off and on going back eight or nine months now, and we have in the last couple of weeks talked to them as well as to a few others," said Charles Peebler Jr., B&J president-ceo, confirming the discussions.

Mr. Peebler, however, emphasized that Lorimar was only one of three potential buyers he has talked to recently, one other of which is also a revived conversation. He would not disclose who they were, but did deny that either D'Arcy MacManus Masius, or any of the French agencies, some of which have previously pursued B&J, were involved.

Other sources indicated neither Saatchi & Saatchi nor Interpublic Group of Cos. was among those would-be buyers either.

"It appears that Bozell & Jacobs' number has come up on the dance card," said Mr. Peebler. "If you look at the track record of what we've done, I doubt you'll find any agency that is going to be more attractive than ours."

But he cautioned against con-

Chicago printer faces indictment

Probe print bribes

By KEVIN DWYER
Crain News Service

CHICAGO—A federal grand jury is expected to indict Earl Lee Co., a commercial printer here, and its president, Norman Karel, next month in an alleged kickback scheme.

The scheme reportedly involved employes of such Chicago-based companies as Walgreen Co., Wm. Wrigley Jr. Co. and First National Bank of Chicago. An employe of Young & Rubicam/Zemp, St. Petersburg, Fla., also has been questioned (AA, April 15).

According to divorce documents filed on Mr. Karel's behalf in Cook County circuit court, "numerous financial setbacks" and "personal difficulties" experienced in recent months by Earl Lee and Mr. Karel "are expected to culminate in [his] indictment."

Mr. Karel, through his attorney, declined comment.

The coming indictment, which the Federal Bureau of Investigation would neither confirm nor deny, follows a six-month investigation by the FBI and the U.S. attorney's office here into Earl Lee's business practices.

Privately held Earl Lee, which employs about 40 people and operates 10 subsidiary businesses out of

SSC&B revamp frees up Weithas

By STEWART ALTER

The reorganization revealed by SSC&B:Lintas Worldwide last week, folding nine divisions into two, is the culmination of a plan by SSC&B chairman-ceo William Weithas to free himself from direct operational responsibilities.

The changes revived speculation that Mr. Weithas, 56, is in line to succeed J. Donald McNamara as president of the Interpublic Group of Cos., SSC&B's parent. Mr. Weithas dismissed such talk last week.

The restructuring at SSC&B, the second-largest of the Interpublic agency networks, leaves the agency with a U.S. and an international division.

Previously divided into nine regions, of which the U.S. was one, all the regional directors had been reporting to Mr. Weithas, who will remain based in London.

The agency is now divided into a U.S. division and an international division, which includes eight of the previously distinct regions.

The two executives heading those divisions are Spencer Plavoukos and Kenneth Robbins, respectively.

Mr. Robbins, 49, will be moving to London from New York (AA,

Nestle yanks Burnett from foreign jobs

By DENNIS CHASE

Nestle is firing Leo Burnett Co. shops around the globe, resulting in millions of dollars in business losses for the agency.

Burnett recently lost Nestle accounts in Brazil, Hong Kong, Malaysia, Puerto Rico and Singapore.

Most of the business has been given to the other two major Nestle agencies—J. Walter Thompson Co. and McCann-Erickson.

In Europe, Burnett lost $3 million-to-$4 million worth of Nestle business in France (AA, May 13). There are rumors that Burnett's Nestle account in the U.K.—one of the biggest international Nestle accounts in the agency's lineup, with $9.8 million in billings—is on shaky ground.

Burnett already has lost more than 33% of its international Nestle business, following the Chicago-based agency's decision to resign $40 million worth of Nestle U.S. business earlier this year.

The agency resigned Nestle in the U.S. after gaining U.S. business from M&M/Mars (AA, Feb. 21, *et seq.*), but some sources contend that the two moves were unrelated and that Burnett resigned the Nestle business because it was neither growing nor profitable.

The agency, which still has Nestle accounts in Argentina, Australia, Mexico, Thailand and the U.K., may lose some of those accounts.

The moves by Vevey, Switzerland-based Nestle surprised some Burnett executives who guessed that the marketer's philosophy of decentralization, where local Nestle companies get wide latitude to choose agencies and creative strategies, would permit Burnett to keep the international business.

But Nestle broke precedent and moved quickly to punish Burnett for resigning the U.S. business by ordering its foreign companies to fire the agency, sources said. The agency has been notified by letter from Nestle each time it gets the ax.

So far, Burnett has not moved aggressively to gain Mars international business but is thinking about it.

The agency's tack is to do impressive work for Mars in the U.S. and then go after the client's foreign accounts.#

Nestle fends off European critics. See Page 85.

Planned Parenthood pitch goes national

By PAT SLOAN

NEW YORK—Its first national pro-abortion advertising campaign positions the Planned Parenthood Federation of America as an organization of compassion and concern, in counterpoint to what the federation sees as a continuing trend toward violence by anti-abortionists.

Newspaper ads running in New York, San Francisco, Los Angeles, Chicago and Washington broke last week and will be followed up this fall with a national magazine campaign themed "The decision is yours." The Public Media Center, San Francisco, is agency for the $1 million effort.

The first of the two current ads gives "Nine reasons why abortions are legal," including: "Laws against abortion kill women"; "legal abortions protect women's health"; "a woman is more than a fetus"; "being a mother is just one option for women"; "outlawing abortion is discriminatory"; "compulsory pregnancy laws are incompatible with a free society"; "outlaw abortion, and more children will bear children"; "every child [should be] a wanted child," and "choice is good for families."

That ad also notes the more than 30 arsons and bombings of family planning and abortion clinics in the last 17 months and the announcement by some anti-abortionist leaders that 1985 will be a "year of fear and pain" for both women seeking abortions and those who would give them.

As a result, a portion of the Planned Parenthood's newspaper campaign includes a coupon addressed to Attorney General Edwin Meese III charging that the call for a "year of fear and pain" constitutes a conspiracy to violate the civil rights of women seeking legal abortions and asking the Justice Department's civil rights division to investi-

Survey: Coors is the one

'Beer talk' scores

By SCOTT HUME

It's agreed that sex, glamor, emotion and patriotism sell. Apple's "1984" commercial also proved that an enormous budget coupled with a creative execution can get you noticed. But it also still is possible to cut through the clutter without invoking any of those tools.

Consider Adolph Coors Co., for example.

In February, Golden, Colo.-based Coors replaced its "Best of the Rockies" advertising campaign, which marketing vp Rob Klugman called "good, middle-of-the-road beer advertising," with a decidedly out-of-the-ordinary campaign carrying the "Coors is the one" tag line (AA, Feb. 11). The new spots feature actor Mark Harmon calmly discussing a series of product attributes while walking on a hilltop or through the Coors brewery. "There's no hoopla here," brewing division president Peter Coors told ADVERTISING AGE in a recent interview. "There are no bar scenes, no macho postures. This is just plain old beer talk."

Perhaps so, but "beer talk" apparently gets listened

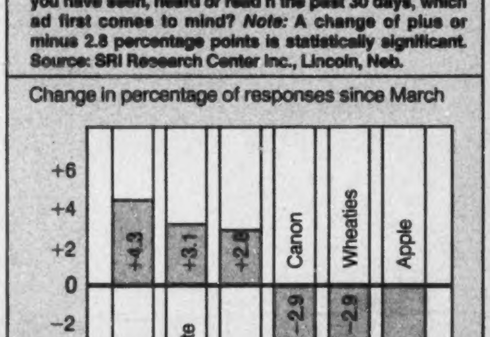
Change in percentage of responses since March



After strong '84, Big Mac stays on track

By SCOTT HUME

McDonald's Corp. has become a chain with $10 billion in sales by sticking to its long-term growth plans and ignoring what "the other guys" do, and executives of the world's largest restaurant company last week gave its shareholders no sign that they plan to change.

McDonald's came through 1984, a relatively tough year for many fast-food chains, in very good shape, and company executives' reports were full of good news and upbeat projections. Systemwide sales last year rose 15% to $10 billion, and international sales were up 20% to nearly $2 billion. Even average-unit sales, which had been flat for the past few years and a source of concern, showed a solid gain, rising 8% from $1.169 million to $1.264 million.

With the tone of the meeting set by those positive numbers and references to last year's successful ties to the Summer Olympics and this year's celebration of the chain's 30th anniversary, McDonald's execs felt no need to comment on moves made by competitors.

"We don't spend our waking hours thinking about the industry. We spend our waking hours on ourselves," explained chairman Fred Turner during a brief post-meeting press conference.

Mr. Turner added that the talk of "Burger wars" neglects the fact that sales are up for all of the Big Three hamburger chains. "Our share of the total pie is up. Theirs are up. The total pie is up."

So positive and confident was Mr. Turner that he declined even to be critical about other industries. Asked about Coca-Cola's reformulation of Coke, he replied rhetorically, "Who is McDonald's to second-guess the marketing acumen of the market leader?"

However, he said McDonald's has no interest in adding Cherry Coke, which several other chains soon will begin testing (AA, May 20), at its 8,300 restaurants.

President Michael Quinlan said that while McDonald's advertising presence during prime time network programing will continue to expand, it represents no real shift in policy.

"Last year we changed the way our national advertising budget is spent to skew more toward national tv and away from local buys," Mr. Quinlan said. "However, the amount of network kids' tv available is limited, and we already are pretty well represented there. As a result, the overage goes to more adult programs. We'll up the ante in prime time buys, but it's not a policy shift."

McDonald's spent approximately $600 million, or 6% of systemwide sales, on advertising and marketing worldwide last year. About 80% of that is spent domestically.

International growth continues to be a high priority for the company despite currency fluctuations that cut its overseas earnings last year. Vice-chairman Edward Schmitt told shareholders that the chain, which last year opened its first stores in Taiwan, Andorra and Finland, hopes to enter Argentina and Macao next year and is looking at South Korea and Indonesia.

Shrugging off questions about "saturation" in the fast-food industry, Mr. Turner said there remains more than enough room for growth, although new stores will not all be on traditional sites. As an example, he noted that 10 McDonald's restaurants were opening simultaneously on the Connecticut Turnpike as the meeting opened.#

McGeehan promoted; Webster takes AA spot

Chicago—Pat McGeehan has been promoted from assistant regional editor to regional reporter for the Chicago bureau of Advertising Age. He will contribute regional stories and cover the national housewares beat.

A 1984 graduate of Northwestern University, Mr. McGeehan joined Ad Age in August.

Nancy Webster has been named to succeed him as assistant regional editor.

N. Webster

P. McGeehan

A 1983 graduate of Indiana University, Ms. Webster most recently was the Life Styles editor of the *Daily Calumet*, a newspaper serving Chicago's southeast suburbs. She also has worked on the copy desk of the *South Bend Tribune*.#

CORRECTIONS & CLARIFICATIONS

- Associate creative director for Dancer Fitzgerald Sample's new Molson Golden ad was Stephen Dolleck, while Peggy Gregerson was the copywriter. Joe Loconto was art director. They were omitted from Global Gallery (AA, May 9, P. 10).
- Young & Rubicam/Dentsu, Los Angeles, is the agency for Tomy Corp.'s Popoids and for that toy's tie-in with McDonald's, not Keye/Donna/Pearlstein and Leo Burnett USA, as reported (AA, May 9, P. 55).
- Zachary & Front, New York, is agency for Bertolli USA's packaged tomatoes. The agency name was misspelled earlier (AA, May 16, P. 51).
- Gillette Co., Boston, markets Dipity-Do styling gel, not Dep Corp., as reported (AA, May 20, P. 60).
- *Spectrum* was inadvertently omitted from the May consumer magazine linage report (AA, May 20, P. 93). Updated figures are: May, 1985, 118.4 pages; May, 1984, 115.3; Year-to-date 1985, 547.6; Year-to-date 1984, 491.9.
- Henson Associates, New York, said Hanes Knitwear is adding "Fraggle Rock" to its children's wear line, not "Muppet Babies" as reported recently (AA, May 20, P. 100).#

FINALLY
A COUPON VEHICLE
WITH REDEEMING
QUALITIES.

CouponCounter

At last there's a coupon vehicle that offers you efficiency, security and reliability: The Coupon Counter®

The incredible in-store Coupon Counter
The Coupon Counter machine instantly delivers your coupon right inside the store. Which means shoppers don't have to hunt for it through a cluttered newspaper. Or clip it. Or remember to bring it. Your coupon is always right there where decisions are made.

Triples your redemption rates
Our 1984 results prove that shoppers who use the Coupon Counter are three times more likely to redeem your coupon. Which means you get three times the power to stimulate trial. In fact, shoppers are so likely to redeem Coupon Counter coupons, many of our clients tell us they can lower the face amounts and still get impressive results.

Tightens security
With misredemption on the rise, the Coupon Counter offers virtually fool-proof security. Your coupon can only be validated when the shopper enters a personal code.

Delivers demographics
Because every Coupon Counter cardholder is listed in our data bank, we know exactly who redeems your coupon. This vital tracking information is now available for the first time…just ask and find out exactly how our research capabilities can help you.

Join the revolution
If you're not getting these kinds of results from your current coupon vehicle, it's time to try the Coupon Counter. You'll join a long list of top companies who've had remarkable success with us.

Just call 1-617-329-5800.

It could be the most redeeming thing you've done for your couponing effort.

Stores, autos top latest Flash Report

By WILLIAM F. GLOEDE

New York—If advertiser spending were a reliable indicator of current consumer spending, it would appear Americans in 15 major markets spent much of February driving new cars to shopping malls, all the while withdrawing money from the bank.

The Advertising Age Flash Report of Newspaper Advertising Investments for February shows department stores, general-merchandise retailers and marketers of new cars leading an over-all increase of $25 million in advertiser investments in daily newspaper advertising in 16 selected categories in 15 major markets.

The Flash Report is prepared for Advertising Age by Media Records Inc. based on linage measurements in 29 daily and 23 Sunday newspapers in 15 cities.

Department stores, newspapers' biggest advertisers, led in dollar gains with a 13.6% jump to $75.1 million, $8.5 million more than February, 1984. General merchandise store spending ros)e 27.4% to $27.2 million.

The passenger cars-new category, which tallies all factory, dealer association and dealer ad spending, posted a 34.3% increase to $13.9 million.

Banks & trust company spending, however, was off 8.9% to $5.7 million.

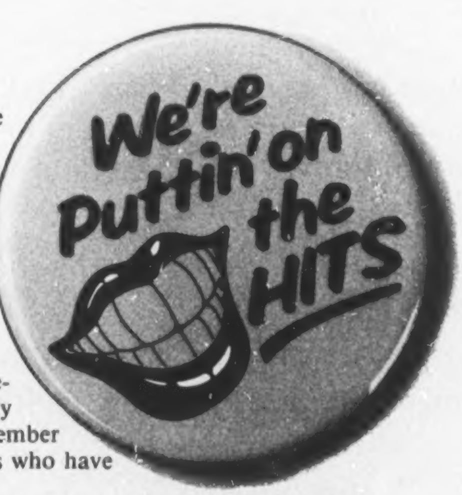
Among the categories showing the highest percentage gains over February, 1984, were cameras, photo supplies & services, up 200% to $461,000; public service utilities and commissions, up 71% to $7.2 million; computers, equipment and services (general classification) up 52.2% to $3.3 million; computer stores & supplies (retail classification), up 47.5% to $4.9 million, and radio, tv, phonographs & records, up 27.4% to $27.2 million.

The largest percentage decreases between February, 1984, and this February were in the cigaret category, down 48.8% to $2.5 million, and the airlines category, down 29.9% to $9.5 million.

Other losers were stock, bond & investment houses, down 9.2% to $1.5 million; alcoholic beverages, down 6.9% to $998,000, and publishing & media, down 6.3% to $13 million.

Other gainers included: Amusements, up 12.8% to $25.8 million, and food stores, up 6.4% to $24.5 million.

The Flash Report is based on measurements of newspapers in Atlanta, Baltimore, Boston, Cincinnati, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, New York, Philadelphia, San Francisco, Washington and Youngstown.#



In shopping malls across the country. Big, splashy, crowd-filled events. Like the auditions we're currently running for the hit TV show, "Puttin' On The Hits"*.

And, the national search for Mother and Daughter Pageant candidates.

We've got "The Gumby Show", with the popular goggle-eyed character and his pals ready to entertain the adults who remember the original show, and the teens who have made him a cult figure.

In fact, we've got the right entertainments and exhibits to showcase your products in the selling environment of shopping malls. Turn-key events, complete with merchandising packages, that deliver more exposure than you thought you could get from your local marketing program.

So call 213-546-2528 and we'll put on a hit for you!

H&K adds two execs

Atlanta—With merger mania rivaling Trivial Pursuit as a national pastime, Hill & Knowlton's Atlanta office has added two senior executives with first-hand experience from the corporate takeover battlefields.

Thomas Latimer, the new vp-general manager in Atlanta, spent long hours working on the Gulf Oil/Chevron merger in his position as senior director of advertising and corporate communications for Gulf Oil Corp., Pittsburgh.

He will be joined by Joel Goldberg, former chairman-ceo of Rich's, the regional department store chain based in Atlanta. Mr. Goldberg, who was head of Rich's when it was purchased by Federated Department Stores, Cincinnati, several years ago, will be a parttime senior consultant.

Recruited to Hill & Knowlton by an executive search company, Mr. Latimer thinks the expanding southeastern corporations represent an untapped pr gold mine.

Mr. Latimer replaces Dwayne Summer, the former vp general manager, who left the agency several months ago.#

Galen sets up new shop

New York—Galen & Asssociates Productions is a newly formed production facility located at 25 W. 43rd St., 10036. The shop is headed by Paul Galen, former corporate officer and executive producer/-production director at Gateway Productions here, a division of Gannett Co.

Smokeless tobacco sales up during '84

By JOHN C. MAXWELL

In 1984 the total smokeless tobacco industry was up 2%, led by moist snuff and loose leaf in particular. It is believed some of this relates to a switch from cigarets.

The moist-snuff area growth continues to be led by U.S. Tobacco, Greenwich, Conn., with volume up 7%. As this was the bottom-line growth of the total category, the company maintained share. The category's biggest grower was the Copenhagen brand, up a bit over 8%.

The Skoal group now has six products, which run from the basic Skoal product to Skoal Bandit, Skoal Bandit Mint, two Skoal long-cut items and the Copenhagen product. It would appear that Skoal Bandits are growing due to some cannibalization of the basic Skoal product, though that area has shown some modest over-all gains.

Memphis-based Conwood Corp.'s Kodiac brand helped the company move up a few tenths of a per cent of the market share, to the detriment of Helme Tobacco Co., Wheeling, W. Va.

The other growth area was loose leaf, up some 3%. Conwood was the only company to show growth in the division, up some 15% in units and up four share points.

On an over-all basis, Conwood kept its No. 1 position with a 27.4% share, closely followed by U.S. Tobacco with 26.2%. The other companies lost some share, but there was no change in their rankings.

The main concern in the industry relates to the probability of a health label some time this year. Already six states: Illinois, Utah, Delaware, Oregon, Massachusetts and New York, have bills on the table to address this problem. The industry would prefer to have one label rather than 50 labels. A national bill is expected to be proposed. A label might affect consumption trends adversely within the industry, though obviously the strength of the label will be a consideration.#

Mr. Maxwell is with Furman Selz Mager Dietz & Birney, New York.

Total smokeless tobacco

Paced in part by a consumer switch in smoking habits, the over-all smokeless tobacco market recorded a 2% increase last year. Pounds figures are listed in thousands. *Source: John C. Maxwell.*

Workshop to see Abel's bag of tricks

New York—Which comes first, the creative "chicken" or the technological "egg"?

With breakthroughs in modern technology and daily strides in visual and audio equipment, a new kind of creativity is emerging. A creativity centered on daring special effects, exciting visual stimulation and unprecedented musical and auditory presentations. But how does this affect the creative process?

"Ultimately, the key is creative, not technical," according to Robert Abel, president of Robert Abel & Associates and a pioneer in special-effects technology.

Mr. Abel will be one of the featured speakers at the Advertising Age Creative Workshop to be held Aug. 25 to 28 at the New York Hilton Hotel.

"Our medium is not one of special effects, but one of visualization" says Mr. Abel. "We've been called a 'state of the art' company because we've always been on the leading edge of technology. But creative visions are realized only when that technology is applied through carefully thought out, ingenious solutions.

"The ability to get a creative vision on film or tape is really just a mechanical process, however complicated. The most creative part is having the vision in the first place," Mr. Abel explains.

In Mr. Abel's opinion, the best visions are the products of collaboration between the production company, the agency and the client, and ultimately rests on their ability to take chances. "The marketplace commands us to keep exploring because the tricks of two years ago simply don't work anymore," he says. He also points out that the audience of today has a much higher level of visual sophistication, which necessitates "being unique."

"It's been demonstrated often that the benefits of being different far outweigh the risks. I don't think that will ever change. What is changing is the way we're going about meeting that challenge," he adds.

For example, the make-up, role and scope of the production company is changing.

"The old way of thinking required that a production company have one 'people' director, one 'tabletop' director, one 'slice of life' director, one 'humor' director and one 'automobile' director. That was a complete staff. Now we're seeing a whole new kind of synergy," he says.

Evidence Mr. Abel's studio, which consists of three or four directors whose primary responsibility is live action, at least six art directors and a number of support people who can provide miniatures, computer graphics, opticals and other special effects.

"Bringing together a variety of people under one roof is a definite catalyst for creativity," Mr. Abel believes.

Additional changes are technological innovations.

In Mr. Abel's estimation, technology has evolved to such an advanced state that no problems are unsolvable in American tv today. This climate allows for exciting experimentation.

Recent "experiments" by Robert Abel & Associates include an animated American flag and set design used by CBS-TV during their presidential election coverage, a project for RCA using live-action miniatures, blue screen, "Paint Box" motion and motion control and a spot for TRW featuring the planet Jupiter that utilized a digital image wrapped around a surface.

At the workshop, Mr. Abel will illustrate some of these principles and techniques and will demonstrate "case histories" of new special-effects projects.

E.T. lands Hardee's in court

Universal City, Cal.—The long finger of Universal Pictures' E.T. is pointing to Roy, Utah (population 15,000), where a local Hardee's restaurant staged an opening-day promotion featuring the extraterrestrial cutie, sans permission from the studio.

Universal filed suit May 9 in federal district court in Salt Lake City against Hardee's Food Systems, Rocky Mount, N.C., as well as Titus Foods (the Utah franchise holder) and its agency, Thomas Phillips Clawsen. It alleges violation of copyright and trademark law.

The studio acted swiftly on a tip before the April 19 opening. It warned the franchisee and its agency that the upcoming promotion violated Universal's rights.

When the E.T. imposter made his appearance anyway, Universal sued.

A local theater owner tipped off the studio about the promotion. Universal said it is particularly sensitive to any unauthorized use by a restaurant of the Steven Spielberg creation because of its ongoing E.T. licensing agreement with McDonald's Corp., Oak Brook, Ill., for the Special Olympics benefit.#

Survey

(Continued from Page 3)

to, enough to make Coors' the best-recalled beer advertising in last month's adWatch survey.

Asked to name the first beer advertising that came to mind, 156 persons, or 12.5% of the monthly sample, named Coors. Anheuser-Busch's Budweiser, which had been tops in top-of-mind recall for 25 straight months, in April found itself in an unaccustomed second place with 10.8% of first mentions.

In fact, Coors' move into the top spot was helped in large measure by a decline in awareness for Budweiser, which dipped from 12.5% in March to last month's 10.8%, while Coors rose from 10.8% to 12.5%.

Miller Brewing captured the third and fourth spots. Miller High Life was close behind Bud with a 10.2% share, slightly—but not significantly—less than the 10.5% share it received in March. Advertising for Miller Lite was recalled by 8.3%, also about the same share it held in March.

Coors has expanded distribution in the Midwest and New England since the first of the year, so a greater awareness for its advertising was expected. But the biggest gain in awareness for Coors' advertising came not in those areas—where the "Coors is the one" campaign has not aired yet—but in Coors' so-called traditional markets in the West. Its share of first mentions in that area rose from 14% in March to 21% in April.

Last month's biggest single gain—and perhaps its biggest surprise—was turned in by General Electric, which threatens to run away from the pack in the home-electronics category. Awareness of its advertising rose 4.3 points in April, from 6.7% of first mentions to 11%. The company, best known until recently as a lighting products manufacturer, has been heavily advertising its line of under-cabinet home appliances.

That advertising has been successful enough to push its awareness past such home electronics stalwarts as RCA (3% of first mention last month), Sony (2.9%), Sears (2.3%) and Whirlpool (2.3%).

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of consumers to name advertising in a variety of product categories that first comes to mind from all seen, heard or read in the previous 30 days.

In April, 1,251 adults were questioned by telephone. Under adWatch methodology, an increase or decrease of 2.8 percentage points is considered statistically significant and attributable to more than sample variation.

Among other interesting results from the April survey:

- What had been a neck and neck awareness race between Gallo and Riunite in the **wine** category is being won by Riunite. Its share of first mentions was up 3.1 points last month, from 9% to 12.1%.

Gallo, which in January had been deadlocked with Riunite at 10%, continued its decline. Gallo advertising came to mind first for 5.8% of respondents last month, compared with 7.2% in March. Paul Masson was third with 3%.

- The up-and-down fortunes of **computer** category leaders continued in April. Awareness of No. 1 Apple's advertising dropped 5.3 points (from 39.2% of first mentions to 33.9%), while IBM's advertising picked up 2.8 points (rising from 12.9% to 15.7%). Commodore remains No. 3 with 4.6%.

In March, it had been Apple's turn to rise and IBM's to decline.

- The **top 10** best-recalled advertisers in April (in response to the initial question "Of *all* advertising you have seen, heard or read in the past 30 days, which first comes to mind?") were, in descending order: Coke, Pepsi, McDonald's, Miller/Miller Lite, Wendy's, Burger King, Ford, Budweiser/Bud Light, Chevrolet and Pizza Hut.#

For additional information or data, contact: Gary Gabelhouse, SRI Research Center, 301 S. 68th St., Lincoln, Neb. 68506. Phone: (402) 489-0351.

Planned

(Continued from Page 3)

gate.

Other coupons in both campaigns are supplied for the support of the proposed Reproductive Health Equity Act, contributions to Planned Parenthood and position statements to congressmen.

The second ad that ran last week offers "Five ways to prevent abortion [And one way that won't]."

Nine Reasons Why Abortions Are Legal:

The $1 million Planned Parenthood national effort kicked off in newspapers and moves to national magazines in the fall.

The one way that will not prevent abortions, the ad says, is to make them illegal. "Offering a better teacher than experience," "making America friendlier to children" and "creating new birth-control methods" are preventive means, the ad says, that even right-to-lifers can support.

While Planned Parenthood's local affiliates have run advocacy campaigns in the past, the national arm has restricted itself to public service announcements.

But acts of violence by anti-abortionists and the restriction of their right-to-life argument to concerns of the fetus, thereby obscuring the concerns of women, prompted the national organization to create the new campaign.

Planned Parenthood's affiliates will be able to support the national campaign by running the ads in their own communities with their own funds, he said.

Kay James, director of public affairs, National Right to Life Committee, Washington, denied last week that anti-abortion groups care only about the unborn child and not about the woman. At a Washington press conference following the appearance of the first Planned Parenthood ad, the committee cited support structures for pregnant women, including housing, financial assistance, career counseling and also counseling for women who had abortions. She said NRLC condemned violence. NRLC has no plan for an advertising response, she added.#

Are mounting deadlines giving you "Overnightmares"?

Edward Sorel

It's happening again, isn't it? Clients, bosses, schedules, deadlines. They're all bearing down on you. And you're lying awake, wondering if the important parcel you sent on the overnight delivery will get there in time. Or whether it will get there at all.

You could be resting easy right now if you had called American Airlines Priority Parcel Service. That's because we can deliver parcels, door to door, *in hours!* Get your package on American's next flight, or any flight you specify. Just call **(800) 638-7320**. In Maryland, call (301) 269-5503.

So the next time you feel the deadlines starting to mount, call American. We'll get your package delivered in hours. And on time.

Abel soars with Eagles

Advertising Age
Thursday

Photo by Hal Fisher, Vanguard Photography

In June, Robert Abel will be the joint recipient of the Golden Eagle Award for outstanding contributions to the visual communications profession—and he will probably add it to the 21 Clios already arranged in his office. But it is only the latest honor bestowed upon a man who has helped to change the way advertising looks, and upon the company he created, Robert Abel & Associates. *See Page 5.*

Creating creative

Clifford Einstein, president-creative director of Dailey Associates, has some tips on encouraging great creativity in agencies. *See Page 6.*

Looking good

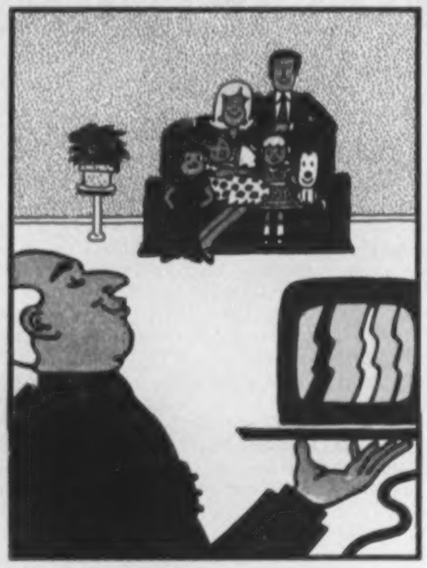
Manhattan advertising stylist Rochelle Weithorn primps executives so they will look good for their pictures in company annual reports. "Many executives simply don't know how to dress properly," she says. *See Page 6.*

He'll clue you in

Renowned fictional detective Nero Wolfe's back, and AA's Robert Goldsborough's got him. An agreement with the heirs of author Rex Stout means Wolfe and Archie Goodwin will ply their trade once again. *See Page 35.*

Special Report

Cable Television



Cable tv used to be considered the be-all and end-all in home entertainment, but now it is seen only as a component in today's home media center. In Special Report, starting on *Page 13.*

Presstime

ND assigns brands

New York—National Distillers Products Co., in dividing its $20 million account equally between BBDO and its newest agency, Laurence, Charles & Free, has identified the brands both will handle. BBDO gains Old Grand-Dad bourbon, formerly at Young & Rubicam, and retains the Gilbey's line, Old Taylor, Old Crow, DeKuyper cordials, CocoRibe coconut liqueur, Kamchatka vodka and the Bellows line. LC&F gains Windsor Canadian and Canada House (both from Y&R), Sauza tequila (from BBDO), Keller-Geister German wine (from Ally & Gargano), Vat 69 and King George IV scotches (both from Y&R) and previously unassigned Talisker scotch.

Time bids on Warner Amex

New York—Time Inc. and TeleCommunications Inc., Englewood, Colo., reportedly have joined forces in a $750 million bid for Warner Amex Cable Communications Inc., the country's sixth-largest cable systems operator. Other parties said to be seeking control of WACCI include Viacom International and WACCI chairman Drew Lewis, who reportedly plans a leveraged buyout (AA, May 13). A Time Inc. spokesman would not comment on the reports. Time Inc./TCI is said to have topped Viacom's bid by $50 million.

'VF' names publisher

New York—Guy Douglas Johnston, advertising director at *Vanity Fair*, has been named *Vanity Fair's* third publisher. He succeeds David O'Brasky, who was dismissed May 28 by S.I. Newhouse Jr., chairman, Conde Nast Publications. Mr. O'Brasky, who served since December, 1983, reportedly resigned at Mr. Newhouse's request because of "differing management styles."

BBDO to be picket site

New York—BBDO's offices here are scheduled to be the site of a demonstration May 31 by trade union workers employed at Black & Decker's Allentown, Pa., plant. The demonstrators plan to protest the proposed closing of their facility by Black & Decker (AA, April 8). BBDO handles B&D's $100 million housewares account.

ISL to market Olympics

Lausanne, Switzerland—ISL Marketing, the Lucerne-based international sports marketing company, this week signed an agreement with the International Olympic Committee to handle a worldwide coordinated marketing program for the 1988 Olympics.

RC begins $10 million push

New York—Royal Crown Cola, Rolling Meadows, Ill., admitting its No. 3 spot in the cola market, broke an aggressive three-week $10 million campaign May 29 via newspapers, radio and network tv. Ten and 30-second spots, themed "Some people will go out of their way for a taste of RC," will continue running after the initial spurt. Dancer Fitzgerald Sample handles.

Advertisers are looking for vivid colors for corporate identification, says Pantone Inc. president Lawrence Herbert, shown here in the Pantone Carousel of Colors during the recent Print '85 Expo in Chicago.

Corporate colors going 'hue-whee!'

By Laurie Freeman

Design

Cyndi Lauper, clothed in crackling yellows and oranges, and Prince, clad in his royal purples, have helped ignite the fashion world as well as pop music.

And now rock stars' flair for whacked-out, vibrantly hued clothes seems to be showing up in the corporate world, too, with companies' logos starting to pop up in a wider range of colors.

Red—any kind of red—still seems to be most companies' color of choice. But close behind as new corporate favorites are bright yellow and orange. Violet and purple also are popular choices today.

Most corporations are not known for following fashion's whims. To the contrary, the majority of marketers tends to rely on the old standbys—reds, deep blues and violets.

"We're finding that those colors are preferred by banks and other financial, more conservative institutions," says Lawrence Herbert, president of Pantone Inc., Moonachie, N.J. "But sometimes. . .they go wild."

He wouldn't elaborate on which companies are planning to take color chances.

It was Mr. Herbert's color communications company that developed the Pantone Color Matching system, which is used internationally by printers to identify specific colors.

The colorful Ms. Lauper.

"Once companies decide on their colors, our only concern is that we can reproduce them on any number of surfaces," he explains. "The deep blues, greens and reds are hard to reproduce because there's a limit on how thick you can lay on the ink."

A company's color selection for its product advertising and packaging is still "pretty much a primitive response," Mr. Herbert says.

The range of colors available now is amazingly varied, making what was once an easy choice a tough one.

Each printer or ink manufacturer also has its own color standards, and colors differ widely from shop to shop.

Yes, roses are red and violets are blue, but it's not always that simple. For example, Anheuser-Busch's logo is a certain Pantone color-coded red, white and blue, which can be easily reproduced by printers nationwide. St. Louis-based A-B turned to Pantone several years ago to standardize its corporate colors.

Poor color reproduction or variations can reflect badly on a company's image, no matter how superior its product may be.

Various organizations, including Pantone, the Assn. of Business Publishers and the U.S. Bureau of Standards, have developed standards for color-coding, injecting some sanity into the confusion.

The need for color standardization is spilling over slowly from the graphic arts and printing industries into the environmental industries—architecture, beauty, fashion and interior design.

"We got 8,000 color samples from designers and, based on their frequency and use, that number quickly dwindled to 1,000 colors, which are 90% of the colors used," Mr. Herbert says.

"Each designer has slight nuances that are really not that necessary—they're whims," he says. "You can't control color reproduction exactly; those nuances are just a waste of time."

Those nuances also can make consumers feel terribly ignorant, Mr. Herbert says, adding, "I'm reminded of the true story of a woman who told her interior designer she wanted buttercup yellow for her kitchen. The designer told her it was bright yellow that she wanted. She just wanted control over what those colors really were."#

Serving varied home entertainment menu

By Mark Trost

For the past 10 years, cable tv has been the filet mignon on the home entertainment menu. But recently, the main course has begun to be overshadowed by a variety of electronic side dishes to enhance and expand cable and video service.

The growth of videocassette recorders even has begun to outstrip the growth of cable subscribers. Vcr units in operation are expected to increase 10 million this year, from 7.3 million units in operation in 1984. Basic cable subscribers are expected to increase from 32.9 million in 1984 to about 36.1 million by the end of this year, according to electronics industry and cable industry sources.

As a result, the wired medium's movers and shakers have realized a set-top 54-channel converter no longer is considered the be-all and end-all in home entertainment. Rather, it now is seen as a component in today's burgeoning home media center.

Today's "liberated viewer," as cable insiders have labeled the multiple-video component owner, has more choices than Aaron Spelling has programs on ABC. From the stereo and cable-ready tv set down to the black box capable of excising commercials unattended, the decision is in the consumer's hands, and cable rates only among the top choices.

The component most responsible for enhanced home entertainment choices is the vcr. The time-shifting marvel is expected to become as common in U.S. tv homes as the tv receiver or cable box.

According to the Electronic Industries Assn., the trade group for consumer electronics marketers, videocassette recorder sales should exceed 10 million units this year—a tally that will result in almost 20 million consumers owning devices that can preserve a Gallagher performance on Showtime or replace a Saturday night Home Box Office movie with one from the local video store.

While the cable industry once shuddered at such numbers and thoughts, they now embrace the rival medium for its ability to maintain subscribers.

Studies from Showtime/The Movie Channel and major multiple system operators have shown a strong supportive relationship between cable and vcr use.

The surveys suggest vcr owners are less prone to cable tv disconnection and more interested in multipay subscribership than non-vcr owners.

The Showtime/TMC survey revealed that 35% of all vcr owners subscribe to pay compared with 21% of nonowners. Among those who receive pay tv, vcr owners averaged 1.7 pay services compared with 1.4 services for nonowners.

Of vcr owners who did not subscribe to pay tv, 28% considered themselves likely to subscribe in the future compared with 16% of nonowners.

Pay tv subscribers with vcrs recorded an average of 1.5 movies a week compared with 1.1 for nonsubscribers. Two-thirds of the movies taped by pay subscribers come from pay channels.

Even the availability of prerecorded cassettes doesn't dim vcr owners' desire to maintain a cable connection. More than half the sample in the study planned to subscribe to pay tv services or rent prerecorded tapes. Of those, 20% leaned toward just subscribing to pay tv,

Home movie theaters receive bigger billing

By Michael J. Kaplan

Saturday night always has been a weak night for tv viewing. It's a date night, a party night, a night to go out on the town.

But that's changing. With the arrival of cable tv and premium movie channels and the explosion of videocassette recorder sales and tape rentals, Saturday night at the movies is taking on a new importance.

The living room is once again a Saturday night entertainment option.

Even as broadcast executives fret about declining audience ratings, cable networks are jumping at the chance to win these new viewers. Although original programing has taken on greater importance at most cable channels, conventional feature films are still the cornerstone of the peak weekend viewing hours.

At least 10 national cable channels program movies on Saturday nights, including giant Home Box Office with 14.5 million subscribers, the Christian Broadcasting Network, the Disney Channel and American Movie Classics, a new premium channel with just 230,000 subscribers.

To make their films stand out amid the cable clutter and home video options, these networks have evolved a variety of programing and marketing tactics that owe as much to the techniques of local radio and tv outlets as to the formulas of the Big Three commercial networks.

The youngest and smallest of the cable competitors is American Movie Classics, launched in November, 1984, and running on 88 cable systems.

The service is one that concentrates on programing artistically significant films released at least 15 years ago. This programing includes an exclusive arrangement for several hundred RKO films.

During the week, AMC programs its film library by themes. Monday is mystery night, comedy on Tuesday, musicals on Wednesday, and so on. On the weekends, the channel presents the "Hollywood Gold" package, the 10 best films from the preceding week.

"A lot of people miss the old values. They miss films made the old way," says Richard Ballenger, vp-programing for Rainbow Services, operator of both American Movie Classics and Bravo, a premium channel of foreign films with 300,000 subscribers. Both services are based in Woodbury, N.Y. "We try to educate people to appreciate films. That's a part of our appeal."

Mr. Ballenger takes his programing responsibilities seriously.

A five-member screening committee selects the titles and writes brief, historical introductions delivered by an on-camera host.

only 12% expected to just rent cassettes, and 21% planned to do both.

Vcr marketers knew of cable's appeal to their customers long before the Showtime study was released in March. When vcrs began hitting their sales stride in 1980 and 1981, marketers began producing cable-ready models, which could attach directly to the cable wire and receive unscrambled transmissions without a special converter.

This feature made it possible to time-shift among multiple cable channels. Prices for units carrying the feature once topped $800, but the cost for cable compatibility has dropped and capability now is considered almost standard. Cable-ready recorders from Panasonic, Quasar, Sharp, Mitsubishi and others retail for as little as $400. While all do not work with every cable system, standards committees on both video manufacturer and cable industry levels continue to work out specifications so the cable-ready vcr can live up to its billing.

For the true upscale cable consumer, recorders outfitted with high-fidelity playback and recording capacities also are increasing in popularity and dropping in price. Sanyo offers a high-fidelity vcr for about $500, and most suppliers are expected to follow in the marketer's footsteps.

The move is sure to cement the vcr-cable relationship because most recorders have yet to be equipped with additional stereo circuitry allowing them to tape over-the-air transmissions.

Once the vcr is in place, consumers often find it necessary to replace their old tv set with a state-of-the-art receiver.

Most of the high price models being pitched to cable subscribers are high-tech monitor-receivers. These 19-in. and 25-in. glass-fronted monoliths feature over-the-air broadcast stereo reception, an internal stereo system with two side-mounted speakers to allow for direct reception of dual-channel stereo broadcasts and, of course, cable-ready tuning that allows direct access to nonscrambled broadcasts.

Some units also feature a built-in switch that can accommodate both direct cable and cable converter inputs so nonscrambled basic and scrambled pay channels can be selected via the wireless remote control. Most of the sets priced between $800 and $1,200 also include a full range of direct audio-video inputs allowing for connection of a vcr, videodisc player, stereo system, computer and whatever else the engineers can dream up.

Tv sets, vcrs and cable aren't alone on the home entertainment menu. The other selections are each capable of supporting rather than detracting from the interest in cable.

Among the add-ons, stereo systems are one of the first supplementary components the cable subscriber-vcr owner usually places beside his stereo tv. Although his gleaming new set and recorder might have all the internal circuitry needed to render a stereo signal, cable only delivers dual-channel audio for the Nashville Network and Superstation WTBS via fm adapters.

Unlike stereo tv broadcasts, cable stereo broadcasts are not offered over the same wire that attaches to the tv. Thus, the need for a stereo system is inescapable, a fact cable operators are viewing as a means to increase revenues by selling and renting fm adapters.

Slowly rising in acceptance, but far from the critical mass of the vcr, is the videodisc player.

Microwave offers alternative

The next development for cable tv could be no cable.

That's right. The latest home entertainment add-on is wireless cable, a concept some veteran cable tv executives may find a bit upsetting.

Unlike other consumer electronics rivals-turned-friends of the cable industry, wireless cable—multichannel multipoint distribution service, as promoted by New York-based mds supplier Microband—is positioned as a cable alternative.

Currently rolling out in abbreviated form throughout the uncabled areas of New York and its surrounding environs, with Milwaukee, Washington and the lower San Francisco bay area to follow, Microband's "Urbanet" is designed to be everything a cable system is and more.

The technology combines over-the-air broadcast signals with a slate of microwave delivered pay and basic satellite networks to form an ad hoc 33-channel service.

Microband chairman Mark Foster says the system also can deliver many features missing from most of the nation's cable systems, including remote control of impulse pay-per-view, digital stereo, audio, data and two-way communications.

Urbanet, he says, eventually will be offered in the top 30 unwired urban regions where 30 million or so tv viewers least likely to obtain cable tv reside.

Through a variety of joint ventures, Microband has acquired the rights to multiple microwave channels throughout the country, Mr. Foster says, and also holds title to 33 microwave frequencies in the top uncabled markets.

"It's a fact that most of the nation's rural areas and densely populated urban centers will not see traditional cable service due to high construction costs," Mr. Foster says. "Our system meets the needs of many unwired consumers by providing the most popular channels via microwave at a fraction of cable's per-subscriber cost."

Microband has contracted with M/A-COM, broadcast engineers, to design an addressable wireless cable box. The set-top receiver, now being field tested, uses M/A-COM's VideoCipher scrambling technology currently being used by Home Box Office and Showtime. Like these pay giants, Microband wants to make certain only those paying Urbanet its $20 to $30 monthly programing fee plus initial installation charge of $40 to $50 see and hear the programs.

Programing plans for Urbanet are still vague. About the only network expected to be carried on the wireless system is HBO, which Microband has been distributing to uncabled homes for 15 years. In addition to that service, Mr. Foster says the average Urbanet system will carry whatever over-the-air channels are available via standard aerials and a mix of the most popular cable channels.

Despite Urbanet's high flying promises, multiple system operators may want to think twice before selling their systems or halting construction plans for New York's boroughs or Chicago's neighborhoods. Urbanet still has some technological obstacles to overcome.

Multiple mds users with videocassette recorders wishing to tape one mds channel while watching another will not be able to do so. But viewers can tune in a regular over-the-air channel via the vcr while watching an mds network.

Many of the system's advanced features are still to be perfected by M/A-COM engineers. The system currently offered in New York is unscrambled and has no stereo, pay-per-view or data downloading capability. "Late summer or early fall is a more likely target date for these features," Mr. Foster says. And it will be 1986 before Urbanet begins pitching subscribers in most of its markets.

—M.T.

considered, hold relatively little weight.

"People ask for films they've seen and enjoyed as children," Mr. Ballenger says. "Quite frankly, a lot of these films just don't hold up. They're very arcane."

"I'm a movie buff, and I was trying to re-create the feeling of one of those revival movie theaters."

—Betty Cornfeld
Arts & Entertainment Network

The ad-supported Arts & Entertainment Network, New York, owned jointly by Hearst Corp. and ABC/RCTV, also programs for the discerning movie buffs among its 12.5 million viewers.

The Saturday night "Double Feature," the network's only weekly prime-time movie feature, packages a pair of compatible films with cartoons, travelogs and other short subjects.

"I'm a movie buff, and I was trying to re-create the feeling of one of those revival movie theaters," says Betty Cornfeld, programing manager for the "Double Feature" series.

"We put two really good films together, and try to fill it out like the old double bills you would have seen," Ms. Cornfeld says.

The films are picked not only on their individual merits, but also on how well they combine. "We try to put things together in interesting ways," Ms. Cornfeld says. "The films have to play off each other in some interesting way, either thematically or because of the stars."

The four-hour "Double Feature" block, repeated early Sunday morning, is among A&E's highest-rated shows, Ms. Cornfeld says, though she would not disclose the block's ratings. A second four-hour movie block runs Thursday afternoon and is repeated on Friday.

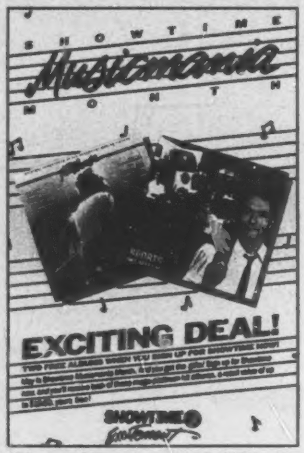
"We're trying to capitalize on Saturday night being a good movie night," she says. "Having a movie on Saturday night is perfect. Most people don't have the time, patience or endurance to sit through two films during the week."

The program is supported by advertising in *TV Guide*, cable guides, newspaper tv listings and Sunday supplements, as well as heavy on-air promotion during A&E's usual fare of series, specials and arts programing.

The advertising generally is keyed to the particular film, rather than the "Double Feature" concept.

"We look for films with star value," Ms. Cornfeld says. "People will watch a movie they don't know if they like the stars."

But what if the film has no stars worth mentioning? That's the problem frequently faced at USA Cable Network, New York, a broad-based ad-supported network with 29.7 million subscribers whose highest ratings come from cartoons and professional wrestling.



Showtime created "Music Mania" package for the premiere of "Footloose."

THE NEW RAINBOW SERVICE!

Rainbow Service offers viewers American Movie Classics and Bravo, featuring foreign films.

With severely limited resources to acquire a film library, Monia Joblin, USA Cable's director of programing, has created several umbrellas featuring films for the not-so-discriminating film fan.

"The more popular film packages just aren't available to us for one reason or another," Ms. Joblin says.

Instead, lesser films are packaged as "Kung Fu Theatre" (martial arts movies on Sunday afternoon), "Saturday Nightmares" (Saturday night horror and suspense), and a new addition, "Commander USA's Groovy Movies" (Saturday afternoon monster movies).

"It's just dressing up block programing, which every programer does," Ms. Joblin says. "But it aggressively packages it as part of the USA network."

The packages also help viewers get accustomed to seeing certain programing at certain times.

"In our advertising, we try to promote the whole block," says Andy Besch, a USA Cable marketing executive. "The movies are a secondary part of the ads. The concept is what we're trying to sell."

The approach works. Since

The way to a subscriber's heart is through this offer
The Academy Awards
THE MOVIE CHANNEL

The Movie Channel uses contests and promotions to attract viewers.

With RCA and its defunct CED player all but out of the running, only Pioneer's laser-based unit remains a viable consumer choice for those who like to collect movies and specials.

Industry estimates place 1985 disc player sales at 130,000 units, creating a total disc player population of about 1 million.

The consumer who doesn't want to buy these cable aids separately has his choice of complete audio-video packages. Sony, Sanyo, Panasonic, JVC and others offer soup-to-nuts home entertainment systems featuring stereo-ready monitors/receivers, high-fidelity vcrs and stereo systems complete with state-of-the-art compact disc players all packed in a high-tech rack and ready for action via a single remote control keypad. Prices on such systems begin about $2,000 and escalate to more than $5,000.

Another addition to the media mix not seen in prepackaged systems is the home computer. Despite decreasing interest on the part of cable systems to supply software, the home computer is still thought to have a future as a supporting cable player. According to the EIA, home computer sales (generally those retailing for less than $1,000) will exceed 6 million in 1985, adding to the 11 million already in consumer's hands.

Many electronics industry experts say home computers often wind up as a closet fixture soon after the children tire of Pac-Man. Still, some cable entrepreneurs continue to believe that just as cable can feed the vcr, it also can feed the home computer—someday.

While not true components, video accessories known as "black boxes" also are assisting the cable cause.

Some models can turn a standard tv into a stereo-ready model, improve the picture and sound quality on an incoming signal and even turn a noncable-ready vcr into one that will change channels for unattended recording.

Among the most talked about black boxes of late is the Vidicraft Zapper. The unit, which the company claims to have spent $200,000 developing, is said to be 95% effective in detecting the beginning and end of a commercial. It's currently priced at $400 (a tag that may leave most consumers more than willing to speed through the commercials manually), Vidicraft chief executive officer Alan Guggenheim says an expected price decrease to about $200 will mean a $1 million market for the Portland, Ore.-based company.

This device and others that simplify off-air and cable taping might be blessings in disguise. Although they might not sit well with an advertiser-hungry cable executive looking to assure sponsors that the cable-vcr connection is good for them, they do give more reasons for vcr buyers to remain cable consumers.

Yet another tv add-on rankling cable executives, but one that also may have hidden advantages, is the home satellite antenna.

With more than 1 million backyard earth station receivers in place, mostly in rural areas where cable is unavailable, the $2,000 to $3,000 systems capable of receiving any unscrambled feed from an orbiting domestic satellite, are beginning to invade wired suburban and even urban cable markets.

Cable operators are attempting to get a piece of the action by selling and renting private dishes to customers who would rather get cable programing without the middleman. However, a study by Channel Master, one of the leading suppliers of such equipment, suggests there isn't much to worry about.

Like the vcr, the black box, the cable-ready vcr and home computer, the satellite dish might be more friend than foe.

"Last year, only 11% of our buyers had access to cable," says Channel Master sales and marketing vp Don Berg. "Today it's 21%. Surprisingly, we've found only a handful of cable buyers said they discontinued service after getting the dish."

Mr. Berg presumes cable retention is because of the superior reception cable gives to over-the-air stations. If that's so, it's a serendipitous twist to the mix because improved reception of local outlets was the original intention of the medium.

Despite the growth of additions to the home entertainment menu, no one believes cable will slip from its position as the main course. After all, the entire notion of an audio-video system, like the idea of a good meal, is compatibility, not competition.

Number of U.S. cable subscribers among owners of various electronics equipment (numbers in millions)

Videocassette recorders in operators' arsenals

By Sharon Donovan

Compatiblity—it's a new marketing tactic.

To remain competitive with the growing array of home electronic equipment, cable tv operators are developing technical strategies designed to strengthen the compatibility between their product and home entertainment centers, especially videocassette recorders.

A number of cable operators also are finding that marketing compatibility is increasing their sales.

According to Catherine Rutkowski, director-technical services for the Washington-based National Cable Television Assn., cable operators always have recognized that cable service must be compatible with whatever other electronic equipment subscribers have in their homes. But as new, more affordable generations of vcrs have been marketed, the need for clear-cut compatibility has become essential.

According to research compiled by the Cabletelevision Advertising Bureau, New York, cable subscribers are generally more affluent than nonsubscribers; they are much more likely to purchase electronic equipment for the home than nonsubscribers, and they expect the equipment to be compatible with their cable service.

Studies project that this year, consumers will spend $900 million to rent videocassettes for home viewing, according to Bradley Johnston, vp-engineering, Group W Cable, a division of Westinghouse Broadcasting & Cable, New York. Group W Cable is the third largest multiple system operator in the country with about 2 million subscribers.
